An Introduction to Parapsychology, 5th ed.

McFarland This is a thoroughly updated and revised edition of our highly acclaimed university textbook on the science of parapsychology. The objective of this book is to provide an introductory survey of parapsychologists' efforts to explore the authenticity and bases of anomalous, apparently paranormal phenomena. It outlines the origins of parapsychological research and critically reviews investigations of extrasensory perception, psychokinesis, poltergeist phenomena, near-death and out-of-body experiences, and the evaluation of parapsychology as a scientific enterprise. Instructors considering this book for use in a course may request an examination copy here.

The Star Gate Archives

Reports of the United States Government Sponsored Psi Program, 1972-1995. Volume 3: Psychokinesis

McFarland Star Gate is the largest funded program in the history of psi research receiving about \$19.933 million in funding from 1972 to 1995. Researchers from SRI International, and later at Science Applications International Corporation, in association with various U.S. intelligence agencies participated in this program. Using the remote viewing method, research focused on understanding the applicability and nature of psi in general but mostly upon informational psi. **Volume 1: Remote Viewing (1972-1984) and Volume 2: Remote Viewing (1985-1995)** include all aspects of RV including laboratory trials and several operational results. **Volume 3: Psychokinesis** focuses on

laboratory investigations. **Volume 4: Operational Remote Viewing: Government Memorandums and Reports** includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind the scenes activities of Star Gate. In a total of 504 separate missions from 1972 to 1995, remote viewing produced actionable intelligence prompting 89 percent of the customers to return with additional missions. The Star Gate data indicate that informational psi is a valid phenomenon. These data have led to the development of a physics and neuroscience based testable model for the underlying mechanism, which considers informational psi as a normal, albeit atypical, phenomenon. The Star Gate data found insufficient evidence to support the causal psi (psychokinesis) hypothesis.

State of the Art Surgical Coronary Revascularization

Oxford University Press, USA This is the most authoritative textbook ever dedicated to the art and science of surgical coronary revascularization, with 71 chapters, organized in 9 sections, and written by over 100 recognized world experts. It covers every aspect of the surgical management of coronary artery pathology and ischaemic heart disease.

Administration & Management

Management of Endometrial Cancer

Springer This practical reference book provides up-to-date, evidence-based multidisciplinary guidelines on the epidemiology, biology, diagnosis, and treatment of endometrial cancer. Individual chapters focus on topics such as hormonal interactions, cancer prevention, genetic classification and its clinical applications. Recent advances in diagnostic methods are described. The treatment-oriented chapters include coverage of the roles of lymphadenectomy and sentinel node dissection, surgical complications, radiation techniques, and chemotherapy in early-stage disease. Treatment options in advanced disease, including hormonal therapy and targeted therapy, are considered separately, as is the management of rare tumor types. The authors are international key opinion leaders. Summaries of the ESMO/ESGO/ESTRO guidelines on management are included. Each clinical chapter ends with a summary of recommendations with the level of evidence.

English for Specific Purposes

Cambridge University Press English for Specific Purposes offers the teacher a new perspective on this important field. The main concern is effective learning and how this can best be achieved in ESP courses. The authors discuss the evolution of ESP and its position today; the role of the ESP teacher; course design; syllabuses; materials; teaching methods, and evaluation procedures. It will be of interest to all teachers who are concerned with ESP. Those who are new to the field will find it a thorough, practical introduction while those with more extensive experience will find its approach both stimulating and innovative.

Doing Action Research in English Language Teaching A Guide for Practitioners

Routledge This hands-on, practical guide for ESL/EFL teachers and teacher educators outlines, for those who are new to doing action research, what it is and how it works. Straightforward and reader friendly, it introduces the concepts and offers a step-by-step guide to going through an action research process, including illustrations drawn widely from international contexts. Specifically, the text addresses: action research and how it differs from other forms of research the steps involved in developing an action research project ways of developing a research focus methods of data collection approaches to data analysis making sense of action research for further classroom action. Each chapter includes a variety of pedagogical activities: Pre-Reading questions ask readers to consider what they already know about the topic Reflection Points invite readers to think about/discuss what they have read action points ask readers to carry out action-research tasks based on what they have read Classroom Voices illustrate aspects of action research from teachers internationally Summary Points provide a synopsis of the main points in the chapter Bringing the 'how-to' and the 'what' together, Doing Action Research in English Language Teaching is the perfect text for BATESOL and MATESOL courses in which action research is the focus or a required component.

Mental Capacity Act 2005 code of practice

[large print 2007 final edition]

The Stationery Office The Mental capacity Act 2005 provides a statutory framework for people who lack the capacity to make decisions for themselves, or for people who want to make provision for a time when they will be unable to make their own decisions. This code of practice, which has statutory force, provides information and guidance about how the Act should work in practice. It explains the principles behind the Act, defines when someone is incapable of making their own decisions and explains what is meant by acting in someone's best interests. It describes the role of the new Court of Protection and the role of Independent Mental Capacity Advocates and sets out the role of the Public

Guardian. It also covers medical treatment and the way disputes can be resolved.

The Psychic Life of Power

Theories in Subjection

Stanford University Press Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

Current Practices, Challenges and Innovations

Springer Nature This edited book focuses on current practices, challenges and innovations in the emerging field of English for Specific Purposes (ESP). By combining diverse, empirically-proven and innovative ESP practices from all over the world with inspiring theoretical input and reflections from experienced practitioners, the authors in this volume examine both best-practice examples and ESP programmes which by various metrics are deemed to have failed. This book will be of interest to practitioners, teacher educators and researchers working in the field of ESP, as well as readers interested in language education and curriculum development more broadly.

Diagnosis and Management of Hypertrophic Cardiomyopathy

John Wiley & Sons *Diagnosis and Management of Hypertrophic Cardiomyopathy* is a unique, multi-authored compendium of information regarding the complexities of clinical and genetic diagnosis, natural history, and management of hypertrophic cardiomyopathy (HCM)—the most common and important of the genetic cardiovascular diseases—as well as related issues impacting the health of trained athletes. Edited by Dr. Barry J. Maron, a world authority on HCM, and with major contributions from all of the international experts in this field, this book provides a single comprehensive source of information concerning HCM. Recent advances in the field are discussed, including the importance of left ventricular outflow tract obstruction, the use of implantable defibrillators for the prevention of sudden death in young people, definition of the genetic basis for HCM and its role in clinical diagnosis and risk stratification, the development of more precise strategies for assessing the level of risk for sudden death among all patients with HCM, and the evolution of invasive interventions for heart failure symptoms, such as surgical management and its alternatives (alcohol septal ablation and dual-chamber pacing). **Key Features:** Contributions from all experts in the field, representing diverse viewpoints regarding this heterogeneous disease and related issues in athletes Information to dispel misunderstandings regarding issues associated with HCM and cardiovascular disease in athletes The only comprehensive source of information available on the topic

A Review of Background Factors, Current Practices, and Possible Role Models

A Primer of Experimental Psychology

Econometric Analysis of Cross Section and Panel Data, second edition

MIT Press The second edition of a comprehensive state-of-the-art graduate level text on microeconomic methods, substantially revised and updated. The second edition of this acclaimed graduate text provides a unified treatment of two methods used in contemporary econometric research, cross section and data panel methods. By focusing on assumptions that can be given behavioral content, the book maintains an appropriate level of rigor while emphasizing intuitive thinking. The analysis covers both linear and nonlinear models, including models with dynamics and/or individual heterogeneity. In addition to general estimation frameworks (particular methods of moments and maximum likelihood), specific linear and nonlinear methods are covered in detail, including probit and logit models and their multivariate, Tobit models, models for count data, censored and missing data schemes, causal (or treatment) effects, and duration analysis. *Econometric Analysis of Cross Section and Panel Data* was the first graduate econometrics text to focus on microeconomic data structures, allowing assumptions to be separated into population and sampling assumptions. This second edition has been substantially updated and revised. Improvements include a broader class of models for missing data problems; more detailed treatment of cluster problems, an important topic for empirical researchers; expanded discussion of "generalized instrumental variables" (GIV) estimation; new coverage (based on the author's own recent research) of inverse probability weighting; a more complete framework for estimating treatment effects with panel data, and a firmly established link between econometric approaches to nonlinear panel data and the "generalized estimating equation" literature popular in statistics and other fields. New attention is given to explaining when particular econometric methods can be applied; the goal is not only to tell readers what does work, but why certain "obvious" procedures do not. The numerous included exercises, both theoretical and computer-based, allow the reader to extend methods covered in the text and discover new insights.

How We Know What Isn't So

Simon and Schuster Thomas Gilovich offers a wise and readable guide to the fallacy of the obvious in everyday life. When can we trust what we believe—that "teams and players have winning streaks," that "flattery works," or that "the more people who agree, the more likely they are to be right"—and when are such beliefs suspect? Thomas Gilovich offers a guide to the fallacy of the obvious in everyday life. Illustrating his points with examples, and supporting them with the latest research findings, he documents the cognitive, social, and motivational processes that distort our thoughts, beliefs, judgments and decisions. In a rapidly changing world, the biases and stereotypes that help us process an overload of complex information inevitably distort what we would like to believe is reality. Awareness of our propensity to make these systematic errors, Gilovich argues, is the first step to more effective analysis and action.
