Best of HR - Berufebilder.de® What the 2nd edition brings you: You support climate protection, quickly receive compact information and checklists from experts (overview and press comments in the book preview) as well as advice that has been tested in practice, which also leads to success step by step thanks to AddOn. Because if you inspire and enthuse your employees as a boss, you can save yourself any laboriously trained motivation tool. Being authentic is the magic word, especially online, in digital communication and social media. In our agile age, it is becoming increasingly important to master this and to be aware of one's impact both inside and outside the company. This is especially true in crisis situations, where not only personnel management and personnel development but also psychological skills are in demand. The boss always acts somewhere between rule giver, organizer and animator, who always has an open ear for his employees, but also guides them. Accordingly, the performance reviews dreaded by all employees quickly become a balancing act between offering cooperation and wrangling over competencies. All too often, a healthy feedback culture is lacking in which even disputes are not a problem. But this is the only way that productive, motivated and fruitful cooperation in teams can develop at all. This book shows what is important in this process. We give you the best possible help on the topics of career, finance, management, personnel work and life assistance. For this purpose, we gather in each book the best experts in their field as authors - detailed biographies in the book - , who give a comprehensive overview of the topic and additionally offer you success planner workbooks in printed form. Our guidebooks are aimed primarily at beginners. Readers who are looking for more in-depth information can get it for free as an add-on with individual content in German and English as desired. This concept is made possible by a particularly efficient, innovative digital process and Deep Learning, AI systems that use neural networks in translation. Moreover, we give at least 5 percent of our proceeds from book sales to social and sustainable projects. For example, we endow scholarships or support innovative ideas as well as climate protection initiatives and in some cases also receive government funding for this. With our translations from German into English we improve the quality of neural machine learning and thus contribute to international understanding.
