The Early Drug Courts

Case Studies in Judicial Innovation

SAGE Publications This brief and readable volume focuses on five case studies in judicial innovation - the dedicated drug treatment courts in Miami, Oakland, Ft. Lauderdale, Portland, and Phoenix. Each case is presented in a chapter written by a local expert to describe and evaluate five prime examples of dedicated drug treatment courts. Editor W. Clinton Terry, III introduces this volume with a chapter that covers judicial innovation and dedicated drug courts, revealing that dedicated courts are unique because of their focus on treatment; the nontraditional, collaborative approach to treatment; and monitoring of by the judiciary. As Terry emphasizes, the court becomes an integral part of the treatment process itself, not just a referral point for offenders. The subsequent chapters are written to a common outline, creating a tightly edited and cohesive volume that addresses the following points: - Community demographics - Structural organization of the court - Court caseloads, including drug cases - Description of the initial decision to implement dedicated drug treatment courts - Successes and failures of initial goals and objectives, and subsequent adaptations - Measures of long-term successes and failures (recidivism and successful completion of treatment programs) The concluding chapter, written by John Goldkamp, a proven researcher of drug courts, synthesizes the research from the evaluation of the exemplar courts, and examines other areas of possible research that

would provide a firmer understanding about these courts - all of which speaks to the continued development and refinement of dedicated drug treatment courts. With approximately one billion dollars in federal monies earmarked for the creation of drug courts, this unique book offers a road map to the effective utilization of those funds.

Good Courts

The Case for Problem-Solving Justice

Quid Pro Books Presented in a new digital edition, and adding a Foreword by Jonathan Lippman, Chief Judge of the state of New York, Good Courts is now available as an eBook to criminal justice workers, jurists, lawyers, political scientists, court officials, and others interested in the future of alternative justice and process in the United States. Public confidence in American criminal courts is at an all-time low. Victims, communities, and even offenders view courts as unable to respond adequately to complex social and legal problems including drugs, prostitution, domestic violence, and quality-of-life crime. Even many judges and attorneys think that the courts produce assembly-line justice. Increasingly embraced by even the most hard-on-crime jurists, problem-solving courts offer an effective alternative. As documented by Greg Berman and John Feinblatt—both of whom were instrumental in setting up New York’s Midtown Community Court and Red Hook Community Justice Center, two of the nation’s premier models for problem-solving justice—these alternative courts reengineer the way everyday crime is addressed by focusing on the underlying problems that bring people into the criminal justice system to begin with. The first book to describe this cutting-edge movement in detail, Good Courts features, in addition to the Midtown and Red Hook models, an in-depth look at Oregon’s Portland Community Court. And it reviews the growing body of evidence that the problem-solving approach to justice is indeed producing positive results around the country. Quality eBook features include linked Notes, active TOC, and proper formatting.

Court Reform and Judicial Leadership

Judge George Nicola and the New Jersey Justice System

Greenwood Publishing Group This study examines judicial leadership in court reform, tying biography, political science, social psychology, law, and history into court reform at the local level through the case of a nationally known jurist and reformer--Judge George Nicola of New Jersey. The work provides an important examination, in depth and over time, of true leadership in the courts and of the exceptionally innovative programs developed by Judge Nicola. The author also addresses two fundamental issues which lie at the heart of court reform and judicial leadership: the perplexing question of whether a judicial system so bound by tradition as that of the United States can be changed from within; and whether judicial leadership provides the best and most fruitful opportunity for changing this institution. This volume will be of interest to scholars of political science, American government, the judiciary, and the practice of law.

How Information Matters

Networks and Public Policy

Innovation

Georgetown University Press How Information Matters examines the ways a network of state and local governments and nonprofit organizations can enhance the capacity for successful policy change by public administrators. Hale examines drug courts, programs that typify the highly networked, collaborative environment of public administrators today. These “special dockets” implement justice but also drug treatment, case management, drug testing, and incentive programs for non-violent offenders in lieu of jail time. In a study that spans more than two decades, Hale shows ways organizations within the network act to champion, challenge, and support

policy innovations over time. Her description of interactions between courts, administrative agencies, and national organizations highlight the evolution of collaborative governance in the state and local arena, with vignettes that share specific experiences across six states (Alabama, Florida, Georgia, Indiana, Missouri, and Tennessee) and ways that they acquired knowledge from the network to make decisions. *How Information Matters* offers valuable insight into successful ways for collaboration and capacity building. It will be of special interest to public administrators or policymakers who wish to identify ways to improve their own programs' performance.

This exceptionally informative book provides a broad perspective on how technological change can be effectively managed in modern organizations. The text explains the conceptual frameworks supported by new and original case studies for start-up companies like Askmen.com, the complex challenges of managing international technology-based companies like NexPress (a joint venture of Kodak and Heidelberg) in the digital printing industry, and corporate sustainability using innovative new product technologies illustrated by the case of Evinrude's launch of the E-tec® outboard motor.
