Random House THE ORIGINAL TEXT 'Shoot all the Bluejays you want, if you can hit 'em, but remember it's a sin to kill a Mockingbird.' Atticus Finch gives this advice to his children as he defends the real mockingbird of this classic novel - a black man charged with attacking a white girl. Through the eyes of Scout and Jem Finch, Lee explores the issues of race and class in the Deep South of the 1930s with compassion and humour. She also creates one of the great heroes of literature in their father, whose lone struggle for justice pricks the conscience of a town steeped in prejudice and hypocrisy.

FINDING WHAT WORKS IN HEALTH CARE

STANDARDS FOR SYSTEMATIC REVIEWS

National Academies Press Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. *Finding What Works in Health Care* also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

THE YELLOW WALLPAPER ILLUSTRATED

"The Yellow Wallpaper" is a short story by American writer Charlotte Perkins Gilman, first published in January 1892 in *The New England Magazine*.^[1] It is regarded as an important early work of American feminist literature, due to its illustration of the attitudes towards mental and physical health of women in the 19th century. Narrated in the first person, the story is a collection of journal entries written by a woman whose physician husband (John) has rented an old mansion for the summer. Forgoing other rooms in the house, the couple moves into the upstairs nursery. As a form of treatment, the unnamed woman is forbidden from working, and is encouraged to eat well and get plenty of air, so she can recuperate from what he calls a "temporary nervous depression - a slight hysterical tendency", a diagnosis common to women during that period

RESEARCH METHODOLOGIES IN SUPPLY CHAIN MANAGEMENT

Springer Science & Business Media For research in all subjects and among different philosophical paradigms, research methodologies form one of the key issues to rely on. This volume brings a series of papers together, which present different research methodologies as applied in supply chain management. This comprises review oriented papers that look at what kind of methodologies have been applied, as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies, which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore, we hope that this book will serve as a valid source for current and future researchers in the field. While the workshop on "Research Methodologies in Supply Chain Management" took place at the Supply Chain Management Center, Carl von Ossietzky University in Oldenburg, Germany, it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Copenhagen Business School and the Department of Production Management at the Vienna University of Economics and Business Administration. We would like to thank all those who contributed to the workshop and this book.

WHAT TO ASK THE PERSON IN THE MIRROR

CRITICAL QUESTIONS FOR BECOMING A MORE EFFECTIVE LEADER AND REACHING YOUR POTENTIAL

Harvard Business Press Successful leaders know that leadership is less often about having all the answers—and more often about asking the right questions. The challenge lies in being able to step back, reflect, and ask the key questions that are critical to your performance and your organization's effectiveness. In *What to Ask the Person in the Mirror*, leadership expert Robert Kaplan presents a process for asking the big questions that will enable you to diagnose problems, change course if necessary, and advance your career. He lays out areas of inquiry, including questions such as: Do I clearly articulate my vision and top priorities to my employees and key constituencies? Does the way I spend my time enable me to achieve my top priorities? Do I give subordinates timely and direct feedback they can act on? Do I actively seek feedback myself? Have I developed a succession roadmap? Is my organization's design aligned with the achievement of its objectives? Is my leadership style still effective, and does it reflect who I truly am? Packed with real-life situations, this highly readable and practical guide helps you learn to ask the right questions—and work through the answers in ways that are right for you. By asking these questions, you can tackle the inevitable challenges of leadership as you craft new strategies for staying on top of your game.

COMMONALITY AND INDIVIDUALITY IN ACADEMIC DISCOURSE

Peter Lang This volume explores the relationship between shared disciplinary norms and individual traits in academic speech and writing. Despite the standardising pressure of cultural and language-related factors, academic communication remains in many ways a highly personal affair, with active participation in a disciplinary community requiring a multidimensional discourse that combines the professional, institutional, social and individual identities of its members. The first section of the volume deals with tensions involving individual/collective values and the analysis of collective vs. individual discursive features in academic discourse. The second section comprises longitudinal investigations of the academic output of single scholars, so as to highlight the individuality in their choices and the reasons for not conforming with the commonality of conventions shared by their professional community. The third part deals with genres that are meant to impose commonality on the members of an academic community, not only in the drafting of specialized texts but also when these are reviewed or evaluated for possible publication.
