Magic and Magicians in the Middle Ages and the Early Modern Time

The Occult in Pre-Modern Sciences, Medicine, Literature, Religion, and Astrology

Walter de Gruyter GmbH & Co KG There are no clear demarcation lines between magic, astrology, necromancy, medicine, and even sciences in the pre-modern world. Under the umbrella term 'magic,' the contributors to this volume examine a wide range of texts, both literary and religious, both medical and philosophical, in which the topic is discussed from many different perspectives. The fundamental concerns address issue such as how people perceived magic, whether they accepted it and utilized it for their own purposes, and what impact magic might have had on the mental structures of that time. While some papers examine the specific appearance of magicians in literary texts, others analyze the practical application of magic in medical contexts. In addition, this volume includes studies that deal with the rise of the witch craze in the late fifteenth century and then also investigate whether the Weberian notion of disenchantment pertaining to the modern world can be maintained. Magic is, oddly but significantly, still around us and exerts its influence. Focusing on magic in the medieval world thus helps us to shed light on human culture at large.

A General Theory of Magic

Routledge First written by Marcel Mauss and Henri Humbert in 1902, *A General Theory of Magic* gained a wide new readership when republished by Mauss in 1950. As a study of magic in 'primitive' societies and its survival today in our thoughts and social actions, it represents what Claude Lévi-Strauss called, in an introduction to that edition, the astonishing modernity of the mind of one of the century's greatest thinkers. The book offers a fascinating snapshot of magic throughout various cultures as well as deep sociological and religious insights still very much relevant today. At a period when art, magic and science appear to be crossing paths once again, *A General Theory of Magic* presents itself as a classic for our times.

The History of Visual Magic in Computers

How Beautiful Images are Made in CAD, 3D, VR and AR

Springer Science & Business Media If you have ever looked at a fantastic adventure or science fiction movie, or an amazingly complex and rich computer game, or a TV commercial where cars or gas pumps or biscuits behaved liked people and wondered, "How do they do that?", then you've experienced the magic of 3D worlds generated by a computer. 3D in computers began as a way to represent automotive designs and illustrate the construction of molecules. 3D graphics use evolved to visualizations of simulated data and artistic representations of imaginary worlds. In order to overcome the processing limitations of the computer, graphics had to exploit the characteristics of the eye and brain, and develop visual tricks to simulate realism. The goal is to create graphics images that will overcome the visual cues that cause disbelief and tell the viewer this is not real. Thousands of people over thousands of years have developed the building blocks and made the discoveries in mathematics and science to make such 3D magic possible, and *The History of Visual Magic in Computers* is dedicated to all of them and tells a little of their story. It traces the earliest understanding of 3D and then foundational mathematics to explain and construct 3D; from mechanical computers up to today's tablets. Several of the amazing computer graphics algorithms and tricks came of periods where eruptions of new ideas and techniques seem to occur all at once. Applications emerged as the fundamentals of how to draw lines and create realistic images were better understood, leading to hardware 3D controllers that drive the display all the way to stereovision and virtual reality.

Jung's Studies in Astrology

Prophecy, Magic, and the Cycles of Time

Routledge

Writing as Craft and Magic

Oxford University Press, USA *Writing as Craft and Magic, Second Edition*, outlines a compelling approach to conceiving, reporting, organizing, and writing articles for today's media. The book revolves around the central idea that writers improve most quickly by combining the powers of technique (craft) with creativity (magic). Applying this method to news and feature writing--both print and online--it focuses on leads, organization, transition, clarity, drama, and other elements that drive good writing toward excellence. Aimed at students in upper-level undergraduate writing and reporting courses, *Writing as Craft and Magic* provides a clear and succinct instructional system--with practical models, a wealth of examples, and step-by-step guides--to help students understand and apply craft and magic to daily assignments. Author Carl Sessions Stepp, a seasoned journalist at the national level, structures his system in three parts. He first evokes the art of writing, then applies that art to standard journalistic writing, and concludes with a strong section on advanced writing techniques for features. He also offers advice and tips on how newsrooms currently operate in the age of multimedia journalism. This revised edition includes an expanded exercise section at the end of each chapter, more coverage of the demands of multimedia journalism (convergence), and updated chapters on incorporating the Internet into research and writing for the daily news cycle.

The Tempest / the Works of William Shakespeare Illustrated

The Tempest is a play by William Shakespeare, probably written in 1610-1611, and thought to be one of the last plays that Shakespeare wrote alone. After the first scene, which takes place on a ship at sea during a tempest, the rest of the story is set on a remote island, where the sorcerer Prospero, a complex and contradictory character, lives with his daughter Miranda, and his two servants--Caliban, a savage monster figure, and Ariel, an airy spirit. The play contains music and songs that evoke the spirit of enchantment on the island. It explores many themes, including magic, betrayal, revenge, and family. In Act IV, a wedding masque serves as a play-within-the play, and contributes spectacle, allegory, and elevated language.

Magic Bullets

Technology as Magic

The Triumph of the Irrational

Bloomsbury Continuum What gives the mass media, particularly advertising and television, their extraordinary power over our lives, so that even the most jaded and sophisticated among us are troubled and fascinated by their allure? The secret, according to Richard Stivers, in this brilliant new book, lies in the curious relationship between technology and magic. Stivers argues the two are now related to one another in such a way that each has taken on important characteristics of the other. His contention is that our expectations for technology have become magical to the point that they have generated a multitude of imitation technologies that function as magical practices. These imitation technologies flourish in the fields of psychology, management administration, and the mass media, and their paramount purpose in human adjustment and control. Advertising and television programs, in particular, contain the key magical rituals of our civilization. In a fascinating analysis of television programming, Stivers shows how various genres--news, sports, game shows, soap operas, sitcoms, etc.--have their distinct mythological symbols. Through dramatized information, they symbolically connect consumer goods and services to desired outcomes--the utopian goals of success, happiness, and health--thus enveloping technology, both real and imitation, in a magical cocoon.>

Transcendental Magic

Weiser Books This is Eliphas Levi's (1810-1875) best-known book. This work arguably made Levi THE most influential writer on magic since the Renaissance. Originally issued in French, the English translator is A.E. Waite and it is doubtful that anyone else could have better captured the essence of Levi's work. The book is divided in two parts; the first is theoretical, the second practical. This is a fascinating and often debated work involving a discussion that covers almost the entire realm of Ritual and High Magic.

The Mystic Test Book or the Magic of the Cards

Lulu.com The publication of this work was, we might say, forced upon us by the demand, before even a page of manuscript was prepared for the press. The demand was caused by members of the Temple, who recognized the necessity of a printed text book, from which they could study the meanings of the cards and their indications under the seven planets. These brothers and sisters naturally wished to perfect themselves in emblem reading as rapidly as possible, and they could not so perfect themselves, without a full and complete set of tables that they could study and refer to at will. The next trouble that arose was the question of expense, as, aside from the printing, engraving, binding, electrotyping and matters of that kind, the author's time was, and is now so valuable that the item far overbalances those mentioned. It was finally decided that the most feasible plan, was to get out enough copies to supply more than our immediate membership and to sell them to outsiders under certain restrictions.

Jung's Studies in Astrology

Prophecy, Magic, and the Qualities of Time

Routledge Winner of the IAJS award for best authored book of 2018! C. G. Jung had a profound interest in and involvement with astrology, which he made clear in virtually every volume of the Collected Works, as well as in many of his letters. This ancient symbolic system was of primary importance in his understanding of the nature of time, the archetypes, synchronicity, and human fate. Jung's Studies in Astrology is an historical survey of his astrological work from the time he began to study the subject. It is based not only on his published writings, but also on the correspondence and documents found in his private archives, many of which have never previously seen the light of day. Liz Greene addresses with thoroughness and detailed scholarship the nature of Jung's involvement with astrology: the ancient, medieval, and modern sources he drew on, the individuals from whom he learned, his ideas about how and why it worked, its religious and philosophical implications, and its applications in the treatment of his patients as well as in his own self-understanding. Greene clearly demonstrates that any serious effort to understand the development of Jung's psychological theories, as well as the nature of his world-view, needs to involve a thorough exploration of his astrological work. This thorough investigation of a central theme in Jung's work will appeal to analytical psychologists and Jungian psychotherapists, students and academics of Jungian and post-Jungian theory, the history of psychology, archetypal thought, mythology and folklore, the history of New Age movements, esotericism, and psychological astrology.

Directory of World Cinema

SCOTLAND

Intellect Books Scotland, its people and its history have long been a source of considerable fascination and inspiration for film-makers, film scholars and film audiences worldwide. A significant number of critically acclaimed films made in the last twenty-five years have ignited passionate conversations and debates about Scottish national cinema. Its historical, industrial and cultural complexities and contradictions have made it all the more a focus of attention and interest for both popular audiences and scholarly critics. Directory of World Cinema: Scotland provides an introduction to many of Scottish cinema's most important and influential themes and issues, films and film-makers, while adding to the ongoing discussion concerning how to make sense of Scotland's cinematic traditions and contributions. Chapters on film-makers range from Murray Grigor to Ken Loach, and Gaelic film-making, radical and engaged cinema, production, finance and documentary are just a few of the topics explored. Film reviews range from popular box office hits such as Braveheart and Trainspotting to lesser known but equally engaging independent and lower budget productions such as Shell and Orphans. This book is both a stimulating and accessible resource for a wide range of readers interested in Scottish film.

Building Communities of Engaged Readers

Reading for pleasure

Routledge **Reading for pleasure** urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. **Building Communities of Engaged Readers** highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities. Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

The Crowd

A Study of the Popular Mind

The Floating Press **The following work is devoted to an account of the characteristics of crowds. Organized crowds have always played an important part in the life of peoples, but this part has never been of such moment as at present. The substitution of the unconscious action of crowds for the conscious activity of individuals is one of the principal characteristics of the present age. Crowds, doubtless, are always unconscious, but this very unconsciousness is perhaps one of the secrets of their strength. In the natural world beings exclusively governed by instinct accomplish acts whose marvelous complexity astounds us. Reason is an attribute of humanity of too recent date and still too imperfect to reveal to us the laws of the unconscious, and still more to take its place. The part played by the unconscious in all our acts is immense, and that played by reason very small.**

Digital Photography and Everyday Life

Empirical Studies on Material Visual Practices

Routledge **Digital Photography and Everyday Life: Empirical studies on material visual practices** explores the role that digital photography plays within everyday life. With contributors from ten different countries and backgrounds in a range of academic disciplines - including anthropology, media studies and visual culture - this collection takes a uniquely broad perspective on photography by situating the image-making process in wider discussions on the materiality and visibility of photographic practices and explores these through empirical case studies. By focusing on material visual practices, the book presents a comprehensive overview of some of the main challenges digital photography is bringing to everyday life. It explores how the digitization of photography has a wide-reaching impact on the use of the medium, as well as on the kinds of images that can be produced and the ways in which camera technology is developed. The exploration goes beyond mere images to think about cameras, mediations and technologies as key elements in the

development of visual digital cultures. Digital Photography and Everyday Life will be of great interest to students and scholars of Photography, Contemporary Art, Visual Culture and Media Studies, as well as those studying Communication, Cultural Anthropology, and Science and Technology Studies.

Magic and the Mind

Mechanisms, Functions, and Development of Magical Thinking and Behavior

Oxford University Press Magical thinking and behavior have traditionally been viewed as immature, misleading alternatives to scientific thought that in children inevitably diminish with age. In adults, these inclinations have been labeled by psychologists largely as superstitions that feed on frustration, uncertainty, and the unpredictable nature of certain human activities. In *Magic and the Mind*, Eugene Subbotsky provides an overview of the mechanisms and development of magical thinking and beliefs throughout the life span while arguing that the role of this type of thought in human development should be reconsidered. Rather than an impediment to scientific reasoning or a byproduct of cognitive development, in children magical thinking is an important and necessary complement to these processes, enhancing creativity at problem-solving and reinforcing coping strategies, among other benefits. In adults, magical thinking and beliefs perform important functions both for individuals (coping with unsolvable problems and stressful situations) and for society (enabling mass influence and promoting social harmony). Operating in realms not bound by physical causality, such as emotion, relationships, and suggestion, magical thinking is an ongoing, developing psychological mechanism that, Subbotsky argues, is integral in the contexts of politics, commercial advertising, and psychotherapy, and undergirds our construction and understanding of meaning in both mental and physical worlds. *Magic and the Mind* represents a unique contribution to our understanding of the importance of magical thinking, offering experimental evidence and conclusions never before collected in one source. It will be of interest to students and scholars of developmental psychology, as well as sociologists, anthropologists, and educators.

Water Stewardship

IWA Publishing Achieving true wholesome sustainability requires a change of heart. Hence this book starts in the heart. It asks the timely question of 'how do we become true water stewards?' The transformation to a new sustainable practice will be made through a new connection with our heart, a more holistic type of analysis (brains) and the right actions based on personal integrity (hand). A water steward should be similar to the shepherds of olden days. They were given the responsibility to guard the sheep. The village trusted they would take care of the flock, make sure it would be well fed, protected from storms and kept together. The shepherd learned to take a long term perspective for the flock, ensuring that the pastures were not overgrazed, that the flock was not led too far away from access to water and that shelter was in reach in the event of storms and dangerous predators. Over time the shepherds became increasingly skilled in caring for the flock. They integrated the responsibility of the well-being of the flock into their identity. In a similar way, we can take the responsibility for human water consumption and our interaction with the natural world. We need to understand and work according to the big picture and the very long term perspective. Being a water steward requires deep reflection of how water should be treated and our relationship with water. Water utility professionals have the knowledge and have been trusted with the role of managing human water consumption. This is a great responsibility and requires deep reflection of how this should be done. The book will present ideas and concepts for the new role as well as questions for personal reflection.

E-learning Strategies

How to Get Implementation and Delivery Right First Time

John Wiley & Sons As more than 90% of spending on the Internet comes from brick and mortar companies it is these operations that will form the client base for e-learning. This book shows those companies how to get e-learning implementation right first time. Don Morisson explores and explains the whole implementation continuum - strategy, vendor selection, technology, implementation, culture change, content development and delivery. Most importantly he stresses that the success or failure of an e-learning initiative is directly related to the underlying strategic thinking. Written for a more mature, second generation e-learning market the book provides a practitioner's handbook to both guide the novice and inform the veteran. * Focuses on the reader's needs * Focuses on the strategic issues of e-learning * Informed by key business drivers * Supported and endorsed by PWC Readership: Senior managers including CEOs, CIOs, CLOs, HR Directors, middle management responsible for implementing and/or delivering e-learning, consultants

Six Memos for the Next Millennium

Penguin UK Italo Calvino was due to deliver the Charles Eliot Norton lectures at Harvard in 1985-86, but they were left unfinished at his death. The surviving drafts explore of the concepts of Lightness, Quickness, Multiplicity, Exactitude and Visibility (Constancy was to be the sixth) in serious yet playful essays that reveal Calvino's debt to the comic strip and the folktale. With his customary imagination and grace, he sought to define the virtues of the great literature of the past in order to shape the values of the future. This collection is a brilliant précis of the work of a great writer whose legacy will endure through the millennium he addressed. Italo Calvino, one of Italy's finest postwar writers, has delighted readers around the world with his deceptively simple, fable-like stories. Calvino was born in Cuba in 1923 and raised in San Remo, Italy; he fought for the Italian Resistance from 1943-45. His major works include *Cosmicomics* (1968), *Invisible Cities* (1972), and *If on a winter's night a traveler* (1979). He died in Siena in 1985, of a brain hemorrhage.

Continuity and Innovation in the Magical Tradition

BRILL This volume brings together thirteen studies by as many experts in the study of one or more ancient or medieval magical traditions, from ancient Mesopotamia and Pharaonic and Greco-Roman Egypt to the Greek world, Judaism, Christianity and Islam. It lays special emphasis on the recurrence of similar phenomena in magical texts as far apart as the Akkadian cuneiform tablets and an Arabic manuscript bought in Egypt in the late-twentieth century. Such similarities demonstrate to what extent many different cultures share a "magical logic" which is strikingly identical, and in particular they show the recurrence of certain phenomena when magical practices are transmitted in written form and often preserve, adopt and adapt much older textual units.
