Safety at Street Works and Road Works

A Code of Practice

This publication sets out the statutory requirements for signing, lighting, and guarding at street works and road works. This is the core reference

manual for utility companies, local authorities, street work contractors and others whose day-to-day business involves street works (works by statutory undertakers and other utility companies etc) and road works (works to maintain or repair road infrastructure). The code, which covers all of the UK and includes national variations, is now compulsory for highway/road authorities in England, Wales and Northern Ireland. It applies to all single carriageway roads and dual carriageways with a speed limit of 40 mph or less. The code is now divided into three parts: Basic Principles, Operations, and Equipment and Vehicles; site layout diagrams have been redrawn to make them easier to understand. There is: increased emphasis on using risk assessment and guidance on what to consider in such assessments; strengthened guidance on providing for pedestrians and cyclists and new guidance on traffic control measures related to road closures, one-way working and temporary road obstructions; enhanced advice on other traffic control measures including works near tramways and railways, and mobile/short duration works; and updated advice on high visibility clothing and the signing and conspicuity requirements for work vehicles. Effective from 1 October 2014 when it will supersede the 2001 edition (ISBN 9780115519581).

Orders of Ordinary Action Respecifying Sociological

Knowledge

Ashgate Publishing, Ltd. **Presenting original research studies by leading scholars in the field, Orders of Ordinary Action considers how ethnomethodology provides for an 'alternate' sociology by respecifying sociological phenomena as locally accomplished members' activities. Following an introduction by the editors and a seminal statement of ethnomethodology's analytic stance by its founder, Harold Garfinkel, the book then comprises two parts. The first introduces studies of practical action and organization, whilst the second provides studies of practical reasoning and situated logic in various settings. By organizing the book in this way, the collection demonstrates the relevance of ethnomethodological investigations to established topics and issues and indicates the contribution that ethnomethodology can make to the understanding of human action in any and all social contexts. Both individually and collectively, these contributions illustrate how taking an ethnomethodological approach opens up for investigation phenomena that are taken for granted in conventional sociological theorizing.**

Normalisation

A Reader

Routledge **Normalisation**, the theoretical framework that underpins the movement of services for people with disabilities from long stay hospitals, has recently become the focus of much academic and professional attention. As the community care debate has moved into the public arena, it has attracted a certain amount of criticism, acknowledging the political and philosophical conflicts that surround it. **Normalisation: A Reader for the Nineties** provides a much needed, informed appraisal of this controversial practice and combines various perspectives on the subject, including applied behavioural analysis, social policy and psychodynamic approaches. Thus it explores the discrepancies between the ideal and the reality and extends the debate by drawing comparisons, with other political and social ideologies.
