Faces of Suicide: Volume 1 is a collection of stories from the heart, written to show the world that they lived and their lives mattered. Some of the stories may inspire those who are reluctant travelers on this same road. The 60 stories were compiled by members of the Parents of Suicides - Friends and Families of Suicides Internet Community (POS - FFOS).

Periodic Orbits: F. R. Moulton's Quest for a New Lunar Theory

American Mathematical Soc. Owing to its simple formulation and intractable nature, along with its application to the lunar theory, the three-body problem has since it was first studied by Newton in the Principia attracted the attention of many of the world's most gifted mathematicians and astronomers. Two of these, Euler and Lagrange, discovered the problem's first periodic solutions. However, it was not until Hill's discovery in the late 1870s of the variational orbit that the importance of the periodic solutions was fully recognized, most notably by Poincaré, but also by others such as Sir George Darwin. The book begins with a detailed description of the early history of the three-body problem and its periodic solutions, with chapters dedicated to the pioneering work of Hill, Poincaré, and Darwin. This is followed by the first in-depth account of the contribution to the subject by the mathematical astronomer Forest Ray Moulton and his research students at the University of Chicago. The author reveals how Moulton's Periodic Orbits, published in 1920 and running to some 500 pages, arose from Moulton's ambitious goal of creating an entirely new lunar theory. The methods Moulton developed in the pursuit of this goal are described and an examination is made of both the reception of his work and his legacy for future generations of researchers.

Similes Dictionary

Visible Ink Press Whether it invokes hard work or merely a hen-house, a good simile is like a good picture—it's worth a thousand words. Packed with more than 16,000 imaginative, colorful phrases—from “abandoned as a used Kleenex” to “quiet as an eel swimming in oil”—the Similes Dictionary will help any politician, writer, or lover of language find just the right saying, be it original or banal, verbose or succinct. Your thoughts will never be “as tedious as a twice-told tale” or “dry as the Congressional Record.” Choose from elegant turns of phrases “as useful as a Swiss army knife” and “varied as expressions of the human face”. Citing more than 2,000 sources—from the Bible, Socrates, Shakespeare, Mark Twain, and H. L. Mencken to popular movies, music, and television shows—the Similes Dictionary covers hundreds of subjects broken into thematic categories that include topics such as virtue, anger, age, ambition, importance, and youth, helping you find the fitting phrase quickly and easily. Perfect for setting the atmosphere, making a point, or helping spin a tale with economy, intelligence, and ingenuity, the vivid comparisons found in this collection will inspire anyone.

The Boston Renaissance

Race, Space, and Economic Change in an American Metropolis

Russell Sage Foundation This volume documents metropolitan Boston's metamorphosis from a casualty of manufacturing decline in the 1970s to a paragon of the high-tech and service industries in the 1990s. The city's rebound has been part of a wider regional renaissance, as new commercial centers have sprung up outside the city limits. A stream of immigrants have flowed into the area, redrawing the map of ethnic relations in the city. While Boston's vaunted mind-based economy rewards the highly educated, many unskilled workers have also found opportunities servicing the city's growing health and education industries. Boston's renaissance remains uneven, and the authors identify a variety of handicaps (low education, unstable employment, single parenthood) that still hold minorities back. Nonetheless this book presents Boston as a hopeful example of how America's older cities can reinvent themselves in the wake of suburbanization and deindustrialization. Mathematical Theory of Scattering Resonances

American Mathematical Soc. Scattering resonances generalize bound states/eigenvalues for systems in which energy can scatter to infinity. A typical resonance has a rate of oscillation (just as a bound state does) and a rate of decay. Although the notion is intrinsically dynamical, an elegant mathematical formulation comes from considering meromorphic continuations of Green's functions. The poles of these meromorphic continuations capture physical information by identifying the rate of oscillation with the real part of a pole and the rate of decay with its imaginary part. An example from mathematics is given by the zeros of the Riemann zeta function: they are, essentially, the resonances of the Laplacian on the modular surface. The Riemann hypothesis then states that the decay rates for the modular surface are all either 0 or 1 . An example from physics is given by quasi-normal modes of black holes which appear in long-time asymptotics of gravitational waves. This book concentrates mostly on the simplest case of scattering by compactly supported potentials but provides pointers to modern literature where more general cases are studied. It also presents a recent approach to the study of resonances on asymptotically hyperbolic manifolds. The last two chapters are devoted to semiclassical methods in the study of resonances.

Our Own Dear Land

Cysticercosis of the Human Nervous System

Springer Science & Business Media Neurocysticercosis (neural infection by larvae of Taenia solium) occurs when humans become intermediate hosts of the tapeworm Taenia solium after ingesting its eggs. The disease is now the most common helminthic infection of the nervous system in humans, and its prevalence has risen significantly even in countries where it was formerly considered exotic. The introduction of modern neuroimaging and serologic techniques has improved the diagnosis of neurocysticercosis; furthermore, the development of potent cysticidal drugs has changed the prognosis of most affected patients. Nevertheless, much remains to be learned about this parasitic disease. This book provides a comprehensive and up-to-date review of the various aspects of cysticercosis of the nervous system that will be of interest to all who are involved in the care of patients with this disease. Epidemiology, neuropathology, immunopathogenesis, clinical manifestations, diagnosis, and management are all thoroughly discussed based on current evidence and practice.

The Nazis

Scalo Verlag Ac Piotr Uklanski, a New York based artist, has put together a most surprising and at the same time simple series of pictures. With them he has created an art book consisting of 160 portraits of movie actors playing Nazis. This volume is as much about history as it is about the industry of entertainment. In 1998, The Observer, London, wrote about these compelling and at the same time enstranging portraits: "If you are an actor, chances are that you will play a Nazi, or at least a cruel German officer in the Second World War. How do you make yourself look the part? First comes the matter of expression. Mug up on verbal cliches: 'ice-cold eyes', 'thin, compressed lips', with if possible, 'the hint of cynical smile playing around the corners of the mouth'. An 'air of cold command', rigid jaw muscles denoting 'utter ruthlessness', a tiny flare of nostrils to suggest unspeakable depths of sadism. Fine! Now put on the gear: the tunic with its collar-tabs of SS lightning flashes, the tall black cap with eagle, swastika and death's head. Stunning! Now all you need is that gargling accent unlike any noise ever uttered by a real German."

For My Legionaries

For My Legionaries is the passionate autobiography of Corneliu Zelea Codreanu, a Romanian patriot from the early 20th Century who founded the Legion of Michael the Archangel, also known as The Iron Guard. This unprecedented movement saw itself as a crusade in the modern world, battling against liberalism, political corruption, Communism, and the threat of foreign cultural domination from Jewish organizations. Combining Christian spirituality, ethnic nationalism, supra-personal devotion to one's people and king, and a warrior ethos, which culminated in confrontations with the police and army, assassinations, public trials, and murder. This new edition of For My Legionaries is distinguishable from previous editions by the inclusion of 100 pages of new text, footnotes, appendices and photographs which are a crucial aid to understanding the book and its context. With an introduction by Kerry Bolton, and a historical overview of the entire history of the Legionary Movement from its beginnings to the present time by Lucian Tudor, this edition of For My Legionaries is the most comprehensive edition published to date.

Moments of Grace

Sharing our stories, who we are, what we love, how we feel, why we fear, connects us to one another. Weaving moments of grace with spiritual practices that have grounded her through life's challenges, Laurie Blefeld invites the reader into her sacramental stories. You will find yourself in Laurie's stories and reclaim bits and pieces of your own. "Our days are a stream of moments - some devastating, some down to earth and some filled with ineffable meaning. Laurie Blefeld has written a book full of tender moments that warm the heart and remind us to be grateful for and conscious of how laced with grace our lives really are. This is a book to enjoy and treasure."-Gunilla Norris, author of Sheltered in the Heart and Companions on the Way: A Little Book of Heart-full Practices "Laurie's transformational stories, told in her authentic and lyrical voice, are evocative of the highs and lows in everyone's life. Laurie's generous prose connects us to her family's living history - and through it to our own. She is a natural spiritual teacher. Moments of Grace is luminous, warm, comforting and filled with such good practices."- Dr. Joan Borysenko, from the Foreword
