VIRAL IMMUNITY

A 10-STEP PLAN TO ENHANCE YOUR IMMUNITY AGAINST VIRAL DISEASE USING NATURAL MEDICINES

Hampton Roads Publishing HIV, hepatitis, influenza, the common cold, herpes, Ebola, Hantavirus, West Nile fever, dengue, TT virus--the viral world keeps posing new major challenges to human health each year. At the same time as this onslaught of emerging powerful viral infections, our antibiotic arsenals are losing ground and our immune systems are compromised. Can we handle the next viral epidemic? Yes, says James Williams, an experienced, credentialed naturopath, acupuncturist, and expert in traditional Chinese medicine. We can shore up our immune system to handle current and any future viral infections and not be dependent on conventional vaccinations or antibiotics to insure our health. In 10 practical steps, Dr. Williams shows how to develop unassailable viral immunity using natural approaches. If you already have a viral infection, these steps will help you reverse its effects; if you're concerned about exposure to one in the future, these steps will give you the keys to prevention. Included in these steps are the best that natural medicine offers: stress management, enzymes, nutrients, detoxification, oxygen therapy, immune modulators, hormones, natural antiviral medicines and anti-inflammatory medicines, Chinese and Western herbs, and more. "Viral immunity is without question one of the most important health issues of this century," says Dr. Williams. "The message of this book is clear. You can improve your system in general with diet, lifestyle, and natural medicines. Here you will find natural ways of improving immune function, remedies to treat viral infections, and suggestions on how to reframe outdated concepts that could otherwise prevent you from obtaining effective treatment."

ARTIFICIAL INTELLIGENCE IN MEDICINE: KNOWLEDGE REPRESENTATION AND TRANSPARENT AND EXPLAINABLE SYSTEMS

AIME 2019 INTERNATIONAL WORKSHOPS, KR4HC/PROHEALTH AND TEAM, POZNAN, POLAND, JUNE 26-29, 2019, REVISED SELECTED PAPERS

Springer Nature This book constitutes revised selected papers from the AIME 2019 workshops KR4HC/ProHealth 2019, the Workshop on Knowledge Representation for Health Care and Process-Oriented Information Systems in Health Care, and TEAM 2019, the Workshop on Transparent, Explainable and Affective AI in Medical Systems. The volume contains 5 full papers from KR4HC/ProHealth, which were selected out of 13 submissions. For TEAM 8 papers out of 10 submissions were accepted for publication.

HUMAN RESPIRATORY VIRAL INFECTIONS

CRC Press Using a multidisciplinary approach, Human Respiratory Viral Infections is set at the level between the definitive reference work and an essential clinical manual. Exploring recent advances in human respiratory viral research, the text builds on the basic sciences of epidemiology, virology, molecular biology, and immunology to cover clinical diagnosis

YOUTH IN THE CONTEMPORARY WORLD

Mittal Publications

ALL ABOUT THE GIRL

CULTURE, POWER, AND IDENTITY

Routledge This groundbreaking collection offers a complicated portrait of girls in the 21st Century. These are the riot grrls and the Spice Girls, the good girls and the bad girls who are creating their own "girl" culture and giving a whole new meaning to "grrl" power. Featuring provocative essays from leaders in the field like Michelle Fine, Angela McRobbie, Valerie Walkerdine, Nancy Lesko, Niobe Way and Deborah Tolman, this work brings to life the ever-changing identities of today's young women. The contributors cover all aspects of girlhood from around the world and strike upon such key areas as schooling, sexuality, popular culture and identity. This is new scholarship at its best.

MANAGEMENT OF CHRONIC VIRAL HEPATITIS

CRC Press Hepatitis, the leading indication for liver transplantation, is a straight-forward disease when it comes to diagnosis: it is a disease of pathology and is diagnosed by liver biopsy, with the result being either positive or negative. There is only one effective treatment: interferons. Nonetheless, new interferons are appearing on the market and Drs Foster and Goldin examine the use of each of these in the management of chronically infected patients. The authors have written a succinct, highly illustrated text for all those interested in the management of viral hepatitis.

CHILD DEVELOPMENT: AN ACTIVE LEARNING APPROACH

AN ACTIVE LEARNING APPROACH

SAGE Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students, few textbooks currently exist that actually do this. Child Development: An Active Learning Approach includes the following key features: - Challenging Misconceptions: true/false or multiple choice tests are incorporated at the beginning of each chapter to specifically address topics that are sources of misunderstanding amongst students. - Activities with children and adolescents: 'hands-on' activities that complement the ideas of the text, as an integral part of the text, rather than as "add-ons" at the end of each chapter. - 'The journey of research' will introduce students to the process of research that leads from early findings to more refined outcomes through real-life examples - 'Test Yourself' sections include activities that cause students to reflect on an issue through their own experiences to bring about increased motivation and understanding of a specific topic. - The Instructor's Resource CD-ROM includes a computerized test bank, PowerPoint Slides, sample syllabi, suggested in-class learning activities, and homework assignments. - The Student Study Site includes interactive videos, self-quizzes, key term flashcards, SAGE journal articles with accompanying exercises, and web links with accompanying exercises.

PARENTING MATTERS

SUPPORTING PARENTS OF CHILDREN AGES 0-8

National Academies Press Decades of research have demonstrated that the parent-child dyad and the environment of the family--which includes all primary caregivers--are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents

themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

CRIMINAL PROCEDURE AND PRACTICE IN NEW SOUTH WALES

THE GIRL IN HER TEENS

YOU ARE THE SOCIETY

□□□ THE TEEN PERIOD She was a beautiful, well-developed girl of thirteen. Her bright, eager face, with its changing expression, was a fascination at all times. It seemed unusually earnest and serious that particular morning as she stood waiting the opportunity to speak to me. She had asked to wait until the others had gone, and her manner as she hesitated even then to speak made me ask, "Are you in trouble, Edith?" "No, not exactly trouble,—I don't know whether we ought to ask you, but all of us girls think,—well, we wish we could have a mirror in the locker-room. Couldn't we? It's dreadful to go into school without knowing how your hair looks or anything!" I couldn't help laughing. Her manner was so tragic that the mirror seemed the most important thing in the educational system just then. I said I would see what could be done about it, and felt sure that what "all the girls" wanted could be supplied. She thanked me heartily, and when she entered her own room nodded her head in answer to inquiring glances from the other girls. As I made a note of the request, I remembered the Edith of a year or more ago. Edith, whose mother found her a great trial; she didn't "care how she looked." It was true. She wore her hat hanging down over her black braids, held on by the elastic band around her neck; she lost hair ribbons continually, and never seemed to miss them. She was a good scholar, wide-awake, alert, always ready for the next thing. She loved to recite, and volunteered information generously. In games she was the leader, and on the playground always the unanimous choice for the coveted "it" of the game. She was never in the least self-conscious, and, as her mother had said, how she looked never seemed to occur to her.

PAPERS RELATING TO INFANT MARRIAGE AND ENFORCED WIDOWHOOD IN INDIA

FEDERAL PROBATION

CASES AND MATERIALS ON CRIMINAL LAW AND PROCEDURE

PRINCIPLES, METHODS & TECHNIQUES OF TEAC

Vikas Publishing House This Book attempts to make a comprehensive and critical exposition of all the facets of teaching. It evaluates the comparative soundness of the Principles, Methods, Techniques and Devices of Teaching. The chief accent of the book is on helping teachers to teach better. The objective is strictly utilitarian and is designed to serve as a reliable guide to the work in the classroom. The book also offers practical suggestions for making the teaching-learning process effective, inspirational & interesting. It incorporates the approaches recommended by eminent educational philosophers and practitioners. A detailed survey of the valuable teaching practices followed in India and abroad also find an important place in the book.

VICTORIA MAGAZINE

OXFORD HANDBOOK OF METHODS IN POSITIVE PSYCHOLOGY

Positive Psychology Publisher description

DEVELOPMENT THROUGH LIFE: A PSYCHOSOCIAL APPROACH

Cengage Learning This book uses a chronological approach to present development across the life span, drawing on the psychosocial theory of Erik Erikson to provide a conceptual framework. The authors address physical, intellectual, social, and emotional growth in all life stages, focusing on the idea that development results from the interdependence of these areas at every stage, and placing special emphasis on optimal development through life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

CYCLOPEDIA OF LAW AND PROCEDURE

CIVIL STATUTES, TIT. 71-136. PENAL CODE. CODE OF CRIMINAL PROCEDURE

IMAGING OF GYNECOLOGICAL DISORDERS IN INFANTS AND CHILDREN

Springer Science & Business Media This textbook provides a comprehensive review of gynecological imaging in infancy, childhood, and adolescence. Experts from the disciplines of pediatric radiology, gynecology, surgery, and endocrinology have come together to produce a textbook that, while written primarily from the perspective of the radiologist, will be of value to all professionals involved in the management of these patients. The normal development of the female reproductive tract is described in detail through embryological development, normal childhood appearances, and puberty. Congenital abnormalities are addressed in chapters reviewing structural abnormalities of the reproductive tract and disorders of sex development. A symptoms-based approach is followed in chapters devoted to the assessment of the patient with gynecological pain and disorders of menstruation. Disorders of the breast and the imaging of patients with gynecological neoplasia are considered in dedicated chapters.

FIELD MANUAL OF TECHNIQUES IN INVERTEBRATE PATHOLOGY

APPLICATION AND EVALUATION OF PATHOGENS FOR CONTROL OF INSECTS AND OTHER INVERTEBRATE PESTS

Springer Science & Business Media This field manual is designed to provide background and instruction on a broad spectrum of techniques and their use in the evaluation of entomopathogens in the field. The second edition provides updated information and includes two additional chapters and 12 new contributors. The intended audience includes researchers, graduate students, practitioners of integrated pest management (IPM), regulators and those conducting environmental impact studies of entomopathogens.

HOW PEOPLE LEARN

BRAIN, MIND, EXPERIENCE, AND SCHOOL: EXPANDED EDITION

National Academies Press First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.
