PEDIATRICS IN PRACTICE

A HEALTH PROMOTION CURRICULUM FOR CHILD HEALTH PROFESSIONALS

Springer Publishing Company Pediatrics in Practice is a faculty development health promotion curriculum based on the principles of Bright Futures. Through the resources presented, maternal and child health (MCH) educators can prepare healthcare professionals with the knowledge, skills, and attitudes necessary to communicate effectively, partner with, and educate children and families as their advocates to promote health and prevent illness in a time-efficient manner. This

innovative curriculum is based on six core concepts that serve as the foundation for effective health encounters: Partnership Communication Health promotion/illness prevention Time Management Education Advocacy These six concepts provide the tools for building successful partnerships and promoting positive interactions among health professionals, children, and families during health encounters. By learning how to integrate these core concepts into clinical practice, health professionals can be assured that they are delivering time-efficient health promotion services. This curriculum developed in collaboration with Children's Hospital Boston, Harvard Medical School, and Bright Futures, will be of interest to anyone who cares for pediatric-age children, including all maternal and child health professionals such as pediatricians, nurses, public health specialists, nurse practitioners, physicians' assistants, social workers, dentists, and medical educators. The Pediatrics in Practice publication is accompanied by a supplemental DVD containing background information about Bright Futures, models of best practice, this health promotion curriculum, and scenes from Disney's The Doctor to be used with the Communication module. VACCINE SCIENCE AND IMMUNIZATION GUIDELINE

A PRACTICAL GUIDE FOR PRIMARY CARE

Springer This book is a comprehensive resource on vaccines and immunizations for primary care physicians, advanced practice providers, and trainees. We are now seeing a rise in measles and the potential for rises in other previously rare infectious diseases, significantly due to public and physician misconceptions and misinformation about vaccines. The text addresses this issue by consolidating historical and current advances in vaccine science from how vaccines are developed to CDC recommendations on how and when to administer them. Expert authors also address barriers to improving vaccination rates in the U.S. and offer evidence-based recommendations on overcoming those barriers. This is an essential guide for primary care physicians, family physicians, pediatricians, internists, residents, medical students, mid-level providers, and learners for understanding vaccines and improving preventative care for their patients.

PRIMARY WELL-BEING: CASE STUDIES FOR THE GROWING CHILD

Springer This book offers solutions on how to enhance the normal development of the well child incorporating complementary medicine. The primary care provider is the only healthcare professional to see every child (0-18) and their parent, and can assess the child's health and advise parents on how to provide a healthy environment and important practices to nurture healthy children. The book provides realistic scenarios encountered by new nurse practitioners in their clinical training. It is structured in a question and answer framework to help practitioners critically think through the best practices to be implemented during the well child visit and develop a plan of action for the family. This book provides assessment and diagnostic criteria and tools and presents common developmental and behavioral issues for each age group. The book promotes the role of professional as advocate by making

recommendations for broad social policies to help all children succeed.

PEDIATRIC ANNALS

HEALTH PROMOTION IN PRACTICE

John Wiley & Sons Health Promotion in Practice is a practice-driven text that translates theories of health promotion into a step-by-step clinical approach for engaging with clients. The book covers the theoretical frameworks of health promotion, clinical approaches to the eleven healthy behaviors—eating well, physical activity, sexual health, oral health, smoking cessation, substance safety, injury prevention, violence prevention, disaster preparedness, organizational wellness, and enhancing development—as well as critical factors shaping the present and the

future of the field. Written by the leading practitioners and researchers in the field of health promotion, *Health Promotion in Practice* is a key text and reference for students, faculty, researchers, and practitioners. "Finally, a signature book in which practitioners of health promotion will find relevant guidance for their work. Sherri Sheinfeld Gorin and Joan Arnold have compiled an outstanding cast of savvy experts whose collective effort has resulted in a stunning breadth of coverage. Whether you are a practitioner or a student preparing for practice, this book will help you to bridge the gap between theory and practice-driven empiricism." —John P. Allegrante, professor of health education, Teachers College, and Mailman School of Public Health, Columbia University "The models of health promotion around which *Health Promotion in Practice* is built have a sound basis in current understanding of human development, the impact of community and social systems, and stages of growth, development, and aging. This handbook can provide both experienced health professionals and students beginning to develop practice patterns the content and structure to interactions that are truly promoting of health." —Kristine M. Gebbie, Dr.P.H., R.N., Columbia University School of Nursing

PARENT CHILD EXCURSIONS

ADHD, ANXIETY, AND AUTISM

Dagmar Miura Written for parents, clinicians, and educators, Parent Child Excursions is a practical book about helping children with ADHD, anxiety, and autism. In this unique approach, Dr. Dan presents ADHD as a problem with stopping, anxiety as a problem with going, and autism as difficulty balancing these competing tendencies. From the introduction: "This book is quite simply a story of red light and green light, braking and accelerating, holding back and forging ahead." Based on this simple formulation, management of problems with self-control depends on finding the right balance between excitation and inhibition. These five Excursions present entirely new ways to think about caring for "different drummer" children. Readers will discover an unprecedented level of detail. Based on scientific research and years of clinical experience, Dr. Dan takes you for a deep dive into: (1) effective medication for ADHD, (2) exposure therapy for anxiety, (3) combined therapies for coexisting ADHD, anxiety, and autism, and (4) social engineering for autism. The book concludes with an in-depth discussion of (5) autism, sexuality, and gender variation, cowritten by Dr. Dan and his son Dr. Aaron Shapiro. As with his first book, Parent Child Journey: An Individualized Approach to Raising Your Challenging Child, Dr. Dan teams up again with illustrator John Watkins-Chow. Throughout the five Excursions, they weave a fun metaphorical tale. Readers are led along by an under-inhibited dog, an over-inhibited turtle, and a well-balanced bird of a different feather. By the end of this comprehensive and original guidebook, parents and professionals will have learned how to prepare the child for the trail and the trail for the child.

INFANT SAFE SLEEP

A POCKET GUIDE FOR CLINICIANS

Springer Nature This book is a practical, comprehensive look at safe sleep for infants, including safe sleep for infants with co-occurring medical conditions. Currently there is a dearth of resources on this topic for general pediatricians and other clinicians who provide health care to infants. The only evidence-based

information about sudden infant death syndrome (SIDS) and other sleep-related infant deaths is published in policy statements and technical reports published by the American Academy of Paediatrics. However pediatricians, public health professionals, and others who provide health care, anticipatory guidance, and/or health education to parents often have difficulty translating the policy recommendations to practice. This book gives guidance and suggestions for clinicians for counseling parents and other caretakers of infants. It discusses common barriers to adherence, as well as approaches that are evidence-based or use behavior change theory. Chapters focus on important aspects of the sleep environment, evaluating commonly sold sleep products, and common sleep practices, including roomsharing and bedsharing. There is also a thorough discussion of SIDS pathophysiology, and a closing chapter on grief and counselling families after a loss. Each chapter follows an organizational structure, to promote consistency and ensure this remains a practical, easy-to-use tool. Chapters open with a clinical vignette and close with a discussion of frequently encountered questions, and clinical pearls and pitfalls. *Infant Safe Sleep* is a valuable resource for pediatricians, nurse practitioners, physician assistants as well as social workers, allied health professionals, public health practitioners, health educators, WIC nutritionists and child care providers.

INTERPROFESSIONAL CARE COORDINATION FOR PEDIATRIC AUTISM SPECTRUM DISORDER

TRANSLATING RESEARCH INTO PRACTICE

Springer Nature This book addresses the importance and relevance of interprofessional care coordination for children and youth with autism spectrum disorder (ASD). It covers the role of interprofessional collaborations across various settings for multiple service provision purposes. The volume examines interprofessional collaboration among professionals across such broad issues as screening, evaluation, intervention, and overall care management of ASD. In addition, the book explores more narrowly focused issues, such as providing transition services during early childhood and young adulthood, culturally responsive practice and advocacy issues for individuals with ASD from diverse backgrounds, and providing care for individuals with ASD and co-occurring trauma. Finally, the book concludes with the editors' recommendations for future directions in interprofessional care for pediatric ASD. Topics featured in this book include: Autism screening tools and interdisciplinary coordination of the processes. Dell Children's (S)TAAR Model of Early Autism Assessment. The Early Start Denver Model (ESDM). Transition from early schooling for youth with ASD. Postsecondary and vocational opportunities for youth with autism. Transitioning from pediatric to adult medical systems. International perspectives in coordinated care for individuals with ASD. Psychopharmacology of ASD. *Interprofessional Care Coordination for Pediatric Autism Spectrum Disorder* is an essential resource for researchers, clinicians and professionals, and graduate students in clinical child and school psychology, social work, behavioral therapy and related disciplines, including clinical medicine, clinical nursing, counseling, speech and language pathology, and special education.

THE IOWA FAMILY PHYSICIAN

BRIGHT FUTURES IN PRACTICE

ORAL HEALTH POCKET GUIDE

This pocket guide offers health professionals an overview of preventive oral health supervision for five developmental periods--pregnancy and postpartum, infancy, early childhood, middle childhood, and adolescence. Although age groupings are designed to take advantage of naturally occurring milestones, many oral health issues cut across multiple developmental periods. The information presented in the pocket guide is intended as an overview rather than as a comprehensive description of pediatric oral health. The information does not prescribe a specific regimen of care but builds upon existing guidelines and treatment protocols such as those recommended by the American Academy of Pediatric Dentistry, the American Academy of Pediatrics, the American Academy of Family Physicians, and the American Dietetic Association.
