The EU is the latest stage in a process of integration begun after World War II, initially by six Western European countries, to foster interdependence and make another war in Europe unthinkable. The EU currently consists of 28 member states, including most of the countries of Central and Eastern Europe, and has helped to promote peace, stability, and economic prosperity throughout the European continent. The EU has been built through a series of binding treaties. Over the years, EU member states have sought to harmonize laws and adopt common policies on an increasing number of economic, social, and political issues. EU member states share a customs union; a single market in which capital, goods, services, and people move freely; a common trade policy; and a common agricultural policy. Nineteen EU member states use a common currency (the euro), and 22 member states participate in the Schengen area of free movement in which internal border controls have been eliminated. In addition, the EU has been developing a Common Foreign and Security Policy (CFSP), which includes a Common Security and Defense Policy (CSDP), and pursuing cooperation in the area of Justice and Home Affairs (JHA) to forge common internal security measures. Member states work together through several EU institutions to set policy and to promote their collective interests. In recent years, however, the EU has faced a number of internal and external crises. Most notably, in a June 2016 public referendum, voters in the United Kingdom (UK) backed leaving the EU. The pending British exit from the EU (dubbed "Brexit") comes amid multiple other challenges, including the rise of populist and to some extent anti-EU political parties, concerns about democratic backsliding in some member states (including Poland and Hungary), ongoing pressures related to migration, a heightened terrorism threat, and a resurgent Russia. The United States has supported the European integration project since its inception in the 1950s as a means to prevent another catastrophic conflict on the European continent and foster democratic allies and strong trading partners. Today, the United States and the EU have a dynamic political partnership and share a huge trade and investment relationship. Despite periodic tensions in U.S.-EU relations over the years, U.S. and EU policymakers alike have viewed the partnership as serving both sides' overall strategic and economic interests. EU leaders are anxious about the Trump Administration's commitment to the EU project, the transatlantic partnership, and an open international trading system-especially amid the Administration's imposition of tariffs on EU steel and aluminum products since 2018 and the prospects of future auto tariffs. In July 2018, President Trump reportedly called the EU a "foe" on trade but the Administration subsequently sought to de-escalate U.S.-EU tensions and signaled its intention to launch new U.S.-EU trade negotiations. Concerns also linger in Brussels about the implications of the Trump Administration's "America First" foreign policy and its positions on a range of international issues, including Russia, Iran, the Israeli-Palestinian conflict, climate change, and the role of multilateral institutions. This report serves as a primer on the EU.*

Despite the UK's vote to leave the EU, the UK remains a full member of the bloc until it officially exits the EU (which is scheduled to occur by October 31, 2019, but may be further delayed). As such, this report largely addresses the EU and its institutions as they currently exist. It also briefly describes U.S.-EU political and economic relations that may be of interest.

Russia and the Idea of Europe A Study in Identity and International Relations Taylor & Francis The end of the Soviet system and the transition to the market in Russia, coupled with the inexorable rise of nationalism, brought to the fore the centuries-old debate about Russia's relationship with Europe. In this revised and updated second edition of *Russia and the Idea of Europe*, Iver Neumann discusses whether the tensions between self-referencing nationalist views and Europe-orientated liberal views can ever be resolved. Drawing on a wide range of Russian sources, this book retains the broad historical focus of the previous edition and picks up from where the it off in the early 1990s, bringing the discussion fully up to date. Discussing theoretical and political developments, it relates the existing story of Russian identity formation to new foreign policy analysis and the developments in the study of nationalism. The book also offers an additional focus on post-Cold War developments. In particular it examines the year 2000, when Putin succeeded Yeltsin as president, and 2014, when Russian foreign policy turned from cooperation to confrontation. Bringing to life the various debates surrounding this complicated relationship in an accessible and clear manner, this book continues to be a unique and vital resource for both students and scholars of international relations.

Prisoners of Geography Ten Maps That Explain Everything About the World Simon and Schuster First published in Great Britain in 2015 by Elliott and Thompson Limited.

Cairo University and the Making of Modern Egypt Cambridge University Press Cairo University has been crucially important in shaping the national life of modern Egypt. In this history, Professor Reid explains the university's part in the national quest for independence from Britain, in the perennial tension between secular and religious world-views, and in the push for a more egalitarian society.

Common European Framework of Reference for Languages: Learning, Teaching, assessment Companion volume Council of Europe The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments

since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

Boundaries, Territory and Postmodernity Routledge Contributions to this collection seek to determine the extent to which states and boundaries have, in fact, disappeared, or are simply changing their functions as we move from an era of fixed territories into a post-Westphalian territorial system. A group of international political geographers and political scientists examine the changing nature of the state, pointing to significant changes on the one hand, but equally noting the continued importance of territory and boundaries in determining the political ordering of the post-modern world. **Bulletin of the Atomic Scientists** The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world. **El-Hi Textbooks & Serials in Print, 2000 Including Related Teaching Materials K-12** **The Invention of Politics in the European Avant-Garde (1906-1940) BRILL** In 1906, for the first time in his life, F.T. Marinetti connected the term 'avant-garde' with the idea of the future, thus paving the way for what is now commonly called the 'modernist' or 'historical avant-garde'. Since 1906 the ties between the early twentieth-century European aesthetic vanguard and politics have been a matter of debate. With a century gone by, *The Invention of Politics in the European Avant-Garde* takes stock of this debate. Opening with a critical introduction to the vast research archive on the subject, this book proposes to view the avant-garde as a political force in its own right that may have produced solutions to problems irresolvable within its democratic political constellation. In a series of essays that combine close readings of texts and plastic works with a thorough knowledge of their political context, the book looks at avant-garde works as media producing political thought and experience. Covering the canonised avant-garde movements of Futurism, Expressionism, Dadaism and Surrealism, but also focussing on the avant-garde in Europe's geographical outskirts, this book will appeal to all those interested in the modernist avant-garde. **Globalization and Governance Routledge** *Globalization and Governance* is a completely up-to-date, impartial survey of a variety of perspectives on what constitutes governance and how globalization may impact governance and the

state. Eleven essays and a thorough introduction provide a theoretical framework and a literature overview. Unlike most books on the subject, this does not espouse any ideological agenda and examines the topical subject of globalization in a conceptually rigorous way. **Bulletin of the Atomic Scientists The Poverty of Marxism in Contemporary Geographical Applications and Research The Search for the Emperor's New Clothes : (an Extended Discussion Paper) Rediscovering Geography New Relevance for Science and Society National Academies Press** As political, economic, and environmental issues increasingly spread across the globe, the science of geography is being rediscovered by scientists, policymakers, and educators alike. Geography has been made a core subject in U.S. schools, and scientists from a variety of disciplines are using analytical tools originally developed by geographers. *Rediscovering Geography* presents a broad overview of geography's renewed importance in a changing world. Through discussions and highlighted case studies, this book illustrates geography's impact on international trade, environmental change, population growth, information infrastructure, the condition of cities, the spread of AIDS, and much more. The committee examines some of the more significant tools for data collection, storage, analysis, and display, with examples of major contributions made by geographers. *Rediscovering Geography* provides a blueprint for the future of the discipline, recommending how to strengthen its intellectual and institutional foundation and meet the demand for geographic expertise among professionals and the public. **The Journal of Education International law in Europe, 700-1200 Manchester University Press** Was there international law in the Middle Ages? Using treaties as its main source, this book examines the extent to which such a system of rules was known and followed in the period 700 to 1200. It considers how consistently international legal rules were obeyed, whether there was a reliance on justification of action and whether the system had the capacity to resolve disputed questions of fact and law. The book further sheds light on issues such as compliance, enforcement, deterrence, authority and jurisdiction, challenging traditional ideas over their role and function in the history of international law. *International law in Europe, 700-1200* will appeal to students and scholars of medieval Europe, international law and its history, as well as those with a more general interest in warfare, diplomacy and international relations. **Europe The Challenge of Diversity The Athenaeum Kant and Colonialism Historical and Critical Perspectives Oxford University Press, USA** This is the first book dedicated to a systematic exploration of Kant's position on colonialism. Bringing together a team of leading scholars in both the history of political thought and normative theory, the chapters in the volume seek to place Kant's thoughts on colonialism in historical context, examine the tensions that the assessment of colonialism produces in Kant's work, and evaluate the relevance of these reflections for current debates on global justice and the relation of Western political thinking to other parts of the world. **French Studies in and for the Twenty-first Century Oxford University Press** With contributions from leading scholars across the entire range of French studies, this up-to-date volume examines both the current state of French studies in the United Kingdom, as well as its future in an increasingly interdisciplinary world where student demand, new technologies, and developments in transnational education are changing the ways in which we teach, learn, research

*and assess achievements. Required reading for French studies scholars worldwide, this volume builds upon the findings of the influential Review of Modern Foreign Languages Provision in Higher Education and maps the present and future of the field. **French Studies in and for the 21st Century Liverpool University Press** French Studies in and for the 21st Century draws together a range of key scholars to examine the current state of French Studies in the UK, taking account of the variety of factors which have made the discipline what it is. The book looks ahead to the place of French Studies in a world that is increasingly interdisciplinary, and where student demands, new technologies and transnational education are changing the ways in which we learn, teach, research and assess. Required reading for all UK French Studies scholars, the book will also be an essential text for the French Studies community worldwide as it grapples with current demands and plans for the future.*
