Olive oil that is not of food quality is used to make soap thereby creating jobs and improving the income of local workers while contributing to the reduction of agricultural waste. The two main types of oil used for soap production are pomace oil, extracted the dregs of the olive paste, and olive oil unsuitable for consumption. SOAP MAKING FROM SCRATCH

THE ULTIMATE GUIDE TO MAKING AND SELLING SOAP

Speedy Publishing LLC Natural soap is a great way to keep yourself clean without exposing your skin to harsh chemicals, dyes, and scents. Making that natural soap at home is a great way to ensure that you are getting exactly what you want in your soap. However, not everyone wants to make their own soap. Lye, a caustic chemical used in making soap can be extremely dangerous and frightening for inexperienced soap makers. Luckily there is a way to make natural soap at home without using lye. If you want to learn the secrets of the art then Soap Making from Scratch by April Weatherly is the best book for you to use to get started. Commercial soap is full of chemicals that are hard to pronounce. Chemicals are added in to create lather, add shine, give the soap color and scent, and preserve the bar for longer times. On the other side, natural soaps are made from things you can both pronounce and understand like goat's milk, olive oil, and your favorite essential oils. April learned that lye that is commonly used in soaps is dangerous. It is poisonous and accidentally swallowed by young children or pets. It can also cause serious chemical burns if spilled. This is why many people are looking for ways to make natural soaps without lye. Unfortunately, there is no true soap without lye, yet you can skip the lye process by using melt and pour soaps. There are several melt and pour glycerin soap kits that you can use to make your own natural soaps. Learn the trade secrets of making safe soap in Soap Making from Scratch.

Traditional soap or mass-produced soap often comes with a lot of plastic packaging - either in a plastic container with a plastic pump and even soap bars sometimes come wrapped in arbitrary plastic - and can even contain some shady chemicals and additives. The chemical cocktails and harsh additives usually leave the skin irritated, overly cleansed, and dry. Some of these chemicals are shown to cause cancer, such as triclosan.
