## Online Library Pdf Type File Development Community For Papers Past Exams Abma

---

This is likewise one of the factors by obtaining the soft documents of this **Pdf Type File Development Community For Papers Past Exams Abma** by online. You might not require more epoch to spend to go to the book inauguration as without difficulty as search for them. In some cases, you likewise accomplish not discover the notice Pdf Type File Development Community For Papers Past Exams Abma that you are looking for. It will extremely squander the time.

However below, subsequently you visit this web page, it will be suitably unconditionally easy to get as well as download guide Pdf Type File Development Community For Papers Past Exams Abma

It will not acknowledge many era as we notify before. You can reach it while perform something else at house and even in your workplace. in view of that easy! So, are you question? Just exercise just what we manage to pay for below as with ease as review **Pdf Type File Development Community For Papers Past Exams Abma** what you next to read!

**The Green Book Appraisal and Evaluation in Central Government : Treasury Guidance Stationery Office** This new edition incorporates revised guidance from H.M Treasury which is designed to promote efficient policy development and resource allocation across government through the use of a thorough, long-term and analytically robust approach to the appraisal and evaluation of public service projects before significant funds are committed. It is the first edition to have been aided by a consultation process in order to ensure the guidance is clearer and more closely tailored to suit the needs of users. **Gender Dynamics in Transboundary Water Governance Feminist Perspectives on Water Conflict and Cooperation** Taylor & Francis This volume assesses the nexus of gender and transboundary water governance, containing empirical case studies, discourse analyses, practitioners' accounts, and theoretical reflections. Transboundary water governance exists at the intersection of two highly masculinised fields: diplomacy and water resources management. In both fields, positions are mainly held by men, and core ideas, norms, and guiding principles that are presented as neutral, are both shaped by men and based on male experiences. This book sheds light on the often hidden gender dynamics of water conflict and cooperation at the transboundary level and on the implicit assumptions that guide research and policies. The individual chapters of the book, based on case studies from around the world, reveal the gendered nature of water diplomacy, take stock of the number of women involved in organisations that govern shared waters, and analyse programmes that have been set up to promote women in water diplomacy and the obstacles that they face. They explore and contest leading narratives and knowledge that have been shaped mainly by privileged men, and assess how the participation of women concretely impacts the practices, routines, and processes of water negotiations. This volume will be of great interest to students and scholars of water governance, water diplomacy, gender, international relations and environmental politics. It will also be of interest to professionals and policymakers involved in supporting gender mainstreaming in water cooperation. **Community Interests Across International Law** Oxford University Press This book explores the extent to which contemporary international law expects states to take into account the interests of others - namely third states or their citizens - when they form and implement their policies, negotiate agreements, and generally conduct their relations with other states. It systematically considers the various manifestations of what has been described as 'community interests' in many areas regulated by international law and observes how the law has evolved from a legal system based on more or less specific consent and aimed at promoting particular interests of states, to one that is more generally oriented towards collectively protecting common interests and values. Through essays by experts in the field, this book explores topics such as the sources of international law and the institutional aspects of developing the law and covers a range of areas within the law. **Return on investment analysis of private sector facilitation funds for Rwandan agribusinesses** RTI Press This study analyzes the return on investment for an agribusiness facilitation fund implemented in Rwanda. Combining project monitoring data with supplementary surveys and interviews of recipient agribusinesses, we find a positive return on investment in terms of farmer income generated per dollar spent by the US government. To determine the commercial viability of the investments, we estimate the payback period and find the median time it will take a firm to recoup the entire investment through profits is 3.7 years. We estimate the net present value of the entire fund portfolio to be \$12.5 million. These estimates rely on conservative assumptions and likely underrepresent the profitability of the investments. Given the positive returns and commercial viability of the agribusinesses, we examine the fund's role as a first step to "graduate" firms toward investment readiness. Although three firms did access equity investment, we find that the majority of the businesses in the portfolio do not meet investor requirements for deal size and management capacity and are more appropriately financed by commercial lenders. We conclude with recommendations for the implementation and measurement of similar funds. **Information Needs of Communities The Changing Media Landscape in a Broadband Age** DIANE Publishing In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an info. and commun. renaissance, local communities in particular are being unevenly served with critical info. about local issues. Soon after the Knight Commission delivered its findings, the FCC initiated a working group to identify crosscurrent and trend, and make recommendations on how the info. needs of communities can be met in a broadband world. This report by the FCC Working Group on the Info. Needs of Communities addresses the rapidly changing media landscape in a broadband age. Contents: Media Landscape; The Policy and Regulatory Landscape; Recommendations. Charts and tables. This is a print on demand report. **MegaFox 1002 Things You Wanted to Know about Extending Visual Foxpro** Hentzenwerke An in-depth guide to Visual FoxPro programming explains how to extend its power and scope by integrating it with other software technologies, offering expanded coverage of data driving and reporting, as well as encompassing such topics as IntelliSense, e-mail, charts and graphs, PDF technology, MSDE, COM/DCOM, XML/ADO, and more. Original. (Intermediate) **Scientific Engineering of Distributed Java Applications 4th International Workshop, FIDJI 2004, Luxembourg-Kirchberg, Luxembourg, November 24-25, 2004, Revised Selected Papers** Springer FIDJI 2004 was an international forum for researchers and practitioners interested in the advances in, and applications of, software engineering for distributed application development. Concerning the technologies, the workshop focused on "Java-related" technologies. It was an opportunity to present and observe the latest research, results, and ideas in these areas. All papers submitted to this workshop were reviewed by at least two members of the International Program Committee. Acceptance was based primarily on originality and contribution. We selected, for these post-workshop proceedings, 11 papers amongst 22 submitted, a tutorial and two keynotes. FIDJI2004 aimed at promoting scientific approaches to software engineering. The scope of the workshop included the following topics: - design of distributed applications - development methodologies for software and system engineering - UML-based development methodologies - development of reliable and secure distributed systems - component-based development methodologies - dependability support during system life cycle - fault tolerance refinement, evolution and decomposition - atomicity and exception handling in system development - software architectures, frameworks and design patterns for developing distributed systems - integration of formal techniques in the development process - formal analysis and grounding of modelling notation and techniques (e. g. , UML, metamodelling) - supporting the security and dependability requirements of distributed applications in the development process - distributed software inspection - refactoring methods - industrial and academic case studies - development and analysis tools The organization of such a workshop represents an important amount of work. **Communities in Action** Papers in Community Informatics Cambridge Scholars Publishing ICTs have become a very powerful community resource, viewed by many authors in this volume as two-way mechanisms, facilitating the perpetuation of and reflecting esteemed community values. The contents of this volume make it clear that ICTs have a huge capacity for incorporation into different forms of community action, including social change, community learning, community connection, and community development. Through studying the papers in this volume, readers can learn about multiple forms of ICTs and action and how action is understood, and improve their grasp of the complexities of social-technical relations. The chapters in this volume began life as papers at the Conference on 'Community Informatics - prospects for communities and action' in 2007, the fourth successful community informatics conference held at the Monash University Centre, Prato Italy. This book creates a platform for exchanging experiences, case studies, and possible solutions to address the difficulties in deploying ICT in many contexts, and will be of interest to all researchers and practitioners who engage with ICT, particularly those in the community and developmental informatics field. **Milestones in Green Transition and Climate Compatible Development in Eastern and Southern Africa** OSSREA It is widely recognised that climate change poses significant serious threats to sustained economic growth and agricultural development, poverty reduction, food security and political stability globally. Nowhere are these challenges more marked than in Africa where two-thirds of all available land is classified either as desert or dry land, in relation to which the Intergovernmental Panel on Climate Change (IPCC) (2013) has classified the continent as the most vulnerable to climate change variability. This anthology is a product of a call from OSSREA to collate evidence based researches in a book in a bid to assess how far countries in eastern and southern Africa are implementing the UNFCCC, Rio+20, Agenda 21 and other global and Africa-wide decisions concerning the need to address climate change. This will contribute to post-2015 development agenda for sustainable development goals (SDGs), in which climate change and disaster risk reduction will be priority areas of focus. The book will serve as a valuable tool for experts, advisers and policymakers in pursuing effective green growth policies and practices and achieving climate compatible development and in doing so inspire readers to choose a more sustainable pathway for humanity. It will also help in looking at climate change as both a challenge and opportunity for development. Further, this book aims at stimulating more research in climate compatible development and climate financing which have put most countries at crossroads. **Foundations of Nursing in the Community - E-Book** Community-Oriented Practice Elsevier Health Sciences With concise, focused coverage of community health nursing, *Foundations of Nursing in the Community: Community-Oriented Practice*, 4th Edition provides essential information for community practice — from nursing roles and care settings to vulnerable population groups. The book uses a practical, community-oriented approach and places an emphasis on health promotion and disease prevention. Practical application of concepts is highlighted throughout the text in case studies, critical thinking activities, QSEN competencies, and Healthy People 2020 objectives. Evidence-Based Practice boxes highlight current research findings, their application to practice, and how community/public health nurses can apply the study results. Levels of Prevention boxes identify specific nursing interventions at the primary, secondary, and tertiary levels, to reinforce the concept of prevention as it pertains to community and public health care. Focus on health promotion throughout the text emphasizes initiatives, strategies, and interventions that promote the health of the community. Clinical Application scenarios offer realistic situations with questions and answers to help you apply chapter concepts to practice in the community. Case Studies provide client scenarios within the community/public health setting to help you develop

assessment and critical thinking skills. What Would You Do? boxes present problem-solving challenges that encourage both independent and collaborative thinking required in community settings. How To boxes offer specific instructions on nursing interventions. NEW! QSEN boxes illustrate how quality and safety goals, competencies, objectives, knowledge, skills, and attitudes can be applied in nursing practice in the community. NEW! Feature box on Linking Content to Practice highlights how chapter content is applied in the role of public/community health nursing. NEW! Healthy People 2020 objectives in every chapter address the health priorities and emerging health issues expected in the next decade. A practical guide for ex-ante impact evaluation in fisheries and aquaculture WorldFish The Invisible Web Uncovering Information Sources Search Engines Can't See Information Today, Inc. Discusses the use of online information resources and problems caused by dynamically generated Web pages, paying special attention to information mapping, assessing the validity of information, and the future of Web searching. Researching International Pedagogies Sustainable Practice for Teaching and Learning in Higher Education Springer Science & Business Media In our rapidly globalizing world students are able to access learning through mobility, through computer mediated experiences, and through the diverse perspectives of their peers and teachers. All of these components impact on the ways in which universities and their staff prepare and present courses for their students. This book presents an edited selection of chapters compiled under the theme of 'new international pedagogies'. The objective is to document current pedagogical frameworks and practices in the teaching and learning context of international education. It showcases innovative teaching and learning methods, methodological frameworks and novel pedagogies that contribute to improving the effectiveness of teaching and learning in international settings and diverse student groups. The collection of seventeen chapters offers new debate on applied critical educational thought, innovation in teaching and learning, and culturally sensitive and inclusive curriculum practices across a broad disciplinary spectrum. Of central interest is the production of teaching and learning examples that provide evidence for implementing progress and advancement in the field. The book aims to stimulate further debate, research and application in the field of international pedagogies. Handbook on Social Protection Systems Edward Elgar Publishing This exciting and innovative Handbook provides readers with a comprehensive and globally relevant overview of the instruments, actors and design features of social protection systems, as well as their application and impacts in practice. It is the first book that centres around system building globally, a theme that has gained political importance yet has received relatively little attention in academia. Social Sustainability, Climate Resilience and Community-Based Urban Development What About the People? Routledge Urban communities around the world face increased stress from natural disasters linked to climate change, and other urban pressures. They need to grow rapidly stronger in order to cope, adapt and flourish. Strong social networks and social cohesion can be more important for a community's resilience than the actual physical structures of a city. But how can urban planning and design support these critical collective social strengths? This book offers blue sky thinking from the applied social and behavioural sciences, and urban planning. It looks at case studies from 14 countries around the world - including India, the USA, South Africa, Indonesia, the UK and New Zealand - focusing on initiatives for housing, public space and transport stops, and also natural disasters such as flooding and earthquakes. Building on these insights, the authors propose a 'gold standard': a socially aware planning process and policy recommendation for those drawing up city sustainability and climate change resilience strategies, and urban developers looking to build climate-proof infrastructure and spaces. This book will be of great interest to students and scholars of urban studies, resilience studies and climate change policy, as well as policymakers and practitioners working in related fields. Resources in Education Public Proposals for the Future of the Housing Finance System Hearing Before the Committee on Banking, Housing, and Urban Affairs, United States Senate, One Hundred Twelfth Congress, First Session ... March 29 and May 26, 2011 National planning policy framework 2012 The Stationery Office The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals. The Fracking Debate The Risks, Benefits, and Uncertainties of the Shale Revolution Columbia University Press Over roughly the past decade, oil and gas production in the United States has surged dramatically—thanks largely to technological advances such as high-volume hydraulic fracturing, more commonly known as “fracking.” This rapid increase has generated widespread debate, with proponents touting economic and energy-security benefits and opponents highlighting the environmental and social risks of increased oil and gas production. Despite the heated debate, neither side has a monopoly on the facts. In this book, Daniel Raimi gives a balanced and accessible view of oil and gas development, clearly and thoroughly explaining the key issues surrounding the shale revolution. The Fracking Debate directly addresses the most common questions and concerns associated with fracking: What is fracking? Does fracking pollute the water supply? Will fracking make the United States energy independent? Does fracking cause earthquakes? How is fracking regulated? Is fracking good for the economy? Coupling a deep understanding of the scholarly research with lessons from his travels to every major U.S. oil- and gas-producing region, Raimi highlights stories of the people and communities affected by the shale revolution, for better and for worse. The Fracking Debate provides the evidence and context that have so frequently been missing from the national discussion of the future of oil and gas production, offering readers the tools to make sense of this critical issue. Economic Development in Africa Report 2016 Debt Dynamics and Development Finance in Africa United Nations Africa has major development aspirations in the broader context of a global and continental economic development agenda. This calls for substantial financial resources at a time when the global development finance landscape is changing, from a model centred on official development assistance and the coverage of remaining financing needs through external debt, to a framework with greater emphasis on the mobilization of domestic resources. The Economic Development in Africa Report 2016 examines some of the key policy issues that underlie Africa's domestic and external debt, and provides policy guidance on the delicate balance required between financing development alternatives and overall debt sustainability. This report analyses Africa's international debt exposure and how domestic debt is increasingly playing a role in some African countries as a development finance option, and also examines complementary financing options and how they relate to debt. Technological Solutions for Sustainable Business Practice in Asia IGI Global Central Asian countries play a geostrategic role in world economy and politics. As a result, efforts are being made to establish an effective channel of communication between academic and research institutions, policymakers, government agencies, and individuals concerned with the complexities of Asian business, information technologies, sustainable development, and globalization. Technological Solutions for Sustainable Business Practice in Asia provides an in-depth analysis on Asian economy, business, and management with a clear international and interdisciplinary approach. This comprehensive resource is beneficial for academics, PhD students, policymakers, and government officials. Danube:Future Interdisciplinary School Proceedings 2017 Cultural and Social Implications of Global Change on the Danube River Basin Edition Donau-Universität Krems Global change processes, such as climate change, digitalization, migration movements and economic crises, are among the greatest challenges of our time and also shape the Danube macro-region as a specifically challenging region of Europe. As part of the Danube:Future Interdisciplinary School 2017 in Krems 28 PhD-students and young scientists from Alps-Adriatic Rectors' Conference and the Danube Rectors' Conference universities discussed these questions and developed research proposals within this broad context. These proceedings offer a comprehensive overview of the generated work. The Danube:Future Interdisciplinary School is part of the Capacity Building Module of the Danube:Future project, a Flagship Project of the EUSDR - the European Union Strategy for the Danube Region, in the Priority Area Knowledge Society. Danube:Future is a joint network project of the Alps-Adriatic Rectors' Conference and the Danube Rectors' Conference. It aims at capacity building in the Danube River Basin (DRB) and at providing networking to aid the development common research projects for a sustainable future of the DRB. Official Joomla! Book Addison-Wesley Professional The Official Joomla! Book is the authoritative and comprehensive Joomla! reference for every administrator, developer, designer, and content manager. Distilling the unsurpassed experience of two long-time Joomla! contributors, it teaches exactly what you need to know, through practical example sites and crystal-clear explanations. If you're new to Joomla!, you'll learn how to quickly create usable, effective sites. If you're an experienced Joomla! user, you'll learn how to make your sites more flexible, feature-rich, visually attractive, and useful. And whether new or experienced, you'll learn how Joomla! really works, so you can fully leverage its power whenever you're ready. You'll also get to know the Joomla! community by hearing from twelve community members through in-depth interviews, and you'll learn how to participate in the Joomla! project in ways that make sense for you. The Official Joomla! Book covers everything from installation to usability, templates to extensions. The authors explain each key concept conversationally, helping you learn to help yourself and confidently gain control over Joomla! and the sites you build with it. They also present chapter-length application case studies for business, non-profits, and education. You will learn how to Plan sites effectively before you start building them Create production sites quickly while avoiding common mistakes Install and configure Joomla! for maximum efficiency Create and edit content for your Joomla! site Customize and work with Joomla! templates Work with extensions: components, modules, plugins, and languages Efficiently administer Joomla! sites Participate in the Joomla! community as a user and contributor The Three Levels of Sustainability Taylor & Francis Understanding the complexity of sustainability is crucial for the leadership of business organizations, national governments, and non-governmental organizations. This second edition of the bestselling book The Three Levels of Sustainability uses the same interdependent three-level and three-dimensional framework as the first edition, encompassing societal, organizational, and individual levels, to clearly demonstrate what sustainability means and how to implement it. This new edition incorporates important developments in reporting and measuring, corporate behaviors, the impact of COVID-19, and the UN Sustainable Development Goals. More and more societies are becoming aware of their dependence on earth's resources. However, there is still a deep-rooted lack of awareness of the connection between society's ambitions for economic growth, earth's limitations, and unequal distribution of wealth. Prominent institutions and organizations and their leaders rely on the conformable belief that "more quantity" equals "more quality" and that "more growth" equals "more development". Although some progress has been made since the publication of the first edition, the world is increasingly characterized by division, rising dissatisfaction, and growing inequality between countries, communities, and people. At the same time, it is anticipated that global warming will reach a point of no return between 2030 and 2052. The fundamental paradigm shift in the way the development process must be navigated is better served by a holistic and inclusive, multilevel and multidimensional approach meant to gradually align the critical institutional and individual factors essential to the pathway toward sustainable development. The book has been established as an excellent primer to explain the complex issues around sustainability for postgraduate and undergraduate students, as well as busy professionals and those already in management and leadership positions in the private, public, or non-profit sectors. Security and Software for Cybercafes IGI Global Cybercafes, which are places where Internet access is provided for free, provide the opportunity for people without access to the Internet, or who are traveling, to access Web mail and instant messages, read newspapers, and explore other resources of the Internet. Due to the important role Internet cafes play in facilitating access to information, there is a need for their systems to have well-installed software in order to ensure smooth service delivery. Security and Software for Cybercafes provides relevant theoretical frameworks and current empirical research findings on the security measures and software necessary for cybercafes, offering information technology professionals, scholars, researchers, and educators detailed knowledge and understanding of this innovative and leading-edge issue, both in industrialized and developing countries. Online Communities and Social Computing Third International

Conference, OCS 2009, Held as Part of HCI International 2009, San Diego, CA, USA, July 19-24, 2009, Proceedings Springer Science & Business Media The 13th International Conference on Human-Computer Interaction, HCI International 2009, was held in San Diego, California, USA, July 19-24, 2009, jointly with the Symposium on Human Interface (Japan) 2009, the 8th International Conference on Engineering Psychology and Cognitive Ergonomics, the 5th International Conference on Universal Access in Human-Computer Interaction, the Third International Conference on Virtual and Mixed Reality, the Third International Conference on Internationalization, Design and Global Development, the Third International Conference on Online Communities and Social Computing, the 5th International Conference on Augmented Cognition, the Second International Conference on Digital Human Modeling, and the First International Conference on Human Centered Design. A total of 4,348 individuals from academia, research institutes, industry and governmental agencies from 73 countries submitted contributions, and 1,397 papers that were judged to be of high scientific quality were included in the program. These papers address the latest research and development efforts and highlight the human aspects of the design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. Developing an Intercultural Responsive Leadership Style for Faculty and Administrators IGI Global College student populations are becoming increasingly more diverse as students from diverse backgrounds have greater access to higher education. Additionally, governing bodies have heightened expectations related to student success, retention, and time to degree, thus holding institutions of higher education more accountable. With a changing student demographic and increased accountability measures, faculty and administrators are seeking effective strategies to enhance intercultural responsiveness among underrepresented populations to support their success. Developing an Intercultural Responsive Leadership Style for Faculty and Administrators is a critical research publication that examines student retention and success among underrepresented college student populations by analyzing factors impacting their persistence towards graduation as well as exploring strategies to enhance intercultural responsiveness among these populations. Featuring a wide range of topics such as diversity, intercultural fluency, STEM education, and lifelong learning, this book is ideal for administrators, faculty, academicians, policymakers, researchers, and students. Youth Work Global Futures BRILL This edited text brings together academics who are at the cutting edge of youth work education. The book draws on global perspectives to explore current practice conditions and generate rich debate regarding the power and potential of future practice. Proceedings of the ... International Symposium on Remote Sensing of Environment Promoting the Sustainable Development Goals in North American Cities Case Studies & Best Practices in the Science of Sustainability Indicators Springer Nature This volume presents North American best practices and perspectives on developing, managing and monitoring indicators to track development progress towards the Sustainable Development Goals (SDGs) in local communities and cities. In 4 main sections, the book presents and frames the many ways in which community indicator programs are either integrating or retooling to integrate the SDGs into their existing frameworks, or how they are developing new programs to track and report progress on the SDGs. This is the first volume that focuses on SDG adoption within the context of North American cities and communities, and the unique issues and opportunities prevalent in these settings. The chapters are developed by experienced academics and practitioners of community planning and sustainable development, and will add broad perspective on public policy, organizational management, information management and data visualization. This volume presents a case-study approach to chapters, offering lessons that can be used by three main audiences: 1) teachers and researchers in areas of urban, regional, and environmental planning, urban development, and public policy; 2) professional planners, decision-makers, and urban managers; and 3) sustainability activists and interested groups. Artificial Intelligence Research and Development Proceedings of the 11th International Conference of the Catalan Association for Artificial Intelligence IOS Press There was a time when AI was seen by many as science fiction, i.e., the healthy endeavour of speculating about the future. Now the future is here. AI has passed from being a visionary discipline to lying at the core of many commercial enterprises. AI programs scattered through the web influence nowadays our lives: by extracting profiles and offering tailored advertisement, helping us in our searches, establishing social networks, providing entertainment...And not just in the net, but also in the physical world. In Japan there are robots that guide customers through marketplaces advising them where to find the product matching their needs, and realistic replicas of university professors allow them to teach their lectures a hundred kilometres away from the classroom. Not to speak about intelligent prostheses and remote high-precision surgery. In the Catalan-speaking world there are no robots in marketplaces yet, but it is coming. Recently, the first commercial humanoid robot was built. Since AI technology is becoming reasonably mature, companies are progressively relying on it. The Catalan Association for Artificial Intelligence (ACIA) tries to promote synergies within the research community and also between the different actors playing a role in the development of AI: from universities to industry, from governmental departments to the information society, from entertainment enterprises to citizen services. Our Common Future Sustainable Tourism on a Finite Planet Environmental, Business and Policy Solutions Taylor & Francis This book helps all those involved in international tourism develop the new skills, tools and investments required to protect irreplaceable global resources from the impacts of escalating tourism demand over the next 50 years. It documents how technology and the growing global middle class are driving a travel revolution which requires a new paradigm in managing tourism destinations. Travel and tourism supply chains and business models for hotels, tour operators, cruise lines, airlines and airports are analysed and environmental management techniques are proposed for each sector. A pragmatic set of solutions are offered to support the transition to lower impact tourism development worldwide. It recommends that decision makers assess the current and future value of natural, social, and cultural capital to guide investment in destinations and protect vital resources. Case studies illustrate why budgets to protect local destinations are consistently underestimated and offer guidance on new metrics. Innovative approaches are proposed to support the transition to green infrastructure, protect incomparable landscapes, and engage local people in the monitoring of vital indicators to protect local resources. It provides students, professionals, and policy makers with far-reaching recommendations for new educational programs, professional expertise, financing, and legal frameworks to lower tourism's rapidly escalating carbon impacts and protect the health and well-being of local populations, ecosystems, cultures, and monuments worldwide.?? Improving Diets and Nutrition Food-based Approaches CABI Nutrition-sensitive, food-based approaches towards hunger and malnutrition are effective, sustainable and long-term solutions. This book discusses the policy, strategic, methodological, technical and programmatic issues associated with such approaches, proposes "best practices" for the design, targeting, implementation and evaluation of specific nutrition-sensitive, food-based interventions and for improved methodologies for evaluating their efficacy and cost-effectiveness, and provides practical lessons for advancing nutrition-sensitive food-based approaches for improving nutrition at policy and programme level. Maritime Supply Chains Maritime Supply Chains breaks the maritime chain into components, consistently relating them to the overall integrated supply chain. The book not only analyzes and provides solutions to frequently encountered problems and key operational issues, it also applies cutting-edge scientific techniques on the maritime supply chain. Sections consider shipping, ports and terminals, hinterland and the issues that intersect different parts of the chain. Readers will find discussions of the various actors at play and how they relate to the overall function of the supply chain. Finally, the book offers solutions to the most pressing problems, thus providing a unique, well-balanced account. Impact Evaluation in Practice, Second Edition World Bank Publications The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development. Kritika: Essays on Intellectual Property Edward Elgar Publishing The field of intellectual property has broadened and deepened in so many ways, and at such pace, that there is a tendency for academic commentators to focus on the next new thing, or to react immediately to judicial developments, rather than to reflect more deeply on the greater themes of the discipline. The Kritika: Essays on Intellectual Property series is a series of books that are designed to fulfill this role by creating a forum for essays that take a critical, long-term approach to the field of intellectual property. Breaking down the barriers of specialization, and laying the foundation for an emergent critical scholarship, this first book in the series brings together the leading scholars in the field to reflect deeply on the current state and future of their discipline. Social Entrepreneurship Working towards Greater Inclusiveness SAGE Publishing India This book explores social entrepreneurship vis-à-vis participation of marginalized communities. Based on in-depth case studies that highlight the efforts of selected third sector organisations, this book brings to light the emergence of social entrepreneurship in India. The cases focus on the roles of locally established methods and community participation in carrying out sustainable social transformation. Social Entrepreneurship: Working Towards Greater Inclusiveness contributes to both practice and theory in social entrepreneurship. It also sets out modalities for future work in the field, examining the various processes adopted by social enterprises in their functioning and delivering of services to address the concerns of exclusion. Generosity and Architecture Taylor & Francis This book proposes that architecture can function as a true embodiment of generosity and examines how generosity in architecture operates within, and questions, current and historical socio-economic and political systems. As such, it interrogates ways in which architecture aspires for something more, whether within economic austerities or within historic contexts of a discipline that has often been preoccupied with cost and quantitative measurement. The texts presented in this book critically examine the theme of generosity and architecture from a variety of perspectives, addressing the theoretical, the historical, and the everyday processes of architectural practice, procurement, and policy in a global context. The book is a richly collaborative text which explores how architecture - in its processes of ordering and shaping space - can represent and embody generosity in all its multi-faceted potential. Globalization, Mass Education and Technical and Vocational Education and Training The Influence of UNESCO in Botswana and Namibia Springer This book assesses the influence of the international organization UNESCO on the development of national Technical and Vocational Education and Training (TVET) systems in the Southern African Community Region (SADC), focusing particularly on Botswana and Namibia. Designed around UNESCO's Better Education for Africa's Rise (BEAR) project, the study is an excellent example of applied policy research. Analysis is from the perspective of key stakeholders including UNESCO headquarters and field offices, Ministries of Education and of Labor, employers and employees, education and training institutions, international partners and more. Both qualitative and quantitative evidence are used to provide a comparative overview, and the author also reveals the current state of data on skills. Readers will discover common goals and challenges across the nations but also a common lack of action to measure the impact and influence that UNESCO's programs have had at a national level, prior to this study. Were the newly implemented educational policies successful or not? If the public policies failed, why was that? These chapters shed light on such questions and how UNESCO's contribution influenced the national development processes, in the context of globalization processes and trends of global mass education. The book has much to offer for both scholars and those working in UN agencies or national governments who seek to develop education systems and better link them to the world of work.
