Independent Thinking on Restorative Practice

Building relationships, improving behaviour and creating stronger communities

Crown House Publishing Ltd In Independent Thinking on Restorative Practice: Building relationships, improving behaviour and creating stronger communities, Mark Finnis shares a practical and inspiring introduction to the use of restorative practice in educational settings. For those educators who are uncomfortable with the punitive world of zero tolerance, isolation booths and school exclusions, Mark Finnis - one of the UK's leading restorative practice experts - is here to show you that there is another way. Drawing on his many years' experience working with schools, social services and local governments across the country, Mark shares all you need to know about what restorative practice is, how it works, where to start and the many benefits of embedding a relational approach into any educational organisation that genuinely has people at its heart. Covering coaching circles and the power of doing things with (and not to) children and young people, to moving your values off lanyards and posters and into the lived experience of every member of the school community, this book sets out how restorative practice - when done well - can transform every aspect of school life. The book shares advice on how to put behaviour right when it goes wrong in a more positive, less punitive way, and, more importantly, on how to get it right and keep it right in the first place. Furthermore, it advocates an approach that is collaborative, empowering and positive - and ultimately geared to improve motivation, engagement and independent learning in even the hardest-to-reach young people. Suitable for school leaders, educators and anyone working with young people.

It produces healthy eyes, clear vision and frees the patient from the need to purchase eyeglasses, drugs, unnecessary eye surgery. Yes, it can and has reversed cataracts! Dr. Bates worked his entire life treating people successfully with Natural Eyesight Improvement. The Bates Method is so simple and effective that many of his cured patients, 'often children' then went on to cure their friends, family, parents, teachers and other children of defective vision including crossed, wandering eyes. Read the 'true story of the two little girls that restored a blind mans eyesight' in the Oct. 1925 Magazine Issue. Health Promotion

Philosophy, Prejudice and Practice

John Wiley & Sons Incisively written, this new edition of a popular guide first published in 1996 slices through the rhetoric of health promotion. Its penetrating analysis quickly reveals health promotion's conceptual roots, providing an enlightening map of their web of theory and practice. David Seedhouse proves that health promotion, a discipline intended to improve the health of a population, is prejudiced—every plan and every project stems first from human values—and argues that only by acknowledging this will a mature discipline emerge. To help speed progress the author proposes a positive, practical theory of health promotion destined to inspire anyone who wishes to create better health. This new edition includes three new chapters on conventional health promotion, radical and foundational health promotion and mental health promotion, providing examples of the use of foundational health promotion. This new edition also adds five new teaching exercises, incorporates and updates the guide for teachers and lecturers and includes a new topical case study. This book is laced with entertaining dialogues and readers are encouraged to explore ten carefully presented exercises. Educational, accessible and intelligent, Health Promotion: Philosophy, Prejudice and Practice, 2nd Edition is a seminal work which heralds the beginning of the end of health promotion's long adolescence. It is nothing less than essential reading for all practitioners and students of health promotion.

Improving Adult Literacy Instruction

Options for Practice and Research

National Academies Press A high level of literacy in both print and digital media is required for negotiating most aspects of 21st-century life, including supporting a family, education, health, civic participation, and competitiveness in the global economy. Yet, more than 90 million U.S. adults lack adequate literacy. Furthermore, only 38 percent of U.S. 12th graders are at or above proficient in reading. Improving Adult Literacy Instruction synthesizes the research on literacy and learning to improve literacy instruction in the United States and to recommend a more systemic approach to research, practice, and policy. The book focuses on individuals ages 16 and older who are not in K-12 education. It identifies factors that affect literacy development in adolescence and adulthood in general, and examines their implications for strengthening literacy instruction for this population. It also discusses technologies for learning that can assist with multiple aspects of teaching, assessment, and accommodations for learning. There is inadequate knowledge about effective instructional practices and a need for better assessment and ongoing monitoring of adult students' proficiencies, weaknesses, instructional environments, and progress, which might guide instructional planning. Improving Adult Literacy Instruction recommends a program of research and innovation to validate, identify the boundaries of, and extend current knowledge to improve instruction for adults and adolescents outside school. The book is a valuable resource for curriculum developers, federal agencies such as the Department of Education, administrators, educators, and funding agencies.
