The Transits of Mathematics and Poetry

Springer **This volume explores the interaction of poetry and mathematics by looking at analogies that link them. The form that distinguishes poetry from prose has mathematical structure (lifting language above the flow of time), as do the thoughtful ways in which poets bring the infinite into relation with the finite. The history of mathematics exhibits a dramatic narrative inspired by a kind of troping, as metaphor opens, metonymy and synecdoche elaborate, and irony closes off or shifts the growth of mathematical knowledge. The first part of the book is autobiographical, following the author through her discovery of these analogies, revealed by music, architecture, science fiction, philosophy, and the study of**

mathematics and poetry. The second part focuses on geometry, the circle and square, launching us from Shakespeare to Housman, from Euclid to Leibniz. The third part explores the study of dynamics, inertial motion and transcendental functions, from Descartes to Newton, and in 20th c. poetry. The final part contemplates infinity, as it emerges in modern set theory and topology, and in contemporary poems, including narrative poems about modern cosmology.

Cognitive Poetics

A New Introduction

Routledge **Cognitive poetics is a new way of thinking about literature, involving the application of cognitive linguistics and psychology to literary texts. This book is the first introductory text to this growing field. In Cognitive Poetics: An Introduction, the reader is encouraged to re-evaluate the categories used to understand literary reading and analysis. Covering a wide range of literary genres and historical periods, the book encompasses both American and European approaches. Each chapter explores a different cognitive-poetic framework and relates it to a literary text. Including a range of activities, discussion points, suggestions for further reading and a glossarial index, the book is both interactive and highly accessible. Cognitive Poetics: An Introduction is essential reading for students on stylistics and literary-linguistic courses, and will be of interest to all those involved in literary studies, critical theory and linguistics.**

Wordsworth's Bardic Vocation, 1787-1842

Lulu.com **Wordsworth's Bardic Vocation, the most comprehensive critical study of the poet since the 1960s, presents the poet as balladist, sonneteer, minstrel, elegist, prophet of nature, and national bard. The book argues that Wordsworth's uniquely various oeuvre is unified by his sense of bardic vocation. Like Walt Whitman or the bards of Cumbria, Wordsworth sees himself as 'the people's remembrancer'. Like them, he sings of nature and endurance, laments the fallen, fosters national**

independence and liberty. His task is to reconcile in one society 'the living and the dead' and to nurture both 'the people' and 'the kind'. Review Comment: 'This erudite exposition, profligate with its ideas ... succeeds as few others have done in apprehending Wordsworth's career holistically, incorporating all its diversities and apparent inconsistencies into a unified vision. It justifies fully the notion proposed by Hughes and Heaney that he was England's last national poet.' - Duncan Wu, Review of English Studies

Against Expression

An Anthology of Conceptual Writing

Northwestern University Press **Charles Bernstein has described conceptual "poetry pregnant with thought." Against Expression, the premier anthology of conceptual writing, presents work that is by turns thoughtful, funny, provocative, and disturbing. Editors Craig Dworkin and Kenneth Goldsmith chart the trajectory of the conceptual aesthetic from early precursors such as Samuel Beckett and Marcel Duchamp through major avant-garde groups of the past century, including Dada, Oulipo, Fluxus, and language poetry, to name just a few. The works of more than a hundred writers from**

Aasprong to Zykov demonstrate a remarkable variety of new ways of thinking about the nature of texts, information, and art, using found, appropriated, and randomly generated texts to explore the possibilities of non-expressive language.

The Wild Swans at Coole

A Facsimile Edition

Simon and Schuster **A stunning facsimile of the 1919 first edition of William Butler Yeats's The Wild Swans at Coole: an elegant volume showcasing these poems as they would have first been read and a complement to facsimile editions The Winding Stair and The Tower. Published in 1919 during W.B. Yeats's "middle stage" and composed of poems written during World War I, The Wild Swans at Coole is contemplative and elegiac. This collection captures Yeats at a time when he was looking back on his life, coming to terms with the realities of modern war, reflecting on lost love, and defining his place in the world as a poet. It features forty poems, among them "The Fisherman," "In Memory of Major Robert Gregory," "The Wild Swans at Coole," and "On Being Asked for a War Poem." This facsimile of the original 1919 edition presents the reader with the work in its original form, with handsome old fashioned type, how readers and Yeats himself would have seen it in the early twentieth century. A great gift book and collector's item, The Wild Swans at Coole also includes an Introduction and notes by esteemed Yeats scholar George Bornstein.**

Qualitative Research Methods

Collecting Evidence, Crafting Analysis, Communicating Impact

John Wiley & Sons The definitive step-by step resource for qualitative and ethnographic research **Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact** is a comprehensive guide on both the theoretical foundations and practical application of qualitative methodology. Adopting a phronetic-iterative approach, this foundational book leads readers through the chronological progression of a qualitative research project, from designing a study and collecting and analyzing data to developing theories and effectively communicating the results—allowing readers to employ qualitative methods in their projects as they follow each chapter. Coverage of topics such as qualitative theories, ethics, sampling, interview techniques, qualitative quality, and advice on practical fieldwork provides clear and concise guidance on how to design and conduct sound research projects. Easy-to-follow instructions on iterative qualitative data analysis explain how to organize, code, interpret, make claims, and build theory. Throughout, the author offers her own backstage stories about fieldwork, analysis, drafting, writing, and publishing, revealing the emotional and humorous aspects of practicing qualitative methods. Now in its second edition, this thorough and informative text includes new and expanded sections on topics including post-qualitative research, phenomenology, textual analysis and cultural studies, gaining access to elite and difficult to access populations, on persuasive writing, novel interviewing approaches, and more. Numerous examples, case studies, activities, and discussion questions have been updated to reflect current research and ensure contemporary relevance. Written in an engaging and accessible narrative style by an acclaimed scholar and researcher in the field Offers new and updated examples of coding and qualitative analysis, full-color photos and illustrations, and a companion instructor website Synthesizes the most up-to-date multidisciplinary literature on qualitative research methods including seven main approaches to qualitative inquiry: grounded theory, case study, ethnography, phenomenology, narrative and autoethnography, participatory action research, and arts-based research Presents innovative qualitative data collection methods and modern representation strategies, such as virtual ethnography, photo-voice, and mobile interviewing **Qualitative Research Methods: Collecting Evidence, Crafting Analysis, Communicating Impact** is an ideal resource for

undergraduate and graduate students, instructors, and faculty across multiple disciplines including the social sciences, healthcare, education, management, and the humanities, and for practitioners seeking expert guidance on practical qualitative methods.

Mothers and Others

Harvard University Press **Mothers and Others** finds the key in the primatologically unique length of human childhood. Renowned anthropologist Sarah Hrdy argues that if human babies were to survive in a world of scarce resources, they would need to be cared for, not only by their mothers but also by siblings, aunts, fathers, friends—and, with any luck, grandmothers. Out of this complicated and contingent form of childrearing, Hrdy argues, came the human capacity for understanding others. In essence, mothers and others teach us who will care, and who will not.

Zen-Brain Reflections

MIT Press A sequel to the popular **Zen and the Brain** further explores pivotal points of intersection in Zen Buddhism, neuroscience, and consciousness, arriving at a new synthesis of information from both neuroscience research and Zen studies. This sequel to the widely read **Zen and the Brain** continues James Austin's explorations into the key interrelationships between Zen Buddhism and brain research. In **Zen-Brain Reflections**, Austin, a clinical neurologist, researcher, and Zen practitioner, examines the evolving psychological processes and brain changes associated with the path of long-range meditative training. Austin draws not only on the latest neuroscience research and new neuroimaging studies but also on Zen literature and his personal experience with alternate states of consciousness. **Zen-Brain Reflections** takes up where the earlier book left off. It addresses such questions as: how do placebos and acupuncture change the brain? Can neuroimaging studies localize the sites where our notions of self arise? How can the latest brain imaging methods monitor meditators more effectively? How do long years of meditative training plus brief enlightened states produce pivotal transformations in the physiology of the brain? In many chapters testable hypotheses suggest ways to correlate normal brain functions and meditative training with the phenomena of extraordinary states of consciousness. After briefly introducing the topic of Zen and describing recent research into meditation, Austin reviews the latest studies on the amygdala, frontotemporal interactions, and paralimbic extensions of the limbic system. He then explores different states of consciousness, both the early superficial absorptions and the later, major "peak experiences." This discussion begins with the states called kensho and satori and includes a fresh analysis of their several different expressions of "oneness." He points beyond the still more advanced states toward that rare ongoing stage of enlightenment that is manifest as "sage wisdom." Finally, with reference to a delayed "moonlight" phase of kensho, Austin envisions novel links between migraines and metaphors, moonlight and mysticism. The Zen

perspective on the self and consciousness is an ancient one. Readers will discover how relevant Zen is to the neurosciences, and how each field can illuminate the other.

Education Pack

Ideas, Resources, Methods and Activities for Informal Intercultural Education with Young People and Adults

Council of Europe This publication updates the 1995 edition as an educational resource for the European youth campaign against racism, anti-semitism, xenophobia and intolerance. It provides a reference source for those involved in intercultural education and training with young people in Europe and beyond. The pack itself offers a series of different methodologies, including role plays, simulation exercises, case studies and cooperative group work, which can be adapted by trainers, teachers and youth workers in their educational programmes.

Active Learning

Creating Excitement in the Classroom. 1991 ASHE-ERIC Higher Education Reports

This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games,

and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text includes over 200 references and an index. (JB)

Teaching Translation from Spanish to English

Worlds Beyond Words

University of Ottawa Press While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Communication, Civilization and China

Discovering the Tang Dynasty (618–907)

Springer Nature Referencing more than 40 ancient works as well as 70 books and papers of contemporary scholars, this book opens up the civilization, society, culture and communication of the Tang Dynasty. The Tang period represented unprecedented prosperity in the ancient world. Combining the socio-cultural background of ancient China and academic achievements of modern times, this book presents an intensive and in-depth exploration of the communicative organisations, methods and ideas of that period. The book looks at Tang methods of communication, from the postal delivery system and first newspaper to military communication in times of peace and war. It also considers questions of literature, poetry and public space as well as the impact of folk culture and communication on the Tang Dynasty, and examines the intellectual atmosphere of the time and debates surrounding freedom of speech and thought, positioning the Tang Dynasty as the end of the classic world and the beginning of modern society.

Twilight of the Anthropocene Idols

Following on from *Theory and the Disappearing Future*, Cohen, Colebrook and Miller turn their attention to the eco-critical and environmental humanities' newest and most fashionable of concepts, the Anthropocene. The question that has escaped focus, as "tipping points" are acknowledged as passed, is how language, mnemo-technologies, and the epistemology of tropes appear to guide the accelerating ecocide, and how that implies a mutation within reading itself-from the era of extinction events. Only in this moment of seeming finality, the authors argue, does there arise an opportunity to be done with mourning and begin reading. Drawing freely on Paul de Man's theory of reading, anthropomorphism and the sublime, *Twilight of the Anthropocene Idols* argues for a mode of critical activism liberated from all-too-human joys and anxieties regarding the future. It was quite a few decades ago (1983) that Jurgen Habermas declared that 'master thinkers had fallen on hard times.' His pronouncement of hard times was premature. For master thinkers it is the best of times. Not only is the world, supposedly, falling into a complete absence of care, thought and frugality, a few hyper-masters have emerged to tell us that these hard times should be the best of times. It is precisely because we face the end

that we should embrace our power to geo-engineer, stage the revolution, return to profound thinking, reinvent the subject, and recognize ourselves fully as one global humanity. Enter anthropos. The Design of Everyday Things

Revised and Expanded Edition

Hachette UK Design doesn't have to be complicated, which is why this guide to human-centered design shows that usability is just as important as aesthetics. Even the smartest among us can feel inept as we fail to figure out which light switch or oven burner to turn on, or whether to push, pull, or slide a door. The fault, argues this ingenious -- even liberating -- book, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from ambiguous and hidden controls to arbitrary relationships between controls and functions, coupled with a lack of feedback or other assistance and unreasonable demands on memorization. The Design of Everyday Things shows that good, usable design is possible. The rules are simple: make things visible, exploit natural relationships that couple function and control, and make intelligent use of constraints. The goal: guide the user effortlessly to the right action on the right control at the right time. The Design of Everyday Things is a powerful primer on how -- and why -- some products satisfy customers while others only frustrate them.

Acoustic Properties

Radio, Narrative, and the New Neighborhood of the Americas

Northwestern University Press **Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas** discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in

Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's *Radio Rebelde*, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power *Radio Free Dixie*. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

Nanopolitics Handbook

How to think politics with and through the body? The invention of new modes of sensibility is vital to enriching and sustaining political engagements, labours and lives in the situated contexts of urban collectivity. The nanopolitics handbook investigates the neoliberal city and workplace, the politics of crisis and austerity, precarious lives and modes of collaboration - through bodies and their encounters. Starting from the exploration of what bodies can do - with curiosity, courage and care - nanopolitics is a proposal for producing new collective subjectivations. Based on the experiments and experiences of the nanopolitics group, this book proposes exercises, concepts and ideas as little maps and machines for action. Drawing on social movements, grassroots organizing, dance, theatre and bodywork, the reflections and practices here present strategies for navigating and reconfiguring the playing field of 'nanopolitics', activating its entanglement with the major politics of our time. Texts and exercises by: the nanopolitics group, esquizo-barcelona, David Vercauteren, Camila Mello and Fabiane Borges, Nelly Alfandari, Jorge Goia, Lottie Child, Carla Bottiglieri, Gabriella Alberti, Paolo Plotegher, Davyd Bodoun, Emma Dowling, Mara Ferreri, Manuela Zechner, Bue Rübner Hansen, Amit Rai, Anja Kanngieser, Lisa Burger, Irina Burger and Signe Lupnov.
