AACN PROCEDURE MANUAL FOR HIGH ACUITY, PROGRESSIVE, AND CRITICAL CARE

Saunders Preceded by: AACN procedure manual for critical care / edited by Debra Lynn-McHale Wiegand. 6th ed. c2011.

AACN PROCEDURE MANUAL FOR CRITICAL CARE

Saunders AACN Procedure Manual for Critical Care offers comprehensive coverage of procedures unique to the critical care environment. This edition is thoroughly revised, updated, and expanded to reflect the current state of critical care nursing practice. Information is presented in a highly illustrated step-by-step format with supporting rationales for each step of every procedure. This resource also emphasizes evidence-based practice and provides complete coverage of the latest clinical studies. Each procedure is organized in a consistent, step-by-step format with categories that include: prerequisite nursing knowledge, equipment, patient and family education, patient assessment and preparation, procedure, expected outcomes, unexpected outcomes, patient monitoring and care, and documentation. Each procedure is supported by research-based data. Advanced practice procedures are noted with a special AP icon indicating that these procedures should be done only by qualified personnel. 19 new procedures discuss topics such as combitube insertion and removal, transesophageal echocardiography, and patient controlled analgesia. A new Quick Tips feature - located in the Special Considerations column for quick reference - highlights key words and key concepts for each procedure. A new web-enhanced feature at the beginning and end of each procedure directs readers to online supplement materials such as additional art and photographs. Web links connect users to hundreds of continually updated web sites that contain information relevant to critical care nursing practice. 200 new line drawings clearly illustrate important techniques and bring key procedures to life.

AACN PROCEDURE MANUAL FOR PEDIATRIC ACUTE AND CRITICAL CARE

W B Saunders Company Using detailed, step-by-step guidelines, this comprehensive book covers procedures commonly performed by all nurses in pediatric critical care. Following the successful format of the AACN Procedure Manual for Critical Care, 5th edition, this new resource focuses on the unique aspects of caring for infants and children. This easy-to-use guide includes the latest information, a strong evidence base, and a supporting rationale for each step of each procedure. Advanced Practice Skills are included throughout the text and are marked with a special AP icon indicating that these procedures should only be performed by qualified personnel. Evidence-based practice and research-based data are used to support the recommendations for each procedure. Each procedure follows a consistent, step-by-step format with rationales. Developmental differences are highlighted in special Procedure tables. This valuable, everyday resource is sponsored by the American Association of Critical-Care Nurses. Each procedure is covered in a consistent structure: Purpose Prerequisite knowledge Child and family assessment Child and family education Equipment Procedure (with steps, rationale, and considerations) Expected and unexpected outcomes Monitoring and care of the child (with activities and interventions, rationale, and reportable conditions) Documentation

AACN ORGANIZATION AND MANAGEMENT OF CRITICAL-CARE FACILITIES

AACN GUIDE TO ACUTE CARE PROCEDURES IN THE HOME

Lippincott Williams & Wilkins esigned specifically to help nurses cope with the challenges of caring for their most acutely ill home care patients, this manual offers step-by-step guidance on those procedures relevant to this patient group without duplicating information covered in other home care manuals. Organized for ease of use, the book's content is sequenced across the lifespan and built around a body system framework. A multidisciplinary approach helps readers address a wide range of conditions and disorders with confidence. The critical thinking process is used to promote problem solving. Other areas addressed include legal issues and documentation essentials. The latest JCAHO, OSHA, and CDC guidelines are also outlined

AACN PROCEDURE MANUAL FOR CRITICAL CARE

W.B. Saunders Company This revised 3rd edition has been reformatted for easier reference and access to information. The new edition reflects the latest technologies and care modalities essential to an adult critical care nursing practice. The text uses the nursing process as a framework for each skill presented, and should work well for staff development personnel as it can be easily integrated into critical care orientation programs. Each chapter includes behavioural objectives, key terms, general assessment guidelines and a detailed reference/bibliography listing. Consistent with JCAHO's new emphasis on continuous quality improvement, this manual sets the standard against which all critical care procedures will be judged.

CRITICAL CARE MANUAL OF CLINICAL PROCEDURES AND COMPETENCIES

John Wiley & Sons This manual is aimed at all healthcare practitioners, from novice to expert, who care for the critically ill patient, recognising that different disciplines contribute to the provision of effective care and that essential knowledge and skills are shared by all practitioners. It provides evidence-based guidelines on core critical care procedures and includes a comprehensive competency framework and specific competencies to enable practitioners to assess their abilities and expertise. Each chapter provides a comprehensive overview, beginning with basic principles and progressing to more complex ideas, to support practitioners to develop their knowledge, skills and competencies in critical care.

CERTIFICATION AND CORE REVIEW FOR NEONATAL INTENSIVE CARE NURSING - E-BOOK

THE FUTURE OF NURSING

LEADING CHANGE, ADVANCING HEALTH

National Academies Press The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

HEALTH PROFESSIONS EDUCATION

A BRIDGE TO QUALITY

National Academies Press The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and

patient safety. **Health Professions Education: A Bridge to Quality** is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.
