To Advance the Gospel

New Testament Studies

Wm. B. Eerdmans Publishing In this greatly expanded second edition of *To Advance the Gospel*, Joseph A. Fitzmyer has added eight new studies of important Pauline and Lucan topics not part of his original work. Together these nineteen essays consider a number of major issues in the study of the New Testament as well as in the life of the church today. Readers will find discussions of such themes as the priority of Mark and the "Q" source in Luke, crucifixion in ancient Palestine, the gospel in the theology of Paul, the ascension of Christ and Pentecost, and the resurrection of Christ according to the New Testament.

Exegetical Crossroads

Understanding Scripture in Judaism, Christianity and Islam in the Pre-Modern Orient

Walter de Gruyter GmbH & Co KG The art of interpreting Holy Scriptures flourished throughout the culturally heterogeneous pre-modern Orient among Jews, Christians and Muslims. Different ways of interpretation developed within each religion not without considering the others. How were the interactions and how productive were they for the further development of these traditions? Have there been blurred spaces of scholarly activity that transcended sectarian borders? What was the role played by mutual influences in profiling the own tradition against the others? These and other related questions are critically treated in the present volume.

The Greek Verb Revisited

A Fresh Approach for Biblical Exegesis

Lexham Press For the past 25 years, debate regarding the nature of tense and aspect in the Koine Greek verb has held New Testament studies at an impasse. *The Greek Verb Revisited* examines recent developments from the field of linguistics, which may dramatically shift the direction of this discussion. Readers will find an accessible introduction to the foundational issues, and more importantly, they will discover a way forward through the debate. Originally presented during a conference on the Greek verb supported by and held at Tyndale House and sponsored by the Faculty of Divinity of Cambridge University, the papers included in this collection represent the culmination of scholarly collaboration. The outcome is a practical and accessible overview of the Greek verb that moves beyond the current impasse by taking into account the latest scholarship from the fields of linguistics, Classics, and New Testament studies.

The Septuagint and Messianism

Peeters Publishers The question of the extent to which the Septuagint reflects an evolution in messianic belief in comparison with the Masoretic Text has come into prominence in recent years, and in view of the role played by messianism in Jewish belief of the late Second Temple period and in early Christianity it seemed very appropriate that "The Septuagint and Messianism" should be chosen as the theme of the 2004 Colloquium Biblicum Lovaniense. This volume contains the papers given at the Colloquium, which are concerned both with methodological issues and with the interpretation of specific texts (in practice the majority of the texts in the Septuagint for which a messianic interpretation has been claimed). The papers are very far from all reflecting the same approach, and it has frequently happened that the same texts have been treated by different contributors from very different viewpoints. But the fact such different viewpoints are expressed is a proper reflection of the complexity of the issues involved in the question of the extent of messianic belief in the Septuagint, and of the fact that the question requires a nuanced answer. It is in any case hoped that the varied approaches reflected in the papers will serve to make clear the underlying reasons for the differences between those who take a "minimalist" and those who take a "maximalist" view on the subject of the Septuagint and Messianism.

Perspectives in the Study of the Old Testament and Early Judaism

A Symposium in Honour of Adams S. Van Der Woude on the Occasion of His 70th Birthday

BRILL This volume contains the papers presented to a symposium organized by the Theological Faculty of the University of Groningen on the occasion of the seventieth birthday of Adam S. van der Woude, former Professor of Old Testament and Early Judaism and former head of the Qumran Institute at the same Faculty. The essays, eight in English and four in German, explore (through case studies) the developments over the last few years in the different areas of study of the Old Testament and of Early Judaism, observe the new perspectives opened in these areas and map the directions in which the research will be moving in the third millennium. The volume also includes a German version of the public lecture on the significance of the Dead Sea Scrolls for the Study of Old Testament and of Early Judaism delivered in Dutch by Van der Woude during the symposium.

Prologue to History

The Yahwist as Historian in Genesis

Westminster John Knox Press In this fascinating study, John Van Seters makes a compelling case for a new reading of Genesis. According to Van Seters, the book of Genesis represents the prologue to a major literary work, conceived and constructed by a single writer--an intellectual and historian. Van Seters argues that the author was a true historian who wrote history in the tradition of the ancient antiquarian.

The Septuagint and Modern Study

Eisenbrauns Twenty-five years after it first appeared, Jellicoe's classic work is still one of the most comprehensive introductions to the Septuagint and cognate studies. Its completeness makes it valuable not only as a textbook, but also as a reference tool for those working in the Septuagint. In bringing together the principal features of twentieth-century Septuagint studies, the author provides a wealth of valuable information. The first part of the book traces the origins and transmission history of the LXX. The second part moves to a discussion of the various LXX manuscripts, versions, and critical editions, along with a brief discussion of language and style. The appendixes, bibliography, and various indexes increase the resource value of this volume.

John, Qumran, and the Dead Sea Scrolls

Sixty Years of Discovery and Debate

Society of Biblical Lit The Dead Sea Scrolls reveal a Palestinian form of Second Temple Judaism in which the seeds of Johannine Christianity may have first sprouted. Although many texts from the Judean Desert are now widely available, the Scrolls have had little part in discussions of the Johannine literature over the past several decades. The essays in this book, ranging from focused studies of key passages in the Fourth Gospel to its broader social world, consider the past and potential impact of the Scrolls on Johannine studies in the context of a growing interest in the historical roots of the Johannine tradition and the origins and nature of the "Johannine community" and its relationship to mainstream Judaism. Future scholarship will be interested in connections between the Gospel of John and the Scrolls and also in Qumran Judaism and Johannine Christianity as parallel religious movements. The contributors are Mary L. Coloe and Tom Thatcher, Eileen Schuller, Paul N. Anderson, John Ashton, George J. Brooke, Brian J. Capper, Hannah K. Harrington, Loren T. Stuckenbruck, and James H. Charlesworth.

Paul and Ancient Rhetoric

Theory and Practice in the Hellenistic Context

Cambridge University Press The Apostle Paul lived and breathed in a Hellenistic culture that placed high value on the art of rhetoric, and recent advances in rhetorical criticism of the New Testament have resulted in a new emphasis on the rhetorical aspect of his letters. As many scholars have pointed out, however, it is not clear to what extent ancient rhetoric actually influenced Paul and his writing or how important rhetoric is for interpreting the Pauline corpus. This volume, containing contributions from major figures in the field, provides a nuanced examination of how ancient rhetoric should inform our understanding of Paul and his letters. The essays discuss Paul's historical context, present innovative advances in and trenchant critiques of rhetorical theory, and offer fresh readings of key Pauline texts. Outlining the strengths and weaknesses of a widely used approach, Paul and Ancient Rhetoric will be a valuable resource for New Testament and Classics scholars.

On the Trail of the Septuagint Translators

Collected Essays

Peeters Publishers The essays of this revised and expanded collection were written by Prof. Anneli Aejmelaeus over a period of 25 years. The thread that runs through all these essays and holds the collection together is translation technique, which is characterized as a central aspect of methodology rather than an object of study. Only by tracing the trail of the Septuagint translators is it possible to gain a reliable picture of the different translators and of the

Hebrew Vorlage their work was based on. The themes dealt with in the individual essays range from the study of syntactical features of the Greek language used in the Septuagint to the quest for the correct understanding of the underlying Hebrew, from the overall description of the translation character of certain biblical books to the application of translation technical data in textual criticism of the Hebrew text, and from methodological questions to the discussion of theological interpretation by the translators, reflecting the ongoing discussion in the international field of Septuagint studies and representing a significant and distinctive critical position in it.

Hidden Criticism?

The Methodology and Plausibility of the Search for a Counter-Imperial Subtext in Paul

Mohr Siebeck Is there a counter-imperial message beneath the surface of the text in Paul? Christoph Heilig analyzes the letters of the apostle and concludes that the hypothesis that we can identify critical "echoes" of the Roman Empire in Paul's letters needs to be modified for it to be maintained.

A Grammar of the Old Testament in Greek

According to the Septuagint

Wipf and Stock Publishers Thackeray's treatment of the Septuagint's grammar is a masterful reference work, which moved Septuagintal study forward. Why write a Grammar of a translation, in parts a servile translation, into a Greek which is far removed from the Attic standard, of an original which was often imperfectly understood? A sufficient answer might be that the work forms part of a larger whole, the Grammar of Hellenistic Greek, the claims of which, as bridging the gulf between the ancient and the modern tongue upon the attention of philhellenes and philologists have in recent years begun to receive their due recognition from a growing company of scholars. The Septuagint, in view both of the period which it covers and the variety of its styles, ranging from the non-literary vernacular to the artificial Atticistic, affords the most promising ground for the investigation of the peculiarities of the Hellenistic or 'common' language . . . Though of less paramount importance than the New Testament, the fact that it was the only form in which the older Scriptures were known to many generations of Jews and Christians and the deep influence which it exercised upon New Testament and Patristic writers justify a separate treatment of its language. Again, the fact that it is in the main translation gives it a special character and raises the difficult question of the extent of Semitic influence upon the written and spoken Greek of a bilingual people. -from the Preface Contents I. Scripture in Transition

Essays on Septuagint, Hebrew Bible, and Dead Sea Scrolls in Honour of Raija Sollamo

BRILL Altogether 46 essays in honour of Professor Raija Sollamo contribute to explore various aspects of the rich textual material around the turn of the era. At that time Scripture was not yet fixed; various writings and collections of writings were considered authoritative but their form was more or less in transition. The appearance of the first biblical translations are part of this transitional process. The Septuagint in particular provides us evidence and concrete examples of those textual traditions and interpretations that were in use in various communities. Furthermore, several biblical concepts, themes and writings were reinterpreted and actualised in the Dead Sea Scrolls, illuminating the transitions that took place in one faction of Judaism. The topics of the contributions are divided into five parts: Translation and Interpretation; Textual History; Hebrew and Greek Linguistics; Dead Sea Scrolls; Present-Day.

Experiments in Ethics

Harvard University Press In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for

various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.

Invitation to the Septuagint

Baker Academic This comprehensive yet user-friendly primer to the Septuagint (LXX) acquaints readers with the Greek versions of the Old Testament. It is accessible to students, assuming no prior knowledge about the Septuagint, yet is also informative for seasoned scholars. The authors, both prominent Septuagint scholars, explore the history of the LXX, the various versions of it available, and its importance for biblical studies. This new edition has been substantially revised, expanded, and updated to reflect major advances in Septuagint studies. Appendixes offer helpful reference resources for further study.

The Text-critical Use of the Septuagint in Biblical Research

Translation and Relevance

Cognition and Context

Routledge From the outset, this book has evoked strong responses. Its central claim is that given a comprehensive theory of inferential communication, there is no need for a special theory of translation. This has been praised by some as "wise and right" (Dell Hymes) and condemned by others as "astonishing, not to say perverse" (Kirsten Malmkjaer). Gutt's call to move from semiotics to an inferential paradigm of communication remains a challenge for many. The debate continues and so does the demand for the book, resulting in this second edition. There is a 'Postscript' entitled 'A decade later', where the author addresses peer criticism, especially from those involved in the movement of 'translation studies', and attempts to bring out more clearly the unique mandate of translation. New perspectives, such as authenticity, are also introduced. Marginal notes, some tongue-in-cheek, liven up the discussion and new references ensure its currency.

Towards a General Theory of Translational Action

Skopos Theory Explained

Routledge This is the first English translation of the seminal book by Katharina Reiß and Hans Vermeer, *Grundlegung einer allgemeinen Translationstheorie*, first published in 1984. The first part of the book was written by Vermeer and explains the theoretical foundations and basic principles of skopos theory as a general theory of translation and interpreting or 'translational action', whereas the second part, penned by Katharina Reiß, seeks to integrate her text-typological approach, first presented in 1971, as a 'specific theory' that focuses on those cases in which the skopos requires equivalence of functions between the source and target texts. Almost 30 years after it first appeared, this key publication is now finally accessible to the next generations of translation scholars. In her translation, Christiane Nord

attempts to put skopos theory and her own concept of 'function plus loyalty' to the test, by producing a comprehensible, acceptable text for a rather heterogeneous audience of English-speaking students and scholars all over the world, at the same time as acting as a loyal intermediary for the authors, to whom she feels deeply indebted as a former student and colleague.

Translation Criticism- Potentials and Limitations

Categories and Criteria for Translation Quality Assessment

Routledge Katharina Reiss's now classic contribution to Translation Studies, *Möglichkeiten und Grenzen der Übersetzungskritik: Kategorien und Kriterien für eine sachgerechte Beurteilung von Übersetzungen*, first appeared in 1971. This is the first English translation of this major work, allowing students and practitioners of translation in the English-speaking world to make more extensive use of Reiss's pioneering treatment of a central theme in translation: how to develop reliable criteria for the systematic evaluation of translations. Using a wealth of interesting and varied examples, Reiss offers a systematic and illuminating text typology, a pragmatic approach to text analysis, a functional perspective on translation and a hermeneutic view of the translator, thus accounting for some of the most important aspects of the translation process: the text (both source and target versions), the conditions which determine the translator's decisions, and the translator as an individual whose personal interpretation has to be respected by any critic. In the three decades since Katharina Reiss wrote, the terminology of translation studies has evolved on many fronts. Erroll Rhodes' translation strikes an optimal balance between remaining faithful to the original presentation and using terminology that today's reader would generally understand and value.

Think! Different

Use the Power!

Think! Different is divested of otherwise typical references to moral or religious standards, because the law of attraction like all natural laws isn't influenced by morality or religion. The author shows that many opinions presented in success book for example that hard work, honesty and appreciation are required to succeed are absurd, as they are all based on religious and cultural imprints and in fact contradict the law of attraction.

A Study in the Translation and Vorlage of LXX Ezekiel 40-48

Society of Biblical Lit This work examines the Vorlage of LXX Ezekiel 40-48, arguing that it represents a reworking of these chapters in light of the book as a whole. The author applies Skopostheorie, a modern functional theory of translation, to understand the goals of translation in LXX Ezekiel 40-48, which include highlighting the distance and hence authority of the source text, suggesting solutions to problems posed by the text, and updating elements of the vision in light of Hellenistic culture. The goal of the translation was both to preserve the authority and to heighten the persuasive power of these chapters for Hellenistic readers of LXX Ezekiel.

The Pastoral Epistles

A&C Black For over one hundred years, the International Critical Commentary series has held a special place among works on the Bible. It has sought to bring together all the relevant aids to exegesis — linguistic and textual no less than archaeological, historical, literary and theological — with a level of comprehension and quality of scholarship unmatched

by any other series. No attempt has been made to secure a uniform theological or critical approach to the biblical text: contributors have been invited for their scholarly distinction, not for their adherence to any one school of thought. The first paperback editions to be published cover the heart of the New Testament, providing a wealth of information and research in accessible and attractive format.

Transformations in the Septuagint

Towards an Interaction of Septuagint Studies and Translation Studies

Peeters Publishers This study inaugurates interaction between Septuagint research and Translation Studies. From the field of Translation Studies the author has singled out approaches suited to LXX-research. The historical survey of views of translation in Antiquity reveals that among Greeks, Romans, Egyptians and Jews similar disputes about language and translatability existed. Three Septuagint-chapters, Genesis 2, Isaiah 1 and Proverbs 6, are analysed in-depth, whereby the transformations ('shifts') are categorised with help of linguistic Translation Studies. Before ascribing 'deviations' either to the translator's ideology or to a variant in the Hebrew parent text, we must ascertain that the 'deviation' does not have a purely translational origin. Every transformation has a reason, and by categorizing the reasons behind all transformations one can trace the translational hierarchy that (un)consciously guided the translator. The rationale behind a transformation can be detected by analysing the literal alternative which the translator rejected. The conclusions of this study are of importance for Translation Studies, Classical Studies and Theology.

Translating a Translation

The LXX and Its Modern Translations in the Context of Early Judaism

Peeters Pub & Booksellers As part of a Joint Project of Bilateral Scientific Cooperation between the Katholieke Universiteit Leuven (Belgium) and University of Stellenbosch (South Africa), the Centre for Septuagint Studies and Textual Criticism (Faculty of Theology, K.U.Leuven) organised a Specialists' Symposium on the Septuagint Translation. This scholarly meeting took place from 4 to 6 December 2006 at the Leuven Faculty of Theology, Research Unit Biblical Studies. The symposium's aim was to survey contemporary research within the realm of the translations of the Septuagint. Therefore, the most important Septuagint translation projects were confronted with each other, from the perspective of their objective and methodology as well as with regard to their concrete application in particular cases or examples. The meeting was exclusively intended for specialists in the field. The present book contains the proceedings of this symposium. It offers the full text of the contributions by J. Cook, R. Sollamo, H. Ausloos & B. Lemmelijn, G. Dorival, K. Hauspie, C. Dogniez, M. Karrer, W. Kraus, E. Bons, H.-J. Fabry, A. Pietersma, D. Buchner, C. Boyd-Taylor, H. Van Rooy, J. Naude, A. Piquer, P. Torijano & Julio Trebolle Barrera and N. Fernandez Marcos. In this way, it reflects the views of leading voices in contemporary research on the Septuagint's translation, and thus confronts different methodological perspectives on a most intriguing research topic.

Academic Charisma and the Origins of the Research

University

University of Chicago Press Tracing the transformation of early modern academics into modern researchers from the Renaissance to Romanticism, *Academic Charisma and the Origins of the Research University* uses the history of the university and reframes the "Protestant Ethic" to reconsider the conditions of knowledge production in the modern world. William Clark argues that the research university—which originated in German Protestant lands and spread globally in the nineteenth and twentieth centuries—developed in response to market forces and bureaucracy, producing a new kind of academic whose goal was to establish originality and achieve fame through publication. With an astonishing wealth of research, *Academic Charisma and the Origins of the Research University* investigates the origins and evolving fixtures of academic life: the lecture catalogue, the library catalog, the grading system, the conduct of oral and written exams, the roles of conversation and the writing of research papers in seminars, the writing and oral defense of the doctoral dissertation, the ethos of "lecturing with applause" and "publish or perish," and the role of reviews and rumor. This is a grand, ambitious book that should be required reading for every academic.
