GENERALIZED LINEAR MODELS

A BAYESIAN PERSPECTIVE

CRC Press **This volume describes how to conceptualize, perform, and critique traditional generalized linear models (GLMs) from a Bayesian perspective and how to use modern computational methods to summarize inferences using simulation. Introducing dynamic modeling for GLMs and containing over 1000 references and equations, Generalized Linear Models considers parametric and semiparametric approaches to overdispersed GLMs, presents methods of analyzing correlated binary data using latent variables. It also proposes a semiparametric method to model link functions for binary response data, and identifies areas of important future research and new applications of GLMs.**

ISSUES IN AGING

Routledge **Opportunities and optimism in Aging. Issues in Aging, 3rd edition** takes an optimistic view of aging and human potential in later life. This book presents the most up-to-date facts on aging today, the issues raised by these facts, and the societal and individual responses that will create a successful old age for us all. Mark Novak presents the full picture of aging--exhibiting both the problems and the opportunities that accompany older age. The text illustrates how generations are dependent on one another and how social conditions affect both the individual and social institutions. Learning Goals -Upon completing this book, readers will be able to: -Understand how large-scale social issues--social attitudes, the study of aging, and demographic issues--affect individuals and social institutions - Identify the political responses to aging and how individuals can create a better old age for themselves and the people they know -Separate the myths from the realities of aging -Recognize the human side of aging -Trace the transformation of pension plans, health, and opportunities for personal expression and social engagement to the new ecology of aging today

POLLUTION CONTROL INSTRUMENTATION FOR OIL AND EFFLUENTS

Springer Science & Business Media **The scale of global transportation of oil cargoes** has led to a demand for increased control and international legislation to combat accidental and operational discharges of oily wastes and residues at sea. Since 1954 the International Maritime Organisation (IMO)* has provided the international forum for the development of several proposals for controlling oil pollution from shipping, which culminated in the 1973 International Convention for Prevention of Pollution from Ships and the 1978 Protocol relating to this Convention, together known as MARPOL 73178. Apart from the requirement for improvements in the constructional design of tankers, and operational procedures to enhance both safety and pollution control in the carriage of oil and other noxious substances at sea, MARPOL 73178 called for the extensive installation of oil discharge monitoring, control and separating equipment on board ships and offshore platforms. The 1973 Convention came into force in October 1983, twelve months after sufficient countries had ratified it and agreed to abide by the international rules and regulations. As a result, a large number of systems have now been installed and are operational. The demand to separate oil from

water to give an oil content of less than 15 parts per million (ppm) and measure this on-line in an extremely difficult environment has provided a considerable impetus for the development of novel and robust instrumentation and systems.

GRANDAD MANDELA

Lincoln Children's Books "...profoundly moving..." -Publishers Weekly Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

BOOLEAN FUNCTIONS

THEORY, ALGORITHMS, AND APPLICATIONS

Cambridge University Press Written by prominent experts in the field, this monograph provides the first comprehensive, unified presentation of the structural, algorithmic and applied aspects of the theory of Boolean functions. The book focuses on algebraic representations of Boolean functions, especially disjunctive and conjunctive normal form representations. This framework looks at the fundamental elements of the theory (Boolean equations and satisfiability problems, prime implicants and associated short representations, dualization), an in-depth study of special classes of Boolean functions (quadratic, Horn, shellable, regular, threshold, read-once functions and their characterization by functional equations) and two fruitful generalizations of the concept of Boolean functions (partially defined functions and pseudo-Boolean functions). Several topics are presented here in book form for the first time. Because of the depth and breadth and its emphasis on algorithms and applications, this monograph will have special appeal for researchers and graduate students in discrete mathematics, operations research, computer science, engineering and economics.

PUBLIC HEALTH, MENTAL HEALTH, AND MASS ATROCITY PREVENTION

Routledge This multidisciplinary volume considers the role of both public health and mental health policies and practices in the prevention of mass atrocity, including war crimes, crimes against humanity, and genocide. The authors address atrocity prevention through the framework of primary (pre-conflict), secondary (mid-conflict), and tertiary (post-conflict) settings. They examine the ways in which public health and mental health scholars and practitioners currently orient their research and interventions and the ways in which we can adapt frameworks, methods, tools, and practice toward a more sophisticated and truly interdisciplinary understanding and application of atrocity prevention. The book brings together diverse fields of study by global north and global south authors in diverse contexts. It culminates in a narrative that demonstrates the state of the current fields on intersecting themes within public health, mental health, and mass atrocity prevention and the future potential directions in which these intersections could go. Such discussions will serve to influence both policy makers and practitioners in these fields toward developing, adapting, and testing frames and tools for atrocity prevention. Multidisciplinary perspectives are represented among editors and authors, including law, political science, international studies, public health, mental health, philosophy, clinical psychology, social psychology, history, and peace studies.

OUR DAILY MEDS

HOW THE PHARMACEUTICAL COMPANIES TRANSFORMED THEMSELVES INTO SLICK MARKETING MACHINES AND HOOKED THE NATION ON PRESCRIPTION DRUGS

Sarah Crichton Books In the last thirty years, the big pharmaceutical companies have transformed themselves into marketing machines selling dangerous medicines as if they were Coca-Cola or Cadillacs. They pitch drugs with video

games and soft cuddly toys for children; promote them in churches and subways, at NASCAR races and state fairs. They've become experts at promoting fear of disease, just so they can sell us hope. No question: drugs can save lives. But the relentless marketing that has enriched corporate executives and sent stock prices soaring has come with a dark side. Prescription pills taken as directed by physicians are estimated to kill one American every five minutes. And that figure doesn't reflect the damage done as the overmedicated take to the roads. Our Daily Meds connects the dots for the first time to show how corporate salesmanship has triumphed over science inside the biggest pharmaceutical companies and, in turn, how this promotion driven industry has taken over the practice of medicine and is changing American life. It is an ageless story of the battle between good and evil, with potentially life-changing consequences for everyone, not just the 65 percent of Americans who unscrew a prescription cap every day. An industry with the promise to help so many is now leaving a legacy of needless harm.

BLUEPRINT FOR BLACK POWER

A MORAL, POLITICAL, AND ECONOMIC IMPERATIVE FOR THE TWENTY-FIRST CENTURY

Afrikan World Infosystems **Afrikan life into the coming millennia is imperiled by White and Asian power. True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover).**

TIBERIUS FOUND

Andrew Goodman **What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he's an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world's first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go 'off-grid'. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ... TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.**

SCORCH

Soft Skull In the future world of Scorch, America is run by a “corporacracy.” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

HOW I MADE ONE MILLION DOLLARS LAST YEAR TRADING COMMODITIES

Windsor Books/Probus This fascinating book is loaded with practical information designed to help you in the commodity market. The author's method...proven by his million dollar success...does not involve complicated math or subjective evaluation. There are two completely systematic methods; %R and Momentum. The essence fo these methods is that they tell you if the super powers are long or short; when the super powers expect a major move to start; what commodities are in true bull or bear markets; when to start buying and when to sell for gargantuan profits. This book is a must if you're a stock or commodity trader. It will expose to you an exciting new approach to trading and thinking—the same approach that has made Larry Williams a millionaire.
