Consular Affairs and Diplomacy

Martinus Nijhoff Publishers Consular Affairs and Diplomacy analyses the nature of diplomacy's consular dimension in international relations. It contributes to our understanding of key themes in consular affairs today, the challenges that are facing the three great powers, as well as the historical origins of the consular institution.

Human Rights and the Dark Side of Globalisation

Transnational Law Enforcement and Migration Control

Taylor & Francis This edited volume examines the continued viability of international human rights law in the context of growing transnational law enforcement. With states increasingly making use of global governance modes, core exercises of public authority such as migration control, surveillance, detention and policing, are increasingly conducted extraterritorially, outsourced to foreign governments or delegated to non-state actors. New forms of cooperation raise difficult questions about divided, shared and joint responsibility under international human rights law. At the same time, some governments engage in transnational law enforcement exactly to avoid such responsibilities, creatively seeking to navigate the complex, overlapping and sometimes unclear bodies of international law. As such, this volume argues that this area represents a particular dark side of globalisation, requiring both scholars and practitioners to revisit basic assumptions and legal strategies. The volume will be of great interest to students, scholars and practitioners of international relations, human rights and public international law.

Visas and Walls

Border Security in the Age of Terrorism

University of Pennsylvania Press Borders traditionally served to insulate nations from other states and to provide bulwarks against intrusion by foreign armies. In the age of terrorism, borders are more frequently perceived as protection against threats from determined individuals arriving from elsewhere. After a deadly terrorist attack, leaders immediately encounter pressure to close their borders. As Nazli Avdan observes, cracking down on border crossings and policing migration enhance security. However, the imperatives of globalization demand that borders remain open to legal travel and economic exchange. While stricter border policies may be symbolically valuable and pragmatically safer, according to Avdan, they are economically costly, restricting trade between neighbors and damaging commercial ties. In Visas and Walls, Avdan argues that the balance between economics and security is contingent on how close to home threats, whether actual or potential, originate. When terrorist events affect the residents of a country or take place within its borders, economic ties matter less. When terrorist violence strikes elsewhere and does not involve its citizens, the unaffected state's investment in globalization carries the day. Avdan examines the visa waiver programs and visa control policies of several countries in place in 2010, including Turkey's migration policies; analyzes the visa issuance practices of the European Union from 2003 until 2015; and explores how terrorism and trade affected states' propensities to build border walls in the post-World War II era. Her findings challenge

the claim that border crackdowns are a reflexive response to terrorist violence and qualify globalists' assertions that economic globalization makes for open borders. *Visas and Walls* encourages policymakers and leaders to consider more broadly the effects of economic interdependence on policies governing borders and their permeability.

Identifying Security Logics in the EU Policy Discourse

The "Migration Crisis" and the EU

Springer Nature This open access book investigates the complexity and the modalities of securitization of migration and border control at the EU level. It discusses and compares how different EU institutions and agencies have been deploying different logics of security, e.g. humanitarianism or management of risk, while framing increased migratory flows and so called migration crisis as a security problem. The book argues that the (re)development of EU migration and border control policies in response to increased migratory flows of 2015 have revealed an increasingly tangled nature of securitization of migration in the EU. This is reflected in the intertwining of security logics where migrants and human mobility tend to be securitized through different, sometimes multiple, interpretative lenses at different stages of policy framing. From a theoretical point of view, the book develops a fresh analytical perspective that further contributes to burgeoning discussion on securitization theory. By bridging the literature on policy framing and securitization it makes a significant contribution to the debates on both securitization and migration. As such this book is of great interest to students, academics, policy makers and all those working in the fields of EU politics, migration, security, and international relations.

Handbook on European Law Relating to Asylum, Borders and Immigration

The European Convention on Human Rights and European Union law provide an increasingly important framework for the protection of the rights of foreigners. European Union legislation relating to asylum, borders and immigration is developing fast. There is an impressive body of case law by the European Court of Human Rights relating in particular to Articles 3, 5, 8 and 13 of the ECHR. The Court of Justice of the European Union is increasingly asked to pronounce itself on the interpretation of European Union law provisions in this field. This handbook presents this European Union legislation and the body of case law by the two European courts in an accessible way. It is intended for legal practitioners, judges, prosecutors, immigration officials and nongovernmental organisations, in the EU and Council of Europe Member States.

Turkey and EU Integration

Achievements and Obstacles

Taylor & Francis What has been achieved regarding Turkey's efforts at integration to the EU and what obstacles remain to it achieving full membership? Like other developing countries, Turkey displays visible signs of advancement with rapid increases in living standards, greater mobility and the rapid spread of technology. Much of its legislation and political, economic and administrative systems are also now aligned to the EU and this process has undoubtedly contributed to democratization and modernization. At the same time problems in politics and society persist; the Gezi protests, limitations of freedom of expression, frequent occupational accidents in the mining and construction sectors, honour killings and political upheaval which has manifested itself most starkly with the recent coup attempt all call attention to the challenges facing a country in the process of change. Charting the political, legal and economic relations between Turkey and the European Union since 1959 this book explores the relationship through phases such as association, customs union and candidacy. Each chapter covers a particular period in the relations and/or a theme which has both current and overall relevance to the conduct of the relations. In this way, the authors examine the impact of the EU in affecting change, what has been achieved and the obstacles that remain.

[Lulu.com 2011 Updated Reprint. Updated Annually. Para-Military Groups in EU Handbook](#)

Routledge Handbook of European Politics

[Routledge](#) Since the Treaty of the European Union was ratified in 1993, the European Union has become an important factor in an ever-increasing number of regimes of pooled sovereignty. This Handbook seeks to present a valuable guide to this new and unique system in the twenty-first century, allowing readers to obtain a better understanding of the emerging multilevel European governance system that links national polities to Europe and the global community. Adopting a pan-European approach, this Handbook brings together the work of leading international academics to cover a wide range of topics such as: the historical and theoretical background the political systems and institutions of both the EU and its individual member nations political parties and party systems political elites civil society and social movements in European politics the political economy of Europe public administration and policy-making external policies of the EU. This is an invaluable and comprehensive resource for students, scholars, researchers and practitioners of the European Union, European politics and comparative politics.

The Migration Conference 2021 Selected Papers

[Transnational Press London](#) This is a collection of self-selected papers presented at The Migration Conference 2021 London. COVID-19 pandemic and ongoing restrictions and difficulties in international travel forced us to run the TMC online for a second time. It is a new and improving experience for most of us and there is strong hints that the conference will continue in hybrid form in the near future. As usual we have invited participants to submit 2000 words papers for the proceedings book and this volume brings you these papers. Topics covered in the volume includes gender, education, mass movements, refugees, religion, identity, migration policy, culture, diplomacy, remittances, climate, water, environment and pretty much everything about migration. Most of the papers are in English, but there are some in French, Spanish and Turkish too. This is a great book for those who want short accounts on all aspects of migration and refugees.

European Integration

[Flipside Digital Content Company Inc.](#) A clear guide to current EU institutions, practices, and policies, this is also an informed insider's account of how they have emerged in their present form, with clues on future change. The mixture of analysis and history, description and prescription, works well, because the author has had a ringside seat, but retains a cool Nordic non-partisan detachment. The hints he offers to those, for example in Asia, considering following a similar path to regional integration, represent the distilled wisdom of a career in balancing economic benefits and national sensitivities. As his story shows, it can be done. - Lord Kerr, Former Head of the UK Diplomatic Service, now Chairman of Imperial College, London and Deputy Chairman of Royal Dutch Shell.

Bilateral Relations in the Mediterranean

Prospects for Migration Issues

[Edward Elgar Publishing](#) This timely book assesses national and supranational bilateral approaches to dealing with the rising tide of migration into the European Union via the Mediterranean Sea. International law and EU migration law specialists critically assess the legal tools adopted to engage with the 'refugee crisis'. While the EU works to develop a unified approach to Mediterranean transit and origin countries, the authors argue that a crucial role should be accorded to individual states in finding a solution to this complex and sensitive situation.

African Migrants and Europe

Managing the ultimate frontier

Routledge The process of migration control mirrors the trajectories of the people who traverse national boundaries, making today's borders flexible and fluid. This book explores the transformation of migration control in the post 9/11 era. It looks at how border controls have become more diffuse in the face of increased human flows from Africa and presents a critical analysis of the dispositive of European migration control, including detention without trial, derogation of human rights law, torture, "extraordinary rendition", the curtailment of civil liberties and the securitization of migration. By examining the role of Gaddafi's Libya in the last ten years as a gendarme of Europe, it argues for a re-visioning of borders and frontiers in ways that can account for their dialectical nature, and for the dialectical nature of political life. This text will be of key interest to scholars and students of European studies, African studies, security studies, international relations, global studies, comparative politics, cultural geography, migration studies and border theory.

Accessing Asylum in Europe

Extraterritorial Border Controls and Refugee Rights Under EU Law

Oxford University Press, USA Europe is currently experiencing a so-called "refugee crisis," demonstrated by millions of displaced people unseen since World War II. This book examines the interface between the EU's response to irregular flows, in particular the main extraterritorial border and migration controls taken by the Member States, and the rights asylum seekers acquire from EU law. "Remote control" techniques, such as the imposition of visas, fines on carriers transporting unsatisfactorily documented third-country nationals, and interception at sea are investigated in detail in a bid to assess the impact these measures have on access to asylum in the EU. The book also thoroughly analyses the rights recognised by the EU Charter of Fundamental Rights to persons in need of international protection, inclusive of the principle of non-refoulement, the right to leave any country including one's own, the right to asylum, and the right to remedies and effective judicial protection. The fundamental focus of the book is the relationship between the aforementioned border and migration controls and the rights of asylum seekers and, most importantly, how these rights (should) limit the scope of such measures and the ways in which they are implemented. The ultimate goal is to conclude whether the current series of extraterritorial mechanisms of pre-entry vetting is compatible in EU law with the EU rights of refugees and forced migrants.

The Pandemic Crisis and the European Union

COVID-19 and Crisis Management

Routledge This book assesses the implications of the COVID-19 pandemic for the European Union (EU), as well as its response in dealing with an overarching, multidimensional crisis with consequences extending beyond public health safety to political, economic, legal, and institutional arenas. It argues the pandemic represents a symmetric crisis cutting across countries with different social, economic and political characteristics and which yet - despite favouring cooperative solutions at the supranational level - has largely been met with initial responses of a national, even local, nature. So, how well did the EU perform as a crisis manager in the pandemic crisis? This book will be of key interest to scholars, students and readers of crisis, pandemic and health management, European Union politics and governance.

Foreigners, Refugees or Minorities?

Rethinking People in the Context of Border Controls and Visas

Routledge When immigration policy and the treatment of Roma collide in international relations there are surprising consequences which are revelatory of the underlying tensions between internal and external policies in the European Union. This book examines the relationship of citizenship, ethnicity and international relations and how these three aspects of the State, its people and its neighbours relate to one another. It studies the wide issue of international relations, citizenship and minority discrimination through the lens of the case study of European Roma who seek refugee status in Canada on account of their persecution in Europe. The volume assesses the relationships among citizenship, state protection and persecution and minority status, and how they can intersect with and destabilize foreign affairs. The central background to the book is the European treatment of Roma, their linkages with visa and asylum policies and their human rights repercussions. The various contributions reveal how modern liberal democracies can find themselves in contradictory positions concerning their citizens - when these are looking for protection abroad - and foreigners - in search of international protection - as a consequence of visa and pre-border surveillance policies and practices.

The Refugee in International Law

Oxford University Press This new edition of the leading textbook on international refugee law has been substantially updated and now features extensive coverage of forced migration. In its accessible and influential style, it defines refugee status and asylum, and sets out the protections afforded to refugees and forced migrations.

Causes and Consequences of Migrant Criminalization

Springer Nature The book illustrates how the trend of associating migrants and refugees with criminality is on the rise. In political discourses and popular media alike, migrants and refugees are frequently portrayed as being dangerous, while cultures intent on welcoming newcomers are increasingly seen as being naïve, and providing assistance to migrants is more and more frequently subject to administrative or criminal penalties. At the same time, nondemocratic trends and practices that violate human rights and equality are gaining momentum in Europe, the US and Australia. Racism, xenophobia and anti-Islamism are simultaneously becoming more open and public; they are no longer restricted to clandestine platforms but are increasingly being mainstreamed into the political programs of parties that are entering both the EU parliaments and member state legislatures. Similar developments can be seen in the US and Australia. Such transformations in societies, governments, and institutions seem to reflect a growing amnesia regarding the lessons of the two World Wars of the 20th century, and the role that Europe, the US and Australia played in developing a post-war legal framework based on a shared, if imperfect, commitment to human rights. The book presents individual national analyses to reveal an emerging trend of “crimmigration” regardless of the peculiarities of national legislatures and internal political dynamics. By collecting original contributions from scholars based in and focused on each of these regions, it addresses above all the causes and impacts of the criminalization of migration in the early 21st century. It tackles the direct causes of these trends and encourages readers to rethink their broader political and socio-historic context. Importantly, the book does so by highlighting the ties between the criminalization of migration and equality, racism, and xenophobia. As the politics of migration become more perilous for political alliances like the EU as well for individual migrants, it is more important than ever to critically examine the cause and consequences of migrant criminalization. This collection does so from a variety of disciplinary perspectives and political traditions, seeking to overcome the distractions of charismatic politicians and the peculiar factions of national political systems, in order to reveal the underlying trends and disturbing patterns that are of interest to a broad, internationally-focused audience.

Coronavirus Politics

The Comparative Politics and Policy of COVID-19

University of Michigan Press COVID-19 is the most significant global crisis of any of our lifetimes. The numbers have been stupefying, whether of infection and mortality, the scale of public health measures, or the economic consequences of shutdown. Coronavirus Politics identifies key threads in the global comparative discussion that continue to shed light on COVID-19 and shape debates about what it means for scholarship in health and comparative politics. Editors Scott L. Greer, Elizabeth J. King, Elize Massard da Fonseca, and André Peralta-Santos bring together over 30 authors versed in politics and the health issues in order to understand the health policy decisions, the public health interventions, the social policy decisions, their interactions, and the reasons. The book's coverage is global, with a wide range of key and exemplary countries, and contains a mixture of comparative, thematic, and templated country studies. All go beyond reporting and monitoring to develop explanations that draw on the authors' expertise while engaging in structured conversations across the book.

Towards a Surveillant Society

The Rise of Surveillance Systems in Europe

Waterside Press Tracking the Surveillance Monster... Thomas Mathiesen describes how the major databases of Europe have become interlinked and accessible not just to participating countries but diverse organizations and third States; meaning that, largely unchallenged, a 'Surveillance Monster' now threatens rights, freedoms, democracy and the Rule of Law. As information is logged on citizens' every move, data flows across borders via systems soon to be under central, global or even non-State control. Secret plans are hatched behind closed doors and 'systems functionaries' become defensive of their own roles. Goals expand and entire processes are shrouded in mystery. Alongside the integration of automated systems sits a weakening of State ties as Prum, Schengen, Verizon, Prism and similar ventures lead to a lack of transparency, restraint or effective if any Parliamentary scrutiny. As Mathiesen points out in this penetrating account, the intention may have been fighting terrorism or organized crime, but the means have become disproportionate, unaccountable, over-expensive and lacking the verifiable results which ordinary vigilance, alertness and sound intelligence in communities should inherently provide. 'Brings into the light the hidden effects of [surveillance and warns] of the need for vigilance': Tony Bunyan, Director, Statewatch. 'A timely and highly troubling analysis [which] reinforces alarm regarding a panoptical globe': Andrew Rutherford.

The Border

Policy and Politics in Europe and the United States

Oxford University Press, USA In our globalized world, borders are back with a vengeance. New data shows a massive increase of walls and barriers between countries after 2001. However, at the same time, the flow of people and the growth of trade have continued at impressive rates, and arguments for more open borders remain relevant. In The Border, Martin Schain compares how and why border policy has become increasingly important, politicized, and divisive in both Europe and the United States. Drawing from an intensive analysis of documents and interviews, he argues that border control is a growing international movement. In Europe, the European Union is under scrutiny, and many countries seek to block the entry of asylum-seekers from wars in the Near East. In the US, Donald Trump pledged to build a wall along the Mexico border, restricted the entry of Syrian asylum-seekers, and more generally tried to ban Muslim immigration. Moreover, on both sides of the Atlantic, trade barriers appear in the political agendas of major parties. Schain delves into these interlinked phenomena, showing that migration, identity, and trade have been packaged and transformed into hotly contested issues of border governance and control.

Supranational Governance of Europe's Area of Freedom, Security and Justice

Routledge This book examines the evolution towards increased supranational governance in the EU's Area of Freedom, Security and Justice (AFSJ). At the end of 2009, a successor programme to the Tampere and Hague Programmes was developed under the Swedish Presidency. Called the 'Stockholm Programme', it was adopted at a special EU Council Summit on 10-11 December 2009. The new agenda covers the period 2010-2014 and emphasises six areas of priority. In the context of these priorities, as well as the innovations introduced by the Lisbon Treaty, this edited book analyses policy change in the AFSJ, especially as it has been affected by the rise of supranational governance in this domain. From police cooperation and crime fighting to border management and counter-terrorism, much has changed, and the EU has taken yet another step forward in the direction of supranational governance. However, the various contributions also highlight that there are still problems and challenges remaining for the AFSJ. Collectively, this book considers how consequential the Lisbon Treaty has been for the AFSJ, as well as how successful the EU has been in achieving its stated goals as expressed in the Stockholm Programme. Thus, this book makes a significant contribution to the scholarly investigation of the AFSJ, but also to the study of European integration in general. This book was published as a special issue of the Cambridge Review of International Affairs.
