## INVENTING ARGUMENTS, 2016 MLA UPDATE

---

**Cengage Learning** Organized around common rhetorical situations that occur all around us, *INVENTING ARGUMENTS* shows students that argument is a living process rather than a form to be modeled. The text's focus on invention teaches students to recognize the rhetorical elements of any argumentative situation and apply the tools of argument effectively in their own writing. Students are introduced to the basic layers of argument in early chapters, with material arranged into increasingly sophisticated topics beginning with the most obvious or explicit layers (claims) and moving to the more implied layers of assumptions, values, beliefs, and ideology. By the time they finish Part I, your students will have a thorough understanding of argument, which they can then apply to the invention projects in Chapters 7–12. This edition has been updated to reflect guidelines from the 2016 MLA HANDBOOK, Eighth Edition. ## MEMORY ENHANCING TECHNIQUES FOR INVESTIGATIVE INTERVIEWING

---

### THE COGNITIVE INTERVIEW

---

**Charles C Thomas Publisher** Despite the obvious importance of eyewitness information in criminal investigation, police receive surprisingly little instruction on how to conduct an effective interview with a cooperative eyewitness. More than half of police departments have no formal training whatsoever for newly appointed investigators. Most texts in police science either completely omit the issue of effective interviewing techniques or provide only superficial coverage. This manual provides guiding principles to effective interviewing, with specific techniques to be used and others to be avoided. There are principles of memory retrieval so that the reader will understand why to employ specific techniques -- for example, when to use open-ended versus direct short-answer questions, effective use of pauses, asking follow-up questions, cues to name and number recall, etc. There is the strategy of interview sequential structure -- that is, what to probe for at the beginning, middle, and end of the interview. Also included are practical exercises and real-world experiences. The book will also be helpful for attorneys in conducting investigative interviews.

## WRITING: TEN CORE CONCEPTS

---

Most composition textbooks present far more material than students could ever grasp and retain in a single semester. That approach ultimately waters down the most essential lessons students need to learn for their different writing tasks. Emphasizing writing as an interaction between a writer and a reader, *WRITING: TEN CORE CONCEPTS* offers students guidance in three main aims of writing and a way to participate in the important conversations that shape our lives. ## REPORTING QUALITATIVE RESEARCH IN PSYCHOLOGY

---

---

## HOW TO MEET APA STYLE JOURNAL ARTICLE REPORTING STANDARDS

---

**American Psychological Association (APA)** "Reporting standards are guidelines that describe how to communicate findings clearly in journal articles so that readers can access and understand the story of the research endeavor. Recognizing that reporting standards can aid authors in the process of writing and evaluating manuscripts and editors and reviewers in the process of evaluating those manuscripts, the Publications and Communications (P&C) Board of the American Psychological Association (APA) invited two task forces of researchers to develop standards for reporting quantitative and qualitative research in journal articles. The Quantitative Journal Article Reporting Standards Working Group developed standards for quantitative research, and a separate book details those standards. This book discusses the reporting standards. It permits the space to expand on the ideas in those standards and to articulate the rationale behind each. It articulates decisions one may need to make as an author as one decides how to present their work. It also provides examples to illustrate a strong presentation style, and these can serve as helpful models. It provides the conceptual undergirding for the reporting decisions that authors make during the writing process. The book considers the typical sections of a qualitative research paper—the introductory sections, Method, Results, and Discussion. Guidance is provided for how to best present qualitative research, with rationales and illustrations. The book presents reporting standards for qualitative meta-analyses, which are integrative analyses of findings from across primary qualitative research. The book includes a discussion of objectivist and constructivist rhetorical styles in research reporting."--Preface. (PsycINFO Database Record (c) 2020 APA, all rights reserved).

## THE DILEMMA OF FEDERAL MENTAL HEALTH POLICY

---

### RADICAL REFORM OR INCREMENTAL CHANGE?

---

**Rutgers University Press** Severe and persistent mental illnesses are among the most pressing health and social problems in contemporary America. Recent estimates suggest that more than three million people in the U.S. have disabling mental disorders. The direct and indirect costs of their care exceed 180 billion dollars nationwide each year. Effective treatments and services exist, but many such individuals do not have access to these services because of limitations in mental health and social policies. For nearly two centuries Americans have grappled with the question of how to serve individuals with severe disorders. During the second half of the twentieth century, mental health policy advocates reacted against institutional care, claiming that community care and treatment would improve the lives of people with mental disorders. Once the exclusive province of state governments, the federal government moved into this policy arena after World War II. Policies ranged from those focused on mental disorders, to those that focused more broadly on health and social welfare. In this book, Gerald N. Grob and Howard H. Goldman trace how an ever-changing coalition of mental health experts, patients' rights activists, and politicians envisioned this community-based system of psychiatric services. The authors show how policies shifted emphasis from radical reform to incremental change. Many have benefited from this shift, but many are left without the care they require.

## DEEP LEARNING

---

**MIT Press** An introduction to a broad range of topics in deep learning, covering mathematical and conceptual background, deep learning techniques used in industry, and research perspectives. "Written by three experts in the field, *Deep Learning* is the only comprehensive book on the subject." —Elon Musk, cochair of OpenAI; cofounder and CEO of Tesla and SpaceX *Deep learning* is a form of machine learning that enables computers to learn from experience and understand the world in terms of a hierarchy of concepts. Because the computer gathers knowledge from experience, there is no need for a human computer operator to formally specify all the knowledge that the computer needs. The hierarchy of concepts allows the computer to learn complicated concepts by building them out of simpler ones; a graph of these hierarchies would be many layers deep. This book introduces a broad range of topics in deep learning. The text offers mathematical and conceptual background, covering relevant concepts in linear algebra, probability theory and information theory, numerical computation, and machine learning. It describes deep learning techniques used by practitioners in industry, including deep feedforward networks, regularization, optimization algorithms, convolutional networks, sequence modeling, and practical methodology; and it surveys such applications as natural language processing, speech recognition, computer vision, online recommendation systems, bioinformatics, and videogames. Finally, the book offers research perspectives, covering such theoretical topics as linear factor models, autoencoders, representation learning, structured probabilistic models, Monte Carlo methods, the partition function, approximate inference, and deep generative models. *Deep Learning* can be used by undergraduate or graduate students planning careers in either industry or research, and by software engineers who want to begin using deep learning in their products or platforms. A website offers supplementary material for both readers and instructors.
