WorldCIST is a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges involved in modern Information Systems and Technologies research, together with technological developments and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Software and Systems Modeling; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Human-Computer Interaction; Ethics, Computers & Security; Health Informatics; Information Technologies in Education; and Information Technologies in Radiocommunications. **Inventario Selectivo de Servicios de Información Y Documentación en Ciencias Sociales Analyzing the Role of Citizen Science in Modern Research** IGI Global As the need for sustainable development practices around the world continues to grow, it has become imperative for citizens to become actively engaged in the global transition. By evaluating data collected from various global programs, researchers are able to identify strategies and challenges in implementing civic engagement initiatives. Analyzing the Role of Citizen Science in Modern Research focuses on analyzing data on current initiatives and best practices in citizen engagement and education programs across various disciplines. Highlighting emergent research and application techniques within citizen science initiatives, this publication appeals to academicians, researchers, policy makers, government officials, technology developers, advanced-level students and program developers interested in launching or improving citizen science programs across the globe. **The Nixon Administration and Cuba Continuity and Rupture** Routledge This book presents a detailed analysis of the U.S. policy that was adopted toward Cuba by the Richard M. Nixon administration between January 20, 1969, and August 8, 1974. Based on governmental, as well as other, sources from both the U.S. and Cuba, this book examines the rupture where the policy of "passive containment" was complemented with a policy of "dirty war." President Nixon attempted to reestablish a confrontational and violent path of action, and once again, Cuba was exposed to a "dirty war" consisting of different forms of aggressive terrorist activities. Since the conditions for this violent route had changed dramatically both in the U.S. and in Cuba, a policy characterized by a continuity of the economic and psychological warfare came to be the central one for the Nixon administration. This book is unique since it is written from a Cuban perspective, and it therefore complements and enriches the knowledge of the U.S.-Cuban relationship during the end of the 1960s and the beginning of the 1970s, and the policy adopted by the Nixon administration. It is of relevance to everyone interested in the issue, and especially for students and researchers within the disciplines of history and political science. **National Library of Medicine Current Catalog Cumulative listing Inventaire Sélectif Des Services D'information Et de Documentation en Sciences Sociales** This inventory is produced from UNESCO's DARE Data Bank and is based on replies obtained from a widely distributed questionnaire. It provides details of the major social science information services worldwide. The term "information service," as used here, applies to any body whose main function is to provide information or data to those working in the field of social sciences. The DARE data bank also exists on cd-rom (see UNESCO Databases). **Strengthening Forensic Science in the United States A Path Forward** National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **Inventaire Sélectif Des Services D'information** United Nations Educational **CORP 2011 Proceedings/Tagungsband** Lulu.com **Directory of Online Data Bases Systematic Reviews in the Social Sciences A Practical Guide** John Wiley & Sons Such diverse thinkers as Lao-Tze, Confucius, and U.S. Defense Secretary Donald Rumsfeld have all pointed out that we need to be able to tell the difference between real and assumed

knowledge. The systematic review is a scientific tool that can help with this difficult task. It can help, for example, with appraising, summarising, and communicating the results and implications of otherwise unmanageable quantities of data. This book, written by two highly-respected social scientists, provides an overview of systematic literature review methods: Outlining the rationale and methods of systematic reviews; Giving worked examples from social science and other fields; Applying the practice to all social science disciplines; It requires no previous knowledge, but takes the reader through the process stage by stage; Drawing on examples from such diverse fields as psychology, criminology, education, transport, social welfare, public health, and housing and urban policy, among others. Including detailed sections on assessing the quality of both quantitative, and qualitative research; searching for evidence in the social sciences; meta-analytic and other methods of evidence synthesis; publication bias; heterogeneity; and approaches to dissemination. **Impact of New Media in Tourism** *IGI Global* Tourism consumers are increasingly demanding and seek to base their travel decision-making process on relevant and credible tourism information. In recent years, user-generated content on social media, the opinion of travel bloggers, and entertainment programs in the media have influenced the public's travel purchasing behavior and acted as a driving force for the development of tourism products, such as film tourism. It also has played a role in the evolution and development of marketing, giving rise to new applications, as in the case of digital and influence marketing. On the other hand, tourism organizations and destination management organizations face major challenges in communicating the attributes of a tourism product, since this cannot be experienced before consumption. Thus, they need to know how and in which means or platforms of communication they can inform potential consumers. **Impact of New Media in Tourism** provides theoretical and practical contributions in tourism and communication including current research on the influence of new media and the active role of consumers in tourism. With a focus on decision making and increasing the visibility of products and destinations, the book provides support for tourism agencies and organizations around the world. Covering themes that include digital marketing, social media, and online branding, this book is essential for professionals, academicians, researchers, and students working or studying in the field of tourism and hospitality management, marketing, advertising, and media and communications. **Extractive Sector and Civil Society When the Work of Communities, Governments and Industries Leads to Development** *Inter-American Development Bank* 4% of Latin America and the Caribbean's GDP comes from the extractive sector. This figure is equivalent to the amount generated by agriculture in the same region. An effective engagement between governments, companies, and civil society is required to propel sustainable development. With this regional diagnosis of countries rich in natural resources like Argentina, Chile, Colombia, Mexico, Peru, and the Dominican Republic, the IDB seeks to shed light on best practices among stakeholders of the extractive sectors. It focuses in actions of information, dialogues, consultations, collaborations, and partnerships that are driving development in the region. From the findings of the diagnosis, 3 roadmaps were drafted, to guide the stakeholders in strengthening their engagement. **Transcending Borders in Tourism Through Innovation and Cultural Heritage 8th International Conference, IACuDiT, Hydra, Greece, 2021** *Springer Nature* **Workgroups eAssessment: Planning, Implementing and Analysing Frameworks** *Springer Nature* This book was developed during a particular pandemic situation in the whole world which confined people to their homes. Therefore, there was a rise in the use of distance working and learning (e-learning) which led to a very quick adoption of technology in order to guarantee different approaches to fulfil the same or better outcomes and ensure that people are connected. This book provides a better understanding about the importance of teams' assessment and collaborative work, as well as the use of collaboration tools and online assessment techniques supported by technology. Consequently, the book is aimed at all institutions that seek new working environments, namely higher education institutions, companies and organizations, sports teams, and others. Furthermore, this book provides new approaches and systems to carry the knowledge and learning assessment. The book gathers knowledge from several authors, related to collaboration environments and tools, as well as their insights on how technology can be applied to carry assessment processes. The book seeks to provide knowledge on new technologies and different learning environments. **Ciencia y tecnología en tiempos difíciles** *Eduvim* La ciencia –a partir del Medioevo tardío– y la tecnología –desde el inicio de la era industrial– pasaron por etapas signadas por la ideología de cada época. En ese devenir histórico, la producción y el manejo del conocimiento fueron –y son– interdependientes de las bases socio-económico-culturales. Los científicos, representantes de la intelectualidad global, no deberían desconocer el frecuente divorcio entre la Ciencia y Tecnología (CyT) y el bienestar general de la sociedad. Sin embargo, se discute mucho sobre experimentos, resultados y papers, pero muy poco sobre política científica. En un intento de aportar a la necesaria discusión de estas cuestiones, *Ciencia y Tecnología en tiempos difíciles* reflexiona sobre el origen y la evolución de la hoy denominada CyT; analiza el neoliberalismo, el postmodernismo y el neocolonialismo como estrategia, táctica y consecuencia en el escenario regional y global; postula el paralelismo entre las bases neoliberales y los hábitos y las conductas del entorno científico; proporciona elementos para discutir la CyT en una convergencia regional; aporta tópicos para una necesaria soberanía del conocimiento, y muestra los recientes cambios político-ideológicos en la región como ejemplos del vínculo entre el universo ideológico-político y el desarrollo de la CyT. Con un lenguaje accesible que facilita su lectura tanto a científicos y tecnólogos como a no especialistas, este libro acerca argumentos legítimos para la defensa de la Ciencia, Tecnología y Sociedad, contribuyendo a la comunicación pública de la ciencia en un área poco conversada y mucho menos discutida. **Inventaire Sélectif Des Services D'information** *United Nations Educational* **The National Union Catalog, Pre-1956 Imprints A Cumulative Author List Representing Library of Congress Printed Cards and Titles Reported by Other American Libraries** **Information and Communication Technologies 8th Conference, TICEC 2020, Guayaquil, Ecuador, November 25-27, 2020, Proceedings** *Springer Nature* This book constitutes refereed proceedings of the 8th Conference on Information and Communication Technologies of Ecuador, TICEC 2020, held in November 2020. Due to the COVID-19 pandemic the conference was held online. The 36 full and 7 short papers were carefully reviewed and selected from 117 qualified submissions. The papers are organized according to the following topical sections: biomedical sensors and wearables systems; data science; ICT's applications; industry 4.0; smart cities; software development; technology and environment. **Directory of Online Databases** Even-numbered issues will contain update information; odd-numbered issues will be complete reissues, with all new & revised information fully integrated into the basic Directory. **Directory of Portable Databases New Serial Titles** A union list of serials commencing publication after Dec. 31, 1949. **Routledge Handbook of the Sociology of Higher Education** *Routledge* Higher education has come under increasing public scrutiny in recent

years, assailed with demands for greater efficiency, accountability, cost reduction, and, above all, job training. Drawing upon examples from across the world, with an emphasis on Anglo-American higher-education systems, this handbook employs sociological approaches to address these pressing concerns. The second edition is thoroughly updated and adds several new chapters to shed further light on the transformations wrought by the interrelated processes of massification, vocationalization, and marketization that have swept through universities in the wake of neoliberal reforms introduced by governments since the 1980s. The handbook explores recent developments in higher-education systems and policy as well as the everyday experiences of students and staff and ongoing problems of inequality and diversity within universities. In doing so, the chapters address a number of current issues concerning the legitimacy of higher-educational credentials, from the continuing debate regarding traditional pedagogies and the role of universities in social class reproduction to more recent concerns about standards in mass systems. Collectively, this handbook demonstrates that the sociology of higher education has the potential to play a leadership role in improving the myriad higher-education systems around the world that are now part of an interrelated set of subsystems, replete with both persistent problems and promising prospects. This book is therefore necessary reading for a variety of stakeholders within academia as well as professionals and policy-makers interested in understanding higher education and the acute challenges it faces.

**The Hidden Structure of Interaction From Neurons to Culture Patterns** *IOS Press* The idea of complexity states that most things tend to organize themselves into recurring patterns, even when these patterns are not immediately visible to an external observer. The general name for the scientific field concerned with the behaviour over time of a dynamic system is complexity theory. The dynamic systems - systems capable of changing over time - are the focus of this approach, and its concern is with the predictability of their behaviour. The systems of interest to the complexity theory, under certain conditions, perform in regular, predictable ways; under other conditions they exhibit behaviour in which regularity and predictability is lost. The concepts of stable and unstable behaviour are part of the traditional repertoire of physical science. What is novel is the concept of something in between - chaotic behaviour. For chaos here we refer to systems which display behaviour that, though it has certain regularities, defies prediction. How does the order emerge from the chaos? How can we predict the behaviour of a chaotic system? Over the last 30 years and more, trying to identify the hidden patterns behind chaotic behaviour became the focus of attention in a number of scientific disciplines. These range as widely as astronomy, chemistry, evolutionary biology, geology and psychology.

**The Vicos Case Peasant Society in Transition** *Gale Directory of Databases **Current Catalog** First multi-year cumulation covers six years: 1965-70. **Violencias de género en entornos virtuales** *Ediciones Octaedro* Informes internacionales recientes alertan de que el progresivo alcance de Internet y el uso generalizado de las redes sociales han convertido la ciberviolencia contra mujeres y niñas en un problema mundial, hasta el punto de que se estima que una de cada diez mujeres a partir de los 15 años de edad ya ha sufrido alguna forma de ciberviolencia y que una de cada tres la sufrirá a lo largo de su vida. Estamos ante un fenómeno que va más allá del ciberespacio, pues estas manifestaciones de la violencia en entornos virtuales forman parte de la propia estrategia de violencia que se ejerce contra adolescentes y jóvenes, que se vale de procedimientos diversos muy eficaces no solo por su capacidad de control, sino también por lo sencillo que resulta camuflar las acciones en un ambiente de "normalidad". Este libro pretende ayudar a identificar las manifestaciones de la violencia de género que se producen en estos entornos, así como dar a conocer propuestas e iniciativas que se están desarrollando para responder a las necesidades que plantea esta realidad. La obra, en la que participan un grupo de docentes que han trabajado en este campo, busca compartir el conocimiento que han obtenido gracias a sus investigaciones, las cuales aportan algunas claves de cara a la intervención educativa. El libro incluye cifras y datos sobre la situación actual, a la vez que ofrece a centros educativos, familias y agentes socializadores propuestas de actuación creativas y novedosas sobre cómo prevenir e intervenir en lo que concierne a las violencias en los espacios virtuales. El libro nos introduce en esos entornos virtuales y nos revela todo el significado y la estrategia de la violencia contra la mujer que se canalizan a través de las nuevas tecnologías. Y lo hace centrándose en todos los elementos involucrados: las características de los agresores, la forma en que se ejerce esa violencia, el contexto que la disimula y, muy importante, las circunstancias de las mujeres que la sufren, especialmente las más jóvenes.*

Especial referencia al impacto del COVID-19, las nuevas tecnologías y metodologías, las perspectivas de género y la diversidad** *Dykinson* La docencia e investigación en las Ciencias Sociales y Jurídicas no se realiza en el vacío. No debe ser así. Se debe tener en cuenta la realidad del mundo que las rodea y llevar además consigo un continuo proceso de aprendizaje, incluyendo el relativo a las nuevas tecnologías, las innovaciones metodológicas y de didáctica, así como otras cuestiones transversales, que permitan adaptarse a las necesidades de cada momento. Estos son los hilos conductores del libro que tiene en sus manos, el cual engloba un amplio número de capítulos realizados por un rico elenco de profesores e investigadores de universidades de varios países, incluido España, y pertenecientes a las diversas disciplinas que conforman la aludida rama de conocimiento. **CONfines de relaciones internacionales y ciencia política Movilización contra educación para la ciudadanía y los derechos humanos. Castilla-la Mancha, Castilla y León y Madrid** *Ediciones Universidad de Salamanca* Esta Tesis Doctoral, realizada desde el enfoque de los Derechos Humanos, la perspectiva de género, la historia comparada y la teoría actual de los movimientos sociales, investiga las razones nacionales e internacionales de la creación e implementación de Educación para la Ciudadanía y los Derechos Humanos en el sistema educativo español durante el Gobierno socialista de Rodríguez Zapatero, así como las reacciones frente a la misma, ilustrándolas con las generadas en Castilla-La Mancha, Castilla y León y Madrid (elegidas por su condición de comunidades autónomas de signo político opuesto y de diferente nivel de religiosidad social). Se estudia la movilización de los activistas católicos laicos neoconservadores alentada por la jerarquía eclesiástica y los papas Juan Pablo II y Benedicto XVI, en el marco de la plural confrontación entre Iglesia y Estado vivida en España en esta etapa. Se subraya que la movilización contra Educación para la Ciudadanía y los Derechos Humanos tiene componentes tanto discursivos como emocionales y tanto locales como transnacionales, estos últimos aportados por el choque entre el discurso de las organizaciones internacionales y el discurso laico de Rodríguez Zapatero, con el discurso neoevangelizador de la Santa Sede secundado por la Conferencia Episcopal Española, un discurso destinado a hacer frente al avance de la perspectiva de género que actualmente permea la ONU y al progreso del laicismo en los viejos bastiones del cristianismo, como España. Se comprueba el efectivo impacto que tal proceso movilizador ha producido en las políticas educativas nacionales y comunitarias, en los contenidos de los libros de texto, en las respuestas de la Administración Pública a las demandas educativas de la ONU, el Consejo de Europa y la UE y, en suma, en el déficit de formación democrática de los ciudadanos. **Resources in Education**
