#### **THEORY AND PRACTICE**

---

*CRC Press* **This book offers a broad overview of the theory and practice of care planning in veterinary nursing, answering three key questions: What are nursing care plans? Why should nursing care plans be used in practice? How should nursing care plans be used in practice? It provides basic definitions and explanations which will be useful to those unfamiliar with nursing care plans. For those veterinary nurses and technicians who are using nursing care plans, the content stimulates debate and discussion, by covering some of the philosophical and theoretical aspects of nursing and drawing comparisons and contrasts between the veterinary and human nursing roles and contexts. There is a pressing need for veterinary nurses to establish themselves as professionals and develop their unique role within the veterinary care team. Nursing care plans are a core tool to support that development. It is hoped that veterinary nurses may borrow tools from the pages of this book or use it as a resource design their unique care plans: either way, this practical guide will support the application of care planning, no matter the species of the animal kingdom for whom you are caring.**

## INTENSIVE CARE

---

---

*Simon and Schuster* Chilling, revelatory, and compassionate, Echo Heron's bestselling memoir offers a brutally honest account of her time as an idealistic nursing student, her entry into the workforce, and her rude awakening to the gritty realities of practice. Devoted to helping the most trying patients in some of the harshest medical environments—from emergency rooms to intensive care units—Heron boldly confronts the most serious medical dilemmas of our time. When does a patient have the right to end his or her life, how can a medical professional help someone evaluate such a decision, and what can a nurse do when doctors don't have their patients' best interests at heart? These are just a few of the critical though deeply uncomfortable questions with which Heron must grapple.
