Ion Beam Surface Layer Analysis

Volume 1

Springer Science & Business Media **The II. International Conference on Ion Beam Surface Layer Analysis was held on September 15-19, 1975 at the Nuclear Research Center, Karlsruhe, Germany. The date fell between two related conferences: "Application of Ion-Beams to Materials" at Warwick, England and "Atomic Collisions in Solids" at Amsterdam, the Netherlands. The first conference on Ion Beam Surface Layer Analysis was held at Yorktown Heights, New York, 1973. The major topic of that and the present conference was the material analysis with ion beams including backscattering and channeling, nuclear reactions and ion induced X-rays with emphasis on technical problems and novel applications. The increasing interest in this field was documented by 7 invited papers and 85 contributions which were presented at the meeting in Karlsruhe to about 150 participants from 21 countries. The oral presentations were followed by parallel sessions on "Fundamental Aspects", "Analytical Problems" and "Applications" encouraging detailed discussions on the topics of most current interest. Summaries of these sessions were presented by the discussion leaders to the whole conference. All invited and contributed papers are included in these proceedings; summaries of the discussion sessions will appear in a separate booklet and are available from the editors. The application of ion beams to material analysis is now well established.**

The Folk Music Sourcebook

Da Capo Press, Incorporated **This revised and updated book is a guide for the listener, collector, singer, player and devotee of folk music. It covers music from string band to bluegrass, Canadian, Creole, Zydeco, jug bands, ragtime and the many kinds of blues. The book evaluates, reviews and recommends on such subjects as where to buy records and instruments and places where folk music flourishes.**

Marvel Graphic Novels and Related Publications

An Annotated Guide to Comics, Prose Novels, Children's Books, Articles, Criticism and Reference Works,

1965–2005

McFarland This work provides an extensive guide for students, fans, and collectors of Marvel Comics. Focusing on Marvel's mainstream comics, the author provides a detailed description of each comic along with a bibliographic citation listing the publication's title, writers/artists, publisher, ISBN (if available), and a plot synopsis. One appendix provides a comprehensive alphabetical index of Marvel and Marvel-related publications to 2005, while two other appendices provide selected lists of Marvel-related game books and unpublished Marvel titles.

Building Technology Publications, 1976

Supplement 1 (Classic Reprint)

Forgotten Books Excerpt from Building Technology Publications, 1976: Supplement 1 This document is divided into three main sections. The first Titles and Abstracts, provides report titles, author(s), date of publication, selected key words, and abstracts of nbs tech nical reports and papers published in outside sources. The Author Index cites each cbt author and gives the publication title and! Or number of those documents listed in this supple ment. The Key Word Index is a subject index, listing one-word summaries of the building research topics for each publica tion and paper. By selecting a main word or subject, which is listed alphabetically, the user is able to locate reports of interest through the subject - related words found in the key word index. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

Hereafter Knowing in Sonnets and Their Similar

Rowman & Littlefield Hereafter Knowing in Sonnets and Their Similar explores the work of prominent poets including Aristotle's epistemology enabling a depiction of sonnets and their similar and how temporality is key, by way of Augustine, to a comparative procedure that explores the closing features in sonnet-writing and in poems by American poets.

The Comic Art Collection Catalog

An Author, Artist, Title, and Subject Catalog of the Comic Art Collection, Special Collections Division, Michigan State University Libraries

Greenwood This is the most comprehensive dictionary available on comic art. The catalog provides detailed information about more than 60,000 cataloged books, magazines, scrapbooks, fanzines, comic books, and other materials in the Michigan State University Libraries, America's premiere library comics collection. Each book or serial is listed by title, with entries as appropriate under author, subject, and series. Besides the traditional books and magazines, significant collections of microfilm, sound recordings, vertical files, and realia (mainly T-shirts) are included. Comics and related materials are grouped by nationality and by genre.

Bibliography of Art and Architecture in the Islamic World (2 Vol. Set)

BRILL Following the tradition and style of the acclaimed "Index Islamicus," the editors have created this new Bibliography of Art and Architecture in the Islamic World. The editors have surveyed and, in many cases, annotated a wide range of books and articles from collected volumes and journals published in all European languages (except Turkish) between 1906 and 2011. The editors have ensured that material from a wide range of scholarly traditions and approaches has been consulted in order to make this comprehensive bibliography an indispensable tool for everyone involved in the study of material culture in Muslim societies.

From Political Economy to Economics

Method, the social and the historical in the evolution of economic theory

Routledge Economics has become a monolithic science, variously described as formalistic and autistic with neoclassical orthodoxy reigning supreme. So argue Dimitris Milonakis and Ben Fine in this new major work of critical recollection. The authors show how economics was once rich, diverse, multidimensional and pluralistic, and unravel the processes that lead to orthodoxy's current predicament. The book details how political economy became economics through the desocialisation and the dehistoricisation of the dismal science, accompanied by the separation of economics from the other social sciences, especially economic history and sociology. It is argued that recent attempts from within economics to address the social and the historical have failed to acknowledge long standing debates amongst economists, historians and other social scientists. This has resulted in an impoverished historical and social content within mainstream economics. The book ranges over the shifting role of the historical and the social in economic theory, the shifting boundaries between the economic and the non-economic, all within a methodological context. Schools of thought and individuals, that have been neglected or marginalised, are treated in full, including classical political economy and Marx, the German and British historical schools, American institutionalism, Weber and Schumpeter and their programme of Socialökonomik, and the Austrian school. At the same time, developments within the mainstream tradition from marginalism through Marshall and Keynes to general equilibrium theory are also scrutinised, and the clashes between the various camps from the famous Methodenstreit to the fierce debates of the 1930s and beyond brought to the fore. The prime rationale underpinning this account drawn from the past is to put the case for political economy back on the agenda. This is done by treating economics as a social science once again, rather than as a positive science, as has been the inclination since the time of Jevons and Walras. It involves transcending the boundaries of the social sciences, but in a particular way that is in exactly the opposite direction now being taken by "economics imperialism". Drawing on the rich traditions of the past, the reintroduction and full incorporation of the social and the historical into the main corpus of political economy will be possible in the future.

Pulpwood, 1976 (Classic Reprint)

Forgotten Books Excerpt from **Pulpwood, 1976** Woodyard inventories continued to drop during the first half of 1976 as northeastern pulp mills operated at near-capacity rates. By June woodyards were at their lowest levels in 2 years and demand for replacement wood picked up. Although high pulpwood consumption in August almost offset receipts, inventories began to rise during the remainder of the year as consumption decreased. Roundwood pulpwood production from hardwoods was almost equal to that from softwoods, exceeding it by only cords. Although roundwood production increased 12 percent from 1975, chipped residue production increased 21 percent. Hardwoods accounted for 53 percent of all pulpwood produced in 1976, about the same percentage as in 1975. Encyclopedia of Great Popular Song Recordings

[Scarecrow Press](#) **The Encyclopedia of Great Popular Song Recordings, Volumes 1 and 2 covers the full range of popular music recordings with virtually unprecedented breadth and depth. In this 2-volume encyclopedia, Sullivan explores approximately 1,000 song recordings from 1889 to the present, telling the stories behind the songs, recordings, performers, and songwriters. From the Victorian parlor ballad and ragtime hit at the end of the 19th century to today's rock classics, the Encyclopedia progresses through a parade popular music styles, from jazz to blues to country Western, as well as the important but too often neglected genres of ethnic and world music, gospel, and traditional folk. This book is the ideal research tool for lovers of popular music in all its glorious variety.**

The Mathematical Writings of Évariste Galois

[European Mathematical Society](#) **Before he died at the age of twenty, shot in a mysterious early-morning duel at the end of May 1832, Evariste Galois created mathematics that changed the direction of algebra. This book contains English translations of almost all the Galois material. The translations are presented alongside a new transcription of the original French and are enhanced by three levels of commentary. An introduction explains the context of Galois' work, the various publications in which it appears, and the vagaries of his manuscripts. Then there is a chapter in which the five mathematical articles published in his lifetime are reprinted. After that come the testamentary letter and the first memoir (in which Galois expounded on the ideas that led to Galois Theory), which are the most famous of the manuscripts. These are followed by the second memoir and other lesser known manuscripts. This book makes available to a wide mathematical and historical readership some of the most exciting mathematics of the first half of the nineteenth century, presented in its original form. The primary aim is to establish a text of what Galois wrote. The details of what he did, the proper evidence of his genius, deserve to be well understood and appreciated by mathematicians as well as historians of mathematics.**

Geometric Aspects of General Topology

[Springer Science & Business Media](#) **This book is designed for graduate students to acquire knowledge of dimension theory, ANR theory (theory of retracts), and related topics. These two theories are connected with various fields in geometric topology and in general topology as well. Hence, for students who wish to research subjects in general and geometric topology, understanding these theories will be valuable. Many proofs are illustrated by figures or diagrams, making it easier to understand the ideas of those proofs. Although exercises as such are not included, some results are given with only a sketch of their proofs. Completing the proofs in detail provides good exercise and training for graduate students and will be useful in graduate classes or seminars. Researchers should also find this book very helpful, because it contains many subjects that are not presented in usual textbooks, e.g., $\dim X \times I = \dim X + 1$ for a metrizable space X ; the difference between the small and large inductive dimensions; a hereditarily infinite-dimensional space; the ANR-ness of locally contractible countable-dimensional metrizable spaces; an infinite-dimensional space with finite cohomological dimension; a dimension raising cell-like map; and a non-AR metric linear space. The final chapter enables students to understand how deeply related the two theories are. Simplicial complexes are very useful in topology and are indispensable for studying the theories of both dimension and ANRs. There are many textbooks from which some knowledge of these subjects can be obtained, but no textbook discusses non-locally finite simplicial complexes in detail. So, when we encounter them, we have to refer to the original papers. For instance, J.H.C. Whitehead's theorem on small subdivisions is very important, but its proof cannot be found in any textbook. The homotopy type of simplicial complexes is discussed in textbooks on algebraic topology using CW complexes, but geometrical arguments using simplicial complexes are rather easy.**

Mathematical Reviews

Canadiana

The Rhododendron, 1976 (Classic Reprint)

Forgotten Books Excerpt from The Rhododendron, 1976 This book was not my idea. The administration made me do it. They held my paycheck over my head and threatened to send it to Billy Graham if I didn't produce this yearbook. Personally, I think it's dirty, done in bad taste, has vulgar words in it, and obscene pictures. It should be a great yearbook, but remember, I didn't want to do it. Every dirty thing in this book is the imagination of our administration. God will not like them anymore. But being a humble person by Nature, I will take all the credit for this book. I would really hate to see our administrators lose their jobs simply because they have bad taste. Me, I'm out of a job anyway, so what does it matter? My future isn't as important as theirs is. Broughton always did look like a nice place to live. About the Publisher **Forgotten Books** publishes hundreds of thousands of rare and classic books.
