As a direct outcome of the Plan, the Construction Products Association has developed this guide, which is supported by the CLG, in collaboration with the National House Building Council, Local Authority Building Control, Energy Saving Trust, Association of Consultant Approved Inspectors and the Federation of Master Builders. It brings together solutions

offered in the Approved Documents and third tier guidance, such as industry literature, in one concise and fully illustrated guide. Starting with chapters on the existing structure and proposed structure, the guide is then divided into chapters on the main considerations for a loft conversion, covering topics such as fire safety, windows and doors, and insulation. This is an essential read for anyone looking for a guide which simplifies the building regulations process and offers solutions, where applicable, to achieve minimum, good and best standards for construction. **Guidance Note 3: Inspection & Testing Requirements for Electrical Installations IET Wiring Regulations** [Inst of Engineering & Technology](#) Incorporating the latest amendments to the British Standard requirements for electrical installations, this text includes the most recent changes to the legislation. **On-Site Guide BS 7671: 2008 17th Edition** This revised edition of the IEE On-Site Guide reflects updates included in the latest edition of the IEE Wiring Regulations (17th edition) 2008.
