Psychology Themes and Variations: Briefer Version - Instructor's Resource Manual Handbook for Teaching Introductory Psychology Volume Ii Psychology Press Like its predecessors, Volume III of the Handbook for Teaching Introductory Psychology provides introductory psychology instructors with teaching ideas and activities that can immediately be put into practice in the classroom. It contains an organized collection of articles from Teaching of Psychology (TOP), the official journal of the Society for the Teaching of Psychology, Division 2 of the American Psychological Association. Volume III contains 89 articles from TOP that have not been included in other volumes. Another distinction between this volume and its predecessors is its emphasis on testing and assessment. The book is divided into two sections. Section One, "Issues and Approaches in Teaching Introductory Psychology," contains 52 articles on critical issues, such as: how to approach the course; understanding students' interests, perceptions, and motives; students' existing knowledge of psychology (including their misconceptions); a comparison of introductory textbooks and tips on how to evaluate them; test questions and student factors affecting exam performance; an overview of different forms of feedback; giving extra credit; and how to deal with academic dishonesty. Section Two consists of 37 articles that present demonstrations, class and laboratory projects, and other techniques to enhance teaching and learning in both the introductory, as well as advanced courses in the discipline. This section is organized so as to parallel the order of topics found in most introductory psychology textbooks. Intended for academicians who teach the introductory psychology course and/or oversee grad assistants who teach the course, all royalties of the book go directly to the Society for the Teaching of Psychology to promote its activities to further improve the teaching of psychology. Study Guide Emerging and Re-Emerging Organizational Features, Work Transitions and Occupational Risk Factors: The Good, the Bad, the Right. An Interdisciplinary Perspective Frontiers Media SA The labor market is evolving very rapidly in recent years, in Europe and

worldwide. The fast and deep changes brought a brand-new context of challenges and occupational risks to the attention of stakeholders. The current global financial crisis has increased the economic pressures on companies and they in turn have intensified the effects on employees, particularly in terms of new competition contexts and a lot of stress and mental health issues. Concurrently, social, political, and environmental problems generate under-employment, over-qualification, over-education, low wages for skilled workers, and unmet demand for education. Consequently, both high skilled and low skilled immigrant workers are increasing. In addition, workplaces are continually changing in step with the introduction of new technologies, materials, and work processes, together with the changes in the labor market, the new forms of employment, and the new work organizations. These changes lead to new opportunities for employees and employers - but also to new risks or re-actualization of old organizational risks. According to the EU-OSHA, the key points that describe the evolution that is currently ongoing in the world of work are globalization, the technical innovation, and the aging population. On one hand, some older potential risks are reappearing in organizations: intensive fear and worries, organizational anxiety, boredom, physical violence, alienation, segregation, loneliness, and isolation. On the other hand, re-emerging perceived organizational features seem vital for organizations and more important today than ever. Central constructs in the study of organizational behavior and organizational health such as perceived organizational support, commitment in organizational context, socialization processes, change capacity of organizations, perceived organizational justice, ergonomics, and motivation, nowadays seem increasingly important and renewed.
