Engendering Democracy in Africa

Women, Politics and Development

Taylor & Francis **This book investigates women's political participation in Africa. Going beyond the formal institutions of electoral politics, it explores a range of spaces where everyday politics take place, at national and at local levels. In recent years there have been significant improvements in the number of women elected to parliament in Africa. However, there is little indication that this is translating into better developmental outcomes, and indeed there is mounting evidence that it could in fact help to bolster some authoritarian regimes. Starting from the premise that politics is a far broader project than securing a seat in national or local legislatures alone, this book explores the opportunities**

for women's political participation across a number of informal spaces where women and men gather, organise and interact in a more regular and systematic manner. Combining insights from political science, sociology and feminist theory and drawing on detailed cases from the Congo, Kenya, Malawi, Nigeria and Rwanda, it examines how power in its multiple dimensions circulates across a range of everyday political spaces, while drawing attention to the links between domestic gender inequalities and the global political economy. Inviting scholars, practitioners and activists to broaden their focus beyond formal electoral institutions if they want to support women to become more politically active, this book provides fresh insights into major issues at the heart of African studies, development studies, gender and development, democratisation, and international relations.

The Chinese Language

Fact and Fantasy

University of Hawaii Press "DeFrancis's book is first rate. It entertains. It teaches. It demystifies. It counteracts popular ignorance as well as sophisticated (cocktail party) ignorance. Who could ask for anything more? There is no other book like it. ... It is one of a kind, a first, and I would not only buy it but I would recommend it to friends and colleagues, many of whom are visiting China now and are adding 'two-week-expert' ignorance to the two kinds that existed before. This is a book for everyone." --Joshua A. Fishman, research professor of social sciences, Yeshiva University, New York "Professor De Francis has produced a work of great effectiveness that should appeal to a wide-ranging audience. It is at once instructive and entertaining. While being delighted by the flair of his novel approach, the reader will also be led to ponder on some of the most fundamental problems concerning the relations between written languages and spoken languages. Specifically, he will be served a variety of information on the languages of East Asia, not as dry pedantic facts, but as appealing tidbits that whet the intellectual appetite. The expert will find much to reflect on in this book, for Professor DeFrancis takes nothing for granted." --William S.Y. Wang, professor of linguistics, University of California at Berkeley

Revisiting Risk-Weighted Assets

International Monetary Fund In this paper, we provide an overview of the concerns surrounding the variations in the calculation of risk-weighted assets (RWAs) across banks and jurisdictions and how this might undermine the Basel III capital adequacy framework. We discuss the key drivers behind the differences in these calculations, drawing upon a sample of systemically important banks from Europe, North America, and Asia Pacific. We then discuss a range of policy options that could be explored to fix the actual and perceived problems with RWAs, and improve the use of risk-sensitive capital ratios.

Push Back

Sri Lanka's Dance with Global Governance

Zed Books Ltd. In 2009, after decades of conflict, the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam. Subsequently, the state proved resistant to attempts by the UN and other international bodies to promote post-war reconciliation or reform. In this incisive new work, Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts, as well as exploring the wider context of rising Sinhalese nationalism, the attendant growth of discrimination against minorities, and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace. *Push Back* is vital reading not only for those interested in Sri Lanka, but also for those concerned about the wider implications of the conflict for human rights, peace-making, and geopolitics.

Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

Investing in Cultural Diversity and Intercultural Dialogue

UNESCO This report analyses all aspects of cultural diversity, which has emerged as a key concern of the international community in recent decades, and maps out new approaches to monitoring and shaping the changes that are taking place. It highlights, in particular, the interrelated challenges of cultural diversity and intercultural dialogue and the way in which strong homogenizing forces are matched by persistent diversifying trends. The report proposes a series of ten policy-oriented recommendations, to the attention of States, intergovernmental and non-governmental organizations, international and regional bodies, national institutions and the private sector on how to invest in cultural diversity. Emphasizing the importance of cultural diversity in different areas (languages, education, communication and new media development, and creativity and the marketplace) based on data and examples collected from around the world, the report is also intended for the general public. It proposes a coherent vision of cultural diversity and clarifies how, far from being a threat, it can become beneficial to the action of the international community.

It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese
