Bearing Design in Machinery

Engineering Tribology and Lubrication

CRC Press Covering the fundamental principles of bearing selection, design, and tribology, this book discusses basic physical principles of bearing selection, lubrication, design computations, advanced bearings materials, arrangement, housing, and seals, as well as recent developments in bearings for high-speed aircraft engines. The author explores unique solutions to challenging design problems and presents rare case studies, such as hydrodynamic and rolling-element bearings in series and adjustable hydrostatic pads for large bearings. He focuses on the design considerations and calculations specific to hydrodynamic journal bearings, hydrostatic bearings, and rolling element bearings.

Safety of Loads on Vehicles

Code of Practice

Stationery Office Books (TSO) In the UK every year, there are over 4,000 successful prosecutions of drivers and operators for unsafe loads, whilst many other incidents go unreported. The legal requirements seek to ensure all loads carried by commercial vehicles are adequately secured in order to protect those involved in loading, unloading and driving the vehicle, as well as other road users and pedestrians. This guide discusses the basic principles of load safety, as well as giving recommendations for specific loads including metal, timber and glass. It also covers any equipment on the vehicle such as loader cranes, landing legs and tailgates. It contains references to industry standards and codes of practice, and addresses the legal framework and possible offences.

Historical Dictionary of Ancient India

Rowman & Littlefield India's history and culture is ancient and dynamic, spanning back to the beginning of human civilization. Beginning with a mysterious culture along the Indus River and in farming communities in the southern lands of India, the history of India is punctuated by constant integration with migrating peoples and with the diverse cultures that surround the country. Placed in the center of Asia, history in India is a crossroads of cultures from China to Europe, as well as the most significant Asian connection with the cultures of Africa. The Historical Dictionary of Ancient India provides information ranging from the earliest Paleolithic cultures in the Indian subcontinent to 1000 CE. The ancient history of this country is related in this book through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced dictionary entries on rulers, bureaucrats, ancient societies, religion, gods, and philosophical ideas.

Bologna (Italy) - Wink Travel Guide

Although it is well known by Italians, it is less so among foreign visitors. Bologna is the capital and largest city of Emilia-Romagna (a region in northern Italy). Bologna is famed for the oldest university in the Western world, lively student population, exquisite food, typical brick terracotta-roofed architecture and porticos, theatre and nightlife. It is considered second only to Venice in beauty by many Italians and certainly has one of the largest and best preserved historic centers among Italian cities. Its architecture is noted for its palette of terracotta reds, burnt oranges, and warm yellows, hence the name of Bologna la rossa (Bologna the red). Wink Travel Guides introduce you to the best world travel destinations, in a clear and concise way, illustrated by photos.

Flagging Handbook

Stochastic Tools in Mathematics and Science

Springer Science & Business Media "Stochastic Tools in Mathematics and Science" covers basic stochastic tools used in physics, chemistry, engineering and the life sciences. The topics covered include conditional expectations, stochastic processes, Brownian motion and its relation to partial differential equations, Langevin equations, the Liouville and Fokker-Planck equations, as well as Markov chain Monte Carlo algorithms, renormalization, basic statistical mechanics, and generalized Langevin equations and the Mori-Zwanzig formalism. The applications include sampling algorithms, data assimilation, prediction from partial data, spectral analysis, and turbulence. The book is based on lecture notes from a class that has attracted graduate and advanced undergraduate students from mathematics and from many other science departments at the University of California, Berkeley. Each chapter is followed by exercises. The book will be useful for scientists and engineers working in a wide range of fields and applications. For this new edition the material has been thoroughly reorganized and updated, and new sections on scaling, sampling, filtering and data assimilation, based on recent research, have been added. There are additional figures and exercises. Review of earlier edition: "This is an excellent concise textbook which can be used for self-study by graduate and advanced undergraduate students and as a recommended textbook for an introductory course on probabilistic tools in science." Mathematical Reviews, 2006

The Cruel Trade

Robert Hale Limited When a remote valley deep in East Africa is discovered, a handsome tribe, descended from the Queen of Sheba, is found living there. The Sultan of Zanzibar is keen to establish his presence. Tippu Tip, the Sultan's Machiavellian minister, orders a heavily armed expedition, led by the unwilling Captain Khalil, to seize the valley as a stepping-stone towards the sultan's ambition of ruling the whole of Africa. The Cruel Trade tells the story of a fascinating and brave expedition as it crosses the untamed savannah. A tale of betrayal and fear, but also courage and great love, this dramatic story gives an illuminating insight into a turning point in the long and bloody history of East African slavery.

Kinship and Marriage in a New Guinea Village

Routledge The economic and political systems, legal code and religious beliefs of the people of the New Guinea village of Busama were analysed by H. Ian Hogbin in his earlier work, Transformation Scene (1951). In this new study founded on field work carried out at intervals over a seven year period, he is concerned primarily with the individual in his relations with the kinship structure. He takes a typical Busama through a full span of life, from birth through infancy, childhood, adolescence, and marriage to maturity and death; and he shows how each stage in the individual's life involves a change in his kinship relationships and responsibilities. This approach gives the professional anthropologist a set of carefully presented data analysed in line with the contemporary emphasis on seeing the relations between kin in the context of the local community, and it also offers the general reader an enjoyable and authentic account of the intimacies of Melanesian life.

Will and Political Legitimacy

A Critical Exposition of Social Contract Theory in Hobbes, Locke, Rousseau, Kant and Hegel

At the heart of representative government is the question: "What makes government and its agents legitimate authorities?" The notion of consent to a social contract between the citizen and his government is central to this problem. What are the functions of public authority? What are the people's rights in a self-governing and representative state? Patrick Riley presents a comprehensive historical analysis of the meaning of contract theory and a testing of the inherent validity of the ideas of consent and obligation. He uncovers the critical relationship between the act of willing and that of consenting in self-government and shows how "will" relates to political legitimacy. His is the first large-scale study of social contract theory from Hobbes to Rawls that gives "will" the central place it occupies in contractarian thinking.
