### KEY=1 - LUCAS RICHARD

---

**International Trade and Global Macropolicy Springer Science & Business Media** In the curricula of highly ranked MBA programs, two areas of discussion are conspicuously absent: International Trade, and Global Macroeconomic Policy. In this post-financial crisis environment, as the US and other advanced economies continue to experience sluggish growth, persistently high unemployment, and political agitation for increasingly protectionist policies, discussions pertaining to trade, currencies, and international capital flows are often fraught with emotion, tension, and hysteria. This book cuts through the emotions and superficial “solutions” and provides the reader with a thorough understanding of the hard-hitting theoretical models that drive the global flow of goods, services, and capital in the real world. A key feature of this volume is the presentation of the theoretical models, and the discussion of their implications in the context of real-world applications. This text is uniquely designed for current and future business leaders who are, or will be, engaged in the global economy. Armed with an understanding of the theoretical underpinnings driving goods, capital and ideas across national boundaries, readers will learn to anticipate the effects of trade and macroeconomic policy changes, and will have the tools to make sound, informed decisions for themselves and their global organizations. **Cambridge IGCSE Geography Collins Educational** An investigative approach to Cambridge IGCSE Geography, written in partnership with the Geographical Association. Encourage students to make links between case studies and their own local contexts as well as exploring the core themes and skills of the 0460 syllabus in the context of global case studies and processes. Prepare for exam success with full coverage of the core themes of Paper 1 (Population and Settlement, The Natural Environment, Economic Development and the Use of Resources) as well as the geographical and fieldwork skills elements of Papers 2, 3 and 4. Help students focus on achieving the best grades with excellent exam support for each Paper, with exam-style questions, answers at different levels and accompanying comments. Be confident in the content and approach - this resource is written by highly experienced Geography teachers, consulted edited by a CIE Principal Examiner, and produced in partnership with the UK Geographical Association - the home of best practice in Geography teaching. **Food Security Governance Empowering Communities, Regulating Corporations Routledge** This book fills a gap in the literature by setting food security in the context of evolving global food governance. Today’s food system generates hunger alongside of food waste, burgeoning health problems, massive greenhouse gas emissions. Applying food system analysis to review how the international community has addressed food issues since World War II, this book proceeds to explain how actors link up in corporate global food chains and in the local food systems that feed most of the world’s population. It unpacks relevant paradigms – from productivism to food sovereignty – and highlights the significance of adopting a rights-based approach to solving food problems. The author describes how communities around the world are protecting their access to resources and building better ways of producing and accessing food, and discusses the reformed Committee on World Food Security, a uniquely inclusive global policy forum, and how it could be supportive of efforts from the base. The book concludes by identifying terrains on which work is needed to adapt the practice of the democratic public sphere and accountable governance to a global dimension and extend its authority to the world of markets and corporations. This book will be of interest to students of food security, global governance, development studies and critical security studies in general. **R&D Management Springer** This book contributes towards the integration of the R&D function with regard to societies, nations, industries and organizations, as well as to leaders within organizations. It covers the management aspects and approaches to R&D management and provides information on the major contexts of R&D such as in production, HR, marketing and finance – functions that are essential to attracting, developing and retaining scientific manpower. The book further elaborates on organizations’ human strategic prospectives. It also suggests various types of practices to help organizations achieve their objectives and analyzes how R&D can contribute to technology, innovation and science to improve organizations’ productivity. In closing, it discusses some of the challenges faced by developing countries and presents R&D management from a global perspective. **Conflict and Cooperation in Sino-US Relations Change and Continuity, Causes and Cures Routledge** Numerous crosswinds are buffeting the more than 40-year-old People’s Republic of China--American relationship, yet only once since Nixon’s historic trip to China in 1972 has a major conflagration seemed a real possibility. Anchoring the relationship throughout multiple storms are the two countries’ broad areas of collaboration such as deep links in culture, economics, and education. However, for some observers, the conflictual aspects of the relationship seem to be gaining prominence. Conflict and Cooperation in Sino-US Relations offers a timely and current look at one of the world’s weightiest bilateral relationships. It goes beyond detailing the conflict and cooperation that have been integral facets of China--US interactions since 1972, to gauging the relationship’s evolution and future trends, examining its nuances regarding diverse issues such as the Asia-Pacific leadership structure, the South China Sea, and the Korean peninsula. The book further delves into the causes of conflict and cooperation, offers diverse solutions for tempering frictions between Beijing and Washington, and considers the efficacy of some of the mechanisms (e.g., military-to-military exchanges) that China and the US currently employ to manage their relationship. The chapters suggest that extreme anxieties about China--US relations may be misplaced, but that there nonetheless are some worrisome signs even in areas like economics and the environment that are perceived as naturally cooperative. While the book does not offer any silver bullets, various contributors contend that successful management of Sino-American relations may require greater American accommodation of China’s interests. This book will be of great interest to students and scholars of Chinese politics, American politics, international relations, and Asian studies, as well as to policy-makers working in the field. **IGCSE Information and Communication Technology** Please note this title is still being made available for students sitting their examinations in 2015. Our second edition supports the updated syllabus for first examination 2016. Textbook and free CD-ROM, endorsed by Cambridge International Examinations for the IGCSE syllabus in Information and Communication Technology (0417) for final examination 2015. - Written by experienced examiners and teachers, who bring a wealth of theoretical knowledge and practical experience to both the book and the CD - Ensures that students are fully prepared for both the written theory paper as well as the two practical papers. - Each Section of the syllabus is fully covered in the text book, with clear explanations and plenty of tasks and activities. - The CD contains source files for the tasks and activities, as well as examination-style questions (with model answers) and a glossary. **Federal Register Higher Education in the 21st Century: Challenges and Opportunities Archers & Elevators Publishing House Service in a Time of Suspicion Experiences of Muslims Serving in the U.S. Military Post-9/11 University of Iowa Press** On September 11, 2001, nineteen members of the Islamist extremist organization al-Qaeda launched four coordinated attacks on the United States, killing 2,977 people. These events and the government’s subsequent “War on Terror” refueled long-standing negative stereotypes about Muslims and Islam among many Americans. And yet thousands of practicing Muslims continued to serve or chose to enlist in the U.S. military during these years. In *Service in a Time of Suspicion*, fifteen such service members talk about what it means to be Muslim, American, and a uniformed member of the armed services in the twenty-first century. These honest accounts remind us of our shared humanity. **Latin America at 200 A New Introduction University of Texas Press** Between 2010 and 2025, most of the countries of Latin America will commemorate two centuries of independence, and Latin Americans have much to celebrate at this milestone. Most countries have enjoyed periods of sustained growth, while inequality is showing modest declines and the middle class is expanding. Dictatorships have been left behind, and all major political actors seem to have accepted the democratic process and the rule of law. Latin Americans have entered the digital world, routinely using the Internet and social media. These new realities in Latin America call for a new introduction to its history and culture, which *Latin America at 200* amply provides. Taking a reader-friendly approach that focuses on the big picture and uses concrete examples, Phillip Berryman highlights what Latin Americans are doing to overcome extreme poverty and underdevelopment. He starts with issues facing cities, then considers agriculture and farming, business, the environment, inequality and class, race and ethnicity, gender, and religion. His survey of Latin American history leads into current issues in economics, politics and governance, and globalization. Berryman also acknowledges the ongoing challenges facing Latin Americans, especially crime and corruption, and the efforts being made to combat them. Based on decades of experience, research, and travel, as well as recent studies from the World Bank and other agencies, *Latin America at 200* will be essential both as a classroom text and as an introduction for general readers. **Contracting-out Welfare Services Comparing National Policy Designs for Unemployment Assistance John Wiley & Sons** "Originally published as Volume 48, Issue 2 of *Social Policy & Administration*." **WJEC GCSE English Language: WJEC GCSE English Language Student Book 2 Assessment Preparation for Component 1 and Component 2 Student Book 2** provides guidance and activities, in the context of the Component 1 and Component 2 exam questions, on how to improve reading and writing skills. With the types of texts that students will face in the exams, in-context SPAG support and regular opportunities to monitor progress, this book aims to improve exam performance. **Confronting Corruption in Business Trusted Leadership, Civic Engagement Routledge** *Confronting Corruption in Business* focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership. It provides students with a unique, critical perspective on issues of leadership, corruption, and policy in different countries, industries, and companies. While there isn’t a universally agreed upon definition of corruption in social sciences, it generally refers to efforts to secure wealth or power through misusing public power for private gain. This kind of destructive leadership is typically treated as an anomaly, but this book closes the gap in our understanding by highlighting the wider consequences of this behavior within business, and on an international level. Armed with this understanding, one also learns how to mitigate its causes and consequences. Edited by leading experts, the book includes contributions from scholars with international expertise on leadership, strategy, political science, finance, organizational change, and public policy. It is the first book to focus on corruption on the country level and within business, and students in international business, management, ethics, and leadership classes will find it a valuable read. **Minerals Yearbook Social Security Bulletin The Incomplete Currency The Future of the Euro and Solutions for the Eurozone John Wiley & Sons** "The Incomplete Currency explains the reasons that are at the root of the current unsolved Euro zone crisis: The architecture of the Euro, the relationship between finance and the real economy, the functioning of the Eurosystem and how the unique currency has changed EU countries' economies are all topics analysed and illustrated in an elementary yet rigorous way, making extensive use of examples, tables, and numerous coloured graphics. Datasets and their statistical elaborations support the arguments illustrated throughout the book. Facts, not theories, matter: every assumption and statement is justified with strong evidence and data. In a macroeconomic context where the monetary policy is the prerogative of the European Central Bank and fiscal policy, Hopeless austerity works against the economic recovery of the Euro Zone countries, a positive attitude is difficult but necessary. Therefore, from the perspectives of solutions available to restore the unique interest rate curve, the reader is guided through a reasoned journey that carefully considers the pros and the cons of each possible solution and its implications"-- **Strengthening Forensic Science in the United States A Path Forward National Academies Press** Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for

addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators. **The Economics and Politics of European Integration Populism, Nationalism and the History of the EU Routledge** The Economics and Politics of European Integration offers a comprehensive history of European integration, from the conceptualization of a United States of Europe, to the present day. The special role of the United States in this process of integration, and the expansion and evolution of the European Union, is critically analyzed. The book also thoroughly discusses the current view of the EU and the complex crises emerging from the COVID-19 pandemic. While the book focuses primarily on Europe, the role of other countries is also examined. The rise of hostile enemies from Turkey, Russia, the US and China is explored, and the history and outcome of Brexit also receives unique focus. Maps are used throughout to clearly depict the enlargement process. This illuminating text will be valuable reading for students and researchers across international economics, economic history, political economy and European studies. **Minerals Yearbook Metals and Minerals 2010 Volume I Government Printing Office**

**Hacking Happiness Why Your Personal Data Counts and How Tracking it Can Change the World Penguin** In Hacking Happiness, futurist and contributing Mashable writer John C. Havens introduces you to your "quantified self"—your digital identity represented by gigabytes of data produced from tracking your activities on your smartphone and computer. Harvested by megacorporations such as Google, Facebook, and Amazon, Havens argues that companies gather this data because of its immense economic value, encouraging a culture of "sharing" as they hoard the information based on our lives for private monetary gain. But there's an alternative to this digital dystopia. Emerging technologies will help us reclaim this valuable data for ourselves, so we can directly profit from the insights linked to our quantified selves. At the same time, sensors in smartphones and wearable devices will help us track our emotions to improve our well-being based on the science of positive psychology. Havens proposes that these trends will lead to new economic policies that redefine the meaning of "wealth," allowing governments to create policy focused on purpose rather than productivity. An issues book highlighting the benefits of an examined life in the digital world, this timely work takes the trepidation out of the technological renaissance and illustrates how the fruits of the Information Age can improve our lives for a happier humanity. **Environmental Law: Text, Cases & Materials Oxford University Press** This new title in the popular Text, Cases, and Materials series provides students with a thorough understanding of environmental law while also encouraging critical reflection and pointing out areas of controversy and debate. The authors present an impressive range of extracts from UK and international cases, legislation, and articles, to help support learning and demonstrate how the law works in practice, clearly guiding students through key areas while providing insightful explanations and analysis. Topics have been carefully selected to support a wide range of environmental law courses and include pollution, conservation, town planning, and water regulation as well as considering environmental law in relation to the EU and from an international perspective. With its unique combination of extracts and author discussion, this new text provides a comprehensive and convenient guide to environmental law which can be relied upon throughout your course and career. This book is also accompanied by an Online Resource Centre which features updates to the law, further reading suggestions and useful weblinks. **Economic Integration in Africa The East African Community in Comparative Perspective Cambridge University Press** This book offers an in-depth analysis of economic integration in Africa with a focus on the East African Community (EAC). **From Precaution to Profit Contemporary Challenges to Environmental Protection in the Montreal Protocol Yale University Press** "This book challenges the oft-cited belief that the Montreal Protocol remains an exemplary global environmental agreement. Through a sociological analysis of the political decision-making process and controversies generated at Montreal Protocol meetings, the book documents new ways global environmental governance is organized based on neoliberal ideals. The book shows how neoliberalism - as a dominant discourse and economic practice - has become increasingly embedded in the Montreal Protocol, and how global powers are able to act protectionist amid that discourse. The book demonstrates how recent controversies involve much more than just economic protectionism per se; it also involves the protection of the legitimacy of certain forms of scientific knowledge. It traces the rise of a new form of disagreement between global powers, members of the scientific community, civil society and agro-industry groups, signaling the negative impact of neoliberal policies on ozone politics and global environmental governance more broadly. The book reveals how global civil society groups involved in the Montreal Protocol are affected by the neoliberal discourse, which has left them relatively ineffective in their efforts to push for environmental protection"-- **Push Back Sri Lanka's Dance with Global Governance Zed Books Ltd.** In 2009, after decades of conflict, the Sri Lankan government proclaimed the decisive defeat of the Liberation Tamil Tigers of Elam. Subsequently, the state proved resistant to attempts by the UN and other international bodies to promote post-war reconciliation or reform. In this incisive new work, Judith Large investigates the ways in which the Rajapaksa government was able to subvert international diplomatic efforts, as well as exploring the wider context of rising Sinhalese nationalism, the attendant growth of discrimination against minorities, and efforts by both the diaspora and citizens within Sri Lanka to work towards a positive peace. Push Back is vital reading not only for those interested in Sri Lanka, but also for those concerned about the wider implications of the conflict for human rights, peace-making, and geopolitics. **127 Hours Between a Rock and a Hard Place Simon and Schuster** On Sunday April 27, 2003, 27-year old Aron Ralston set off for a day's hiking in the Utah canyons. Dressed in a t-shirt and shorts, Ralston, a seasoned climber, figured he'd hike for a few hours and then head off to work. 40 miles from the nearest paved road, he found himself on top of an 800-pound boulder. As he slid down and off of the boulder it shifted, trapping his right hand against the canyon wall. No one knew where he was; he had little water; he wasn't dressed correctly; and the boulder wasn't going anywhere. He remained trapped for five days in the canyon: hypothermic at night, de-hydrated and hallucinating by day. Finally, he faced the most terrible decision of his life: braking the bones in his wrist by snapping them against the boulder, he hacked through the skin, and finally succeeded in amputating his right hand and wrist. The ordeal, however, was only beginning. He still faced a 60-foot rappell to freedom, and a walk of several hours back to his car - along the way, he miraculously met a family of hikers, and with his arms tourniqued, and blood-loss almost critical, they heard above them the whir of helicopter blades; just in time, Aron was rescued and rushed to hospital. Since that day, Aron has had a remarkable recovery. He is back out on the mountains, with an artificial limb; he speaks to select groups on his ordeal and rescue; and amazingly, he is upbeat, positive, and an inspiration to all who meet him. This is the account of those five days, of the years that led up to them, and where he goes from here. It is narrative non-fiction at its most compelling. **Human Development Report 2016 Human Development for Everyone United Nations** This report focuses on how human development can be ensured for everyone, now and in future. It starts with an account of the hopes and challenges of today's world, envisioning where humanity wants to go. This vision draws from and builds on the 2030 Agenda and the Sustainable Development Goals. It explores who has been left behind in human development progress and why. It argues that to ensure that human development reaches everyone, some aspects of the human development framework and assessment perspectives have to be brought to the fore. The Report also identifies the national policies and key strategies to ensure that will enable every human being achieve at least basic human development and to sustain and protect the gains. **Political Standards Corporate Interest, Ideology, and Leadership in the Shaping of Accounting Rules for the Market Economy University of Chicago Press** Assembling compelling and unprecedented evidence, "Political Standards: Accounting for Legitimacy" documents how in subtle ways the rules of corporate accounting a critical institution in modern market capitalism have been captured to benefit industrial corporations, financial firms, and audit firms. In what is perhaps the only independent overview of the accounting industry, Karthik Ramanna begins with a history of corporate accounting and an accessible explanation of how it works today, including the essential roles it plays in defining the fundamental notion of profitability, facilitating asset allocation, and ensuring the accountability of corporations and their managers. From the evidence, Ramanna shows how accounting rule-makers selectively co-opt conceptual arguments from academia and elsewhere to advance the views of the special-interest groups. From this, Ramanna moves on to develop more broadly a new type of regulatory challenge that of producing public policy in a thin political market. His argument is that accounting rules cannot be determined without the substantial expertise and experience of groups that by definition also have strong commercial interests in the outcome." Political Standards" concludes with an exploration of possible solutions to the problem in accounting and that of thin political markets in general, charting avenues for scholarship and practice. Certain to be an eye-opening account of a massive industry central to the modern business world, "Political Standards" will be an essential resource in understanding how the rules of the game business are set, whom they inevitably favor, and how they can be changed for the better of society." **The Routledge Companion to Critical Management Studies Routledge** The scholarly field of Critical Management Studies (CMS) is in a state of flux. Against a backdrop of dramatic global shifts, CMS scholarship has lately taken a number of new and exciting directions and, at times, challenged older critical voices. Novel theoretical frameworks and diverse research interests mark the CMS field as never before. Interrogating conventional critiques of management and arguing for fresh approaches, The Routledge Companion to Critical Management Studies captures this intellectual ferment and new spirit of inquiry within CMS, and showcases the pluralistic generation of CMS scholars that has emerged in recent years. Setting the scene for a crucial period for the discipline, this insightful volume covers new ground and essential areas grouped under the following themes: Critique and its (dis-)contents Difference, otherness, marginality Knowledge at the crossroads History and discourse Global predicaments. Drawing on the expertise of an international team of contributing scholars, The Routledge Companion to Critical Management Studies is a rich resource and the perfect reference tool for students and researchers of management and organization. **The Report of the Hillsborough Independent Panel The Stationery Office** 96 women, men and children died as a result of the disaster in Hillsborough Stadium on 15 April 1989. They were crushed due to overcrowding in the Leppings Lane terrace, penned in by the ground's fencing. Hundreds more were injured and thousands traumatised. Lord Justice Taylor led a judicial inquiry (1990, Cm. 962, ISBN 9780101096225), concluding that the main cause of the disaster was the failure of police control. The next 11 years saw a variety of investigations and proceedings, including a scrutiny of new evidence (Lord Justice Stuart-Smith, 1998, Cm. 3878, ISBN 9780101387828). Yet many bereaved families felt that the true context, circumstances and aftermath had not been adequately made public, and were particularly aggrieved that it had become widely assumed that Liverpool fans' behaviour had contributed to the disaster. The Independent Panel was established in 2010 to oversee full public disclosure of all documents relating to the disaster and to report on its work. This report is in three parts. Firstly it shows what was already known and in the public domain by 2010. Secondly, in 12 detailed chapters, it describes what the disclosed documents add to public understanding. The third part gives a review of options for providing an archive of the documents. The disclosed documents (available at <http://panel.hillsborough.independent.gov.uk/>) add considerably to public understanding. They show that multiple factors were responsible for the tragedy and that the fans were not the cause. The report also shows that the bereaved families met a series of obstacles in their search for justice over more than 20 years. **Enhancing Evaluation Use SAGE** This book is valuable to those involved in the evaluation of public organisations. Particularly insightful is the realization that similar challenges faced in various organizations are addressed with very different solutions. **Research Methods for Business Students Pearson Education** Brings the theory, philosophy and techniques of research to life and enables students to understand the relevance of the research methods. This book helps you learn from worked examples and case studies based on real student research, illustrating what to do and what not to do in your project. **Democratization and Memories of Violence Ethnic minority rights movements in Mexico, Turkey, and El Salvador Routledge** Ethnic minority communities make claims for cultural rights from states in different ways depending on how governments include them in policies and practices of accommodation or assimilation. However, institutional explanations don't tell the whole story, as individuals and communities also protest, using emotionally compelling narratives about past wrongs to justify their claims for new rights protections. Democratization and Memories of Violence: Ethnic minority rights movements in Mexico, Turkey, and El Salvador examines how ethnic minority communities use memories of state and paramilitary violence to shame states into cooperating with minority cultural agendas such as the right to mother tongue education. Shaming and claiming is a social movement tactic that binds historic violence to contemporary citizenship. Combining theory with empirics, the book accounts for how democratization shapes citizen experiences of interest representation and how memorialization processes challenge state regimes of forgetting at local, state, and international levels. Democratization and Memories of Violence draws on six case studies in Mexico, Turkey, and El Salvador to show how memory-based narratives serve as emotionally salient leverage for marginalized communities to facilitate state consideration of minority rights agendas. This book will be of interest to postgraduates and researchers in comparative politics, development studies, sociology, international studies, peace and conflict studies and area studies. **The Oxford Handbook of Oral History Oxford University Press** The Oxford Handbook of Oral History brings together forty authors on five continents to address the evolution of oral history, the impact of digital technology, the most recent methodological and archival issues, and the application of oral history to both scholarly research and public presentations. **A Safe**

**and Just Space for Humanity: Can we live within the doughnut? Oxfam The Psychic Life of Power Theories in Subjection Stanford University Press** Judith Butler's new book considers the way in which psychic life is generated by the social operation of power, and how that social operation of power is concealed and fortified by the psyche that it produces. It combines social theory, philosophy, and psychoanalysis in novel ways, and offers a more sustained analysis of the theory of subject formation implicit in her previous books.

**Family Justice Review final report The Stationery Office** The Family Justice Review examines the effectiveness of the family justice system and the outcomes it delivers. The review covers both public and private law cases; explores if better use can be made of mediation and how best to support contact between children and non-resident parents or grandparents; examines the processes (but not the law) involved in granting divorces and awarding ancillary relief, and looks at how the different parts of the family justice system are organised and managed. The review is aiming to produce a system which allows families to reach easy, simple and efficient agreements which are in the best interests of children whilst protecting children and vulnerable adults from risk of harm. The agencies and professionals directly involved in the family justice system are all in scope for the Review. This final report takes into account views expressed during the consultation on the interim report and the call for evidence. It makes a number of recommendations to improve public and private law and looks at how the agencies within the family justice system could work together more effectively to improve the experience for children and families

**Knowledge Sovereignty Among African Cattle Herders UCL Press** Beni-Amer cattle owners in the western part of the Horn of Africa are not only masters in cattle breeding, they are also knowledge sovereign, in terms of owning productive genes of cattle and the cognitive knowledge base crucial to sustainable development. The strong bonds between the Beni-Amer, their animals, and their environment constitute the basis of their ways of knowing, and much of their knowledge system is built on experience and embedded in their cultural practices. In this book, the first to study Beni-Amer practices, Zeremariam Fre argues for the importance of their knowledge, challenging the preconceptions that regard it as untrustworthy when compared to scientific knowledge from more developed regions. Empirical evidence suggests that there is much one could learn from the other, since elements of pastoralist technology, such as those related to animal production and husbandry, make a direct contribution to our knowledge of livestock production. It is this potential for hybridisation, as well as the resilience of the herders, at the core of the indigenous knowledge system. Fre also argues that indigenous knowledge can be viewed as a stand-alone science, and that a community's rights over ownership should be defended by government officials, development planners and policy makers, making the case for a celebration of the knowledge sovereignty of pastoralist communities

**Praise for Knowledge Sovereignty Among African Cattle Herders** 'This book greatly contributes to the limited literature on theoretical discourses and practices on indigenous knowledge of livestock herding communities in the Horn of Africa. It discusses knowledge heritage and sovereignty through the presentation of valid empirical evidence, and its subsequent relevance in nurturing sustainability of knowledge systems to enhance lives of pastoralists in Africa and beyond.' Samuel Tefera PhD, Assistant Professor and Asian Desk Coordinator at the Centre for African and Oriental Studies, Associate Dean for Research and Technology Transfer, College of Social Sciences, Addis Ababa University 'The author has worked with our Beni-Amer pastoral communities in Eastern Sudan and Western Eritrea for over 30 years and this book is the first of its kind in documenting our practices, knowledge systems, heritage and way of life.' Mustafa Faid and Mohamed Ali, Leaders of the of the Pastoral and Environmental Association Kassala State (PEAKS) 'A riveting and rare book! Zeremariam Fre guides you along the sandy [dusty] tracks and grassy pastures that the Beni-Amer and their herds have been softly tracing over time all through the Horn of Africa. One of the virtues of the book is that it illustrates vividly and in clear language how their continuous self-built endogenous knowledge on agro-pastoral life is not only at the core of their survival and the survival of their herds, but more importantly a powerful weapon in facing and resisting multiple aggressions . . . Ground-breaking and a huge achievement.' Yves Cabannes, Emeritus Professor of Development Planning,, The Bartlett Development Planning Unit, UCL 'The book underlines the importance of enriching and utilizing the unrecognized, yet valuable scientific knowledge and practices that are deeply rooted in pastoral traditional expertise about their own environment and breeding practices. It is an important publication that reflects Dr Fre's expertise and long term research in the region and thus, it is a significant addition to the African library.' Hala Alkarib, Director of the Strategic Initiative for Women in the Horn of Africa (SIHA) 'This fascinating book not only gives a unique insight into the knowledge and practice of pastoralists in the Horn of Africa from the author's first-hand experience, it also provides an incisive critique of the multiple dimensions of knowledge, paying tribute to the sovereignty of indigenous knowledge. It has a timely relevance for global sustainability that will appeal to a wider readership.' Nicole Kenton, International Development Consultant, former long serving senior staff member of the International Institute for Environment and Development (IIED) 'The book covers several intertwined issues relevant to contemporary development policy and practice. It goes beyond the rural-urban and peasant-nomadic livelihoods dichotomy by shedding more light on the inter-linkages within the multiple livelihood systems within the Horn of Africa and globally. A rich evidence-based resource for academics, development partners and social movements for promoting and designing state policies that embrace pastoralist aspirations.' Bereket Tsegay MA, PhD candidate, Pastoral and Environmental Network in the Horn of Africa (PENHA) 'Dr Zeremariam Fre has done a wonderful job of placing at the centre of this book the Beni-Amer pastoralists, the world they inhabit and the knowledge they use to navigate and thrive in it. The lessons contained in this book go beyond pastoralism; it is a must read for anyone serious about understanding the importance of located knowledge in the innovation and development process.' Yusuf Dirie, PENHA Research Fellow and PhD researcher at the University of Sussex

**Environmental Security and India Global Concerns and National Interests Taylor & Francis** This book examines environmental issues through the lens of security studies and presents a comprehensive analysis of Indian policy in dealing with threats posed by climate change. This volume, • Puts forward theoretical base for securitization of environmental issues, incorporating different schools of thought; • Presents a survey of global environmental politics in general and the effects of climate change and its consequences for India's national security in particular; • Examines the politics involved in India's environmental policy at both the domestic and international level; • Outlines key policy takeaways and possibilities for action that can help contain the threat of environmental change. A comprehensive guide to a new and emerging dimension in Indian security policy, this book will be essential reading for students and researchers of international relations, security studies, especially non-traditional security, public policy, especially environmental policy, and area studies.

**State of the World's Children 2013 Children with Disabilities United Nations Publications** One in every seven children is disabled. Children with disabilities are among the most likely to be marginalized, poor and vulnerable. UNICEF is committed to improving the lives of children, particularly those who face the greatest disadvantages. The report will investigate the web of barriers disabled children face: discrimination, harmful norms and the lack of accurate information. The report will analyse and provide good-practice guidance on: inclusive health and education; prevention; nutrition; protection from violence, exploitation and abuse; emergency response; institutionalization; and the role of appropriate technology and infrastructure

**Mark. Plan. Teach. Save Time. Reduce Workload. Impact Learning. Bloomsbury Publishing** There are three actions that every teacher must do well. Provide feedback, plan lessons and teach their students. Packed full of evidence-based ideas, this book, is supported by psychological perspectives to enable all teachers to develop their classroom practice to help make the greatest impact as possible on your students' learning; reducing workload and making the class domain, manageable and sustainable.
