Round About the Earth Circumnavigation from Magellan to Orbit Simon and Schuster In this first full history of around-the-world travel, Joyce E. Chaplin brilliantly tells the story of circumnavigation. Round About the Earth is a witty, erudite, and colorful account of the outrageous ambitions that have inspired men and women to circle the entire planet. For almost five hundred years, human beings have been finding ways to circle the Earth—by sail, steam, or liquid fuel; by cycling, driving, flying, going into orbit, even by using their own bodily power. The story begins with the first centuries of circumnavigation, when few survived the attempt: in 1519, Ferdinand Magellan left Spain with five ships and 270 men, but only one ship and thirty-five men returned, not including Magellan, who died in the Philippines. Starting with these dangerous voyages, Joyce Chaplin takes us on a trip of our own as we travel with Francis Drake, William Dampier, Louis-Antoine de Bougainville, and James Cook. Eventually sea travel grew much safer and passengers came on board. The most famous was Charles Darwin, but some intrepid women became circumnavigators too—a Lady Brassey, for example. Circumnavigation became a fad, as captured in Jules Verne's classic novel, Around the World in Eighty Days. Once continental railroads were built, circumnavigators could traverse sea and land. Newspapers sponsored racing contests, and people sought ways to distinguish themselves—by bicycling around the world, for instance, or by sailing solo. Steamships turned round-the-world travel into a luxurious experience, as with the tours of Thomas Cook & Son. Famous authors wrote up their adventures, including Mark Twain and Jack London and Elizabeth Jane Cochrane (better known as Nellie Bly). Finally humans took to the skies to circle the globe in airplanes. Not much later, Sputnik, Gagarin, and Glenn pioneered a new kind of circumnavigation— in orbit. Through it all, the desire to take on the planet has tested the courage and capacity of the bold men and women who took up the challenge. Their exploits show us why we think of the Earth as home. Round About the Earth is itself a thrilling adventure. Fogg is a rich English gentleman living in solitude. Despite his wealth, Fogg lives a modest life with habits carried out with mathematical precision. Very little can be said about his social life other than that he is a member of the Reform Club. Having dismissed his former valet, James Foster, for bringing him shaving water at 84 °F (29 °C) instead of 86 °F (30 °C), Fogg hires a Frenchman by the name of Jean Passepartout as a replacement. At the Reform Club, Fogg gets involved in an argument over an article in The Daily Telegraph stating that with the opening of a new railway section in India, it is now possible to travel around the world in 80 days. He accepts a wager for £20,000 from his fellow club members, which he will receive if he makes it around the world in 80 days. Accompanied by Passepartout, he leaves London by train at 8:45 P.M. on Wednesday, October 2, 1872, and is due back at the Reform Club at the same time 80 days later, Saturday, December 21, 1872. They argue that the major events in the Bible such as the victory of Abraham against Chedorlaomer, an unknown king of Elam around 2000 BCE, the victory of Moses against an unknown Pharaoh around 1500 BCE or the victory of Esther, an unknown Persian Queen, against an unknown vizier of Xerxes, never existed because they left absolutely no evidence. They also explain that according to what we know today, these events could not have occurred. These logical arguments are impressive but a precise chronological analysis based on absolute dates, coupled with a rigorous historical investigation, shows that all those major events really took place at the dates and places indicated. General Catalogue of Printed Books Ten-year Supplement, 1956-1965 From the Earth to the Moon and Round the Moon Open Road Media A team of nineteenth-century American engineers builds a rocket to the moon in this visionary novel from the author of Twenty Thousand Leagues Under the Sea and Around the World in Eighty Days During the Civil War, the members of the Baltimore Gun Club delighted themselves by designing artillery the likes of which the world had never seen. But when the South eventually surrenders, the gun club languishes, until its president, Impey Barbicane, conceives of a project so preposterous it must be attempted: to build a gun large enough to fire a rocket to the moon. From raising the money to casting the cannon to readying it to fire, the gun club overcomes one seemingly insurmountable obstacle after another. But when a rival engineer and an intrepid French adventurer join Barbicane on the spaceship's inaugural voyage, the three men soon discover that getting to the moon is only half the battle: Making it home will be their toughest challenge yet. From the Earth to the Moon and its sequel, Round the Moon, were published nearly a century before the Apollo missions. Suspenseful, humorous, and prophetic, these captivating adventure stories sparked mankind's enduring fascination with space travel. This ebook has been professionally proofread to ensure accuracy and readability on all devices. Around The World In Eighty Days Hachette UK 'The pace of this kind of travel has not much changed since Fogg set out in 1872. Trains may be a little faster, but there are certainly no high-speed rail links yet across India, China or the USA. Passenger services have practically disappeared from the world's shipping lanes ... Recourse to air travel, even as a convenient means of escape, was not allowed.' Following the route taken by Phileas Fogg 115 years earlier, Michael Palin set out from the Reform Club to circumnavigate the world. The rules were simple, but nothing else about the trip was straightforward... From a tour of Venice on a rubbish barge to ship spotting at the Suez Canal and the bicycle rush hour and snake snacks in China, this is an unparalleled tribute to man's ability to make life difficult for himself. July 1, 1876-Dec. 31, 1910 Fiction, 1876-1983: Authors New York : Bowker Amazing Journeys Five Visionary Classics State University of New York Press New, superbly translated omnibus of five of Jules Verne's most renown stories. "One of the best storytellers who ever lived."--Arthur C. Clarke In one dazzling decade, French novelist Jules Verne took readers places they'd never gone before. . .the age of dinosaurs. . .the undersea realm of Atlantis. . .the craters and crevices of the moon. . .and a whirlwind aerial tour of the planet earth! Though he penned his unforgettable yarns in French, Verne plunked big parts of them down in America. And he himself possessed an American sassiness, nerve, and sense of humor, so Americans have returned the compliment: we've released dozens of Hollywood films based on his astonishing tales, and we've created the U.S.S. Nautilus, the NASA space missions, and other technological triumphs that have turned Verne's visions into practical reality. Here are Jules Verne's best-loved novels in one convenient omnibus volume, but with a huge difference. This book features new, accurate, accessible, and unabridged translations of these five visionary classics, translations that are complete down to the smallest substantive detail, that showcase Verne's farseeing science with unprecedented clarity and accuracy, capture the wit, prankishness, and showbiz flamboyance of one of literature's leading humorists and satirists. This is a Verne almost completely unknown to Americans. . .yet a Verne who has an uncannily American mindset! So these heroes and happenings are part of our heritage: Phileas Fogg chugging across the wild, wild west. . .the impossible underground journey of Professor Lidenbrock. . . the deep-sea exploits of secretive Captain Nemo. . .and a moon shot so realistic, it inspired U.S. astronaut Frank Borman a full century later. Jules Verne was a science buff with a showbiz background, and finally these classic stories have a translator with the same orientation: Frederick Paul Walter is one of America's foremost Verne scholars. . . But he's also a scriptwriter, broadcaster, and part-time fossil hunter! Enriched with dozens of classic illustrations, The Amazing Journeys of Jules Verne will be a family favorite in every home library. Jules Verne was born in 1828 into a French lawyering family in the Atlantic coastal city of Nantes. Though his father sent him off to a Paris law school, young Jules had been writing on the side since his early teens, and his pet topics were the theater, travel, and science. Predictably enough, his legal studies led nowhere, so Verne took a day job with a stock brokerage, in his off hours penning scripts for farces and musical comedies while also publishing short stories and novelettes of scientific exploration and adventure. His big breakthrough came when he combined his theatrical knack with his scientific bent and in 1863 published an African adventure yarn, Five Weeks in a Balloon. After that and till his death in 1905, Jules Verne was one of the planet's best-loved and best-selling novelists, publishing over sixty books. In addition to the five visionary classics in this volume, other imaginative favorites by him include The Mysterious Island, Hector Servadac, the Begum's Millions, Master of the World, and The Meteor Hunt. Verne ranks among the five most translated authors in history, along with Mark Twain and the Bible .Frederick Paul Walter is a scriptwriter, broadcaster, librarian, and amateur paleontologist. A Trustee of the North American Jules Verne Society, he served as its Vice President from 2000 to 2008. Walter has produced many media programs, articles, reviews, and papers on aspects of Jules Verne and has collaborated on translations and scholarly editions of three Verne novels: The Meteor Hunt, The Mighty Orinoco, and a special edition of 20,000 Leagues Under the Seas for the U.S. Naval Institute in Annapolis. Known to friends as Rick Walter, he lives in Albuquerque, New Mexico. Railway News, Finance and Joint-stock Companies' Journal
