#### **COCHRANE HANDBOOK FOR SYSTEMATIC REVIEWS OF INTERVENTIONS**

---

**Wiley** Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library ([www.thecochranelibrary.com](http://www.thecochranelibrary.com)). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

## **TWO BASIC POINTS IN GEORGIAN-GERMAN RELATIONS**

---

**GRIN Verlag** Master's Thesis from the year 2011 in the subject Politics - International Politics - Topic: History of International Relations, grade: 96, , course: International Relations - European Studies, language: English, abstract: The relations between Georgia and Germany refer to the actual and progressively ongoing process. These relations have quite significant tradition in the last century. According to the official information "close and trustful relations between Germany and Georgia have the tradition of nearly 200 years". Therefore the experience earned through the different historical points of German-Georgian relations can be used from nowadays as well as from the future perspective. Accordingly, the analyze of the important points in these relations and explaining certain circumstances of them should be worth of interest. Therefore the aim of our research is to clarify the certain points in the history of Georgian-German relations with the proper theoretical framework. Our research is dedicated to the two basic points of the history of German-Georgian relations. The first point is the relations connected to the declaration of independence by Georgia in 26 May 1918. The second one refers to the restoration of independence in 9 April 1991 based on the independence act of 26 May. These two dates had been the crucial points in the history of Georgia of the previous century. However, they had been the basic turning points in the history of German-Georgian relations as well. In the first case the basic motivation for starting the relations between Georgia and Germany was the issue of Georgian independence. In the second case the relations between Germany and Georgia has started after (but not immediately after) the declaration of independence as well. However, there is a significant difference between these two periods of Georgian-German relations. First of all, the symmetry of developing relations goes differently. In the first case the relations had started several

years before the declaration of independence, which was the direct result of these relations, and finished shortly (several months) after declaring independence. In the second case the relations have started some time after the restoration of independence, the relations which still go on during the last couple of decades. Another difference, which has the basic importance for our research, is the fundamentally different attitude from the German side towards the first and second cases of declaring independence of Georgia. The research tries to clarify the reasons for such difference and explain it with the proper theoretical concept.
