The Screen Media Reader

Culture, Theory, Practice

**Bloomsbury Publishing USA** As mobile communication, social media, wireless networks, and flexible user interfaces become prominent topics in the study of media and culture, the screen emerges as a critical research area. This reader brings together insightful and influential texts from a variety of sources-theorists, researchers, critics, inventors, and artists-that explore the screen as a fundamental element not only in popular culture but also in our very understanding of society and the world. The Screen Media Reader is a foundational resource for studying the screen and its cultural impact. Through key contemporary and historical texts addressing the screen's development and role in communications and the social sphere, it considers how the screen functions as an idea, an object, and an everyday experience. Reflecting a number of descriptive and analytical approaches, these essays illustrate the astonishing range and depth of the screen's introduction and application in multiple media configurations and contexts. Together they demonstrate the long-standing influence of the screen as a cultural concept and communication tool that extends well beyond contemporary debates over screen saturation and addiction.

Natural Language Processing and Information Systems

20th International Conference on Applications of Natural Language to Information Systems, NLDB 2015, Passau, Germany, June 17-19, 2015, Proceedings

**Springer** This book constitutes the refereed proceedings of the 20th International Conference on Applications of Natural Language to Information Systems, NLDB 2015, held in Passau, Germany, in June 2015. The 18 full papers, 15 short papers, 14 poster and demonstration papers presented were carefully reviewed and selected from 100 submissions. The papers cover the following topics: information extraction, distributional semantics, querying and question answering systems, context-aware NLP, cognitive and semantic computing, sentiment and opinion analysis, information extraction and social media, NLP and usability, text classification and extraction, and posters and demonstrations.

Fundamentals of Patenting and Licensing for Scientists and Engineers

**World Scientific** This book is the first of its kind to teach scientists and engineers how to go beyond simply getting a patent granted. It covers various aspects, from basic concepts of patent laws, patent preparation to patent post granting, in an easy-to-understand language for inventors. It also introduces the basis of patent licensing and related business aspects, helping inventors create patents that can be better capitalized. Through the author's extensive scientific background and experience, it provides common pitfalls and tips on how an inventor should assist in all phases of patent filing, prosecution and licensing.
