EG-ICE 2021 WORKSHOP ON INTELLIGENT COMPUTING IN ENGINEERING

Universitätsverlag der TU Berlin The 28th EG-ICE International Workshop 2021 brings together international experts working at the interface between advanced computing and modern engineering challenges. Many engineering tasks require open-world resolutions to support multi-actor collaboration, coping with approximate models, providing effective engineer-computer interaction, search in multi-dimensional solution spaces, accommodating uncertainty, including specialist domain knowledge, performing sensor-data interpretation and dealing with incomplete knowledge. While results from computer science provide much initial support for resolution, adaptation is unavoidable and most importantly, feedback from addressing engineering challenges drives fundamental computer-science research. Competence and knowledge transfer goes both ways. Der 28.

Internationale EG-ICE Workshop 2021 bringt internationale Experten zusammen, die an der Schnittstelle zwischen fortgeschrittener Datenverarbeitung und modernen technischen Herausforderungen arbeiten. Viele ingenieurwissenschaftliche Aufgaben erfordern Open-World-Resolutionen, um die Zusammenarbeit mehrerer Akteure zu unterstützen, mit approximativen Modellen umzugehen, eine effektive Interaktion zwischen Ingenieur und Computer zu ermöglichen, in mehrdimensionalen Lösungsräumen zu suchen, Unsicherheiten zu berücksichtigen, einschließlich fachspezifischen Domänenwissens, Sensordateninterpretation durchzuführen und mit unvollständigem Wissen umzugehen. Während die Ergebnisse aus der Informatik anfänglich viel Unterstützung für die Lösung bieten, ist eine Anpassung unvermeidlich, und am wichtigsten ist, dass das Feedback aus der Bewältigung technischer Herausforderungen die computer-wissenschaftliche Grundlagenforschung vorantreibt. Kompetenz und Wissenstransfer gehen in beide Richtungen.

ETHICS OF RESEARCH INVOLVING MINORS

A EUROPEAN PERSPECTIVE

LIT Verlag Münster Research involving minors is an area of controversy within medical ethics and medical law. Minors represent a vulnerable group, for whom particular protective measures are required and who should be excluded from research that does not offer the prospect of direct benefit. However, the exclusion of minors from research into disorders of relevance to their age group precludes the potential for beneficial medical advances. Furthermore, effective prevention strategies for common medical conditions with an origin in childhood and adolescence, such as mental disorders, require the delineation of those who are at increased risk. This volume considers the ethical challenges of research with minors for the researchers, but also for the involved research ethics committees. In particular, it reflects how minors can be more involved in the decision-making-processes and reports about the experiences in conducting the European multicentric research project IMAGEMEND.
