## Latin as the Language of Science and Learning

*Walter de Gruyter GmbH & Co KG* This book investigates the role of the Latin language as a vehicle for science and learning from several angles. First, the question what was understood as 'science' through time and how it is named in different languages, especially the Classical ones, is approached. Criteria for what did pass as scientific are found that point to 'science' as a kind of Greek *Denkstil* based on pattern-finding and their unbiased checking. In a second part, a brief diachronic panorama introduces schools of thought and authors who wrote in Latin from antiquity to the present. Latin's heydays in this function are clearly the time between the twelfth and eighteenth centuries. Some niches where it was used longer are examined and reasons sought why Latin finally lost this lead-role. A third part seeks to define the peculiar characteristics of scientific Latin using corpus linguistic approaches. As a result, several types of scientific writing can be identified. The question of how to transfer science from one linguistic medium to another is never far: Latin inherited this role from Greek and is in turn the ancestor of science done in the modern vernaculars. At the end of the study, the importance of Latin science for modern science in English becomes evident.

## Ecce Romani Level 3 Student Edition Hardcover 2005c

*Prentice Hall* The title of this series of Latin books is *Ecce Romani*, which means "Look! The Romans!" The books in the series will present the Romans to you as you learn the Latin language that they spoke. At first you will meet the members of a Roman family; Latin is the language they use to communicate among themselves. As you continue reading you will meet mythological and historical characters that meant much to the Romans and remain part of our cultural heritage today. You will be introduced to a vast and colorful world of ancient Mediterranean and European civilizations that included peoples who spoke many different languages, and you will meet people of many different cultures and social levels, ranging from slaves to emperors. You will read passages from many ancient Roman writers and thus come into direct communication with the ancient Romans themselves. - Introduction.

## On the Track of the Books

## Scribes, Libraries and Textual Transmission

*Walter de Gruyter GmbH & Co KG* This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity. In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

### Themes and Images in the Medieval English Religious Lyric

*Routledge* Originally published in 1972, Themes and Images in the Medieval English Religious Lyric discusses themes and images in religious lyric poetry in Medieval English poetry. The book looks at the affect that tradition and convention had on the religious poetry of the medieval period. It examines the background of the lyrics, including the Latin tradition which was inherited by medieval vernacular and shows how religious lyric poetry presents, through a rich variety of images, the significant incidents in the scheme of Christ's redemption, such as the Annunciation, the Nativity, the Passion and the Resurrection. It also considers the lyrics which were designed to assist humanity in the task of living in a Christian life, as well as those which prepared them for death.

### Negative Theology in the Platonic Tradition: Plato to Eriugena

*Wipf and Stock Publishers* "This book contains a careful, thorough, and where necessary skeptical as regards doubtful evidence (especially in the case of Plato and the Old Academy) of the beginnings in European thought of the negative or apophatic way of thinking and its relations to more positive or kataphatic ways of thinking about God. One of its greatest strengths, perhaps the greatest, is that the author makes clear that none of the persons concerned, Hellenic, Jewish or Christian, was engaged in the pursuit of a philosophical abstraction, or the heaping of rhetorical superlatives on God. They were rather concerned to present the origin of the universe as an intimately present living reality which infinitely transcends our thought and speech. This, combined with careful attention to the varieties of negative theology and its relations with positive, and the particular difficulties experienced by the members of the various traditions involved, makes the book the best introduction to the negative theology available." -A. H. Armstrong, Emeritus Professor of Greek, University of Liverpool, England. Emeritus Professor of Classics, Dalhousie University, Halifax, Nova Scotia, Canada. Senior Fellow of the British Academy. ## Lucretius on Disease

### The Poetics of Morbidity in ›De rerum natura‹

*Walter de Gruyter GmbH & Co KG* The standard view in scholarship is that disease in Lucretius' De rerum natura is mainly a problem to be solved and then dispensed with. However, a closer reading suggests that things are more layered and complex than they appear at first sight: just as morbus causes a radical rearrangement of atoms in the body and makes the patient engage with alternative and up to that point unknown dimensions of the sensible world, so does disease as a theme generate a multiplicity of meanings in the text. The present book argues for a reconsideration of morbus in De

rerum natura along those lines: it invites the reader to revisit the topic of disease and reflect on the various, and often contrasting, discourses that unfold around it. More specifically, it illustrates how, apart from calling for therapy, disease, due to its dominant presence in the narrative, transforms at the same time into a concept that is integral both to the poem's philosophical agenda but also to its wider aesthetic concerns as a literary product. The book thus sheds new light on De rerum natura's intense preoccupation with morbus by showing how disease is not exclusively conceived by Lucretius as a blind, obliterating force but is crucially linked to life and meaning—both inside and outside the text.

## The Hammer of Witches

### A Complete Translation of the Malleus Maleficarum

*Cambridge University Press* The Malleus Maleficarum, first published in 1486-7, is the standard medieval text on witchcraft and it remained in print throughout the early modern period. Its descriptions of the evil acts of witches and the ways to exterminate them continue to contribute to our knowledge of early modern law, religion and society. Mackay's highly acclaimed translation, based on his extensive research and detailed analysis of the Latin text, is the only complete English version available, and the most reliable. Now available in a single volume, this key text is at last accessible to students and scholars of medieval history and literature. With detailed explanatory notes and a guide to further reading, this volume offers a unique insight into the fifteenth-century mind and its sense of sin, punishment and retribution.

## Universe and Inner Self in Early Indian and Early Greek Thought

*Edinburgh University Press* From the sixth century BCE onwards there occurred a revolution in thought, with novel ideas such as such as that understanding the inner self is both vital for human well-being and central to understanding the universe. This intellectual transformation is sometimes called the beginning of philosophy. And it occurred - independently it seems - in both India and Greece, but not in the vast Persian Empire that divided them. How was this possible? This is a puzzle that has never been solved. This volume brings together Hellenists and Indologists representing a variety of perspectives on the similarities and differences between the two cultures, and on how to explain them. It offers a collaborative contribution to the burgeoning interest in the Axial Age and will be of interest to anyone intrigued by the big questions inspired by the ancient world.

## Cashing in on Education

### Women, Childcare, and Prosperity in Latin America and the Caribbean

*World Bank Publications* Investments in education across countries in Latin America and the Caribbean have transformed the lives of millions of girls and the prospects of their families and societies. Unleashing the full economic potential of women is nevertheless still a curtailed issue in the region: just about half of women are unable to participate in paid work. The majority of the population out of the labor market is women between the ages of 24 and 45. This is the largest share of the available pool of unused human capital countries have, and where mothers of young children are concentrated. This

book argues that more and better childcare constitutes a fundamental policy option to improve female outcomes in the labor market, but countries need to pay particular attention to the design and features of such services. First-rate educational programs will be useless if children are not enrolled or do not attend formal education centers. A large program expansion will be wasted if parents cannot enroll their children because they are unable to reach the center, don't trust its quality, if the program is too expensive, or if work and care schedules are not compatible. Through an integrated framework applied to each country and an overview of the existing evidence, this book addresses the why and what questions about policy relevant instruments to achieve female labor participation. Parts I and II of the book lay out the motivation for Latin-American and Caribbean countries to act depicting their current situation both in terms of women's labor participation and the use and provision of childcare services. Moreover, this book tackles the how question contributing to the incipient evidence about factors affecting the take-up of programs and demand for childcare services and other informal care arrangements. Part III of the book explores how to improve services and implement more and better formal, center-based care arrangements for young children. It looks at international benchmarks, discusses different experiences and proposes specific actions to solve potential inequalities in access to childcare.

## Medieval Saints and Modern Screens

### Divine Visions as Cinematic Experience

*Amsterdam University Press* This ground-breaking book brings theoretical perspectives from twenty-first century media, film, and cultural studies to medieval hagiography. *Medieval Saints and Modern Screens* stakes the claim for a provocative new methodological intervention: consideration of hagiography as media. More precisely, hagiography is most productively understood as cinematic media. Medieval mystical episodes are made intelligible to modern audiences through reference to the filmic - the language, form, and lived experience of cinema. Similarly, reference to the realm of the mystical affords a means to express the disconcerting physical and emotional effects of watching cinema. Moreover, cinematic spectatorship affords, at times, a (more or less) secular experience of visionary transcendence: an 'agape-ic encounter'. The medieval saint's visions of God are but one pole of a spectrum of visual experience which extends into our present multi-media moment. We too conjure godly visions: on our smartphones, on the silver screen, and on our TVs and laptops. This book places contemporary pop-culture media - such as blockbuster movie *The Dark Knight*, Kim Kardashian West's social media feeds, and the outputs of online role-players in *Second Life* - in dialogue with a corpus of thirteenth-century Latin biographies, 'Holy Women of Liège'. In these texts, holy women see God, and see God often. Their experiences fundamentally orient their life, and offer the women new routes to knowledge, agency, and belonging. For the holy visionaries of Liège, as with us modern 'seers', visions are physically intimate, ideologically overloaded spaces. Through theoretically informed close readings, *Medieval Saints and Modern Screens* reveals the interconnection of decidedly 'old' media - medieval textualities - and artefacts of our 'new media' ecology, which all serve as spaces in which altogether human concerns are brought before the contemporary culture's eyes.

## An Introduction to English Economic History and Theory

### Feminist Reflections on the History of Philosophy

*Springer Science & Business Media* Feminist work in the history of philosophy has come of age as an innovative field in the history of philosophy. This volume marks that accomplishment with original essays by leading feminist scholars who ask basic questions: What is distinctive of feminist work in the history of philosophy? Is there a method that is distinctive of feminist historical work? How can women philosophers be meaningfully included in the history of the discipline? Who counts as a philosopher? This collection is a unique collaboration among philosophers from North America and the Nordic Countries, including papers written from both analytic and continental philosophical perspectives and discussing both ancient and modern philosophers. *Feminist Reflections on the History of Philosophy* will be of interest to historians of philosophy, feminist theorists, women's studies faculty and students, and humanists interested in canon formation and transformation.

## Plato-Nietzsche

## Philosophy the Other Way

Uncovers in the works of Plato and Nietzsche, not some royal road to truth, but rather the intensity of their love and commitment to the life of thought, whatever it discovers and wherever it might lead.

## Nietzsche's System

Oxford University Press This book argues, against recent interpretations, that Nietzsche does in fact have a metaphysical system--but that this is to his credit. Rather than renouncing philosophy's traditional project, he still aspires to find and state essential truths, both descriptive and evaluative, about us and the world. These basic thoughts organize and inform everything he writes; by examining them closely we can find the larger structure and unifying sense of his strikingly diverse views. With rigor and conceptual specificity, Richardson examines the will-to-power ontology and maps the values that emerge from it. He also considers the significance of Nietzsche's famous break with Plato--replacing the concept of "being" with that of "becoming." By its conservative method, this book tries to do better justice to the truly radical force of Nietzsche's ideas--to demonstrate more exactly their novelty and interest.

## Victims of Progress

Rowman & Littlefield Victims of Progress, now in its sixth edition, offers a compelling account of how technology and development affect indigenous peoples throughout the world. Bodley's expansive look at the struggle between small-scale indigenous societies, and the colonists and corporate developers who have infringed their territories reaches from 1800 into today. He examines major issues of intervention such as social engineering, economic development, self-determination, health and disease, global warming, and ecocide. Small-scale societies, Bodley convincingly demonstrates, have survived by organizing politically to defend their basic human rights. Providing a provocative context in which to think about civilization and its costs—shedding light on how we are all victims of progress—the sixth edition features expanded discussion of “uprising politics,” Tebtebba (a particularly active indigenous organization), and voluntary isolation. A wholly new chapter devotes full coverage to the costs of global warming to indigenous peoples in the Pacific and the Arctic. Finally, new appendixes guide readers to recent protest petitions as well as online resources and videos.

## Changing Educational Landscapes

## Educational Policies, Schooling Systems and Higher Education - a comparative perspective

Springer Science & Business Media Analyzing educational landscapes - the fundamental values, principles and institutions of the sector - is a highly complex and demanding task for any researcher. Like shifting desert sands, these aspects of education are in a constant state of flux, changing according to the unpredictable economic, social, cultural and geo-political circumstances of late modernity. Key aspects of the intricate, fluid and multifarious contemporary setting can always escape the researcher's necessarily selective observation. The contributors to this book share the view that it is wise, therefore, to take note of other people's ideas, perceptions and perspectives, to compare notes and reflect critically on them. Thus the papers presented here are a critical and comparative analysis of today's changing educational landscapes. They are an exploration of some of the forces and factors that induce these changes, and also examine some of their most significant implications. The work takes a fresh look at received ideology and institutional practices and delineates the increasingly internationalized educational discourses and policies. Among other things, the book discusses the

obsession with quality in education and the alternative perceptions of educational equality; the rising concern at the obstacles to truly multicultural education, and the debate about the epistemological foundations both of knowledge and knowledge production. Underlying all of the papers in the book is the authors' intention to enhance our understanding of educational change in this era of transition and to further our appreciation of its multifaceted expressions across the world.

## Lydgate's Fall of Princes

## Ancient Philosophy of the Self

*Springer Science & Business Media* Pauliina Remes and Juha Sihvola In the course of history, philosophers have given an impressive variety of answers to the question, "What is self?" Some of them have even argued that there is no such thing at all. This volume explores the various ways in which selfhood was approached and conceptualised in antiquity. How did the ancients understand what it is that I am, fundamentally, as an acting and affected subject, interpreting the world around me, being distinct from others like and unlike me? The authors highlight the attempts in ancient philosophical sources to grasp the evasive character of the specifically human presence in the world. They also describe how the ancient philosophers understood human agents as capable of causing changes and being affected in and by the world. Attention will be paid to the various ways in which the ancients conceived of human beings as subjects of reasoning and action, as well as responsible individuals in the moral sphere and in their relations to other people. The themes of persistence, identity, self-examination and self-improvement recur in many of these essays. The articles of the collection combine systematic and historical approaches to ancient sources that range from Socrates to Plotinus and Augustine.

## Teutonic Mythology

## Paideia Romana

## Cicero's Tusculan Disputations

*Cambridge Philological Society* Paideia Romana: Cicero's Tusculan Disputations takes a new look at an unloved text of the western canon to reveal it as a punchy and profoundly original work, arguably Cicero's most ingenious literary response to the tyranny of Caesar. The book shows how the Tusculans' much lambasted literary design, critically isolated prefaces, and overlooked didactic plot start to cohere once we read the dialogue for what it is: not a Latin treatise on Greek philosophy, but a Roman drama on education, with a strong political subtext. The first chapter ('The form □ enigmas and answers') tries to make sense of those features of the work that scholars have found baffling or disappointing, such as the nondescript characters, the uncertain genre, or the lack of setting. Chapter 2 ('The prologues □ in tyrannum and cultural warfare') analyses how Cicero in his prologues to the five individual books situates his desire to create and teach a 'Latin philosophy' within wider contexts, in particular the dictatorship of Caesar and the intellectual traditions of Greece and Rome. The final chapter 3 ('The plot □ teacher and student') explores the pedagogy enacted in the dialogue as a form of constructive outreach, addressed to a future generation of Roman aristocrats. With its emphasis on rhetoric, literary artistry, and historical context, the present volume breaks with earlier scholarship on the Tusculans and thereby makes a significant contribution to the on-going reassessment of Cicero's thought and authorial practice.

## Defining Pre-Raphaelite Poetics

*Palgrave Macmillan* Defining Pre-Raphaelite Poetics offers a range of Pre-Raphaelite literary scholarship, provoking innovative discussions into the poetic form, gender dynamics, political engagement, and networked communities of Pre-Raphaelitism. The authors in this collection position Pre-Raphaelite poetics broadly in the sense of poiesis, or acts of making, aiming to identify and explore the Pre-Raphaelites' diverse forms of making: social, aesthetic, gendered, and sacred. Each chapter examines how Pre-Raphaelitism takes up and explores modes of making and re-making identity, relationality, moral transformations, and even, time and space. Essays explore themes of formalist or prosodic approaches, expanded networks of literary and artistic influence within Pre-Raphaelitism, and critical legacies and responses to Pre-Raphaelite poetry and arts, codifying the methods, forms, and commonalities that constitute literary Pre-Raphaelitism.

## Case, Agreement, and their Interactions

## New Perspectives on Differential Argument Marking

*Walter de Gruyter GmbH & Co KG* Differential argument marking has been a hot topic in linguistics for several decades, both because it is cross-linguistically widespread and because it raises essential questions at multiple levels of grammar, including the relationship between abstract processes and overt morphological marking, between case and agreement, and between syntax and information

structure. This volume provides an introduction into the current state of the art of research on differential case marking and chapters by leading linguists addressing theoretical questions in a wide range of typologically and geographically diverse languages from the Indo-European, Sinitic, Turkic, and Uralic families. The chapters engage with current theoretical issues in the morphology, syntax, semantics, and processing of differential argument marking. A central issue addressed by all the authors is the adequacy of various theoretical approaches in modelling (different varieties of) differential case marking, such as those determined by topicality, those driven by cumulative factors, and those that involve double marking. The volume will be of interest to students and researchers working on cross-linguistic variation in differential marking and its theoretical modelling.

## Intende, Lector - Echoes of Myth, Religion and Ritual in the Ancient Novel

*Walter de Gruyter* Representation of myth in the novel, as a poetic, narrative and aesthetic device, is one of the most illuminating issues in the area of ancient religion, for such narratives investigate in various ways fundamental problems that concern all human beings. This volume brings together twenty contributions (six of them to a Roundtable organized by Anton Bierl on myth), originally presented at the Fourth International Conference on the Ancient novel (ICAN IV) held in Lisbon in July 2008. Employing an interdisciplinary approach and putting together different methodological tools (intertextual, psychological, and anthropological), each offers a illuminating investigation of mythical discourse as presented in the text or texts under discussion. The collection as a whole demonstrates the exemplary and transgressive significance of myth and its metaphorical meaning in a genre that to some extent can be considered a modernized and secular form of myth that focuses on the quintessential question of love.

## The Two Fundamental Problems of Ethics

*Cambridge University Press* This translation is the first English edition to reunite Schopenhauer's two major essays on ethics in one volume.

## The Stoics Reader

## Selected Writings and Testimonia

*Hackett Publishing* This volume gathers together the most important evidence about Stoic thought surviving from the ancient world. It is an expanded version of the section on Stoicism in Inwood and Gerson's *Hellenistic Philosophy*, consolidating related texts into larger, more continuous selections, adding material on the skeptical attack on Stoicism, and a short section that introduces the reader to some of the more interesting texts on Stoic ethics from the Roman imperial period. Inwood and Gerson provide lucid, accurate translations, an Introduction that sets the works included in historical and philosophical context, a glossary of terms, a glossary of philosophers and philosophical sources, an index of passages translated, and a subject index.
