The Secrets of Chinese Esoteric Arts Revealed!

Secrecy in Japanese Arts: “Secret Transmission” as a Mode of Knowledge

Springer Exploring the Japanese tradition of hidden (or the secret transmission of) knowledge within a closed and often hereditary group, the author investigates how esoteric practices function, how people make meaning of their practices, and how this form of esotericism survived into the modern age. These questions are examined through the use of esoteric texts from the 15th to 18th centuries and theatrical treatises from the late 19th century onwards.

The Origin, Inner Philosophy, History, and Symbolism of the Buddhist Martial Art Within India and China

Motilal Banarsidass Publishe This unique study of the genesis and development of the earliest form of Buddhist self-defense practiced by Chuan Fa monks and mystics shows both the philosophical and physical basis of the skills developed and passed on to subsequent generations. This book seeks to reunite these concepts. Its teaching draws equally on the practices of North Chinese Chuan Movement Meditation Traditions and on the South Chinese Esoteric (Mi Chiao) School--both secret traditions rarely revealed to the general public. The material is presented so readers can understand that what we think of as a competitive sport is really a meditation mandala in action. Extensive appendices list the main Chinese dynasties, a chronology of Buddhist Sutras, a chronological record of scriptures, teachers, events during 1000 years of Indian and Chinese Buddhism, and translations of Bodhidharma's texts including The Six Gates, Entering the Buddha's Path, and the treatise upon the Bloodline Teaching of True Dharma.

The Secret Doctrine: Anthropogenesis

Making Transcendents

Ascetics and Social Memory in Early Medieval China

University of Hawaii Press Honorable Mention, Joseph Levenson Prize (pre-1900 category), Association for Asian Studies By the middle of the third century B.C.E. in China there were individuals who sought to become transcendents (xian)—deathless, godlike beings endowed with supernormal powers. This quest for transcendence became a major form of religious expression and helped lay the foundation on which the first Daoist religion was built. Both xian and those who aspired to this exalted status in the centuries leading up to 350 C.E. have traditionally been portrayed as secretive and hermit-like figures. This groundbreaking study offers a very different view of xian-seekers in late classical and early medieval China. It suggests that transcendence did not involve a withdrawal from society but rather should be seen as a religious role situated among other social roles and conceived in contrast to them. Robert Campany argues that the much-discussed secrecy surrounding ascetic disciplines was actually one important way in which practitioners presented themselves to others. He contends, moreover, that many adepts were not socially isolated at all but were much sought after for their power to heal the sick, divine the future, and narrate their exotic experiences. The book moves from a description of the roles of xian and xian-seekers to an account of how individuals filled these roles, whether by their own agency or by others'—or, often, by both. Campany summarizes the repertoire of features that constituted xian roles and presents a detailed example of what analyses of those cultural repertoires look like. He charts the functions of a basic dialectic in the self-presentations of adepts and examines their narratives and relations with others, including family members and officials. Finally, he looks at hagiographies as attempts to persuade readers as to the identities and reputations of past individuals. His interpretation of these stories allows us to see how reputations were shaped and even co-opted—sometimes quite surprisingly—into the ranks of xian. Making Transcendents provides a nuanced discussion that draws on a sophisticated grasp of diverse theoretical sources while being thoroughly grounded in traditional Chinese hagiographical, historiographical, and scriptural texts. The picture it presents of the quest for transcendence as a social phenomenon in early medieval China is original and provocative, as is the paradigm it offers for understanding the roles of holy persons in other societies.

Secrets of Creativity

What Neuroscience, the Arts, and Our Minds Reveal

Oxford University Press, USA Secrets of Creativity: What Neuroscience, the Arts, and Our Minds Reveal draws on insights from leading neuroscientists and scholars in the humanities and the arts to probe creativity in its many contexts, in the everyday mind, the exceptional mind, the scientific mind, the artistic mind, and the pathological mind. Components of creativity are specified with respect to

types of memory, forms of intelligence, modes of experience, and kinds of emotion. Authors in this volume take on the challenge of showing how creativity can be characterized behaviorally, cognitively, and neurophysiologically. The complementary perspectives of the authors add to the richness of these findings. Neuroscientists describe the functioning of the brain and its circuitry in creative acts of scientific discovery or aesthetic production. Humanists from the fields of literature, art, and music give analyses of creativity in major literary works, musical compositions, and works of visual art.

Religion in Japan: Unity and Diversity

Cengage Learning This standard text explores religion in Japan as a complex tapestry of different religious strands, reflecting both the unity and diversity of Japanese culture, a theme Earhart pioneered in the first edition (1969) of this enduring, classic book--a theme he has devoted subsequent decades to refining through cutting-edge scholarship and keen observation of the evolving religious scene. Tracing the development of religious traditions from the prehistoric era through modern times, Earhart explores the vital influence of Shinto, Buddhism, Daoism, Confucianism, and folk religion. Presuming no technical or academic background, the text guides students to key Japanese religious themes, which include the proximity of humans and gods, the religious character of the family, the bond between religion and the nation, and the pervasiveness of religion in everyday life. This new edition updates the description and interpretation of the entire history of religion in Japan in light of the latest developments in the field. In the latter chapters, changes in the contemporary scene are highlighted, discussing Tokyo Disneyland, manga, and anime as alternative reality, as well as the innovations in more traditional events such as wedding ceremonies and rites for the dead. Tai Chi Chuan and the Code of Life

Revealing the Deeper Mysteries of China's Ancient Art for Health and Harmony (Revised Edition)

Singing Dragon In *Tai Chi Chuan and the Code of Life*, Graham Horwood describes the various styles of Tai Chi Chuan, exploring its roots in the Chinese philosophy of Taoism as well as elaborating on the evolution it has undergone over millennia. In order to understand the energetic method of Tai Chi Chuan and Chi Kung, he highlights parallels between its source, The I Ching, and archetypal principles from both Eastern and Western philosophy and medicine. The text and diagrams show the synergy between the different cultures, and shows how they are all linked. This enables the beginner or the experienced Tai Chi practitioner to improve their understanding of Tai Chi, which will strengthen both the mind and body, opening the gateway to the inner person. Drawing on information from the Yang family's formerly secret teachings, the book explains how to build chi (energy), circulate and store it, and also includes an exclusive set of Chi Kung exercises which will augment the building, circulation and storage of chi for the healer and martial practitioner, showing the path to optimizing the practitioner's energetic and spiritual development. The exercises are accompanied by an explanation of where chi comes from and its application for the mind and body as well as the flow in the meridians. The book provides an excellent introduction to both the theory and key practices of Tai Chi Chuan for the beginner, and multi-level insights for the seasoned practitioner that will enhance his or her practice and understanding of Tai Chi Chuan.

The Early Chinese Empires

Qin and Han

Harvard University Press In 221 bc the First Emperor of Qin unified the lands that would become the heart of a Chinese empire. Though forged by conquest, this vast domain depended for its political survival on a fundamental reshaping of Chinese culture. With this informative book, we are present at the creation of an ancient imperial order whose major features would endure for two millennia. The Qin and Han constitute the "classical period" of Chinese history--a role played by the Greeks and Romans in the West. Mark Edward Lewis highlights the key challenges faced by the court officials and

scholars who set about governing an empire of such scale and diversity of peoples. He traces the drastic measures taken to transcend, without eliminating, these regional differences: the invention of the emperor as the divine embodiment of the state; the establishment of a common script for communication and a state-sponsored canon for the propagation of Confucian ideals; the flourishing of the great families, whose domination of local society rested on wealth, landholding, and elaborate kinship structures; the demilitarization of the interior; and the impact of non-Chinese warrior-nomads in setting the boundaries of an emerging Chinese identity. The first of a six-volume series on the history of imperial China, *The Early Chinese Empires* illuminates many formative events in China's long history of imperialism--events whose residual influence can still be discerned today.

Secret Vancouver

The Unique Guidebook to Vancouver's Hidden Sites, Sounds, and Tastes

ECW Press It's been said that Vancouver is a little superficial. Observers point to her great bones, pretty face, and fine outerwear of mountains, gardens, trees and water. But there's more to this Pacific coast city than good looks. Vancouver has character, warmth, brains and style -- even some spunk. Consider funky, former-industrial Yaletown, where restaurants and tasting bars serve locally sourced and seasonal cuisine in an ultra-chic atmosphere, at prices so modest they'll shock the knowing American. Or visit the dramatic Museum of Anthropology, with its historic aboriginal totem poles still standing tall in the Great Hall. Amble along time-tested Main Street where youthful designers and vintage clothiers mingle with antique dealers and ethnic take-out. Or spend the evening at an authentic Irish pub in Gastown, or a night-club on downtown's Entertainment Row. Then there's the utterly authentic Punjabi Market. And the oh-so-West Coast neighborhood of Kitsilano, full of environmentally correct shops and eateries. Take a charming passenger ferry over lake-like False Creek to Granville Island, with its world-class public market and artisan studios. Or put on your walking shoes and venture into the wilds of world-famous Stanley Park in search of giant, old growth trees and solitude. In other words, whether you are a long-time local or casual vacationer, let *Secret Vancouver* introduce you to the sights, sensations and stories you'd never think to look for, especially in such a nice-looking, upstanding sort of place. *Secret Vancouver* is the latest in the acclaimed *Secret Guides* series. God's Ambiance

Is Revealed in the Matrix of Wisdom

Outskirts Press The MATRIX OF WISDOM is all about God's Ambiance residing in the soul of the individual. This volume is about unraveling the deep mysteries of God esoterically codified into the world's sacred scriptures, literature, artworks, monuments and architecture in all times and climes via the ESOTERIC SCIENCE: i.e. the harmonious integration of the Seven Liberal Arts: Quadrivium (Four Mathematical Sciences) and the Trivium (Three Grammatical Arts) that are the foundations of the ancient Mystery Schools. The MATRIX OF WISDOM is a 10 x 10 matrix that is the original source material that wrote the sacred scriptures in all religious cultures around the world. From the mystical depths of this 10 x 10 matrix China created the I Ching and the Tao te Ching, Buddhism created their Stupas, Hinduism and Christianity build their temples, cathedrals and churches, numerous cultures around the world built their pyramids based upon its schematics and the Native American Indians knew of it, Astrology and the Game of Chess were developed from it, and Pythagoras developed his mathematical theorems from it, and Freemasonry is founded upon it and the city of Washington DC is built on its esoteric design and this latter is provided for in the United States Constitution, Article 1, Section 8; however, this matrix is never-ever discussed explicitly to the general public. Throughout this volume there will be a continuous tsunami of demonstrable evidence directly and indirectly challenging the status quo of academia and the orthodoxy of all religions around the world. The WORD OF GOD will be discussed mainly from the perspective of the Judaeo Christian Scriptures, the secret teachings of the Roman Catholic Church's literature, artwork, monuments and architecture and Freemasonry symbolism designed into the landscape of Washington DC. The MATRIX OF WISDOM (spiritual waters of creation: i.e. sum total or all knowledge) is inherent in the psyche of every human being. The MATRIX OF WISDOM is a commentary or the MONAD, which is the soul's raison d'être: i.e. God/Man Christ (Tao, Krishna, Buddha, Horus, etc.). When the soul comes into the world it splits into a two-part psyche: ego-consciousness and the unconscious mind and this knowledge is esoterically codified into the mythoi of the Judaeo Christian Scriptures; thus, the sacred scriptures of the world are all about explaining to the worthy initiate the dynamics of the soul and its psyche. The sacred scriptures are written first and foremost for the Born Again initiate; though, the average member of the laity has direct access to both its exoteric writings (REVEALED) and its secret esoteric teachings (COVERED). The inexplicable WORD OF GOD (HIDDEN): however, cannot be explained to another in the vernacular. The initiate can know of the ESOTERIC SCIENCE; however that does not avail him or her of the true understanding of the WORD OF GOD. Only God can communicate that unfathomable and inexplicable knowledge to the individual. The ESOTERIC SCIENCE can somewhat prepare the worthy initiate for the spiritual Initiatic Visionary Experience, which is gifted only to those that are worthy and truly DESIRE to know the WORD OF GOD. The sacred scriptures around the world are written to explain the spiritual Initiatic Visionary Experience; furthermore, the sacred scriptures in their indigenous languages are the most scientific instruments on the face of the Earth; though, modernity will most likely dispute that fact ad nauseam.

Secret Practices of the Sufi Freemasons

The Islamic Teachings at the Heart of Alchemy

Simon and Schuster Reveals the secret spiritual exercises of the Bektashi Order of Sufis • Shows how this order, also known as Oriental Freemasonry, preserves the ancient spiritual doctrines forgotten by modern Freemasonry • Explains how to transform the soul into the alchemical Magnum Opus by combining Masonic grips and the abbreviated letters of the Qur'an • Includes a detailed biography of Baron von Sebottendorff Originally published in Germany in 1924, this rare book by Baron Rudolf von Sebottendorff reveals the secret spiritual exercises of the Bektashi Order of Sufis as well as how this order, also known as Oriental Freemasonry, preserves the ancient spiritual doctrines forgotten by modern Freemasonry. Sebottendorff explains how the mysterious abbreviated letters found in the Qur'an represent formulas for perfecting the spirit of the individual. When combined with Masonic hand signs and grips and conducted accordingly to a precise schedule, these formulas incorporate spiritual power into the body and transform the soul from its base state into a noble, godlike state: the Magnum Opus of the medieval alchemists. Laying out the complete program of spiritual exercises, Sebottendorff explains each abbreviated word-formula in the Qur'an, the hand gestures that go with them, and the exact order and duration for each exercise. Including a detailed biography of Sebottendorff and an examination of alchemy's Islamic heritage, this book shows how the traditions of Oriental Freemasonry can ennoble the self and lead to higher knowledge.

NOBILITY AND CIVILITY

Harvard University Press Globalization has become an inescapable fact of contemporary life. Some leaders, in both the East and the West, believe that human rights are culture-bound and that liberal democracy is essentially Western, inapplicable to the non-Western world. How can civilized life be preserved and issues of human rights and civil society be addressed if the material forces dominating world affairs are allowed to run blindly, uncontrolled by any cross-cultural consensus on how human values can be given effective expression and direction? In a thoughtful meditation ranging widely over several civilizations and historical eras, Wm. Theodore de Bary argues that the concepts of leadership and public morality in the major Asian traditions offer a valuable perspective on humanizing the globalization process. Turning to the classic ideals of the Buddhist, Hindu, Confucian, and Japanese traditions, he investigates the nature of true leadership and its relation to learning, virtue, and education in human governance; the role in society of the public intellectual; and the responsibilities of those in power in creating and maintaining civil society. De Bary recognizes that throughout history ideals have always come up against messy human complications. Still, he finds in the exploration and affirmation of common values a worthy attempt to grapple with persistent human dilemmas across the globe.
