FINANCIAL MANAGEMENT FROM AN EMERGING MARKET PERSPECTIVE

BoD - Books on Demand One of the main reasons to name this book as Financial Management from an Emerging Market Perspective is to show the main differences of financial theory and practice in emerging markets other than the developed ones. Our many years of learning, teaching, and consulting experience have taught us that the theory of finance differs in developed and emerging markets. It is a well-known fact that emerging markets do not always share the same financial management problems with the developed ones. This book intends to show these differences, which could be traced to several characteristics unique to emerging markets, and these unique characteristics could generate a different view of finance theory in a different manner. As a consequence, different financial decisions, arrangements, institutions, and practices may evolve in emerging markets over time. The purpose of this book is to provide practitioners and academicians with a working knowledge of the different financial management applications and their use in an emerging market setting. Six main topics regarding the financial management applications in emerging markets are covered, and the context of these topics are "Capital Structure," "Market Efficiency and Market Models," "Merger and Acquisitions and Corporate Governance," "Working Capital Management," "Financial Economics and Digital Currency," and "Real Estate and Health Finance."

RESEARCH IN FINANCE

ESSENTIALS OF CANADIAN MANAGERIAL FINANCE

WERTORIENTIERTES CONTROLLING

BoD - Books on Demand Das normative Management bildet das "unternehmenslange" Gerüst für eine langfristige und nachhaltige Steigerung des Unternehmenswertes. Werte zu schaffen ist das Leitziel jedes Unternehmens. Zum Wohle der Eigentümer, aber auch der anderen Stakeholder. Denn Werte erhalten und sichern, im besten Falle steigern, bedeutet letztendlich Sicherheit und Wohlstand für alle Beteiligten. Hierbei unterstützt das Controlling die Unternehmensführung durch die Planung und Kontrolle aller Maßnahmen, die zur Erreichung des Ziels "Wertschaffung" beitragen. Ausgehend von der Vision eines Unternehmens beschreibt diese Monografie mögliche normative und daraus abgeleitete strategische Ziele. In der Folge wird der Ziel-Führungsprozess für die letztgenannten Ziele erörtert und die Steigerung des Unternehmenswertes als das primäre Ziel der Unternehmenseigner herausgearbeitet. Dabei wird betont, dass eine Wertsteigerung ohne eine Orientierung an den Interessen unterschiedlicher Anspruchsgruppen des Unternehmens zum einen nicht möglich, zum anderen nicht sinnvoll ist. Schwerpunkt dieser Schrift bildet die ausführliche Vorstellung derjenigen Kennzahlen, z. B. EVA, ROCE, CFROI und CVA, die die Wertentwicklung des Unternehmens messbar machen. Ebenso wird auf die DCF-Verfahren eingegangen. Zahlreiche Praxisbeispiele fördern das Verständnis der Materie. Aufgaben und Lösungen runden das Buch ab. Das vorliegende Werk wendet sich an alle Leser, die sich im Studium oder Beruf mit der Wertorientierung von und in einem Unternehmen beschäftigen. Es richtet sich an Dozenten und Studierende der Wirtschaftswissenschaften an Hochschulen für angewandte Wissenschaften (Fachhochschulen), Universitäten und Berufsakademien. Es ist gleichermaßen zum Selbststudium für Führungskräfte geeignet, die einen fundierten theoretischen Background für das wertorientierte Controlling im Unternehmen suchen.
