Social Studies for Secondary Schools

Teaching to Learn, Learning to Teach

Routledge This popular text advocates an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers. Based in practice and experience, it offers systematic support and open, honest advice for new teachers, is conversational not pedantic, and provides lots of examples. While the structure and most of the topics remain largely the same as before, this Third Edition presents new lesson ideas in every chapter especially designed to help new teachers to address learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms puts a heavier focus on what is important to know and why includes new essays on the politics of social studies education responds to opponents of project- or activity-based social studies instruction and multicultural education with a sharpened defense of both of these approaches throughout the book Intended as a text for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice.

Bauer. Susan Wise Bauer's narrative world history series is widely used in advanced high school history classes, as well as by home educating parents. The Study and Teaching Guide, designed for use by both parents and teachers, provides a full curriculum with study questions and answers, critical thinking assignments, essay topics, instructor rubrics, and test forms. Explanations for answers and teaching tips are also included. The Study and Teaching Guide, designed by historian and teacher Julia Kaziewicz in cooperation with Susan Wise Bauer, makes The History of the Ancient World (recommended for high school study in The Well-Trained Mind: A Guide to Classical Education at Home) even more accessible to educators and parents alike.

World's Story 1: The Ancients (Teacher Guide)

Creation to the Roman Empire

New Leaf Publishing Group **Ancient history is fascinating, but it can be difficult to find material that teaches it from a Christian perspective. Even harder is finding a history curriculum that captivates students. But Angela O'Dell's newly revised The World's Story 1 - The Ancients does both! Students will learn all about the ancient civilizations of the Middle East, Europe, Africa, Asia, and the Americas from a strong Biblical perspective. Focuses on History and interweaves a Christian perspective throughout. Features an engaging historical narrative. First volume in a three-book world history series for upper elementary and junior high students. The text covers Biblical history, also educating students about civilizations mentioned in the Bible, including ancient Egypt, ancient Israel, ancient Babylon, ancient Persia, ancient Greece, and ancient Rome, up to the development of the early Church. It also discusses other ancient civilizations from around the world.**

Ancient Rome 2nd Edition Teacher's Guide

Questions for the Thinker Study Guide Series

[Createspace Independent Publishing Platform](#) **Fran Rutherford's two-volume Ancient Rome (Student Book and Teacher's Guide) provides an ideal course for parents who homeschool high school students and for teachers of secondary education who wish to introduce their students to the great books of Western civilization, "the best that has been thought and said," in Matthew Arnold's famous phrase. The choice of great books is appropriate, balanced, and coherent—each book illuminating an important facet of Roman thought and culture and embodying the moral wisdom of the Greek mind. The course covers Livy's Early History of Rome and War with Hannibal, Sallust's Conspiracy of Catiline, Cicero's Attack on an Enemy of Freedom and Attack on Misgovernment, Tacitus' The Annals of Imperial Rome, Virgil's The Aeneid, Ovid's Metamorphoses, Marcus Aurelius' Meditations, Early Christian Writings, St. Augustine's Confessions and City of God, Plautus' The Brothers Menaechmi, Terence's The Brothers—a rich banquet for the mind that integrates history, literature, and philosophy for a beginning humanities student. Comprised of brief but substantive introductions to the authors and to the works, the book then poses simple but penetrating questions about each chapter or major part of the book. It also presents probing questions for further reflection and discussion. For example, the questions at the end of a chapter test simple reading comprehension: "What virtue did Scipio pride himself in?" "What did Scipio do the day after taking New Carthage?" The Questions for Further Thought are contemplative and thought-provoking: "What was the significance of the names Trebia, Trasimene and Cannae?" and "Do modern people have the staying power to remain at war for such protracted periods as we saw in the study of Ancient Rome? Why?" The Teacher's Guide of course offers the answers to the factual questions, but it provides special insights to address the Questions for Further Thought. "Why did Turnus lament his escape from death?" To these ancient warriors, death in battle was a guarantee that their memory would be honored. They were concerned about that legacy and preferred that to an escape from death which carried no respect." The questions and answers are always lucid, straightforward and penetrating. The other features of the book that make it a valuable resource are the maps, illustrations, vocabulary, and explanation of technical terms. The map of Hannibal's route, a diagram of the Roman theater, and the Words to Know at the end of each chapter (e.g., pillory, scruples, desultory, cognomen) all broaden the mind and provide breadth and depth to the course. In short, these two volumes provide a bone fide traditional, classical liberal arts education that introduces students to the reality of philosophical or universal truth, to the unchanging natural moral law that explains the nature of tragedy and the events of history, and to**

the Romans' passionate love of knowledge and desire for glory. It transmits to students the patrimony of Roman civilization-the culture that discerned the difference between living and living well, between being "civilized" and being "barbaric." For students to know these perennial truths about human nature and the human condition is the beginning of wisdom-the goal of all true education.

A Companion to Global Gender History

John Wiley & Sons Provides a completely updated survey of the major issues in gender history from geographical, chronological, and topical perspectives This new edition examines the history of women over thousands of years, studies their interaction with men in a gendered world, and looks at the role of gender in shaping human behavior. The Emergence of Civilisation

From Hunting and Gathering to Agriculture, Cities and the State of the Near East

Routledge **The Emergence of Civilisation is a major contribution to our understanding of the development of urban culture and social stratification in the Near Eastern region. Charles Maisels argues that our present assumptions about state formation, based on nineteenth century speculations, are wrong. His investigation illuminates the changes in scale, complexity and hierarchy which accompany the development of civilisation. The book draws conclusions about the dynamics of social change and the processes of social evolution in general, applying those concepts to the rise of Greece and Rome, and to the collapse of the classical Mediterranean world.**

Social Studies

Third Edition

Waveland Press **According to Piaget, all higher-order thinking skills have their bases in activities involving concrete manipulation and observation. The third edition of this highly regarded collection of social studies activities continues to be based on the premise that children learn best through experiences and activities—learning by doing. It features new activities for each social studies category (geography, history, anthropology, sociology, economics, political science, and interdisciplinary). Three important new additions to the key elements of the easy-to-follow activity format make it easier for instructors to meet standards-based curriculum requirements: A detailed treatment of National Council of Social Studies standards addressed; specific multiple intelligences addressed (also reinforced by a multiple intelligences section in the back of the book); and useful Web site(s) for group/individual research (URLs for sites that will expand or enrich the learning experience for the activity). By engaging pupils in meaningful, worthwhile social studies activities, instructors can emphasize the processes of learning rather than the products, resulting in a richly rewarding experience for pupils and teacher alike.**

Based on the work of urban, public school teachers over the course of three years, the SKIIP approach was developed to assist teachers in the daunting task of integrating new pedagogies, curricula, and technologies into their practice.

Pan's Travail

Environmental Problems of the Ancient Greeks and Romans

"Many people express surprise," writes J. Donald Hughes, "when they are told that environmental problems existed in the ancient world; they are used to thinking of the environment as an exclusively modern concern. But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene, but in many cases they were aware of them and commented on them." "In Pan's Travail Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world. Focusing on Greece and Rome, as well as on areas subject to their influences, Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin. He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing, soil erosion, depletion of wildlife and natural resources, pollution, and urban problems such as water supply and sewage disposal. He also compares the ancient world's environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Crossing Jordan

North American Contributions to the Archaeology of Jordan

Routledge Jordan is a key area of migration within the Levantine corridor that links the continents of Africa and Asia. 'Crossing Jordan' examines the peoples and cultures that have travelled across Jordan from antiquity to the present. The book offers a critical analysis of recent discoveries and archaeological models in Jordan and highlights the significant contribution of North American archaeologists to the field. Leading archaeologists explore the theory and methodology of archaeology in Jordan in essays which range across prehistory, the Bronze Age, the Iron Age, the Hellenistic and Roman periods, Nabatean civilization, the Byzantine period, and Islamic civilization. The volume provides an up-to-date guide to the archaeological heritage of Jordan, being an important resource for scholars and students of Jordan's history, as well as citizens, non-governmental organizations and tourists.

The Way Class Works

Readings on School, Family, and the Economy

Routledge Since the 1980s, the relationship between social class and education has been overshadowed by scholarship more generally targeting issues of race, gender, and representation. Today, with the global economy deeply immersed in social inequalities, there is pressing need for serious class-based analyses of schooling, family life and social structure. *The Way Class Works* is a collection of twenty-four groundbreaking essays on the material conditions of social class and the ways in which class is produced "on the ground" in educational institutions and families. Written by the most visible and important scholars in education and the social sciences, these timely essays explore the production of class in and through the economy, family, and school, while simultaneously interrogating and challenging our understandings of social class as linked to race, gender, and nation. With essays by distinguished scholars and questions for further reflection and discussion, *The Way Class Works* will be an invaluable resource for students and scholars in education, sociology, and beyond.
