Garbage Land

On the Secret Trail of Trash

Hachette UK Out of sight, out of mind ... Into our trash cans go dead batteries, dirty diapers, bygone burritos, broken toys, tattered socks, eight-track cassettes, scratched CDs, banana peels.... But where do these things go next? In a country that consumes and then casts off more and more, what actually happens to the things we throw away? In Garbage Land, acclaimed science writer Elizabeth Royte leads us on the wild adventure that begins once our trash hits the bottom of the can. Along the way, we meet an odor chemist who explains why trash smells so bad; garbage fairies and recycling gurus; neighbors of massive waste dumps; CEOs making fortunes by encouraging waste or encouraging recycling- often both at the same time; scientists trying to revive our most polluted places; fertilizer fanatics and adventurers who kayak amid sewage; paper people, steel people, aluminum people, plastic people, and even a guy who swears by recycling human waste. With a wink and a nod and a tightly clasped nose, Royte takes us on a bizarre cultural tour through slime, stench, and heat-in other words, through the back end of our ever-more supersized lifestyles. By showing us what happens to the things we've "disposed of," Royte reminds us that our decisions about consumption and waste have a very real impact-and that unless we undertake radical change, the garbage we create will always be with us: in the air we breathe, the water we drink, and the food we consume. Radiantly written and boldly reported, Garbage Land is a brilliant exploration into the soiled heart of the American trash can.

Fences

[Penguin](#) From legendary playwright August Wilson comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis.

Favela

Four Decades of Living on the Edge in Rio de Janeiro

[Oxford University Press](#) Janice Perlman wrote the first in-depth account of life in the favelas, a book hailed as one of the most important works in global urban studies in the last 30 years. Now, in Favela, Perlman carries that story forward to the present. Re-interviewing many longtime favela residents whom she had first met in 1969--as well as their children and grandchildren--Perlman offers the only long-term perspective available on the favelados as they struggle for a better life. Perlman discovers that while educational levels have risen, democracy has replaced dictatorship, and material conditions have improved, many residents feel more marginalized than ever. The greatest change is the explosion of drug and arms trade and the high incidence of fatal violence that has resulted. Yet the greatest challenge of all is job creation--decent work for decent pay. If unemployment and underpaid employment are not addressed, she argues, all other efforts will fail to resolve the fundamental issues. Foreign Affairs praises Perlman for writing "with compassion, artistry, and intelligence, using stirring personal stories to illustrate larger points substantiated with statistical analysis."

A History of Marshall Space Flight Center, 1960-1990

This scholarly study of NASA's Marshall Space Flight Center places the institution in social, political, scientific, and technological context. It traces the evolution of Marshall, located in Huntsville, Alabama, from its origins as an Army missile development organization to its status in 1990 as one of the most diversified of NASA's field Centers. Chapters discuss military rocketry programs in Germany and the United States, Apollo-Saturn, Skylab, Space Shuttle, Spacelab, the Space Station and various scientific and technical projects including the Hubble Space Telescope. It sheds light not only on the history of space technology, science, and exploration, but also on the Cold War, federal politics, and complex organizations.

Factotum

[Random House](#) Henry Chinaski, an outcast, a loner and a hopeless drunk, drifts around America from one dead-end job to another, from one woman to another and from one bottle to the next. Uncompromising, gritty, hilarious and confessional in turn, his downward spiral is peppered with black humour. "Factotum" follows Charles Bukowski's bestselling "Post Office", his highly autobiographical first novel.

Health, Safety and Well-Being of Workers in the Informal Sector in India

Lessons for Emerging Economies

[Springer](#) This book focuses on the core problems of occupational health, safety and well-being of workers in the informal sector in developing countries, where it accounts for most of the rural labour force and a substantial percentage of the urban labour force. The sector is characterised by low incomes, unstable employment and lack of protection in the form of legislation/policies or trade unions. Though some health and problem-solving measures have been introduced, a focused academic effort to address the problems confronting workers in the unorganised sector, or informal economy, is lacking. The book evaluates workers' physical and mental health in the context of labour migration, social inclusion of minorities and the differently abled, provisions for women workers, demonetisation, occupational safety for hazardous work, and in connection with various areas of informal work, e.g. agriculture, construction, transportation, sanitation, tanning, the tobacco industry, powerloom industry, surrogacy, and self-employment. It provides a well-rounded description of an analytical reflection on the challenges these workers face and focuses on social policy changes to help alleviate them. Accordingly, it offers a valuable asset for researchers and students interested in development studies, the sociology of work, health and labour economics, public health, and social work.

Improving Municipal Solid Waste Management in India A Sourcebook for Policymakers and Practitioners

[World Bank Publications](#) Solid Waste Management (SWM) is a matter of great concern in the urban areas of developing countries. The municipal authorities who are responsible for managing municipal solid waste are unable to discharge their obligations effectively because they lack the in-house capacity to handle the complexities of the process. It is heartening to see that the World Bank has prepared this book covering all important aspects of municipal SWM in great depth. The book covers very lucidly the present scenario of SWM in urban areas, the system deficiencies that exist, and the steps that need to be taken to correct SWM practices in compliance with Municipal Solid Waste (Management and Handling) Rules 2000 ratified by the Government of India. The book shares examples of best practices adopted in various parts of the country and abroad, and very appropriately covers the institutional, financial, social, and legal aspects of solid waste management, which are essential for sustainability of the system. It provides a good insight on how to involve the community, nongovernmental organizations, and the private sector to help improve the efficiency and cost effectiveness of the service, and shows how contracting mechanisms can be used to involve the private sector in SWM services. This book will be a very useful tool for city managers and various stakeholders who deal with municipal solid waste management in the design and execution of appropriate and cost-effective systems.

The Management of Construction: A Project Lifecycle Approach

[Routledge](#) Management of Construction introduces all aspects of management practice to students and professionals based in the construction industry. It is also important for those involved in allied fields such as design, project development, and site monitoring and inspection. The book addresses each stage of the construction project from conception to completion, giving a perspective on the whole life cycle often missing from textbooks. The author also balances engineering concerns with the human resource and personal aspects of construction management that are so important to the successful outcome of a project.

Picking Up: On the Streets and Behind the Trucks with the Sanitation Workers of New York City

[Farrar, Straus and Giroux](#) "Meticulous . . . [Nagle's] passion for the subject really comes to life." --The New York Times New York City produces more than twelve thousand tons of household trash and recyclables a day. As quickly as it accumulates, it's hauled away. But who makes that happen? What's life like for the workers with careers built around garbage? In Picking Up, the anthropologist Robin Nagle takes us inside New York City's Department of Sanitation, a largely unseen and often unloved army responsible for keeping the city alive. Nagle spent a decade with sanitation people of all ranks to learn what it takes to manage Gotham's garbage. She even took the job herself, driving trucks and plowing snow while enduring the physical aches, public abuse, and risk of injury that are constant realities of the job. Nagle offers an insider's perspective on the complex hierarchies, intricate rules, and obscure language unique to this mostly invisible world. Not just a contemporary account, Picking Up charts New York City's four-hundred-year struggle with trash. It traces the city's waste-management efforts from a time when filth overwhelmed the streets to today's far more vigorous practices, which have made the city cleaner than it's been in decades. Complete with vividly evoked characters and memorable descriptions of the sights and smells of the job, Picking Up reveals the vital role sanitation workers play in every city across the globe.

Cleaning Human Waste

"manual Scavenging," Caste, and Discrimination in India

"This 96-page report documents the coercive nature of manual scavenging. Across India, castes that work as "manual scavengers" collect human excrement on a daily basis, and carry it away in cane baskets for disposal. Women from this caste usually clean dry toilets in homes, while men do the more physically demanding cleaning of sewers and septic tanks. The report describes the barriers people face in leaving manual scavenging, including threats of violence and eviction from local residents but also threats, harassment, and unlawful withholding of wages by local officials."--Publisher's website.

Invisible Child

Poverty, Survival & Hope in an American City (Pulitzer Prize Winner)

[Random House](#) **PULITZER PRIZE WINNER** • A "vivid and devastating" (The New York Times) portrait of an indomitable girl—from acclaimed journalist Andrea Elliott "From its first indelible pages to its rich and startling conclusion, *Invisible Child* had me, by turns, stricken, inspired, outraged, illuminated, in tears, and hungering for reimmersion in its Dickensian depths."—Ayad Akhtar, author of *Homeland Elegies* **ONE OF THE TEN BEST BOOKS OF THE YEAR:** The New York Times • **ONE OF THE BEST BOOKS OF THE YEAR:** The Atlantic, The New York Times Book Review, Time, NPR, Library Journal *In Invisible Child*, Pulitzer Prize winner Andrea Elliott follows eight dramatic years in the life of Dasani, a girl whose imagination is as soaring as the skyscrapers near her Brooklyn shelter. In this sweeping narrative, Elliott weaves the story of Dasani's childhood with the history of her ancestors, tracing their passage from slavery to the Great Migration north. As Dasani comes of age, New York City's homeless crisis has exploded, deepening the chasm between rich and poor. She must guide her siblings through a world riddled by hunger, violence, racism, drug addiction, and the threat of foster care. Out on the street, Dasani becomes a fierce fighter "to protect those who I love." When she finally escapes city life to enroll in a boarding school, she faces an impossible question: What if leaving poverty means abandoning your family, and yourself? A work of luminous and riveting prose, Elliott's *Invisible Child* reads like a page-turning novel. It is an astonishing story about the power of resilience, the importance of family and the cost of inequality—told through the crucible of one remarkable girl. Winner of the J. Anthony Lukas Book Prize • Finalist for the Bernstein Award and the PEN/John Kenneth Galbraith Award
