### The Green Book

## Appraisal and Evaluation in Central Government : Treasury Guidance

Stationery Office This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users.

## Technical questions and answers for job interview Offshore Drilling Platforms

Petrogav International This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

## Questions and answers for job interview Offshore Oil & Gas Rigs

Petrogav International The job interview is probably the most important step you will take in your job search journey. Because it's always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry. Since these questions are so common, hiring managers will expect you to be able to answer them smoothly and without hesitation. This eBook contains 288 questions and answers for job interview and as a BONUS web addresses to 289 video movies for a better understanding of the technological process. This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

## Immunisation against infectious diseases

The Stationery Office This is the third edition of this publication which contains the latest information on vaccines and vaccination procedures for all the vaccine preventable infectious diseases that may occur in the UK or in travellers going outside of the UK, particularly those immunisations that comprise the routine immunisation programme for all children from birth to adolescence. It is divided into two sections: the first section covers principles, practices and procedures, including issues of consent, contraindications, storage, distribution and disposal of vaccines, surveillance and monitoring, and the Vaccine Damage Payment Scheme; the second section covers the range of different diseases and vaccines.

## George Washington on Coins and Currency

McFarland George Washington is the most popular subject on coins, medals, tokens, paper money and postage stamps in America. Attempts to eliminate one-dollar bills from circulation, replacing them with coins, have been unsuccessful. Americans' reluctance to part with their "Georges" are beyond rational considerations but tap into deep-felt emotions. To discard one-dollar bills means discarding the metaphorical Father of His Country. Alexander Hamilton, the nation's first Secretary of the Treasury, said that monetary tokens were "vehicles of useful impressions." This numismatic history of George Washington traces the persistence of his image on American currency. These images are mostly from the late 18th-century. This book also offers a close look at the pictorial tradition in which these images are rooted.

## Other People's Money

### Masters of the Universe or Servants of the People?

**Profile Books Shortlisted for the Orwell Prize 2016** We all depend on the finance sector. We need it to store our money, manage our payments, finance housing stock, restore infrastructure, fund retirement and support new business. But these roles comprise only a tiny sliver of the sector's activity: the vast majority of lending is within the finance sector. So what is it all for? What is the purpose of this activity? And why is it so profitable? John Kay, a distinguished economist with wide experience of the financial sector, argues that the industry's perceived profitability is partly illusory, and partly an appropriation of wealth created elsewhere - of other people's money. The financial sector, he shows, has grown too large, detached itself from ordinary business and everyday life, and has become an industry that mostly trades with itself, talks to itself, and judges itself by reference to standards which it has itself generated. And the outside world has itself adopted those standards, bailing out financial institutions that have failed all of us through greed and mismanagement. We need finance, but today we have far too much of a good thing. In *Other People's Money* John Kay shows in his inimitable style what has gone wrong in the dark heart of finance.

### Infrastructure Investment in Indonesia: A Focus on Ports

**Open Book Publishers** *Infrastructure Investment in Indonesia: A Focus on Ports* presents an important and original collation of current material investigating the efficient facilitation of major infrastructure projects in Indonesia and Australia, with an emphasis on infrastructure investment and a focus on port planning and development. This interdisciplinary collection—spanning the disciplines of engineering, law and planning—draws helpfully on a range of practical and theoretical perspectives. It is the collaborative effort of leading experts in the fields of infrastructure project initiation and financing, and is based on international research conducted by the University of Melbourne, Universitas Indonesia and Universitas Gadjah Mada. The volume opens with a macroscopic perspective, outlining the broader economic situations confronting Indonesia and Australia, before adopting a more microscopic perspective to closely examine the issues surrounding major infrastructure investment in both countries. Detailed case studies are provided, key challenges are identified, and evidence-based solutions are offered. These solutions respond to such topical issues as how to overcome delays in infrastructure project initiation; how to enhance project decision-making for the selection and evaluation of projects; how to improve overall efficiency in the arrangement of project finance and governance; and how to increase the return provided by investment in infrastructure. Special focus is given to proposed improvements to the port cities of Indonesia in the areas of major infrastructure project governance, policies, engagement, operation and processes. By rigorously investigating the economic, transport, finance and policy aspects of infrastructure investment, this book will be a valuable resource for policy makers and government officials in Indonesia and Australia, infrastructure investment organisations, and companies involved in exporting services between Indonesia and Australia. This book will also be of interest to researchers and students of infrastructure planning and financing, setting a solid foundation for subsequent investigations of financing options for large-scale infrastructure developments.

### Civil Society Contributions to Policy Innovation in the PR China

### Environment, Social Development and International Cooperation

**Springer** This book focuses on the question of whether and how civil society may contribute to policy innovation. As the focus of civil society research is often more on the constraints on civil society by the state and less on the agency and effects of civil society organisations the authors provide a fresh and fruitful perspective.

### The Revised Standard Reference Guide to Indian Paper Money

### The Dog Bone Portfolio

### A Personal Odyssey into the First Kondratieff Winter of the Twenty-First Century

**BPS Books** Like so many of us, Margret Kopala lost a significant portion of her life savings in the stock market crash of 2008. Unlike us, however, she went on a long and intense financial odyssey to find out what caused the losses and what she could do to protect herself in the future. Armed with her skills as a journalist and public policy analyst, fueled by equal measures of fear and determination, and mentored by successful investment strategist and financial broadcaster John Budden, Kopala researched and wrote this magisterial analysis of how Russian economist Nikolai Kondratieff's long-wave theory is playing out in what many today describe as a financial Winter. Along the way, she is introduced to financial experts familiar with Kondratieff scholarship. John Budden's interviews in the book with Dean LeBaron, J. Anthony Boeckh, Ian Gordon, Larry Jeddelloh, Don Lindsey, the late Lord William Rees-Mogg, Jim Rogers, Eric Sprott, and Ronald-Peter Stöferle show how investors must put a new spin on asset allocation and security of their assets: like a dog that buries bones in different places, we would be advised to allocate our assets to different parts of the world - and to ensure that a good portion of those assets include gold, the only continuous basis of wealth across history and around the world. Kopala explores the global, national, and personal effects of: overconsumption; underproduction; energy and innovation; the printing of money to "save" the economy; competitive devaluations; deflation, reflation, and inflation; and war (the ultimate economic crisis). She documents those technologies that seeded previous New Economy Spring seasons -- from the era of canals to those of railroads, automobiles, and infotech -- and probes today's innovations most likely to seed the Next New Economy that we desperately need if we are to escape the doldrums of the current financial Winter. With trenchant explanations of how individuals can achieve portfolio strength by first preserving capital then being vigilant about the financial effects of politics, economic theory, culture, and our own choices, *The Dog Bone Portfolio* is a gift to investors, policy-makers, and, ultimately, nations everywhere.

### National planning policy framework 2012

**The Stationery Office** The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.

## The State of the Nation

[Hay House, Inc](#) A definitive, analytical and meticulous account of the present state of the nation - from a constitutional perspective - by one of India's most respected legal luminaries An ardent defender of the Constitution of India, Fali Nariman has today attained the status of an outstanding lawyer who strongly believes in the rule of the law and stands by his convictions. In this timely volume, the author highlights crucial issues that the legislature, the executive, judiciary, the bar and the common people have to deal with virtually on a day-to-day basis. His main focus is on corruption at various levels and in 'hallowed' institutions, including the judiciary. The author contends that the legislative and executive wings of the government - the elected representatives of the people - were (and are) expected to provide for the welfare of the people. He points out that they have failed miserably simply because making of laws is not enough; applying and enforcing laws - which are also the primary duties of the government - have left much to be desired. Consequently, it is the judiciary that tells the government when and how to distribute excess food, what crops to grow and what not to grow, which economic projects are good for the country and which are not, and what fuel should be used in our vehicles and whether 2G/3G licences should be allotted only through auctions! The judiciary is hence accused of overreach! The contents also throw light on other important subjects such as: the implications of reservations for certain sections of the population (including minorities); the true purpose and significance of the Constitution; Centre-State relations; and whether the Constitution has benefited the common people over the years. This is a book that is absorbing as well as thought-provoking that will make the readers put on their thinking caps.

## A Safe and Just Space for Humanity: Can we live within the doughnut?

[Oxfam](#)

## The EU Law of Economic and Monetary Union

[Oxford University Press, USA](#) An authoritative reference work on the legal framework of European economic and monetary union, this book comprehensively analyses the legal foundations, institutions, and substantive legal issues in EU monetary integration.

## Entrepreneurship in the Informal Economy

## Models, Approaches and Prospects for Economic Development

[Routledge](#) Although entrepreneurship in the informal economy occurs outside state regulatory systems, informal commercial activities account for an estimated 30% of economic activity around the world. Informal entrepreneurship goes unmonitored despite the fact that it significantly contributes to poverty reduction and economic development. As a result, the informal sector is open to unethical practices including corruption, worker exploitation, and natural environment abuse to name just a few. In the media, debates have formed around whether informal entrepreneurship should be assisted or legitimized. Hence, a deep understanding of the phenomenon is vitally important. This book is the first on the market to offer models and approaches to informal entrepreneurship as well as to its prospects for economic development. Offering an in-depth examination of informal entrepreneurship in many different countries, it reveals the motivations for engaging in entrepreneurship in the informal economy, characteristics of informal entrepreneurship, and informal entrepreneurs' response to ethical issues. This volume illustrates the relationship between formal and informal economies and the conditions for the benefits of informal entrepreneurship to outweigh its disadvantages. And finally, it gives recommendations about when and how the informal economy can be formalized, which sectors should be formalized, and which ones can remain informal. This book offers much-needed guidance for stakeholders involved in economic development programs and scholars and entrepreneurs interested in the field of informal entrepreneurship as it is developing around the globe.

## The Trader's Guide to the Euro Area

## Economic Indicators, the ECB and the Euro Crisis

[John Wiley & Sons](#) The euro area remains in a state of flux and appears to be unsustainable in its present form. The outcome of the crisis may be unknown for years and a judgement on the project's success or failure may be out of reach for decades. In the meantime, analysts, portfolio managers and traders will still have daily, weekly, quarterly and annual benchmarks. They will have to analyze economic developments in the euro area and their impacts on financial assets. The objective of this book is to provide a framework for that analysis that is comprehensible to most financial market participants. The book begins with a focus on coincident and leading economic indicators for the euro area. The following section looks at euro-area institutions. The next chapter focuses on the euro crisis. It attempts to provide an explanation of its origins and a glimpse of the potential outcomes. In addition, the tools needed to analyze the crisis as it evolves are presented. The last sections provide information unique to the economies of Germany, France, the U.K., Switzerland, Sweden and Norway.

## The Special Collections Handbook

[Facet Publishing](#) This comprehensive and no-nonsense guide to working with special collections and rare books is an essential day-to-day companion. Working with special collections can vary dramatically from preserving a single rare book to managing and digitizing vast mixed-media archives, yet the role of the information professional is always critical in tapping into the potential of these collections, protecting their legacy and bringing them to the attention of the wider public. This book offers up-to-date guidance which pulls together insights from best practice across the heritage sector to build innovative, co-operative and questioning mind-sets that will help them to cope in turbulent times. The Handbook covers all aspects of special collections work: preservation, developing collections, understanding objects, emergency planning, security, legal and ethical concerns, cataloguing, digitization, marketing, outreach, teaching, impact, advocacy and fundraising. New to this edition: coverage of new standards and concepts including unique and distinctive collections (UDCs), The Leeds Typology, Archive Accreditation, PD 5454:2012 and PAS 197 discussion of the major changes to laws affecting special collections including UK copyright law relating to library/archive exception and orphan works and forthcoming changes to data protection in the EU exploration of new trends in research including the rise of digital humanities, open access, the impact agenda and the REF updates to the sections on marketing, audience development and fundraising to include social media, customer journey mapping and crowdsourcing and more consideration of impact and indicators, digitization and new skills frameworks from CILIP and RBMS. This is the essential practical guide for anyone working with special collections or rare books in libraries, archives, museums, galleries and other heritage organizations. It is also a useful introduction to special collections work for academics and students taking library and information courses.

## Electronic Commerce

## A Managerial and Social Networks Perspective

[Springer](#) Throughout the book, theoretical foundations necessary for understanding Electronic Commerce (EC) are presented, ranging from consumer behavior to the economic theory of competition. Furthermore, this book presents the most current topics relating to EC as described by a diversified team of experts in a variety of fields, including a senior vice president of an e-commerce-related company. The authors provide website resources, numerous exercises, and extensive references to supplement the theoretical presentations. At the end of each chapter, a list of online resources with links to the websites is also provided. Additionally, extensive, vivid examples from large corporations, small businesses from different industries, and services, governments, and nonprofit agencies from all over the world make concepts come alive in Electronic Commerce. These examples, which were collected by both academicians and practitioners, show the reader the capabilities of EC, its cost and justification, and the innovative ways corporations are using EC in their operations. In this edition (previous editions published by Pearson/Prentice Hall), the authors bring forth the latest trends in e-commerce, including social businesses, social networking, social collaboration, innovations, and mobility.

## Strengthening Forensic Science in the United States

### A Path Forward

[National Academies Press](#) Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

## The Criminal Injuries Compensation Scheme 2012

[The Stationery Office](#) The Criminal Injuries Compensation Scheme is a government funded scheme to compensate blameless victims of violent crime. Money (an award) is paid to people who have been physically or mentally injured because they were the blameless victim of a violent crime. This current Scheme introduced on 27 November 2012 applies to any application made on or after that date (for any applications made before then different rules may apply). The Scheme is for people injured in England, Scotland and Wales (Great Britain) and the rules of the Scheme and the value of the payments awarded are set by Parliament. Payments are calculated by reference to a tariff of injuries. Claims are considered for the following: personal injury following a single incident; personal injury following a period of abuse; loss of earnings; special expenses payments - to cover specific injury-related requirements which are not available free of charge from any other source; fatal injuries, including loss of parental services and financial dependency; and funeral payments.

## Eurostat-OECD Methodological Manual on Purchasing Power Parities (2012 Edition)

[OECD Publishing](#) This manual gives a complete, detailed and up-to-date description of the Eurostat-OECD PPP Programme, including its organisation, the various surveys carried out by participating countries and the ways PPPs are calculated and disseminated. It also provides guidance on the use of PPPs.

## Revisiting Risk-Weighted Assets

[International Monetary Fund](#) In this paper, we provide an overview of the concerns surrounding the variations in the calculation of risk-weighted assets (RWAs) across banks and jurisdictions and how this might undermine the Basel III capital adequacy framework. We discuss the key drivers behind the differences in these calculations, drawing upon a sample of systemically important banks from Europe, North America, and Asia Pacific. We then discuss a range of policy options that could be explored to fix the actual and perceived problems with RWAs, and improve the use of risk-sensitive capital ratios.

## Model Rules of Professional Conduct

[American Bar Association](#) The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

## International Convergence of Capital Measurement and Capital Standards

### A Revised Framework

[Lulu.com](#)

## Why Nation-Building Matters

## Political Consolidation, Building Security Forces, and Economic Development in Failed and Fragile States

[U of Nebraska Press](#) Why Nation-Building Matters establishes a framework for building security forces, economic development, and political consolidation that blends soft and hard power into a deployable and effective package.

## Unhappy Union

### How the Euro Crisis- and Europe - Can Be Fixed

**Profile Books** The euro was supposed to create an unbreakable bond between the nations and people of Europe. But when the debt crisis struck, the flaws of the half-built currency has brought the EU close to breaking point after decades of post-war integration. Deep fault-lines have opened up between European institutions and the nation-states, and often between the rulers and the ruled, raising profound questions about Europe's democratic deficit. Belief in European institutions and national governments alike is waning, while radicals of both the left and the right are gaining power and influence. Europe's leaders have so far proved the doomsayers wrong and prevented the currency from breaking up. "If the euro fails, Europe fails," says Angela Merkel. Yet the euro, and the European project as a whole, is far from safe. If it is to survive and thrive, leaders will finally have to confront difficult decisions. How much national sovereignty are they willing to give up to create a more lasting and credible currency? How much of the debt burden and banking risk will they share? Is Britain prepared to walk away from the EU? And will other countries follow? In their astute analysis of the crisis, the authors describe America's behind-the-scenes lobbying to salvage the euro, economists' bitter debates over austerity, the unseen manoeuvres of the European Central Bank and the tortuous negotiations over banking union. In the final chapter, they set out the stark choices confronting Europe's leaders and citizens.

## Practising Feminist Political Ecologies

### Moving Beyond the 'Green Economy'

**Zed Books Ltd.** Destined to transform its field, this volume features some of the most exciting feminist scholars and activists working within feminist political ecology, including Giovanna Di Chiro, Dianne Rocheleau, Catherine Walsh and Christa Wichterich. Offering a collective critique of the 'green economy', it features the latest analyses of the post-Rio+20 debates alongside a nuanced reading of the impact of the current ecological and economic crises on women as well as their communities and ecologies. This new, politically timely and engaging text puts feminist political ecology back on the map.

## Private Equity Unchained

### Strategy Insights for the Institutional Investor

**Springer** There are significant returns to be made from private equity, infrastructure, real estate and other illiquid investments, but a competitive strategy is essential for investment success and for meeting objectives. This book takes readers through all the considerations of planning and implementing an investment strategy in illiquid investments.

## Social Value for Health: Understanding, Framing and Capturing the Wider Psycho-social Outcomes Of Health Interventions and Programmes

Frontiers Media SA

## Powering Prosperity

### A Citizen's Guide to Shaping the 21st Century

**Bombardier Books** Since the Global Financial Crisis, we have been approaching a crossroad in modern human history. The top 1 percent of people own more than half of the world's wealth, while hundreds of millions suffer in extreme poverty. Governments quarrel over the politics of environmental policy, even as climate change poses an existential threat to life on the planet. And communities "hollowed out" by the forces of globalization still struggle to stand on their feet. How can we even begin to contemplate solutions to such immense and persistent problems? In *Powering Prosperity: A Citizen's Guide to Shaping the 21st Century*, Dr. Indranil Ghosh brings together his decades of experience as a sustainable economic development investor, an entrepreneur, and an MIT-trained scientist, to provide a new framework for understanding the world's challenges and the choices societies must make to address them. Central to Dr. Ghosh's roadmap for positive change is a more inclusive form of governance, a collaborative model of long-term investment between public and private capital, and the empowerment of local communities to unleash their innovative and entrepreneurial energy.

## Design to Grow

### How Coca-Cola Learned to Combine Scale and Agility (and How You Can, Too)

**Penguin UK** Tomorrow's business winners need two things: scale and agility. The answer to both is design. For over a century, The Coca-Cola Company has used design to scale its flagship brand to over 200 countries. And in recent years it has sustained that growth while becoming even more agile - something most established businesses struggle with. In *Design to Grow*, Coca-Cola's vice president of Innovation and Entrepreneurship David Butler gives an unprecedented behind-the-scenes look at Coca-Cola's design-led strategy for growth. He shows how any business can use the same approach to get to the next level. Clear and actionable, this book is a must-read for leaders, creatives and entrepreneurs. 'A handy blueprint for how any company can use design to stay ahead of the competition' The Times 'Reading *Design to Grow* has caused me to think differently about my company. I am confident it will do the same for how you think about yours' Tim Brown, CEO of IDEO

## Crime Scene Investigation A Guide for Law Enforcement

This is a guide to recommended practices for crime scene investigation. The guide is presented in five major sections, with sub-sections as noted: (1) Arriving at the Scene: Initial Response/Prioritization of Efforts (receipt of information, safety procedures, emergency care, secure and control persons at the scene, boundaries, turn over control of the scene and brief investigator/s in charge, document actions and observations); (2) Preliminary Documentation and Evaluation of the Scene (scene assessment, "walk-through" and initial documentation); (3) Processing the Scene (team composition, contamination control, documentation and prioritize, collect, preserve, inventory, package, transport, and submit evidence); (4) Completing and Recording the Crime Scene Investigation (establish debriefing team, perform final survey, document the scene); and (5) Crime Scene Equipment (initial responding officers, investigator/evidence technician, evidence collection kits).

## The Vampire in Folklore, History, Literature, Film and Television

### A Comprehensive Bibliography

[McFarland](#) This comprehensive bibliography covers writings about vampires and related creatures from the 19th century to the present. More than 6,000 entries document the vampire's penetration of Western culture, from scholarly discourse, to popular culture, politics and cook books. Sections by topic list works covering various aspects, including general sources, folklore and history, vampires in literature, music and art, metaphorical vampires and the contemporary vampire community. Vampires from film and television—from Bela Lugosi's *Dracula* to *Buffy the Vampire Slayer*, *True Blood* and the *Twilight Saga*—are well represented.

## Easy Money

### The Greatest Ponzi Scheme Ever and How It Is Set to Destroy the Global Financial System

[SAGE Publications India](#) This is the third book in the Easy Money trilogy which discusses how, what the world now calls the global financial crisis evolved in the aftermath of the real estate bubble bursting in the United States and other parts of the world. In this book, we will try to understand the various reasons behind the financial crisis, and also identify the different villains behind it.

## Tibet on Fire

### Buddhism, Protest, and the Rhetoric of Self-Immolation

[Springer](#) Using Kenneth Burke's concept of dramatism as a way of exploring multiple motivations in symbolic expression, *Tibet on Fire* examines the Tibetan self-immolation movement of 2011-2015. The volume asserts that the self-immolation act is an affirmation of Tibetan identity in the face of cultural genocide.

## Handbook of Research on Theory and Practice of Global Islamic Finance

[IGI Global](#) As an emerging global phenomenon, Islamic economics and the financial system has expanded exponentially in recent decades. Many components of the industry are still unknown, but hopefully, the lack of awareness will soon be stilled. The *Handbook of Research on Theory and Practice of Global Islamic Finance* provides emerging research on the latest global Islamic economic practices. The content within this publication examines risk management, economic justice, and stock market analysis. It is designed for financiers, banking professionals, economists, policymakers, researchers, academicians, and students interested in ideas centered on the development and practice of Islamic finance.

## The Thinking Executive's Guide to Sustainability

[Business Expert Press](#) We live in an increasingly global economy in which the effects of shrunken economies, broadened communication, and widespread meteorological incidents associated with climate change are leaving virtually no one untouched. As a result, a working knowledge of concepts such as the triple bottom line and sustainability, have become mandatory. Systems-thinking is foundational for grasping these concepts and is based on trans-disciplinary theories deriving in part from biology, physics, economics, philosophy, computer science, engineering, geography, and other sciences. Specifically it is the study of systems, including all life forms, climate phenomena, and even in human learning and organizational processes, that regulate themselves through feedback. The media and the public have become savvy to corporate green-washing, and government regulation, already pervasive in Europe, is imminent in the United States. Business practices are a subsystem of human activity, which is itself a subsystem of the biosphere we all depend upon for services, such as clean air and water, sufficient soils to produce food, and moderate weather. Corporate sustainability practices are in the midst of becoming a required aspect of the social license to conduct business, and the use of a systems framework provides a coherent and eminently sensible way to comprehend the structure and logic that underlies this transition. Green business efforts and stakeholder initiatives undertaken by those without the requisite understanding of sustainability and the trends related to it in the world of commerce risk adverse press, activist pressure, regulatory constraint, added expense, reduced revenue, and lowered valuation. This book offers a practical, relevant, and easily grasped overview of sustainability issues and the systems logic that informs them, supported by empirical research and applied to corporate rationales, decision-making, and business processes. Intended for business professionals seeking concise, reliable, and current knowledge and trends, it will support them in leading their organizations' corporate sustainability, social responsibility, and citizenship efforts so they can remain competitive and successful.

## The Games People Play

## Theology, Religion, and Sport

[Wipf and Stock Publishers](#) In *The Games People Play*, Robert Ellis constructs a theology around the global cultural phenomenon of modern sport, paying particular attention to its British and American manifestations. Using historical narrative and social analysis to enter the debate on sport as religion, Ellis shows that modern sport may be said to have taken on some of the functions previously vested in organized religion. Through biblical and theological reflection, he presents a practical theology of sport's appeal and value, with special attention to the theological concept of transcendence. Throughout, he draws on original empirical work with sports participants and spectators. *The Games People Play* addresses issues often considered problematic in theological discussions of sport such as gender, race, consumerism, and the role of the modern media, as well as problems associated with excessive competition and performance-enhancing substances. As Ellis explains, "Sporting journalists often use religious language in covering sports events. Salvation features in many a headline, and talk of moments of redemption is not uncommon. Perhaps, somewhere beyond the cliched hyperbole, there is some theological truth in all this after all."
