Originally a small project in the data visualization community, #MakeoverMonday features a weekly chart or graph and a dataset that community members reimagine in order to make it more effective. The results have been astounding; hundreds of people have contributed thousands of makeovers, perfectly illustrating the highly variable nature of data visualization. Different takes on the same data showed a wide variation of theme, focus, content, and design, with side-by-side comparisons throwing more- and less-effective techniques into sharp relief. This book is an extension of that project, featuring a variety of makeovers that showcase various approaches to data communication and a focus on the analytical, design and storytelling skills that have been developed through #MakeoverMonday. Paging through the makeovers ignites immediate inspiration for your own work, provides insight into different perspectives, and highlights the techniques that truly make an impact. Explore the many approaches to visual data communication Think beyond the data and consider audience, stakeholders, and message Design your graphs to be intuitive and more communicative Assess the impact of layout, color, font, chart type, and other design choices Creating visual representation of complex datasets is tricky. There's the mandate to include all relevant data in a clean, readable format that best illustrates what the data is saying—but there is also the designer's impetus to showcase a command of the complexity and create multidimensional visualizations that “look cool.” #MakeoverMonday shows you the many ways to walk the line between simple reporting and design artistry to create exactly the visualization the situation requires. Astronaut Gordon Cooper: 1985 Corporate Stewardship Achieving Sustainable Effectiveness [Routledge](#) Stewardship entails a profound understanding and acceptance of the challenges that result from the organization's interdependence with the societal and ecological contexts in which it operates—and of what it takes to embrace the challenges to be a force for building a viable future. This book dares to ask ‘why’ business leaders should embrace stewardship in the current market where profit reigns supreme. A shift in approach represents fundamental change for the corporate world, and even the most advanced corporations consider themselves to be in the starting block of this transition. The book sets out the practical ways in which corporate stewardship can be achieved through embedding new approaches across the different functions of a business. This book, written by the leading thinkers in sustainability research, provides practical guidance on how companies can resolve the paradoxical challenges they face. How can they be at the same time profitable and responsible, effective and ethical, sustainable and adaptable? It explores what businesses are doing, what they can and should do to effectively respond to external challenges, and focuses on how leaders can create cultures, strategies, and designs far beyond “business as usual”. Stewards must not only make proper current use of that which they hold in trust, they also must leave it in better condition for use by future generations. Corporate Stewardship challenges managers, executives, and directors of global corporations to think and act as stewards of both their organizations and the physical and social environments in which they operate. Toward Sustainable Agricultural Systems in the 21st Century [National Academies Press](#) In the last 20 years, there has been a remarkable emergence of innovations and technological advances that are generating promising changes and opportunities for sustainable agriculture, yet at the same time the agricultural sector worldwide faces numerous daunting challenges. Not only is the agricultural sector expected to produce adequate food, fiber, and feed, and contribute to biofuels to meet the needs of a rising global population, it is expected to do so under increasingly scarce natural resources and climate change. Growing awareness of the unintended impacts associated with some agricultural production practices has led to heightened societal expectations for improved environmental, community, labor, and animal welfare standards in agriculture. Toward Sustainable Agricultural Systems in the 21st Century assesses the scientific evidence for the strengths and weaknesses of different production, marketing, and policy approaches for improving and reducing the costs and unintended consequences of agricultural production. It discusses the principles underlying farming systems and practices that could improve the sustainability. It also explores how those lessons learned could be applied to agriculture in different regional and international settings, with an emphasis on sub-Saharan Africa. By focusing on a systems approach to improving the sustainability of U.S. agriculture, this book can have a profound impact on the development and implementation of sustainable farming systems. Toward Sustainable Agricultural Systems in the 21st Century serves as a valuable resource for policy makers, farmers, experts in food production and agribusiness, and federal regulatory agencies. Defendant Participation in the Criminal Process [Taylor & Francis](#) Requirements for the defendant to actively participate in the English criminal process have been increasing in recent years such that the defendant can now be penalised for their non-cooperation. This book explores the changes to the defendant's role as a participant in the criminal process and the ramifications of penalising a defendant's non-cooperation, particularly its effect on the adversarial system. The book develops a normative theory which proposes that the criminal process should operate as a mechanism for calling the state to account for its accusations and request for official condemnation and punishment of the accused. It goes on to examine the limitations placed on the privilege against self-incrimination, the curtailment of the right to silence, and the defendant's duty to disclose the details of his or her case prior to trial. The book shows that, by placing participatory requirements on defendants and penalising them for their non-cooperation, a system of obligatory participation has developed. This development is the consequence of pursuing efficient fact-finding with little regard for principles of fairness or the rights of the defendant.
