**Extinction Point** *47North First comes the red rain: a strange, scarlet downpour from a cloudless sky that spreads across cities, nations, and the entire globe. In a matter of panicked hours, every living thing on earth succumbs to swift, bloody death. With only wits, weapons, and a bicycle, Emily must undertake a grueling journey across a country that's turning increasingly alien. For though she fears she's been left to inherit the earth, the truth is far more terrifying than a lifetime of solitude.* **The Ultimate Collection on UFOs** *Lulu.com* **The Late Great Planet Earth** *Zondervan The impact of The Late Great Planet Earth cannot be overstated. The New York Times called it the "no. 1 non-fiction bestseller of the decade." For Christians and non-Christians of the 1970s, Hal Lindsey's blockbuster served as a wake-up call on events soon to come and events already unfolding -- all leading up to the greatest event of all: the return of Jesus Christ. The years since have confirmed Lindsey's insights into what biblical prophecy says about the times we live in. Whether you're a church-going believer or someone who wouldn't darken the door of a Christian institution, the Bible has much to tell you about the imminent future of this planet. In the midst of an out-of-control generation, it reveals a grand design that's unfolding exactly according to plan. The rebirth of Israel. The threat of war in the Middle East. An increase in natural catastrophes. The revival of Satanism and witchcraft. These and other signs, foreseen by prophets from Moses to Jesus, portend the coming of an antichrist . . . of a war which will bring humanity to the brink of destruction . . . and of incredible deliverance for a desperate, dying planet.* **The British Study Edition of the Urantia Papers Book [eReader PDF]** *Tigran Aivazian The British Study Edition of the Urantia Papers is based on the standard SRT text, but uses the metric system and adds a critical apparatus of textual variants and*

But when images from the Voyager I space probe reveal an alien doomsday ship hurtling toward the earth, the human race seems marked for extinction. As news of the approaching ship spreads panic around the globe, signs of a sinister plot begin to emerge. One which threatens to unravel the already fragile fabric of society and everything Jack and Dr. Mia Ward have fought for. But could a mysterious signal emanating from inside Greenland's ice sheet hold the promise of unlocking the secrets hidden within our genome and preventing humanity's destruction? From the frozen fields of Greenland to the bustling Indian subcontinent and the cobbled streets of Rome, the race is on to stop the deadliest countdown to extinction the human race has ever known. **Romantic Revelations Visions of Post-Apocalyptic Life and Hope in the Anthropocene** University of Toronto Press Romantic Revelations shows that the nonhuman is fundamental to Romanticism's political responses to climatic catastrophes. Exploring what he calls "post-apocalyptic Romanticism," Chris Washington intervenes in the critical conversation that has long defined Romanticism as an apocalyptic field. "Apocalypse" means "the revelation of a perfected world," which sees Romanticism's back-to-nature environmentalism as a return to paradise and peace on earth. Romantic Revelations, however, demonstrates that the destructive climate change events of 1816, "the year without a summer," changed Romantic thinking about the environment and the end of the world. Their post-apocalyptic visions correlate to the beginning of the Anthropocene, the time when humans initiated the possible extinction of their own species and potentially the earth. Rather than constructing paradises where humans are reborn or human existence ends, the later Romantics are interested in how to survive in the ashes after great social and climatic global disasters. Romantic Revelations argues that Percy Shelley, Mary Shelley, Lord Byron, John Clare, and Jane Austen sketch out a post-apocalyptic world that, in contrast to the sunnier Romantic narratives, is paradoxically the vision that offers us hope. In thinking through life after disaster, Washington contends that these authors craft an optimistic vision of the future that leads to a new politics. **Mein Kampf** Diamond Pocket Books Pvt Ltd 'MEIN KAMPF' is the autobiography of Adolf Hitler gives detailed insight into the mission and vision of Adolf Hitler that shook the world. This book is the merger of two volumes. The first volume of MEIN KAMPF' was written while the author was imprisoned in a Bavarian fortress. The book deals with events which brought the author into this blight. It was the hour of Germany's deepest humiliation, when Napoleon has dismembered the old German Empire and French soldiers occupied almost the whole of Germany. The books narrates how Hitler was arrested with several of his comrades and imprisoned in the fortress of Landsberg on the river Lech. During this period only the author wrote the first volume of MEIN KAMPF. The Second volume of MEIN KAMPF was written after release of Hitler from prison and it was published after the French had left the Ruhr, the tramp of the invading armies still echoed in German ears and the terrible ravages had plunged the country into a state of social and economic Chaos. The beauty of the book is, MEIN KAMPF is an

historical document which bears the imprint of its own time. Moreover, Hitler has declared that his acts and 'public statements' constitute a partial revision of his book and are to be taken as such. Also, the author has translated Hitler's ideal, the Volkischer Staat, as the People's State. The author has tried his best making German Vocabulary easy to understand. You will never be satisfied until you go through the whole book. A must read book, which is one of the most widely circulated and read books worldwide. **Four Views on the Book of Revelation** Zondervan Of all the books of the Bible, few are as fascinating or as bewildering as Revelation. Its images grip the imagination: four grim horsemen, the Antichrist, the ten-horned beast, the ultimate battle at Armageddon, and, of course, 666, the "mark of the beast," variously interpreted to signify everything from Hitler and Krushchev to credit cards and the Internet. Is the book of Revelation a blueprint for the future that needs decoding if we want to understand current events? Is it a book of powerful imagery, with warnings and promises for the church throughout the ages? Or is it essentially an imaginative depiction of historical events in the first century? *Four Views on the Book of Revelation* explores the four main views in which Revelation is understood: preterist, idealist, classical dispensationalist futurist, and progressive dispensationalist. The interactive Counterpoints forum allows each author not only to present his view, but also to offer brief commentary on other views presented. This evenhanded approach is ideal for comparing and contrasting stances in order to form a personal conclusion about the interpretation and meaning of Revelation. The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians. Counterpoints books address two categories: Church Life and Bible and Theology. Perhaps not even each other... Shortlisted for the 2019 Scottish Teenage Book Prize **Imagining Extinction The Cultural Meanings of Endangered Species** University of Chicago Press La 4e de couverture de la jaquette indique : "How should science be written? It is a question that piqued natural philosophers of the seventeenth century as they experimented with the rhetorical figures, neologisms, verse-forms, and generic variety that characterise the literary texture of their work. Inspired laymen were quick to borrow from the new philosophy and from practising scientists in order to deploy ideas and images from astronomy, optics, chemistry, biology, and medicine. Between them, scientists, natural historians, poets, dramatists, and essayists produced new, adjusted, or hybrid literary forms. *The Poetics of Scientific Investigation in Seventeenth-Century England* examines those forms and that literary-scientific texture, as well as representations of the scientific--the laboratory, collaborative experimental retirement, and the canons of scientific conversation--and proposes that the writing of seventeenth-century science mirrors the intellectual and investigative processes of early-modern science itself" **Extinction** Faber & Faber LRB BOOKSHOP'S AUTHOR OF THE MONTH ONE OF THE GUARDIAN'S BEST BOOKS OF 2019 WITH A

NEW AFTERWORD BY GEOFF DYER 'If you haven't read Bernhard, you will not know of the most radical advance in fiction since Joyce ... My advice: dive in.' Lucy Ellmann 'I absolutely love Bernhard: he is one of the darkest and funniest writers ... A must read for everybody.' Karl Ove Knausgaard Franz-Josef Murau is the intellectual black sheep of a powerful Austrian land-owning family. He now lives in Rome in self-imposed exile, surrounded by a coterie of artistic and intellectual friends. On returning from his sister's wedding on the family estate of Wolfsegg, having resolved never to go home again, Murau receives a telegram informing him of the death of his parents and brother in a car crash. Not only must he now go back, he must do so as the master of Wolfsegg: and he must decide its fate. The summit of Thomas Bernhard's artistic genius - mesmerising, addictive, explosively tragicomic - *Extinction* is a landmark of post-war literature, newly illuminated by Geoff Dyer's afterword. **The Road** Pan Macmillan The post-apocalyptic modern classic with an introduction by novelist John Banville. In a burned-out America, a father and his young son walk under a darkened sky, heading slowly for the coast. They have no idea what, if anything, awaits them there. The landscape is destroyed, nothing moves save the ash on the wind and cruel, lawless men stalk the roadside, lying in wait. Attempting to survive in this brave new world, the young boy and his protector have nothing but a pistol to defend themselves. They must keep walking. Winner of the Pulitzer Prize for Fiction, *The Road* is an incandescent novel, the story of a remarkable and profoundly moving journey. In this unflinching study of the best and worst of humankind, Cormac McCarthy boldly divines a future without hope, but one in which, miraculously, this young family finds tenderness. An exemplar of post-apocalyptic writing, *The Road* is a true modern classic, a masterful, moving and increasingly prescient novel. This edition is part of the Picador Collection, a series of the best in contemporary literature, inaugurated in Picador's 50th Anniversary year. **Daniel and the Revelation** Review and Herald Pub Assoc **Information—Consciousness—Reality How a New Understanding of the Universe Can Help Answer Age-Old Questions of Existence** Springer This open access book chronicles the rise of a new scientific paradigm offering novel insights into the age-old enigmas of existence. Over 300 years ago, the human mind discovered the machine code of reality: mathematics. By utilizing abstract thought systems, humans began to decode the workings of the cosmos. From this understanding, the current scientific paradigm emerged, ultimately discovering the gift of technology. Today, however, our island of knowledge is surrounded by ever longer shores of ignorance. Science appears to have hit a dead end when confronted with the nature of reality and consciousness. In this fascinating and accessible volume, James Glattfelder explores a radical paradigm shift uncovering the ontology of reality. It is found to be information-theoretic and participatory, yielding a computational and programmable universe. **The Extinction Trials** The end... is only the beginning. A few miles off the Yucatán coast, Jack and a team of scientists tow an aging drilling platform over the impact crater with the aim of securing a sample. The Revelation of St. John has been an enigma from the earliest Christian centuries. On the one hand, it has been shunned because of its mysteriousness; on the other, it has been discredited for sober-minded, intelligent Christians by the absurd vagaries of its interpreters. **The Story of the Seer of Patmos** TEACH Services, Inc. The book of Revelation pronounces a blessing upon everyone who "reads" or even "hears" it read. Yet, many treat it as a mysterious book that should not be read and cannot be understood. S. N. Haskell has opened the book of Revelation up in an easily read style that explains it and its relation to our day. This facsimile, originally printed in 1905, makes an excellent study book for young and old. **The Apocalypse Unsealed** Cosimo, Inc. The biblical Book of Revelation is not a cryptic

history or prophecy, as is generally believed, but is, in fact, a manual of spiritual development. So explains theosophist James M. Pryse in this 1919 work, which seeks to uncover the hidden significance of the most misunderstood section of the Bible and reinterpret it from a modern theosophical perspective, uncovering its esoteric relationship to other ancient texts, including the Upanishads. Pryse offers a new translation of the Apocalypse based upon undisputed meanings of the original Greek text and comments on it on a verse-by-verse basis to bring to light startling new meaning in a work that many readers will have believed fully explored. Students of comparative mythology, ancient religion, and the Bible will find this an intriguing read. American journalist JAMES MORGAN PRYSE JR. (1859-1942) helped found the Gnostic Society in Los Angeles in 1925. He is also the author of *Sermon on the Mount and Other Extracts from the New Testament* (1899) and *Reincarnation in the New Testament* (1900), among other works. **The Good Life Crisis** Nick Shelton *The Good Life Crisis* is a project that seeks to find the best answers to the question "What is the Good Life?" author of *The Nevernight Chronicle* and the *Illuminae Files* 'Every kind of badass' - Laini Taylor **Exile** Usborne Publishing Ltd The second book in the heart-stopping *The Extinction Trials* trilogy, for fans of *The Hunger Games* and *Jurassic Park*. Terror. Wonder. Survival. Welcome to the continent of monsters. To ensure the survival of the human race, three killer species must be destroyed. It's a deadly mission - one that Stormchaser and Lincoln are not allowed to refuse. But in the jaws of danger, would you obey orders - or fight for the secret that might save those you love? **The God Delusion. 10th Anniversary Edition** Random House The *God Delusion* caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. *The God Delusion* is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject. **Rare Earth Why Complex Life is Uncommon in the Universe** Springer What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by *Rare Earth*, and its implications for those who look to the heavens for companionship. **Climate and Literature** Cambridge University Press Leading scholars examine the history of climate and literature. Essays analyse this history in terms of the contrasts between literary and climatological time, and between literal and literary atmosphere, before addressing textual representations of climate in seasons poetry, classical Greek literature, medieval Icelandic and Greenlandic sagas, and Shakespearean theatre. Beyond this, the effect of Enlightenment understandings of climate on literature are explored in Romantic poetry, North American settler literature, the novels of empire, Victorian and modernist fiction, science fiction, and Nordic noir or crime fiction. Finally, the volume addresses recent literary framings of climate in the Anthropocene, charting the rise of the climate change novel, the spectre of extinction in the contemporary cultural imagination, and the relationship between climate criticism and nuclear criticism. Together, the essays in this volume outline the discursive dimensions of climate. Climate is as old as human civilisation, as old as all attempts to apprehend and describe patterns in the weather. Because climate is weather documented, it necessarily possesses an intimate relationship with

language, and through language, to literature. This volume challenges the idea that climate belongs to the realm of science and is separate from literature and the realm of the imagination. **The Uninhabitable Earth A Story of the Future** Penguin UK **\*\*SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER\*\*** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live-the planet no longer nurturing a dream of abundance, but a living nightmare. **The Shadow of the Gods** Hachette UK 'A masterfully crafted, brutally compelling Norse-inspired epic' Anthony Ryan **THE GREATEST SAGAS ARE WRITTEN IN BLOOD**.
