The Poison Tree A True Story of Family Terror [Open Road Media](#) **Edgar Award Finalist:** The shocking account of a Wyoming father who terrorized his family for years—until his children plotted a deadly solution. One cold November night, in Cheyenne, Wyoming, fifteen-year-old Richard Jahnke Jr., ROTC leader and former Boy Scout, waited for his parents to return from celebrating the twentieth anniversary of the night they met. When his father got out of the car, the boy blasted him through the heart with a twelve-gauge pump-action shotgun. Richard's seventeen-year-old sister, Deborah, was sitting on the living room couch with a high-powered rifle—just in case her brother missed. Hours later the Jahnke kids were behind bars. Days later they made headlines. So did the truth about the house of horrors on Cowpoke Road. Was it cold-blooded murder? Or self-defense? Richard Jahnke Sr., special agent for the IRS, gun collector, and avid reader of *Soldier of Fortune*, had been subjecting his wife, Maria, and both children to harrowing abuse—physical, psychological, and sexual—for years. Deborah and her brother conspired to finally put a stop to it themselves. But their fate was in the hands of a prejudiced and inept judicial system, and only public outcry could save them. Written with the full and revealing cooperation of the Jahnkes, this finalist for the Edgar Award for Best Fact Crime is “the ultimate family nightmare, played out in the heartland of America. . . . From the night of the murder through both trials, convictions and both youngsters' eventual release . . . it's gripping reading” (*Chicago Tribune*).

New York and Los Angeles The Uncertain Future [Oxford University Press](#) This book provides in-depth comparative studies of the two largest cities and metropolitan areas in the United States: New York City and Los Angeles. The chapters, written by leading experts and based upon the most current information available from the Census and other sources, discuss and explicitly compare politics, economic prospects and the financial crisis, and a host of social issues. Reform movements in education, ethnic politics, budget stringency, strategies to deal with crime, the development and political context of infrastructure, rising inequality, immigration and immigrant communities, the segregation of the poor and minorities and the new segregation of the economic elite, environmental impacts and attempts to deal with them, the image of both cities and regions in the movies, architectural trends, and the differential impact and response to the financial crisis, including foreclosure patterns, are all examined in this volume. This comparative framework reveals that old paradigms such as urban “decline” or “resurgence” are inadequate for grasping the new challenges and complexities facing America's two major global cities. Each is responding in sometimes similar and different ways to the challenges brought on by two events that defined the last decade: the attack of 9/11 and its aftermath, and the continuing effects of the financial crisis. How all of these events, institutions, and trends play out in the New York and Los Angeles regions is important not only for the two cities, but also as a harbinger for other U.S. cities, the entire nation, and cities worldwide. *New York and Los Angeles* provides an essential guide for understanding the many forces that determine the future of our cities. The State and Security in Mexico Transformation and Crisis in Regional Perspective [Routledge](#) At the turn of the millennium, Mexico seemed to have finally found its path to political and economic modernization; a state which had been deeply embedded in society was being pulled out, with new political leaders allowing market forces to play a greater role in guiding the nation's economic development, and allowing old patron-client networks to crumble. At the same time, many hoped that political and legal reforms would increase the state's capacity to provide prosperity, security, and equity for its citizens. In the midst of this historic transformation, however, Mexico was confronted with an urgent new policy challenge. Internationally recognized experts from the academic and think-tank communities in the United States, Mexico, and Canada consider the origins of the current crisis in Mexico, and the nature and effectiveness of the Calderón government's response. Simply not another book on North American regional security, this volume uses Joel Migdal's concept of "the state in society" to provide a refreshingly clear and accessible exploration of political change in the developing world. The engagement with the US and Canada gives the reader a chance to observe the dynamics of persuasion across the developmental divide. Four key questions structure the study: What does the ongoing security crisis in Mexico tell us about the changing role of the state in society there? What does the changing role of the state tell us about the nature (and intractability) of the crisis? How has the transition to democracy affected the links between the state and organized crime in Mexico, and the state's capacity to contain non-state challengers? What kinds of political and legal reforms are called for, and what effects can we expect them to have on the extent and intensity of violence in Mexico? No other study comprehensively uncovers new conceptual and theoretical insights in each of these areas whilst offering some practical guidance for policy-makers and publics seeking to understand these urgent and complex challenges.

World Drug Report 2010 [United Nations](#) In order to prepare the World Drug Report, UNODC relies on Member States to provide data, primarily through the Annual Reports Questionnaire (ARQ). The ARQ was distributed to 192 Member States, and UNODC received 110 replies to the drug abuse section and 114 replies to the illicit supply of drugs section from Member States (and territories). In general, most countries' ability to provide information on illicit drug supply is significantly better than their ability to provide demand-related data. Despite commendable progress, for example in the area of prevalence estimates, far more remains to be done to provide a solid, reliable basis for trend and policy analysis. The report includes in-depth and cross-sectoral analyses of transnational drug markets (chapter 1) as well as the latest statistical data and trends regarding the world drug situation (chapter 2). This year, the report also discusses the impact of transnational drug trafficking on transit countries (chapter 3).

Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early 2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has access to broadband capability. This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem networks, devices, content and applications is healthy. Illus.
