Globalization. Advantages and Disadvantages

GRIN Verlag Seminar paper from the year 2013 in the subject Economics - International Economic Relations, grade: 2,0, University of applied sciences Frankfurt a. M., course: Advanced Business English, language: English, abstract: **Globalization is one of the major topics and challenges of our time. It describes the process of the worldwide increasing interconnection of economy, politics, culture and environment. This compression affects individuals, society and institutions as well as countries. It can help to increase prosperity, social justice and global networking in order to make the world more equal. In the following seminar paper, the prime importance will be the look at the effects of globalization on the world economy in general. Despite the advantages of globalization, the negative side with all the disadvantages should not be neglected. Therefore, it is essential to look at the advantages and disadvantages that are created by globalization. The question is to ask, if globalization really has the force to make the world more equal and who are the winners or the losers of it ? The available seminar paper tries to answer that question with a critical analysis of the topic. Chapter two pays attention to the fact what globalization really is and tries to identify the major characteristics of globalization. Chapter three concentrates on the consequences and effects of globalization on the world economy. The fourth chapter tries to identify the advantages and disadvantages. The seminar paper ends with a short result in chapter five, providing a short summary of the whole theme.**

The Nutmeg's Curse

Parables for a Planet in Crisis

Hachette UK 'Do not miss this book' NAOMI KLEIN, author of *This Changes Everything* The history of the nutmeg is one of conquest and exploitation - of both human life and the natural environment - and the origin of our contemporary climate crisis. Tracing the threats to our future to the discovery of the New World and the sea route to the Indian Ocean, *The Nutmeg's Curse* argues that the dynamics of climate change are rooted in a centuries-old geopolitical order constructed by Western colonialism. The story of the nutmeg becomes a parable revealing the ways human history has always been entangled with earthly materials - spices, tea, sugarcane, opium, and fossil fuels. Our crisis, Ghosh shows, is ultimately the result of a mechanistic view of the earth, where nature exists only as a resource for humans to use for our own ends, rather than a force of its own, full of agency and meaning. Writing against the backdrop of the global pandemic and the Black Lives Matter protests, Ghosh frames these historical stories in a way that connects our shared colonial past with the deep inequality we see around us today. By interweaving discussions on everything from the

global history of the oil trade to the migrant crisis and the animist spirituality of indigenous communities around the world, *The Nutmeg's Curse* offers a sharp critique of contemporary society and speaks to the profoundly remarkable ways in which human history is shaped by non-human forces.

The Brics and the Future of Global Order

The transformation of the BRIC acronym from an investment term into a household name of international politics and into a semi-institutionalized political outfit (called BRICS, with a capital 'S'), is one of the defining developments in international politics in the past decades. While the concept is now commonly used in the general public debate and international media, there has not yet been a comprehensive and scholarly analysis of the history of the BRICS term. *The BRICS and the Future of Global Order, Second Edition* offers a definitive reference history of the BRICS as a term and as an institution--a chronological narrative and analytical account of the BRICS concept from its inception in 2001 to the political grouping it is today. In addition, it analyzes what the rise of powers like Brazil, Russia, India, China, and South Africa means for the future of global order. Will the BRICS countries seek to establish a parallel system with its own distinctive set of rules, institutions, and currencies of power, rejecting key tenets of liberal internationalism, or will they seek to embrace the rules and norms that define today's Western-led order?

The Economics of Social Determinants of Health and Health Inequalities

A Resource Book

[World Health Organization](#) "This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and

urban development, housing and transport policy can act as health policy"--

World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In The Fourth Industrial Revolution, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.**

Never Enough

Capitalism and the Progressive Spirit

[Oxford University Press](#) **It is said that greed fuels capitalism and socialism feeds on envy. But what happens in a stable society when a successful economy generates material progress for one population sector, while simultaneously creating income inequality and poverty for another sector? While this has long been a classic debate for economists, Neil Gilbert, a social welfare theorist, offers a new take. In this landmark work, Gilbert addresses the long-standing tensions between capitalism and the progressive spirit and challenges the contemporary progressive outlook on the failures of capitalism. In doing this, Never Enough analyzes the empirical evidence for conventional claims about the real level of poverty, the presumed causes and consequences of inequality, the meaning and underlying dynamics of social mobility, and the necessity for more social welfare spending and universal benefits. The book's careful analysis suggests that it is time to resist the material definition of progress that stands so high on the current agenda and envision alternative ways for our government to advance the "good society." Insatiable consumption and the commodification of everyday life has dominated the last half-century, and is encouraged by modern capitalism because it feeds the economy and is also used as a measure of individual success. But Gilbert argues that it is perhaps no longer the best way to stimulate the economy. Never Enough also challenges the prevailing assumptions about the decline of middle-class prosperity, opportunity and material well-being in the United States and in other post-industrial nations. In a careful reading of the evidence and a critical analysis of its implications, Gilbert demonstrates the extent to which the customary progressive claims about the severity of poverty, inequality, social mobility and the benefits of universalism not only distort the empirical reality of modern life in an era of abundance, but confounds efforts to help those most in need.**

Facing Forward

Schooling for Learning in Africa

[World Bank Publications](#) **While everybody recognizes the development challenges facing Sub-Saharan Africa, few have put together coherent plans that offer real hope for any feasible and general improvement. Facing Forward combines an evidence-based plan that not only recognizes the deep problems but provides specific prescriptions for dealing with the problems. In the simplest version, focus on the skills of the people and do it in a rational and achievable manner. †“ Eric Hanushek, Paul and Jean Hanna Senior Fellow, Hoover Institute, Stanford University This book offers a clear perspective on how to improve learning in basic education in Sub-Saharan Africa, based on extremely rigorous and exhaustive analysis of a large volume of data. The authors shine a light on the low levels of learning and on the contributory factors. They have not hesitated to raise difficult issues, such as the need to implement a consistent policy on the language of instruction, which is essential to ensuring the foundations of learning for all children. Using the framework of “From Science to Service Delivery,†? the book urges policy makers to look at the entire chain from policy design, informed by knowledge adapted to the local context, to implementation. Facing Forward: Schooling for Learning in Africa is a unique addition to the literature that is relevant for African policy makers and stakeholders. †“ Professor Hassana Alidou, Ambassador of the Republic of Niger to the United States and Canada As the continent gears itself up to provide universal basic education to all its children by 2030, it has to squarely address the challenge of**

how to improve learning. *Facing Forward* helps countries to benchmark themselves against each other and to identify concrete lines of action. It forces policy makers to think “where do I go from here?” “what do I do differently?” and to examine the hierarchy of interventions that can boost learning. It rightly urges Ministries of Education to build capacity through learning by doing and continuous adaptation of new knowledge to the local context. *Facing Forward* will unleash frank conversations about the profound reforms that are required in education policy and service delivery to ensure learning for every child on the continent. †“ Dr. Fred Matiang’i, Cabinet Secretary for the Interior and Coordination of National Government, Government of Kenya (former Cabinet Secretary for Education) *Facing Forward* couldn’t have come at a more opportune time as countries in the region, including Mauritius, focus more on learning outcomes rather than simply on inputs and processes in education systems. The book underscores the important point that African countries need not exclusively model themselves on high-performing education systems in the world. Much can as well be learnt from other countries at the same level of development, or lower, by virtue of the challenges they have faced and successfully overcome. This presents opportunities for greater peer-sharing and networking with these countries. Indeed a number of key focus areas are highlighted in the book that demonstrate good practices worthy of being emulated. These cover domains as diverse as enabling factors leading to improved student progression, strengthened teacher capacity, increased budgetary allocation with a focus on quality, as well as improved technical capacity of implementing agencies in the region. †“ Hon. (Mrs.) Leela Devi Dookun-Luchoomun, Minister of Education and Human Resources, Tertiary Education and Scientific Research, Republic of Mauritius

Yesterday, Today, and Tomorrow

School Desegregation and Resegregation in Charlotte

Harvard Education Press *Yesterday, Today, and Tomorrow* provides a compelling analysis of the forces and choices that have shaped the trend toward the resegregation of public schools. By assembling a wide range of contributors—historians, sociologists, economists, and education scholars—the editors provide a comprehensive view of a community’s experience with desegregation and economic development. Here we see resegregation through the lens of Charlotte, North Carolina, once a national model of successful desegregation, and home of the landmark Swann desegregation case, which gave rise to school busing. This book recounts the last forty years of Charlotte’s desegregation and resegregation, putting education reform in political and economic context. Within a decade of the Swann case, the district had developed one of the nation’s most successful desegregation plans, measured by racial balance and improved academic outcomes for both black and white students. However, beginning in the 1990s, this plan was gradually dismantled. Today, the level of resegregation in Charlotte has almost returned to what it was prior to 1971. At the core of Charlotte’s story is the relationship between social structure and human agency, with an emphasis on how yesterday’s decisions and actions define today’s choices.

Communities in Action

Pathways to Health Equity

National Academies Press In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual’s health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable:

such inequities can be mitigated by social policies that can shape health in powerful ways. **Communities in Action: Pathways to Health Equity** seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

What Lies Ahead for America's Children and Their Schools

Hoover Institution Press The coming decade holds immense potential for dramatic improvement in U.S. education and in the achievement of American children and in this volume, members of the Hoover Institution's Koret Task Force on K-12 Education examine both the potential gains and the pitfalls that lie ahead, informed by where U.S. education has been, what changes have been made in recent years, and what's still required for the comprehensive overhaul that this vital enterprise so urgently needs. Looking backward is infinitely easier than predicting the future, but planning for the future is necessary if anything is to change and by analyzing the recent past and present condition of American primary and secondary school education across a host of key topics, task force members in this volume chart a bold course for the years ahead. Optimistic about the opportunities at hand, they identify essential—and feasible—reforms as well as the barriers that must be overcome if those changes are to occur. They offer high-quality scholarship and thoughtful prescriptions for productive policy alternatives.

Causes and Consequences of Income Inequality

A Global Perspective

International Monetary Fund This paper analyzes the extent of income inequality from a global perspective, its drivers, and what to do about it. The drivers of inequality vary widely amongst countries, with some common drivers being the skill premium associated with technical change and globalization, weakening protection for labor, and lack of financial

inclusion in developing countries. We find that increasing the income share of the poor and the middle class actually increases growth while a rising income share of the top 20 percent results in lower growth—that is, when the rich get richer, benefits do not trickle down. This suggests that policies need to be country specific but should focus on raising the income share of the poor, and ensuring there is no hollowing out of the middle class. To tackle inequality, financial inclusion is imperative in emerging and developing countries while in advanced economies, policies should focus on raising human capital and skills and making tax systems more progressive.

Landscapes of Fear

Understanding Impunity in India

Zubaan Drawing on the findings of a comparative research project, this volume tackles a set of intricate questions about the workings of impunity in India. How do victims of abuse and survivors of sexual violence end up being denied justice? What do those on the margins—those with the wrong sex, wrong identity markers, wrong political leanings—tell us about violence by state and non-state actors? Bringing together senior academics, civil society leaders and fresh voices from the across India, the volume offers analysis — contextual, structural and gendered — and breaks new conceptual ground on the underbelly of India Shining. The volume contains testimonies that were collected during fieldwork in four Indian states. Published by Zubaan.

Education System in Saudi Arabia

Of Change and Reforms

Springer Nature This book is a comprehensive study on the education system of Saudi Arabia, placing the reforms and changes it has undergone in the past two decades within the context of the historical evolution of the education system. An education system cannot be seen in isolation of the society; it plays a significant role in shaping the individual, state and the society, that in turn, have a bearing on the education system and its evolution. Therefore, this book locates Saudi education in the backdrop of the changes in the society, how they have facilitated or hindered the education reforms and how the education reforms have impacted the society. The book does not ignore the immediate trigger for the beginning of a comprehensive reforms process but goes beyond it to find much deeper socio-political and economic rationales that paved the way for the reforms. It provides a nuanced understanding of the interplays of various socioeconomic as well as political factors that have shaped the education system in Saudi Arabia.

How's Life? 2013

Measuring Well-being

OECD Every person aspires to a good life. But what does “a good or a better life” mean? The second edition of How’s Life? provides an update on the most important aspects that shape people’s lives and well-being: income, jobs, housing, health, work-life balance, education, social connections, civic engagement and governance, environment, personal security and subjective well-being. It paints a comprehensive picture of well-being in OECD countries and other major economies, by looking at people’s material living conditions and quality of life across the population. Through a wide range of comparable well-being indicators, the report shows that countries perform differently in the various dimensions of well-being. For instance, low-income countries in the OECD area tend to do very well in subjective well-being and work-life balance, while their level of material well-being is much lower than that of other OECD countries. The report responds to the needs of citizens for better information on well-being and the needs of policy makers to give a more accurate picture of societal progress. In addition, the report contains in-depth studies of four key cross-cutting issues in well-being that are particularly relevant. First, this report analyses how well-being has changed during the global economic and financial crisis. Even though some effects of the crisis may become visible only in the long-term, the report finds that the Great Recession has large implications for both economic and non-economic well-being of households. Secondly, the report looks at gender differences in well-being, showing that the traditional gender gap in favour of men has reduced but has not disappeared. It also finds that women and men do well in different areas of well-being and that they are increasingly sharing tasks and roles. Third, it looks at the quality of employment and well-being in the workplace. The report presents evidence on the main factors that drive people’s commitment at work and are key to strengthening their capacity to cope with demanding jobs. Finally, the last chapter of the report studies the links between current and future well-being. It looks at ways to define and measure sustainability of wellbeing over time. How’s Life? is part of the OECD Better Life Initiative, launched by the Organization on the occasion of its 50th Anniversary in 2011. The OECD Better Life Initiative aims to promote “Better Policies for Better Lives”, in line with the OECD’s overarching...

Poor Economics

A Radical Rethinking of the Way to Fight Global Poverty

Hachette UK The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the *Wall Street Journal*, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.
