Game On Penguin In the first irresistable sports romance in the Out of Bounds series, the only way to win is to score... With a reputation for fast moves on the gridiron and even faster moves off the field, Shane Devlin was a player in every sense of the word. Unfortunately, his bad-boy persona has made him a risky prospect as a quarterback, and only the Baltimore Blaze are willing to give him a chance. And he's about to take a hit he never expected. Working for the Blaze, Carly March knows too well how jocks think—and what they think with—so she's always made a point of keeping them at arm's length. But when she shares a kiss with the devilishly handsome Shane, she finds it hard to play by her own rules—and even harder to resist him. Can a football hero and a business-minded beauty take it all the way? Or will their mutual attraction cost them the big game? A Numbers Game An Out of Bounds Novella Sun Home Productions Love is worth more than the sum of its hearts... CPA Merrit Callahan learned early not to let passion unravel her orderly life. Now, after her back-stabbing fiancé breaks off their engagement, Merrit flees to Baltimore to escape the fallout. After eight years in the pros, a series of concussions have forced Heath Gibson out of the NFL. The transition from player to coach for the Baltimore Blaze hasn't been smooth, but finding himself face-to-face with Merrit Callahan makes the ride even rockier. So when he's asked to help run his mother's bed and breakfast he moves home and rolls out his campaign at the same time. But political stardom isn't a given, especially when he's expected to compromise the very ideals he's trying to uphold. Making matters worse is the inn's stubborn, and distractingly beautiful cook. The last thing she needs is to get involved with her boss's son. Miles proves to be too sexy to ignore, however. Their heated fling elicits feelings deeper than either anticipated. An anonymous blogger is out to destroy his reputation, and now his team is being sued by its own cheerleaders. If Jay's not careful, he could lose big—and not just financially. **Bridgett Janik's** brother may play for the **Baltimore Blaze**, but she's not thrilled to be defending **Jay McManus**, the man who broke her heart. It's bad enough she has to mingle with Jay during games, but working beside her former lover may be too much for her body—and her heart—to resist. Jay's determined not to let **Bridgett** slip away from him a second time. But, as the two follow the mysterious blogger's trail, secrets—both past and present—are revealed, and **Jay** and **Bridgett** must decide if their relationship can be something more than just sleeping with the enemy. **Just for Kicks Sun Home Productions Milwaukee Growlers Football Book 1** It was supposed to be just for kicks... **Andi Larsen** learned early on there is no such thing as fairy godmothers. A childhood spent in foster care will do that to a girl. She's working her way through night school and is on the cusp of establishing her own business without help from anyone, thank you very much. But when her deadbeat ex steals her identity, amassing a staggering debt in her name, her fairy godmother appears in the guise of a spunky, **Fireball** whisky-wielding septuagenarian. The older woman's solution for **Andi**? Tie the knot with a kilt-wearing, moody jock whose legs look sexier in a skirt than hers do. **Declan Fletcher** never intended to be a place-kicker for a professional football team. But fate had other plans. Exiled from his beloved **Scotland** a decade ago, **Dex** is now a superstar athlete known throughout the league as the "Man with the

Million Dollar Leg." But when a mix-up in his immigration paperwork threatens to send him home before the season begins, he'll do anything to avoid deportation and facing his greatest mistake. Even if it means marrying a pink-haired waif of a lass with eyes that seem to see everything he's determined to keep hidden. A grumpy cat, nosy teammates, and a sizzling sexual attraction make their marriage of convenience anything but convenient. Killing Snow White Jamie Campbell Please note: this is a novella. Every Shot Must Have a Purpose
How GOLF54 Can Make You a Better Player
 Penguin Two legendary coaches give golfers a powerful new approach to the game... and to life. As coaches to some of golf's top players, Pia Nilsson and Lynn Marriott have designed and refined a revolutionary way of teaching the game, with phenomenal results. They don't believe in prescribing the same stance, grip, and swing to everyone, followed by hours of purposeless drilling. They don't even believe in beginning with physical technique. Their success has proven to them that a great game begins with a great vision. Unlike any other golf book, **Every Shot Must Have a Purpose** offers cutting-edge techniques for integrating the physical, technical, mental, emotional, and social parts of a player's game. The book's revolutionary pre-shot routine will improve your focus, leading to a golf swing that is not only successful but can be repeated under extreme pressure. Emphasizing the individual golfer rather than a rigid set of mechanics, their **VISION54** method takes the frustration out of the game. Why 54? Because they believe it's possible to shoot a 54 (making a birdie on every hole of a par-72 course) if you have the right mind-set and well-honed intuitive power. An engaging read for the beginner or the seasoned golfer, **Every Shot Must Have a Purpose** is inspiration for life, not just the links.

These compounds are found in varying concentrations in a wide range of foods (fish, cheese, meat, wine, beer, vegetables, etc.) and their formations are influenced by different factors associated to those foods (composition, additives, ingredients, storage, microorganism, packaging, handling, conservation, etc.). The intake of foods containing high concentrations of biogenic amines can present a health hazard. Additionally, they have been used to establish indexes in various foods in order to signal the degree of freshness and/or deterioration of food. Nowadays, there has been an increase in the number of food poisoning episodes in consumers associated with the presence of these biogenic amines, mainly associated with histamines. Food safety is one of the main concerns of the consumer and safety agencies of different countries (EFSA, FDA, FSCJ, etc.), which have, as one of their main objectives, to control these biogenic amines, principally histamine, to assure a high level of food safety. Therefore, it is necessary to deepen our understanding of the formation, monitoring and reduction of biogenic amines during the development, processing and storage of food, even the effect of biogenic amines in consumers after digestion of foods with different levels of these compounds. With this aim, we are preparing a Special Issue on the topic of "Biogenic Amines in Food Safety", and we invite researchers to contribute original and unpublished research articles and reviews articles that involve studies of biogenic amines in food, which can provide an update to our knowledge of these compounds and their impacts on food quality and food safety. Important tree pathogens and wood decay fungi are characterized for prevention and identification. The final section focuses on the positive effects of wood-inhabiting microorganisms.

The Archaeologist's Laboratory The Analysis of Archaeological Evidence Springer Nature This second edition of the classic textbook, *The Archaeologist's Laboratory*, is a substantially revised work that offers updated information on the archaeological work that follows fieldwork, such as the processing and analysis of artifacts and other evidence. An overarching theme of this edition is the quality and validity of archaeological arguments and the data we use to support them. The book introduces many of the laboratory activities that archaeologists carry out and the ways we can present research results, including graphs and artifact illustrations. Part I introduces general topics concerning measurement error, data quality, research design, typology, probability and databases. It also includes data presentation, basic artifact conservation, and laboratory safety. Part II offers brief surveys of the analysis of lithics and ground stone, pottery, metal artifacts, bone and shell artifacts, animal and plant remains, and sediments, as well as dating by stratigraphy, seriation and chronometric methods. It concludes with a chapter on archaeological illustration and publication. A new feature of the book is illustration of concepts through case studies from around the world and from the Palaeolithic to historical archaeology. The text is appropriate for senior undergraduate students and will also serve as a useful reference for graduate students and professional archaeologists.

Recovery of Gray Wolves in the Great Lakes Region of the United States An Endangered Species Success Story Springer Science & Business Media In this book, we document and evaluate the recovery of gray wolves (*Canis lupus*) in the

Great Lakes region of the United States. The Great Lakes region is unique in that it was the only portion of the lower 48 states where wolves were never completely extirpated. This region also contains the area where many of the first modern concepts of wolf conservation and research were developed. Early proponents of wolf conservation such as Aldo Leopold, Sigurd Olson, and Durward Allen lived and worked in the region. The longest ongoing research on wolf-prey relations (see Vucetich and Peterson, Chap. 3) and the first use of radio telemetry for studying wolves (see Mech, Chap. 2) occurred in the Great Lakes region. The Great Lakes region is the first place in the United States where "Endangered" wolf populations recovered. All three states (Minnesota, Wisconsin, and Michigan) developed ecologically and socially sound wolf conservation plans, and the federal government delisted the population of wolves in these states from the United States list of endangered and threatened species on March 12, 2007 (see Refsnider, Chap. 21). Wolf management reverted to the individual states at that time. Although this delisting has since been challenged, we believe that biological recovery of wolves has occurred and anticipate the delisting will be restored. This will be the first case of wolf conservation reverting from the federal government to the state conservation agencies in the United States.

Fascism and the Masses The Revolt Against the Last Humans, 1848-1945 Routledge Highlighting the "mass" nature of interwar European fascism has long become commonplace. Throughout the years, numerous critics have construed fascism as a phenomenon of mass society, perhaps the ultimate expression of mass politics. This study deconstructs this long-standing perception. It argues that the entwining of fascism with the masses is a remarkable transubstantiation of a movement which understood and presented itself as a militant rejection of the ideal of mass politics, and indeed of mass society and mass culture more broadly conceived. Thus, rather than "massifying" society, fascism was the culmination of a long effort on the part of the élites and the middle-classes to de-massify it. The perennially menacing mass - seen as plebeian and

insubordinate - was to be drilled into submission, replaced by supposedly superior collective entities, such as the nation, the race, or the people. Focusing on Italian fascism and German National Socialism, but consulting fascist movements and individuals elsewhere in interwar Europe, the book incisively shows how fascism is best understood as ferociously resisting what Elias referred to as "the civilizing process" and what Marx termed "the social individual." Fascism, notably, was a revolt against what Nietzsche described as the peaceful, middling and egalitarian "Last Humans."
