As OECD school systems have become more complex and characterised by multi-level governance, a growing set of actors are increasingly involved in financial decision-making. This requires designing funding allocation models that are aligned to a school system's governance structures, linking budget planning procedures at different levels to shared educational goals and evaluating the use of school funding to hold decision makers accountable and ensure that resources are used effectively and equitably. The three R's to combat the three T's are 1) Revise the environment (set the student up for success by changing the environment), 2) Replace the behavior (Teach the student what you want to see instead of telling them what not to do, and 3) Reframe your response (change how you react to the target behavior and feed the replacement behavior. A dedicated, online “toolkit” offers numerous worksheets and templates that support each stage of the process and help school leaders scaffold the work of educators to put an aggressive turnaround plan into action while a leadership guide at the end of the book provides guidance to turnaround teams and facilitators.
