### **Interactive Web-Based Data Visualization with R, plotly, and shiny** *CRC Press*

The richly illustrated *Interactive Web-Based Data Visualization with R, plotly, and shiny* focuses on the process of programming interactive web graphics for multidimensional data analysis. It is written for the data analyst who wants to leverage the capabilities of interactive web graphics without having to learn web programming. Through many R code examples, you will learn how to tap the extensive functionality of these tools to enhance the presentation and exploration of data. By mastering these concepts and tools, you will impress your colleagues with your ability to quickly generate more informative, engaging, and reproducible interactive graphics using free and open source software that you can share over email, export to pdf, and more. Key Features: Convert static ggplot2 graphics to an interactive web-based form Link, animate, and arrange multiple plots in standalone HTML from R Embed, modify, and respond to plotly graphics in a shiny app Learn best practices for visualizing continuous, discrete, and multivariate data Learn numerous ways to visualize geo-spatial data This book makes heavy use of plotly for graphical rendering, but you will also learn about other R packages that support different phases of a data science workflow, such as tidy, dplyr, and tidyverse. Along the way, you will gain insight into best practices for visualization of high-dimensional data, statistical graphics, and graphical perception. The printed book is complemented by an interactive website where readers can view movies demonstrating the examples and interact with graphics.

### **Food Proteins and Bioactive Peptides** *MDPI*

This book is a printed edition of the Special Issue "Food Proteins and Bioactive Peptides" that was published in *Foods*

### **Heparanase From Basic Research to Clinical Applications** *Springer Nature*

Written by internationally recognized leaders in Heparanase biology, the book's eight chapters offer an opportunity for scientists, clinicians and advanced students in cell biology, tumor biology and oncology to obtain a comprehensive understanding of Heparanase's multifaceted activities in cancer, inflammation, diabetes and other diseases, as well as its related clinical applications. Proteases and their involvement in cancer progression have been well addressed and documented; however, the emerging premise presented within this book is that Heparanase is a master

regulator of aggressive cancer phenotypes and crosstalk with the tumor microenvironment. This endoglycosidase contributes to tumor-mediated remodeling of the extracellular matrix and cell surfaces, augmenting the bioavailability of pro-tumorigenic and pro-inflammatory growth factors and cytokines that are bound to Heparan sulfate. Compelling evidence ties Heparanase with all steps of tumor progression including tumor initiation, growth, angiogenesis, metastasis, and chemoresistance, supporting the notion that Heparanase is an important contributor to the poor outcome of cancer patients and a validated target for therapy. Unlike Heparanase, heparanase-2, a close homolog of Heparanase, lacks enzymatic activity, inhibits Heparanase, and regulates selected genes that promote normal differentiation and tumor suppression. Written by internationally recognized leaders in Heparanase biology, this volume presents a comprehensive understanding of Heparanase's multifaceted activities in cancer, inflammation, diabetes and other diseases, as well as its related clinical applications to scientists, clinicians and advanced students in cell biology, tumor biology and oncology. **In the Realm of Hungry Ghosts Close Encounters with Addiction** *Knopf Canada* In this timely and profoundly original new book, bestselling writer and physician Gabor Maté looks at the epidemic of addictions in our society, tells us why we are so prone to them and what is needed to liberate ourselves from their hold on our emotions and behaviours. For over seven years Gabor Maté has been the staff physician at the Portland Hotel, a residence and harm reduction facility in Vancouver's Downtown Eastside. His patients are challenged by life-threatening drug addictions, mental illness, Hepatitis C or HIV and, in many cases, all four. But if Dr. Maté's patients are at the far end of the spectrum, there are many others among us who are also struggling with addictions. Drugs, alcohol, tobacco, work, food, sex, gambling and excessive inappropriate spending: what is amiss with our lives that we seek such self-destructive ways to comfort ourselves? And why is it so difficult to stop these habits, even as they threaten our health, jeopardize our relationships and corrode our lives? Beginning with a dramatically close view of his drug addicted patients, Dr. Maté looks at his own history of compulsive behaviour. He weaves the stories of real people who have struggled with addiction with the latest research on addiction and the brain. Providing a bold synthesis of clinical experience, insight and cutting edge scientific findings, Dr. Maté sheds light on this most puzzling of human frailties. He proposes a compassionate approach to helping drug addicts and, for the many behaviour addicts among us, to addressing the void addiction is meant to fill. I believe there is one addiction process, whether it manifests in the lethal substance dependencies of my Downtown Eastside patients, the frantic self-soothing of overeaters or shopaholics, the obsessions of gamblers, sexaholics and compulsive internet users, or in the socially acceptable and even admired behaviours of the workaholic. Drug addicts are often dismissed and discounted as unworthy of empathy and respect. In telling their stories my intent is to help their voices to be heard and to shed light on the origins and nature of their ill-fated struggle to overcome suffering through substance use. Both in their flaws and their virtues they share much in common with the society that ostracizes them. If they have chosen a path to nowhere, they still have much to teach the rest of us. In the dark mirror of their lives we can trace outlines of our own. —from *In the Realm of Hungry Ghosts*

**The Romani World A Historical Dictionary of the the Gypsies** Gypsy history and life. Professionals working with Gypsies and migrant Roma from the CEE will also find it invaluable."--BOOK JACKET. **Jurisdiction and Admissibility in Investment Arbitration The Practice and the Theory** BRILL In this work, Filippo Fontanelli analyses the notions of jurisdiction and admissibility in investment arbitration. The first part takes stock of the arbitration practice. The second part interrogates these notions within the wider theory of international law and reveals the effects of their inherent fuzziness on the work of investment tribunals. **Liquidated An Ethnography of Wall Street** Duke University Press Financial collapses—whether of the junk bond market, the Internet bubble, or the highly leveraged housing market—are often explained as the inevitable result of market cycles: What goes up must come down. In *Liquidated*, Karen Ho punctures the aura of the abstract, all-powerful market to show how financial markets, and particularly booms and busts, are constructed. Through an in-depth investigation into the everyday experiences and ideologies of Wall Street investment bankers, Ho describes how a financially dominant but highly unstable market system is understood, justified, and produced through the restructuring of corporations and the larger economy. Ho, who worked at an investment bank herself, argues that bankers' approaches to financial markets and corporate America are inseparable from the structures and strategies of their workplaces. Her ethnographic analysis of those workplaces is filled with the voices of stressed first-year associates, overworked and alienated analysts, undergraduates eager to be hired, and seasoned managing directors. Recruited from elite universities as "the best and the brightest," investment bankers are socialized into a world of high risk and high reward. They are paid handsomely, with the understanding that they may be let go at any time. Their workplace culture and networks of privilege create the perception that job insecurity builds character, and employee liquidity results in smart, efficient business. Based on this culture of liquidity and compensation practices tied to profligate deal-making, Wall Street investment bankers reshape corporate America in their own image. Their mission is the creation of shareholder value, but Ho demonstrates that their practices and assumptions often produce crises instead. By connecting the values and actions of investment bankers to the construction of markets and the restructuring of U.S. corporations, *Liquidated* reveals the particular culture of Wall Street often obscured by triumphalist readings of capitalist globalization. **Forensis The Architecture of Public Truth** The role of material forensics in articulating new notions of the public truth of political struggle, violent conflict, and climate change are the focus of *Forensis*, the HKW exhibition catalog based on the theories of Eyal Weizman. - The concept of forensis was developed as a research project by Goldsmiths College, Centre for Research Architecture by theorist Eyal Weizman. The project is the subject of a major exhibition at the Haus der Kulturen der Welt (HKW) and catalog cum theoretical reader presenting the findings and contributions of over 20 influential architects, artists, filmmakers, and academics. *Forensis*, (Latin for pertaining to the forum ) argues for the role of material forensics as central to the interpretation of the ways in which states police and govern their subjects. *Forensis* engages struggles for justice across frontiers of contemporary conflict through the study of how technology mediates the testimony of material objects such as bones, ruins, toxic

substances, etc. In the hopes of unlocking forensics potential as a political practice, the project participants present innovative investigations aimed at producing new kinds of evidence for use by international prosecutorial teams, political organizations, NGOs, and the UN. **Ivermectin and Abamectin** *Springer Science & Business Media* Ivermectin and abamectin, members of the avermectin family of compounds, were introduced to the market in the 1980's as a veterinary antiparasitic drug and agricultural pesticide, respectively. Their acceptance and commercial success have been remarkable; both are highly effective and in worldwide use. The efficacy of ivermectin in river blindness has expanded the interest in its use in human medicine. In response to the intense scientific and industrial interest in ivermectin and abamectin and the likelihood that they will be forerunners of an expanding family of drugs, this comprehensive monograph satisfies the need for a review and synthesis of current knowledge about the use of these substances in crop protection as well as in cattle, sheep, swine, horses, dogs, cats, birds, fish, reptiles, and in man. This overview presents chemical, biochemical, and microbiological data, as well as pharmacological, safety, and environmental aspects and covers practical use of the compounds as antiparasitic and pesticide agents, as well as the available safety data that have emerged from the clinical experience with human applications.

#### **Towards Consistency in International Investment Jurisprudence A Preliminary Ruling System for ICSID Arbitration**

*BRILL* In *Towards Consistency in International Investment Jurisprudence*, Katharina Diel-Gligor addresses the problem of inconsistent arbitral decision-making, with a focus on ICSID arbitration. After analysing the causes, forms, and manifestations of inconsistencies, she proposes a preliminary ruling system as a means of reform.

#### **New Contributions in Information Systems and Technologies Volume 1**

*Springer* This book contains a selection of articles from The 2015 World Conference on Information Systems and Technologies (WorldCIST'15), held between the 1st and 3rd of April in Funchal, Madeira, Portugal, a global forum for researchers and practitioners to present and discuss recent results and innovations, current trends, professional experiences and challenges of modern Information Systems and Technologies research, technological development and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Human-Computer Interaction; Health Informatics; Information Technologies in Education; Information Technologies in Radio communications.

**International Maritime Boundaries** *Martinus Nijhoff Publishers* Volume III includes: a systematic examination of all international maritime boundaries worldwide, the text of every modern boundary agreement, descriptions of judicially-established boundaries, plus other resources that make it an unmatched comprehensive, accessible resource in the field.

#### **New Contributions in Information Systems and Technologies**

**Volume 2** *Springer* This book contains a selection of articles from The 2015 World Conference on Information Systems and Technologies (WorldCIST'15), held between the 1st and 3rd of April in Funchal, Madeira, Portugal, a global forum for researchers and practitioners to present and discuss recent results and innovations, current

trends, professional experiences and challenges of modern Information Systems and Technologies research, technological development and applications. The main topics covered are: Information and Knowledge Management; Organizational Models and Information Systems; Intelligent and Decision Support Systems; Big Data Analytics and Applications; Software Systems, Architectures, Applications and Tools; Multimedia Systems and Applications; Computer Networks, Mobility and Pervasive Systems; Human-Computer Interaction; Health Informatics; Information Technologies in Education; Information Technologies in Radio communications.

**The Elastic Closet A History of Homosexuality in France, 1942-present** *Springer* A history of French homosexuals since 1942 in the interconnected realms of law, politics and the media, with a focus on the complex relationship between French republican values and the possibilities they have offered for change in each of these three spheres.

**Modern Chromatographic Analysis Of Vitamins Revised And Expanded** *CRC Press* Third Edition collects and examines the tremendous proliferation of information on chromatographic analysis of fat and water soluble vitamins over the last decade. Extensively describes sample preparation and final measurement.

**Essentials of Evidence-Based Academic Interventions** *John Wiley & Sons* Essentials of Evidence-Based Academic Interventions puts at your fingertips the successful instructional techniques and materials necessary for accurate and effective use of evidence-based interventions. Written by Barbara Wendling and Nancy Mather, two experts in educational assessment and intervention, this intervention-oriented reference presents clear descriptions of research-based interventions in the areas of: phonological awareness and beginning reading phonics; phonics and sight word instruction; reading fluency; vocabulary and reading comprehension; spelling, handwriting, and written expression; basic math skills; and math problem-solving.

**From Bilateral Arbitral Tribunals and Investment Courts to a Multilateral Investment Court Options Regarding the Institutionalization of Investor-State Dispute Settlement** *Springer Nature* This open access book considers the potential setup for a future Multilateral Investment Court (MIC). The option of an MIC was first discussed by the EU Commission in 2016 and has since been made an official element of the EU Common Commercial Policy. In 2017, UNCITRAL also decided to discuss the possibility of an MIC, and on 20 March 2018, the Council of the EU gave the EU Commission the mandate to negotiate the creation of an MIC. The "feasibility study" presented here is intended to contribute to a broader discussion on the options for a new international court specialized in investment protection. The cornerstones of such a new permanent court are a strict orientation on the rule of law, reduced costs of investment protection, transparency considerations, aspects of consistency in case law, and the effective enforceability of MIC decisions.

**Neuroscience and Social Science The Missing Link** *Springer* This book seeks to build bridges between neuroscience and social science empirical researchers and theorists working around the world, integrating perspectives from both fields, separating real from spurious divides between them and delineating new challenges for future investigation. Since its inception in the early 2000s, multilevel social neuroscience has dramatically reshaped our understanding of the affective and cultural dimensions of neurocognition. Thanks to its explanatory pluralism, this field has moved beyond

long standing dichotomies and reductionisms, offering a neurobiological perspective on topics classically monopolized by non-scientific traditions, such as consciousness, subjectivity, and intersubjectivity. Moreover, it has forged new paths for dialogue with disciplines which directly address societal dynamics, such as economics, law, education, public policy making and sociology. At the same time, beyond internal changes in the field of neuroscience, new problems emerge in the dialogue with other disciplines. *Neuroscience and Social Science - The Missing Link* puts together contributions by experts interested in the convergences, divergences, and controversies across these fields. The volume presents empirical studies on the interplay between relevant levels of inquiry (neural, psychological, social), chapters rooted in specific scholarly traditions (neuroscience, sociology, philosophy of science, public policy making), as well as proposals of new theoretical foundations to enhance the rapprochement in question. By putting neuroscientists and social scientists face to face, the book promotes new reflections on this much needed marriage while opening opportunities for social neuroscience to plunge from the laboratory into the core of social life. This transdisciplinary approach makes *Neuroscience and Social Science - The Missing Link* an important resource for students, teachers, and researchers interested in the social dimension of human mind working in different fields, such as social neuroscience, social sciences, cognitive science, psychology, behavioral science, linguistics, and philosophy. **Marine and Coastal Systems of the Quoddy Region, New Brunswick Human Rights and Personal Self-defense in International Law** *Oxford University Press* Based on author's thesis (doctoral - European University Viadrina in Frankfurt (Oder), Germany, 2016) issued under title: *The right to personal self-defence as a general principle of law and its general application in international human rights law* --Verso of title page.

**Microalgae Biotechnology for Food, Health and High Value Products** *Springer Nature* "Microalgae Biotechnology for Food, Health and High Value Products" presents the latest technological innovations in microalgae production, market status of algal biomass-based products, and future prospects for microalgal applications. It provides stimulating overviews from different perspectives of application that demonstrate how rapidly the commercial production of microalgae-based food, health and high value products is advancing. It also addresses a range of open questions and challenges in this field. The book highlights the latest advances of interest to those already working in the field, while providing a comprehensive overview for those readers just beginning to learn about the promise of microalgae as a sustainable source of both specialty and commercial products. It offers a valuable asset for commercial algae producers, algae product developers, scientific researchers and students who are dedicated to the advancement of microalgae biotechnology for applications in health, diet, nutrition, cosmetics, biomaterials etc.

**Goat Medicine** *John Wiley & Sons* Fully revised and expanded, *Goat Medicine, Second Edition* includes discussions on new diseases ranging from bovine spongiform encephalopathy to floppy kid disease as well as major updates on important diseases such as scrapie, mycoplasmosis, paratuberculosis, and urolithiasis. Information has also been added on management of transgenic goats and organic goat production. The text begins by outlining fundamentals of goat practice and moves on to systems-based coverage of the goat. Each chapter

provides clinical anatomy and physiology of every system alongside information on relevant clinical signs, differential diagnosis, and system-specific disease.

**Governing Cyberspace Behavior, Power and Diplomacy** Rowman & Littlefield Publishers Cyber norms and other ways to regulate responsible state behavior in cyberspace is a fast-moving political and diplomatic field. The academic study of these processes is varied and interdisciplinary, but much of the literature has been organized according to discipline. Seeking to cross disciplinary boundaries, this timely book brings together researchers in fields ranging from international law, international relations, and political science to business studies and philosophy to explore the theme of responsible state behavior in cyberspace. . Divided into three parts, Governing Cyberspace first looks at current debates in and about international law and diplomacy in cyberspace. How does international law regulate state behaviour and what are its limits? How do cyber superpowers like China and Russia shape their foreign policy in relation to cyberspace? The second focuses on power and governance. What is the role for international organisations like NATO or for substate actors like intelligence agencies? How do they adapt to the realities of cyberspace and digital conflict? How does the classic balance of power play out in cyberspace and how do different states position themselves? The third part takes a critical look at multistakeholder and corporate diplomacy. How do global tech companies shape their role as norm entrepreneurs in cyberspace, and how do their cyber diplomatic efforts relate to their corporate identity?

**The Pacific Arctic Region Ecosystem Status and Trends in a Rapidly Changing Environment** Springer The Pacific Arctic region is experiencing rapid sea ice retreat, seawater warming, ocean acidification and biological response. Physical and biogeochemical modeling indicates the potential for step-function changes to the overall marine ecosystem. This synthesis book was coordinated within the Pacific Arctic Group, a network of international partners working in the Pacific Arctic. Chapter topics range from atmospheric and physical sciences to chemical processing and biological response to changing environmental conditions. Physical and biogeochemical modeling results highlight the need for data collection and interdisciplinary modeling activities to track and forecast the changing ecosystem of the Pacific Arctic with climate change.

**The Investment Treaty Arbitration Review Books for You A Booklist for Senior High Students** Urbana, Ill. : The Council Presents an annotated bibliography of 1200 books for high school students, divided into such sections as Human Rights, Romance, War, Easy Reading, Outdoor Life and Travel, and Colleges. Includes author and title indexes and a directory of publishers.

**Management Practices in Asia Case Studies on Market Entry, CSR, and Coaching** Springer Nature Asia is a continent of contradictions and boundaries; it offers exciting business opportunities, but is also characterized by unpredictability and conflict. While flexibility and creativity are in the DNA of many startups in China, major players like Xiaomi and Alibaba have also emerged as global giants, challenging established global competitors. The authors of this book show that these companies are crossing various boundaries – between cultures, mindsets, and perspectives. At the same time, Western companies entering Asian markets face challenges that are very different from those on their home turf. This book addresses the needs of current and future managers doing business in Asia, who need to

understand the individual, social and business challenges that can arise from crossing boundaries. The respective case studies provide essential insights on how several Asian companies have made impressive strides towards becoming established players; how the revival of local brands and growing pride in local products has become a major challenge for global competition; how the need to actively practice corporate social responsibility in Asian markets is currently challenging many companies; and how the need for individual and team coaching among the members of management to support a company's development has grown tremendously, calling for new solutions. **Animal Homing** Springer Science & Business Media Homing phenomena must be considered an important aspect of animal behaviour on account of their frequent occurrence, their survival value, and the variety of the mechanisms involved. Many species regularly rely on their ability to home or reach other familiar sites, but how they manage to do this is often uncertain. In many cases the goal is attained in the absence of any sensory contact, by mechanisms of indirect orientation whose complexity and sophistication have for a long time challenged the skill and patience of many researchers. A series of problems of increasing difficulty have to be overcome; researchers have to discover the nature of orienting cues, the sensory windows involved, the role of inherited and acquired information, and, eventually, how the central mechanisms process information and control motory responses. Naturally, this book emphasizes targets achieved rather than areas unexplored and mysteries unsolved. Even so, the reader will quickly realize that our knowledge of phenomena and mechanisms has progressed to different degrees in different animal groups, ranging from the mere description of homing behaviour to a satisfactory insight into some underlying mechanisms. In the last few decades there have been promising developments in the study of animal homing, since new approaches have been tried out, and new species and groups have been investigated. Despite this, homing phenomena have not recently been the object of exhaustive reviews and there is a tendency for them to be neglected in general treatises on animal behaviour. **Catch-22** Random House A classic novel set in the closing months of World War II - It is used to highlight the madness of twentieth century warfare and the individual's desire to survive it. **The Political Economy of the Investment Treaty Regime** Oxford University Press Investment treaties are some of the most controversial instruments of global economic governance. This book integrates legal, economic, and political perspectives to offer the first comprehensive analysis of the political economy of the investment treaty regime, and contextualises the investment treaty regime in its broader socio-economic context. **People Power What Communities are Doing to Counter Inflation** Abstract: A resource book is presented for community groups and individual citizens on consumer action projects related to food, housing, energy, and health. Successful local projects are described in each category. A section on basic tools provides guidelines for organizing a community project and obtaining necessary resources. The section on food covers co-ops, home and community gardening, community nutrition, and food needs of the elderly. The section on health discusses care centers, specialized services, health education and self-care, health planning, and health care reform. Appendices contain organization names and addresses and other resource materials. **Immunocytochemical Methods and**

**Protocols** *Springer Science & Business Media* Lorette Javois' timely new 2nd edition revises and updates her widely acclaimed collection of step-by-step immunocytochemical methods, one that is now used in many biological and biomedical research programs. The methods are designed for researchers and clinicians who wish to visualize molecules in plant or animal embryos, tissue sections, cells, or organelles. In addition to cutting-edge protocols for purifying and preparing antibodies, light microscopic analysis, confocal microscopy, FACS, and electron microscopy, this revised edition contains many new methods for applying immunocytochemical techniques in the clinical laboratory and in combination with in situ hybridization.

**Shifting Paradigms in International Investment Law More Balanced, Less Isolated, Increasingly Diversified** *Oxford University Press* International investment law is in transition. Whereas the prevailing mindset has always been the protection of the economic interests of individual investors, new developments in international investment law have brought about a paradigm shift. There is now more than ever before an interest in a more inclusive, transparent, and public regime. *Shifting Paradigms in International Investment Law* addresses these changes against the background of the UNCTAD framework to reform investment treaties. The book analyses how the investment treaty regime has changed and how it ought to be changing to reconcile private property interests and the state's duty to regulate in the public interest. In doing so, the volume tracks attempts in international investment law to recalibrate itself towards a more balanced, less isolated, and increasingly diversified regime. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements with other areas of public international law, constitutional questions, and new regional perspectives from Europe, South Africa, the Pacific Rim Region, and Latin America. Together they provide an invaluable resource for scholars, practitioners, and policymakers. The individual chapters of this edited volume address the contents of investment agreements, the system of dispute settlement, the interrelation of investment agreements with other areas of public international law, constitutional questions, and new regional perspectives from Europe, South Africa, the Pacific Rim Region, and Latin America. Together they provide an invaluable resource for scholars, practitioners, and policymakers.

**The Blood & Roses Series** *Createspace Independent Publishing Platform* Zeth Mayfair's never been troubled by morals before. As one of Seattle's most dangerous, feared men, he's always carried out the jobs he's sent on without a second thought. Drugs? Guns? Dirty money? They're all fair game. But girls? Girls are another matter entirely. When Zeth's employer decides buying and selling kidnapped women is a lucrative sideline, Zeth's usually uncomplicated life suddenly becomes very complicated indeed. And his biggest complication goes by the name of Sloane Romera. As a trauma doctor at St. Peter's Hospital, Sloane's finger is hardly on the pulse of Seattle's underground crime scene. Her sister is missing and she needs to find her, yet all doors leading into the seedy world of human trafficking are firmly closed in Sloane's face. She needs information. What she really needs is help...and help presents itself in the most unlikely of forms. Zeth Mayfair is terrifying, scandalously hot, and comes fully loaded with a terrible attitude and wicked smile. He also looks like he's Sloane's only hope. Can she work

with the guy without getting herself killed, losing her job, or falling head over heels in love? What happens in the dark never stays in the dark. **Targeted Killings, Law and Counter-Terrorism Effectiveness Does Fair Play Pay Off?** *Routledge* This book examines the permissibility and effectiveness of targeted killing in campaigns against terror. Targeted killing has become a primary counterterrorism measure used by several countries in their confrontation with lethal threats. The practice has been extensively used by the US in Afghanistan, Iraq, Pakistan, Yemen and Somalia, and by Israel in the West Bank and Gaza. Several studies have already explored the difficult balance between achieving security while maintaining the liberties and rights of a country's civilians. This book goes a step further by seeking to examine whether maintaining those liberties by complying with legal standards and minimizing unintended deaths can be more effective for national security. Using targeted killing applied by Israel, in particular, as well as the United States during the first decade of the twenty-first century as case studies, this book explores that question and ultimately assesses whether compliance with legal standards can strengthen a state in its campaign against terrorism and thus provide stronger security. The book focuses on civilian-related criteria, hypothesizing that minimizing civilian casualties will maximize effectiveness in an asymmetric war setting. The conclusions are not limited to a specific tactic or theater, and if adopted might have far-reaching implications for how asymmetric warfare is strategized. This book will be of much interest to students of counter-terrorism, law, Middle Eastern studies, and security studies. **Dictionary of Finance and Investment Terms More Than 5,000 Terms Defined and Explained** *Simon and Schuster* Publisher's Note: Products purchased from third-party sellers are not guaranteed by the publisher for quality, authenticity, or access to any online entitles included with the product. **The Official Overstreet Identification and Price Guide to Indian Arrowheads** *House of Collectibles* A definitive resource draws on the expertise of a leading expert and dedicated collector, providing more than 12,000 actual-size illustrations for identification and a complete market review that explains how to obtain, grade and classify a personal collection. Original. **Angels Don't Play this HAARP Advances in Tesla Technology** *Anchorage, Alaska : Earthpulse Press* "The U.S. Government has a new ground based "Star Wars" weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications systems. Change weather patterns over large areas. Interfere with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings"--Back cover. **Trauma Informed Guilt Reduction Therapy Treating Guilt and Shame Resulting from Trauma and Moral Injury** *Academic Press* Trauma Informed Guilt Reduction

Therapy (TrIGR) provides mental health professionals with tools for assessing and treating guilt and shame resulting from trauma and moral injury. Guilt and shame are common features in many of the problems trauma survivors experience including posttraumatic stress disorder (PTSD), depression, substance use, and suicidality. This book presents Trauma Informed Guilt Reduction (TrIGR) Therapy, a brief, transdiagnostic psychotherapy designed to reduce guilt and shame. TrIGR offers flexibility in that it can be delivered as an individual or group treatment. Case examples demonstrate how TrIGR can be applied to a range of trauma types including physical assault, sexual abuse, childhood abuse, motor vehicle accidents, and to moral injury from combat and other military-related events. Conceptualization of trauma-related guilt and shame, assessment and treatment, and special applications are covered in-depth. Summarizes the empirical literature connecting guilt, shame, moral injury, and posttraumatic problems Guides therapists in assessing posttraumatic guilt, shame, moral injury, and related problems Provides a detailed look at a brief, transdiagnostic therapy shown to reduce guilt and shame related to trauma Describes how TrIGR can be delivered as an individual or group intervention Includes a comprehensive therapist manual and client workbook **The Behavioral Neurology of Dementia** Cambridge University Press The Behavioral Neurology of Dementia is a comprehensive textbook that offers a unique and modern approach to the diagnosis and treatment of patients with dementing conditions in the twenty-first century. The coverage is broad, ranging from common conditions such as Alzheimer's disease, Parkinsonian disorders, vascular and frontotemporal dementia, to the more obscure such as Creutzfeldt-Jakob disease. Subtypes of mild cognitive impairment are presented and the early prodromes of neurodegenerative diseases are explored. Simple approaches to bedside mental status testing, differential diagnosis and treatment, genetic testing, interpreting neuropsychological testing and neuroimaging findings, and assessing rapidly progressive dementias, paraneoplastic syndromes and disorders of white matter give guidance to both the novice and expert in dementia. The basic science of dementia is outlined in introductory chapters on animal models of dementia, dementia epidemiology and dementia neuropathology.
