Various financial institutions and societies have taken steps toward financial inclusion, but to be successful, they need to understand how to accurately target and market their potential customers as well as the new avenues for development. **Marketing Techniques for Financial Inclusion and Development** is a critical scholarly resource on the marketing techniques adopted by various financial institutions and societies for promoting financial inclusion initiatives for the development of the society at large. Featuring coverage on a broad range of topics such as consumer awareness, financial literacy, and micro-enterprises, this book is geared towards managers, investors, brokers, researchers, and all others within the banking industry. **Producing Childrens Television in the On Demand Age** *Intellect Books* This book provides a detailed account of the creative, economic and regulatory processes underlying the production of children's television in a multi-platform era. Its collection of integrated case studies includes extended interviews with leading producers whose programs are watched by children all over the world. These reveal the impact of digitization on the funding, distribution and consumption of children's television, and the ways that producers have adapted their creative practice accordingly. In its comprehensive analysis of the production culture of children's television, this book provides a valuable lens through which to view broader transformations in media industries in the on-demand age. This original and engaging book explores the creative processes underlying the production of children's television, with close attention to underlying economic and policy dynamics. It does so through a combination of detailed case studies and interviews with leading producers from across three English-language markets. In its examination of the impact of new streaming services like Netflix and Amazon Prime on the funding, production and distribution of children's screen content, the book will reveal how producers successfully created content for these increasingly influential new services. It offers important insights into the production of children's screen content in Australia, New Zealand and the United Kingdom, and builds on previous research in the field. The addition of analysis, which provides the context of historical, regulatory and economic factors that shape production in all three countries, is important for situating the personal testimonies and providing some critical distance. The variety of productions chosen for analysis, including drama, factual productions and animation, represents the very different pressures on different genres. Previous studies have looked at children's content as one genre, whereas this new study reveals children's content to be as diverse in range as adult content. The case studies show the pressures and opportunities emerging from different national and international context and offers its own unique take on matters such as diversity, gender representation and indeed the ethics of representing children from a producers' perspective. As a contribution to industry studies, this volume represents a valuable addition to the literature and will no doubt be referenced by future studies. The quantity and quality of original interview material goes far beyond interviews in the trade press. Combined with the rich detail of production case studies, the articulate interviews and Potter's highly engaging mode of writing, this book is an invaluable additional to research in the area. This book will provide a crucial analysis of success stories in the children's screen production industries at a time of flux and adaptation as television's distribution revolution takes place. The book will be indispensable for scholars of children's television and of UK, New Zealand and Australian media policy. It will also engage a wider audience interested in television production, production studies and digital distribution - including those teaching at undergraduate and postgraduate levels. It will be a valuable library resource for courses that include screen media industries and television production culture as part of their content. It will be of interest to scholars beyond children's television because of its analysis of success stories in screen production at a time of change and uncertainty. It will also be of relevance to the international screen production sector and industry bodies, including screen organizations such as Screen Australia, and the UK's Children's Media Foundation, for its analysis of success stories in the screen production industries. Also, of interest to the many groups with vested interests around children and children's media - including regulatory bodies like Ofcom in the UK, the Australian Communications and Media Authority in Australia and other key institutions, including legacy broadcasters such as the BBC, ABC and ITV. **The Handbook of Banking Technology** *John Wiley & Sons* Competitive advantage in banking comes

Small businesses not only have less employment, but also less annual revenue than a regular-sized business. With the growth of large corporations and chain businesses, it has become harder to maintain the survival of a small business. The COVID-19 pandemic has also brought more pressure onto the already unsteady survival of small businesses, due to forced closures, decreased agility, fewer technological innovations, and smaller customer bases. The *Research Anthology on Small Business Strategies for Success and Survival* offers current strategies for small businesses that can be utilized in order to maintain equal footing during challenging times. With the proper strategies available to small business owners, small businesses could not only survive, but also excel despite the environment that surrounds them. Covering topics including decision management, new supportive technologies, sustainable development, and micro-financing, this text is ideal for small business owners, entrepreneurs, startup companies, family-owned and operated businesses, restaurateurs, local retailers, managers, executives, academicians, researchers, and students. *Research Anthology on Concepts, Applications, and Challenges of FinTech* *IGI Global* FinTech, an abbreviated term for financial technology, is a digital revolution changing the way banking and financial services are being used both by individuals and businesses. As these changes continue to take place, the financial industry is focused on technological innovation and feeding into this digital revolution to better serve consumers who are looking for easier ways to invest, transfer money, use banking services, and more. FinTech is increasing accessibility to financial services, automating these services, expanding financial options, and enabling online payments and banking. While the benefits are being continually seen and this technology is becoming more widely accepted, there are still challenges facing the technology that include security concerns. To understand FinTech and its role in society, both the benefits and challenges must be reviewed and discussed for a holistic view on the digital innovations changing the face of the financial industry. The *Research Anthology on Concepts, Applications, and Challenges of FinTech* covers the latest technologies in FinTech with a comprehensive view of the impact on the industry, where these technologies are implemented, how they are improving financial services, and the security applications and challenges being faced. The chapters cover the options FinTech has unlocked, such as mobile banking and virtual transactions, while also focusing on the workings of the technology itself and security applications, such as blockchain and cryptocurrency. This book is a valuable reference tool for accountants, bankers, financial planners, financial analysts, business managers, economists, computer scientists, academicians, researchers, financial professionals, and students. *Fourteen Points for the Twenty-First Century A Renewed Appeal for Cooperative Internationalism* *University Press of Kentucky* When the United States entered World War I, President Woodrow Wilson declared to Congress that the objective was not merely to bring "a new balance of power," but rather to bring a "just and secure peace" to the world by the end of the conflict. In this famous speech, known as "The Fourteen Points," Wilson offered the world a road map toward a more equitable international system in the midst of unprecedented global conflict, including ideas on the interconnectedness of democracy, trade, and the concept of a forum for peaceably resolving international disputes. Even decades after the end of the First World War, Wilson's ideas remained important and influenced many of his successors. But now, in the twenty-first century, there are forces at work in the world that Wilson could never have imagined, and those forces call for a new plan toward peace. In *Fourteen Points for the Twenty-First Century: A Renewed Appeal for Cooperative Internationalism*, Richard H. Immerman and Jeffrey A. Engel bring together a diverse group of thinkers who take up Wilson's call for a new world order by exploring fourteen new directions for the twenty-first century. The contributors—scholars, policymakers, entrepreneurs, poets, doctors, and scientists—propose solutions to contemporary challenges such as migration, global warming, health care, food security, and privacy in the digital age. Taken together, these points challenge American leaders and policymakers to champion an international effort, not to make America great again, but to work

cooperatively with other nations on the basis of mutual respect. **International Convergence of Capital Measurement and Capital Standards A Revised Framework** *Lulu.com* **The American Legal Profession The Myths and Realities of Practicing Law** *CQ Press* While emphasizing that lawyers fulfill a vital but often misunderstood public function in society, **The American Legal Profession: The Myths and Realities of Practicing Law** by Christopher P. By 2050, the world is expected to increase waste generation by 70 percent, from 2.01 billion tonnes of waste in 2016 to 3.40 billion tonnes of waste annually. Individuals and governments make decisions about consumption and waste management that affect the daily health, productivity, and cleanliness of communities. Poorly managed waste is contaminating the world's oceans, clogging drains and causing flooding, transmitting diseases, increasing respiratory problems, harming animals that consume waste unknowingly, and affecting economic development. Unmanaged and improperly managed waste from decades of economic growth requires urgent action at all levels of society. **What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050** aggregates extensive solid waste data at the national and urban levels. It estimates and projects waste generation to 2030 and 2050. Beyond the core data metrics from waste generation to disposal, the report provides information on waste management costs, revenues, and tariffs; special wastes; regulations; public communication; administrative and operational models; and the informal sector. Solid waste management accounts for approximately 20 percent of municipal budgets in low-income countries and 10 percent of municipal budgets in middle-income countries, on average. Waste management is often under the jurisdiction of local authorities facing competing priorities and limited resources and capacities in planning, contract management, and operational monitoring. These factors make sustainable waste management a complicated proposition; most low- and middle-income countries, and their respective cities, are struggling to address these challenges. Waste management data are critical to creating policy and planning for local contexts. Understanding how much waste is generated—especially with rapid urbanization

and population growth—as well as the types of waste generated helps local governments to select appropriate management methods and plan for future demand. It allows governments to design a system with a suitable number of vehicles, establish efficient routes, set targets for diversion of waste, track progress, and adapt as consumption patterns change. With accurate data, governments can realistically allocate resources, assess relevant technologies, and consider strategic partners for service provision, such as the private sector or nongovernmental organizations.

**What a Waste 2.0: A Global Snapshot of Solid Waste Management to 2050** provides the most up-to-date information available to empower citizens and governments around the world to effectively address the pressing global crisis of waste. Additional information is available at <http://www.worldbank.org/what-a-waste>.

**Strengthening Forensic Science in the United States A Path Forward** *National Academies Press* Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. **Strengthening Forensic Science in the United States: A Path Forward** provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. **Strengthening Forensic Science in the United States** gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Sustainable Development in Post-Pandemic Africa Effective Strategies for Resource Mobilization** *Taylor & Francis* With both domestic and external financing expected to dry up in the wake of the COVID-19 pandemic, this book argues that there is a need for fresh ideas and new strategies for achieving sustainable development in Africa. In addition to triggering the most severe recession in nearly a century, the COVID-19 pandemic has disrupted global value chains, causing unprecedented damage to healthcare systems, economies, and well-being, hitting the world's most vulnerable people the hardest. Even before the pandemic, Africa was suffering from the effects of low commodity prices, sluggish GDP growth, high debt levels, low levels of domestic savings, and weak private capital inflows. This book argues that now, as the continent emerges from the current crisis, it will be important to reconfigure current financing sources under a forward-looking framework that incorporates other non-traditional financing tools and mechanisms such as public-private partnerships, sovereign wealth funds, gender lens investing, new growth drivers, and emerging and disruptive technologies. Finally, the book concludes by adopting a sectoral approach and examining the real economy impacts of new growth drivers such as agriculture value chains, industrialization, tourism, and the blue economy. Drawing on a range of original research as well as insights from practice, this book will be a useful guide for Global Development and African Studies researchers, as well as for policy makers, investors, finance specialists, and global business practitioners and entrepreneurs.

**Independent Power Projects in Sub-Saharan Africa Lessons from Five Key Countries** *World Bank Publications* Inadequate electricity services pose a major impediment to reducing extreme poverty and boosting shared prosperity in Sub-Saharan Africa. Simply put, Africa does not have enough power. Despite the abundant low-carbon and low-cost energy resources available to Sub-Saharan Africa, the region's entire installed electricity capacity, at a little over 80 GW, is equivalent to that of the Republic of Korea. Looking ahead, Sub-Saharan Africa will need to ramp-up its power generation capacity substantially. The investment needed to meet this goal largely exceeds African countries already stretched public finances. Increasing private investment is critical to help expand and improve electricity supply. Historically, most private sector finance has been channeled through privately financed independent power projects (IPP), supported by nonrecourse or limited recourse

loans, with long-term power purchase agreements with the state utility or another off-taker. Between 1990 and 2014, IPPs have spread across Sub-Saharan Africa and are now present in 17 countries. Currently, there are 125 IPPs, with an overall installed capacity of 10.7 GW and investments of \$24.6 billion. However, private investment could be much greater and less concentrated. South Africa alone accounts for 67 IPPs, 4.3 GW of capacity and \$14.4 billion of investments; the remaining projects are concentrated in a handful of countries. The objective of this study is to evaluate the experience of IPPs and identify lessons that can help African countries attract more and better private investment. At the core of this analysis is a reflection on whether IPPs have in fact benefited Sub-Saharan Africa, and how they might be improved. The analysis is based primarily on in depth case studies, carried out in five countries, including Kenya, Nigeria, South Africa, Tanzania and Uganda, which not only have the most numerous but also among the most extensive experience with IPPs.

**FCC Record A Comprehensive Compilation of Decisions, Reports, Public Notices, and Other Documents of the Federal Communications Commission of the United States** *Global Investment Competitiveness Report 2019/2020* **Rebuilding Investor Confidence in Times of Uncertainty** *World Bank Publications* The **Global Investment Competitiveness Report 2019-2020** provides novel analytical insights, empirical evidence, and actionable recommendations for governments seeking to enhance investor confidence in times of uncertainty. The report's findings and policy recommendations are organized around "3 ICs" - they provide guidance to governments on how to increase investments' contributions to their country's development, enhance investor confidence, and foster their economies' investment competitiveness. The report presents results of a new survey of more than 2,400 business executives representing FDI in 10 large developing countries: Brazil, China, India, Indonesia, Malaysia, Mexico, Nigeria, Thailand, Turkey, and Vietnam. The results show that over half of surveyed foreign businesses have already been adversely affected by policy uncertainty, experiencing a decrease in employment, firm productivity, or investment. Foreign investors report that supporting political environments, stable macroeconomic conditions, and conducive regulatory regimes are their top three investment decision factors. Moreover, the report's new global database of regulatory risk shows that predictability and transparency increase investor confidence and FDI flows. The report also assesses the impact of FDI on poverty, inequality, employment, and firm performance using evidence from various countries. It shows that FDI in developing countries yields benefits to their firms and citizens-including more and better-paid jobs-but governments need to be vigilant about possible adverse consequences on income distribution. The report is organized in 5 chapters: Chapter 1 presents the results of the foreign investor survey. Chapter 2 explores the differential performance and development impact of greenfield FDI, local firms acquired by multinational corporations (i.e. brownfield FDI), and domestically-owned firms using evidence from six countries. Chapter 3 assesses the impact of FDI on poverty, inequality, employment and wages, using case study evidence from Ethiopia, Turkey and Vietnam. Chapter 4 presents a new framework to measure FDI regulatory risk that is linked to specific legal and regulatory measures. Chapter 5 focuses on factors for increasing the effectiveness of investment promotion agencies.

**Benchmarking Public Procurement 2016 Assessing Public Procurement Systems in 77 Economies** *World Bank Publications* Public procurement accounts for around one-fifth of global gross domestic product (GDP). Given its size the public procurement market can improve public sector performance, promote national competitiveness, drive domestic economic growth, and boost economic development. Launched at the request of the G20 Anti-Corruption Working Group, Benchmarking Public Procurement presents actionable indicators to help countries identify and monitor policies and regulations that impact how private sector companies do business with the government in 77 economies. The Benchmarking Public Procurement 2016 report is organized under two parts: the public procurement life cycle and the complaint and reporting mechanisms indicators. Data was gathered using standardized questionnaires distributed to expert contributors in each economy. The project builds on the Doing Business methodology and aims to promote evidence-based decision making by governments and shed light over areas where few empirical data have been presented so far.

**Families Caring for an Aging America** *National Academies Press* Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in trying to meet the needs of older adults.

**Development and the Next Generation** *World Bank Publications* "The theme of The World Development Report 2007 is youth - young people between the ages of 12 to 24. As this population group seeks identity and independence, they make decisions that affect not only their own well-being, but that of others, and they do this in a rapidly changing demographic and socio-economic environment. Supporting young people's transition to adulthood poses important opportunities and risky challenges for development policy. Are education systems preparing young people to cope with the demands of changing economies? What kind of support do they get as they enter the labor market? Can they move freely to where the jobs are? What can be done to help them avoid serious consequences of risky behavior, such as death from HIV-AIDS and drug abuse? Can their creative energy be directed productively to support development thinking? The report will focus on crucial capabilities and transitions in a young person's life: learning for life and work, staying healthy, working, forming families, and exercising citizenship. For each, there are opportunities and risks; for all, policies and institutions matter." **Diversity, Equity, and Inclusion in Sport** *Human Kinetics* Diversity, Equity, and Inclusion in Sport delivers a comprehensive view of DEI issues in sport organizations. **Identifying the Culprit Assessing Eyewitness Identification** *National Academies Press* Eyewitnesses play an important role in criminal cases when they can identify culprits. Estimates suggest that tens of thousands of eyewitnesses make identifications in criminal investigations each year. Research on factors that affect the accuracy of eyewitness identification procedures has given us an increasingly clear picture of how identifications are made, and more importantly, an improved understanding of the principled limits on vision and memory that can lead to failure of identification. Factors such as viewing conditions, duress, elevated emotions, and biases influence the visual perception experience. Perceptual experiences are stored by a system of memory that is highly malleable and continuously evolving, neither retaining nor divulging content in an informational vacuum. As such, the fidelity of our memories to actual events may be compromised by many factors at all stages of processing, from encoding to storage and retrieval. Unknown to the individual, memories are forgotten, reconstructed, updated, and distorted. Complicating the process further, policies governing law enforcement procedures for conducting and recording identifications are not standard, and policies and practices to address the issue of misidentification vary widely. These limitations can produce mistaken identifications with significant consequences. What can we do to make certain that eyewitness identification convicts the guilty and exonerates the innocent? Identifying the Culprit makes the case that better data collection and research on eyewitness identification, new law enforcement training protocols, standardized procedures for administering line-ups, and improvements in the handling of eyewitness identification in court can increase the chances that accurate identifications are made. This report explains the science that has emerged during the past 30 years on eyewitness identifications and identifies best practices in eyewitness procedures for the law enforcement community and in the presentation of eyewitness evidence in the courtroom. In order to continue the advancement of eyewitness identification research, the report recommends a focused research agenda. Identifying the Culprit will be an essential resource to assist the law enforcement and legal communities as they seek to understand the value and the limitations

of eyewitness identification and make improvements to procedures. *The Uninhabitable Earth A Story of the Future Penguin UK* **\*\*SUNDAY TIMES AND THE NEW YORK TIMES BESTSELLER\*\*** 'An epoch-defining book' Matt Haig 'If you read just one work of non-fiction this year, it should probably be this' David Sexton, Evening Standard Selected as a Book of the Year 2019 by the Sunday Times, Spectator and New Statesman A Waterstones Paperback of the Year and shortlisted for the Foyles Book of the Year 2019 Longlisted for the PEN / E.O. Wilson Literary Science Writing Award It is worse, much worse, than you think. The slowness of climate change is a fairy tale, perhaps as pernicious as the one that says it isn't happening at all, and if your anxiety about it is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible, even within the lifetime of a teenager today. Over the past decades, the term "Anthropocene" has climbed into the popular imagination - a name given to the geologic era we live in now, one defined by human intervention in the life of the planet. But however sanguine you might be about the proposition that we have ravaged the natural world, which we surely have, it is another thing entirely to consider the possibility that we have only provoked it, engineering first in ignorance and then in denial a climate system that will now go to war with us for many centuries, perhaps until it destroys us. In the meantime, it will remake us, transforming every aspect of the way we live-the planet no longer nurturing a dream of abundance, but a living nightmare. *FinTech and RegTech in a Nutshell, and the Future in a Sandbox CFA Institute Research Foundation* The 2008 global financial crisis represented a pivotal moment that separated prior phases of the development of financial technology (FinTech) and regulatory technology (RegTech) from the current paradigm. Today, FinTech has entered a phase of rapid development marked by the proliferation of startups and other new entrants, such as IT and ecommerce firms that have fragmented the financial services market. This new era presents fresh challenges for regulators and highlights why the evolution of FinTech necessitates a parallel development of RegTech. In particular, regulators must develop a robust new framework that promotes innovation and market confidence, aided by the use of regulatory "sandboxes." Certain RegTech developments today are highlighting the path toward another paradigm shift, which will be marked by a reconceptualization of the nature of financial regulation. *The Indigo Book Lulu.com* This public domain book is an open and compatible implementation of the Uniform System of Citation. *Why Karen Carpenter Matters University of Texas Press* A Pitchfork Best Music Book of 2019: A look at what the beloved pop singer meant to fans, written with "nostalgic affection and astute critical thinking" (Los Angeles Times). In the '60s and '70s, America's music scene was marked by raucous excess, reflected in the tragic overdoses of young superstars such as Jimi Hendrix and Janis Joplin. At the same time, the uplifting harmonies and sunny lyrics that propelled Karen Carpenter and her brother, Richard, to international fame belied a different sort of tragedy—the underconsumption that led to Karen's death at age thirty-two from the effects of an eating disorder. In *Why Karen Carpenter Matters*, Karen Tongson (whose Filipino musician parents named her after the pop icon) interweaves the story of the singer's rise to fame with her own trans-Pacific journey between the Philippines—where imitations of American pop styles flourished—and Karen Carpenter's home ground of Southern California. Tongson reveals why the Carpenters' chart-topping, seemingly whitewashed musical fantasies of "normal love" can now have profound significance for her—as well as for other people of color, LGBT+ communities, and anyone outside the mainstream culture usually associated with Karen Carpenter's legacy. This hybrid of memoir and biography excavates the destructive perfectionism at the root of the Carpenters' sound, while finding the beauty in the singer's all too brief life. *Fundamental Principles of EU Law Against Money Laundering Routledge* This book critically analyses fundamental principles of EU law for the control of international economic crime. Discussing how the reporting system and the exchange of information are at the heart of the global anti-money laundering regime, the study also looks at the inferential force of financial intelligence in criminal proceedings and the responsibilities this places on prosecutors and criminals alike. The author closely examines the application of Article 8(2) of the European Court of Human Rights for the retention and movement of the fingerprints, cellular samples and DNA profiles of unconvicted persons, and argues the incompatibility with the ECHR, along with the effect of socially stigmatising unconvicted persons. The work concludes with exploring how financial regulation has, inter alia, shifted responsibility to businesses and financial institutions to become more transparent and accountable to financial regulators and tax authorities. This critical analysis is essential reading for law students and the Judicial Body, as well as financial crime investigators and regulators. *A New Youth? Young People, Generations and Family Life Routledge* A New Youth? provides a cross-cultural perspective on the challenges and problems posed by young people's transition to adulthood. The authors address questions such as: What are the experiences of being young in different European countries? What can we learn about the differences of being young in non-European countries? Are young people developing new attitudes towards society? What are the risks associated with the transition of youth to adulthood? Can we identify new attitudes about citizenship? On a more general level, are there experiences and new social meanings associated with youth? The volume is comparative between various European and non-European countries in order to identify the emerging models of transition. These characteristics are connected with broader social, political and cultural changes: changes related to extended education, increasing women's participation in the labour market, changing welfare regimes, as well as changes in political regimes and in the representation and construction of individual identities and biographies, towards an increasing individualization. The work offers critical reflections in the realm of sociology of youth by providing broader understandings of the term 'youth'. The detailed analysis of new forms of marginality and social exclusion among young people offers valuable insight for policy development and political debate.
