# Reluctant Genius

## Alexander Graham Bell and the Passion for Invention

Skyhorse The popular image of Alexander Graham Bell is that of an elderly American patriarch, memorable only for his paunch, his Santa Claus beard, and the invention of the telephone. In this magisterial reassessment based on thorough new research, acclaimed biographer Charlotte Gray reveals Bell's wide-ranging passion for invention and delves into the private life that supported his genius. The child of a speech therapist and a deaf mother, and possessed of superbly acute hearing, Bell developed an early interest in sound. His understanding of how sound waves might relate to electrical waves enabled him to invent the "talking telegraph" before his rivals, even as he undertook a tempestuous courtship of the woman who would become his wife and mainstay. In an intensely competitive age, Bell seemed to shun fame and fortune. Yet many of his innovations—electric heating, using light to transmit sound, electronic mail, composting toilets, the artificial lung—were far ahead of their time. His pioneering ideas about sound, flight, genetics, and even the engineering of complex structures such as stadium roofs still resonate today. This is an essential portrait of an American giant whose innovations revolutionized the modern world.

### Love, War and Tears

Trafford Publishing This is a wartime love story of two young people, brought together by terror and destruction in Croatia. Their journey starts in 1991, as the war begins to spread across the land. From the nightmare and blood being spilt, a deep love was born. For a love so right, yet so wrong, the quest for survival begins. Can they survive against all odds? That year, the war was spreading across the expanse of the former Yugoslavia. It lasted only for a short period in Slovenia, but it blazed up in its full force in Croatia. The agitators brought back from Serbia, manipulated with the local Serbian population and together with the Yugoslav National Army, triggered the beginning of destruction, devastation and murder of civil Croatian society. Croatia becomes productive territory for hundreds of newsreporters from all around the world, and from there they inform their

homeland stations of the terror appearing before their eyes. One of them is an Australian reporter Suzane Goudin, from her mother's side Croatian. She comes to Split, a town situated along the Adriatic Coast, where, right at the beginning of her journey meets a local newsreporter Mario Matovina. Up until then, Mario also wrote for an Australian newspaper whose owner was Suzane's father. Although Mario was happily married father of three children and Suzane Goudin, a young widow with one child, between them, from the very first start, a chemistry and a strong sense of attraction existed. Mario's father is the former general of Yugoslav's National Army, and in the previous days of aggression within Croatia, he feels shame for all the things that same army is doing to Croatia. He puts his personal experience and places it to his country's disposal whom he had loved so greatly and would sacrifice himself for. He has a stroke and becomes chained to his hospital bed. In those dramatic moments between life and death, Mario awaits in his father's presence for the worst. Although he loves his wife, Mario has a hard time denying and resisting the feelings he feels towards Suzane. At the beginning, it was all sexual attraction, which has with time developed into something much more deeper. The terror and nightmare of the war had made them closer. A love was born. Is it possible to love two women at the same time? The southern sky of Dubrovnik was not covered in stars any longer, but by grenades and mines. Death spread across the old Dubrovnik's walls. During the artillery attack on Dubrovnik, Mario uses all his power, his body, his mind, his soul to protect Suzane. They go through hell, he is wounded, loses a part of his arm during the ongoing battle while Suzane loses her baby to him at Split's hospital. Although she was pregnant, he didn't know. Suzane departs for Australia, while wounded Mario goes back to his family. All over again, he starts experiencing love with his wife. In the year 1995, Suzane dies in Frankfurt from leukemia. She wished to die in Croatia, but death was quicker and beat her to it. She was buried in her native soil along the Adriatic Coast where her mother was from. Mario did not attend the funeral. He went the next day, when he could say peacefully goodbye to his wartime love. The war in Croatia ended, right when this deeply moving love story did. The war had brought them together, but it also ripped them apart.

## Nurturing Giftedness to Genius

## How to Increase Your Intelligence

Xlibris Corporation **This work is a combination of research, applied research, and ultimate success. When I got into it, I was a university lecturer in three different areas. I knew nothing about preschool, primary school, or secondary school except that I had passed through them. I had wanted my psychologist wife to run the first bilingual school in Canada, but there were so many legal problems imposed by an uninformed ministry that I had to become headmaster as well as to continue to practice law to earn my livelihood and to subsidize the school in its dramatic growth. Since I knew how to research, I found out the best schools in the world, visited them, and adopted their procedures. I visited fourteen countries, studied the approaches of perhaps forty schools, was helped by the government of France, and ended up with one school that was probably the most successful academic school in the world. It dominated the Putnam University Level Mathematics Competition; beat every country in the world in the Chemistry and Physics Olympiads except Russia; and beat most of the European countries regularly, some every year. When the university professors chose the Canadian Olympiad teams, they almost always chose the students from the Toronto French School because they had covered 23 1/2 years of the program at the University of Toronto because I knew how to hire gifted teachers and because our programs were enriched beyond any that I knew of in the world. Because of my complex approaches and early academic intervention, all of the children had a boost in measured IQ. Unhappily, they dropped my ideas of teachers, dropped my psychological approaches, my learning methodologies, and neither of the two schools now even reach the Putnam or the Olympiad teams for any of their students and do not win regular national science fair gold medals or national mathematics competitions.**

## How to Tutor - Library Edition

[Createspace Independent Publishing Platform](#) **2018 edition of How To Tutor** which first appeared in 1973. **Special: ONLY \$ 24.95.** How To Tutor, by famed writer Samuel L. Blumenfeld, first available 42 years ago. It has without change continued to be an outstanding resource to teach the Three R's. It has not changed in over 4 decades because it works so well. It is a whole school in one book. Its three parts are (1) Sam Blumenfeld's amazingly easy to teach systematic, intensive phonics **READING** instruction program. (2) His effective **CURSIVE HANDWRITING** program and (3) his

equally effective ARITHMETIC PROGRAM. Has been used by 100,000's parents, teachers and tutors. Mary Pride, leading homeschooling materials reviewer, calls it a best value. 298 pages. How To Tutor works at ALL ages. Anyone who can read can teach the 3 R's with it. WHY IS HOW TO TUTOR IMPORTANT? Dr. Blumenfeld warns: Most parents wait until their child is having difficulty at school before they think of providing remediation. Sometimes the child is so far behind, so confused, so frustrated by not learning in the first two grades, that the remedial program looks long and difficult. However, proper tutoring at the preschool level or in the first two grades, as a preventive measure, can make sure that the child has the foundation on which to build achievement. How To Tutor provides parents and teachers with a complete instructional program in the Three R's. It originally was to help public school students. Since then the decline in many public schools made HOMESCHOOLING much more important. Homeschool families discovered how helpful it is for them. (1) **READING:** The big problem today. HTT shows how to avoid the confusion in teaching reading that prevails in our schools today. 117 complete lessons. Contains everything you need to teach your student to be a top reader. You learn the dirty little secret professional educators keep from you: It is really **EASY TO TEACH READING!** There are only 44 sounds (Phonograms) you need to teach your student to build a high level of reading skill. (2) **CURSIVE HANDWRITING:** Grandparents today are often shocked to learn that in many schools cursive is not taught. With How To Tutor you are given all the tools you need to teach this important skill with ease. Here is another little secret: Cursive can be taught **BEFORE** printing (ball & stick). It is also **EASY** to teach! There are only **THREE** basic strokes involved in cursive handwriting. Most children can learn these at a surprisingly early age. Learning about this will amaze you. 73 complete lessons. (3) **ARITHMETIC:** Quoting Dr. Blumenfeld: In teaching arithmetic it is important to convey the genius of the system itself. Next to the alphabet, it is the greatest mental tool ever devised by man. We should approach the subject with the excitement it deserves. Any teacher who makes arithmetic dull does so because he does not understand its beautiful simplicity, logic and facility which permits us to do so much with so little. HTT Arithmetic covers addition, subtraction, multiplication, division, fractions, decimals, weights, time, and the calendar. 67 easy lessons. **FINAL WORD:** Anyone can use these lesson plans: students, parents, teachers, tutors. Tutoring can be a good way to earn extra \$ while aiding people who need help to improve their reading, handwriting and arithmetic. Some of the claims we make may appear unbelievable. They are **TRUE**. We have heard from countless users who cannot say enough about HTT's simplicity and effectiveness. HTT also available on Kindle or: How To Tutor eBook - CD ROM version (ISBN 9780941995474- \$ 17.95). Amazon also has **FIVE OPTIONAL** workbooks to accompany How To Tutor: The Alpha-Phonics and How To Tutor Phonics Companion Workbook (ISBN:9780941995337), The Alpha-Phonics and How To Tutor Little Companion Readers

## Amazing Grace of Quantum Physics

Wipf and Stock Publishers **Science and faith have had a long intertwined history. The relationship has run the gamut from a total disconnect to an adversarial battleground where proponents of each claim total victory. However, if God created the physical world and remains active in the physical world, we cannot ignore the interaction nor can we assume or expect a world of conflict. While nineteenth-century physics brought classical physics—which quite reasonably divorced God and nature—to a culmination, twentieth-century physics, especially quantum physics, has opened a new realm of possible interactions. Even though one can reasonably say that no one understands quantum physics, the fruits of the discipline overflow the cornucopia. People of faith can share the feast; and people of science are welcome at the table of faith.**

## The Transitive Nightfall of Diamonds

# A Collection of Bad-Boy Poetry and Other Assorted Fish Tales

iUniverse A collection of unique bad boy poetry, **The Transitive Nightfall of Diamonds** is sure to send the reader into a cerebral tizzy—just keeping up is half the battle and all of the fun! The proverbial, "Long-time listener and first-time caller" takes readers on a journey of sight and sound, that both titillates and tantalizes the auditory senses. The poems can only be described as a psychedelic stew of various addictions meets whining divorcee, meets mental health, meets mid-life crisis, meets renewed youth, meets reality check, meets recovery. Quite simply, it's a compendium of everyday problems for everyday people with a couple of solutions thrown in for good measure. In 2006, while contemplating divorce from his wife of thirteen years, author Fred Schrott left his home to travel around the southwest and Northern California in his Coachmen trailer. He was urged to start journaling by his marriage counselor but normal writing seemed a bit boring, so the author decided to purge his brain in poetic form. His goal right from the beginning for **The Transitive Nightfall of Diamonds** was to communicate with anyone and everyone through observation and humor. **Don't Hate the Player Hey, don't hate the player. Get your hate on the game. I'm the same old bad boy with just a different name. Seventeen long years ago everything was all the same, but then the crazy traveling sent me to the zoo again...**
