Book Production [Routledge](#) The digital revolution has brought with it a wider range of options for creating and producing print on paper products than ever seen before. With the growing demand for skills and knowledge with which to exploit the potential of digital technology, comes the need for a comprehensive book that not only makes it possible for production staff, editors, and designers to understand how the technology affects the industry they work in, but also provides them with the skills and competencies they need to work in it smartly and effectively. This book is designed to satisfy this need. Book Production falls into two parts: The first part deals with the increasingly important role of production as project managers, a role which has not been adequately written about in any of the recent literature on publishing. The second part deals with the processes and raw materials used in developing and manufacturing print on paper products. Case studies are used to illustrate why and how some processes or raw materials may or may not be appropriate for a particular job. With expert opinions and case studies, and a consideration of the practices and issues involved, this offers a comprehensive overview of book production for anyone working, or training to work in or in conjunction with the books industry. The Unpredictable Certainty White Papers [National Academies Press](#) This book contains a key component of the NII 2000 project of the Computer Science and Telecommunications Board, a set of white papers that contributed to and complements the project's final report, The Unpredictable Certainty: Information Infrastructure Through 2000, which was published in the spring of 1996. That report was disseminated widely and was well received by its sponsors and a variety of audiences in government, industry, and academia. Constraints on staff time and availability delayed the publication of these white papers, which offer details on a number of issues and positions relating to the deployment of information infrastructure. Computers Helping People with Special Needs 11th International Conference, ICCHP 2008, Linz, Austria, July 9-11, 2008, Proceedings [Springer Science & Business Media](#) Welcome to the proceedings of ICCHP 2008. We were proud to welcome participants from more than 40 countries from all continents to ICCHP. The International Programme Committee, encompassing 102 experts from all over the world, selected 150 full and 40 short papers out of 360 abstracts submitted to ICCHP. Our acceptance rate of about half of the submissions, demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands. An impressive group of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2008. The existence of these STS sessions helped to bring the meeting into sharper focus in several key areas of assistive technology. In turn, this deeper level of focus helped to bring together the state-of-the-art and mainstream technical, social, cultural and political developments. Our keynote speaker, Jim Fruchterman from BeneTech, USA highlighted the importance of giving access to ICT and AT at a global level. In another keynote by Harold Thimbleby, Swansea University, UK, the role of user-centred design and usability engineering in assistive technology and accessibility was addressed. And finally, a combination keynote and panel discussion was reserved for WAI/WCAG2.0, which we expect to be the new reference point for Web accessibility from the summer of 2008 and beyond. It offers theoretical background, mixed-method research, and tools for creating a resilience-based response to terrorism, as opposed to the security-based frameworks commonly in use worldwide. The extended example of Milan as a "resilient-healthy" city pinpoints sociological, political, and economic factors that contribute to terror risk, and outlines how law enforcement and emergency management professionals can adopt more proactive measures. From these observations and findings, the author also makes recommendations for the professional training and city planning sectors to address preparedness issues, and for community inclusion programs to deter criminal activities in at-risk youth. **Features of the coverage:** Summary of sociological theories of terrorism The Resilience D model for assessing and managing urban terrorist activity Findings on resilience and vulnerabilities of terror groups Photo-illustrated analysis of neighborhoods in Milan, describing areas of risk and resilience Virtual ethnography with perspectives from native residents, recent immigrants, and security experts Proposals for coordinated communications between resource agencies **The Other Side of Resilience to Terrorism** will hold considerable interest for students, stakeholders, practitioners, and researchers.
