KEY=SOLUTION - KINGSTON KARSYN

SIMPLE SOLUTION ESSAYS

AuthorHouse SIMPLE SOLUTIONS for Planet Earth and SIMPLE SOLUTIONS for Humanity cracked the top ten list in Honolulu. This third publication crystallizes the essence of these topics, linking them with current events and the future of our society. Have you wondered why we don't have a national energy policy, whether global warming is a hoax, how a nation that mostly believes God creating everything in less than 10,001 days became the greatest ever, and how we can best attain peace in our lifetime? If you do, then this is your must read book for the year.

ESSAYS FOR HIGH SCHOOL

COLLECTION OF IMPORTANT ESSAYS ON TRENDING TOPICS FROM EXAMINATION PERSPECTIVES, SUITABLE FOR SSLC,PUC AND OTHER COMPETITIVE EXAMS

Chandranna NS This collection of essays makes a wonderful bouquet of flowers picked up from the vast meadow of topics essential for a young mind; more so for those teenagers appearing for the Matriculate exams. Individually every single flower is simple and recognisable. In a cluster they make it a work of art, more functional than a mere piece of art. As the title says it is a collection of 17 essays written in simple English that can be easily understood by the vast majority of the rural children in the state appearing for the tenth standard exams. Annually above 8 lakh students appear for the SSLC exams every year and a vast majority of them are from the rural background. About fifteen per cent of them fail to pass in English. Many findings suggest that the rural students' weak background in English.

A WORKBOOK FOR READING ARGUMENTATIVE TEXTS

ANALYTIC TOOLS TO IMPROVE UNDERSTANDING

Rowman & Littlefield his Workbook teaches the tools essential to analyzing and understanding the meaning of nonfiction texts that assert arguments.

TEACHING SCIENCE TO ENGLISH LANGUAGE LEARNERS

Routledge Books in the Teaching English Language Learners (ELLs) across the Curriculum Series are written specifically for pre- and in- service teachers who may not have been trained in ELL techniques, but still find themselves facing the realities and challenges of today's diverse classrooms and learners. Each book provides simple and straightforward advice on how to teach ELLs through a given subject area, and how to teach content to ELLs who are at different levels of English language proficiency than the rest of their class. Authored by both language and content area specialists, each volume arms readers with practical, teacher-friendly strategies, and subject-specific techniques. Teaching Science to English Language Learners offers science teachers and teacher educators a straightforward approach for engaging ELLs learning science, offering examples of easy ways to adapt existing lesson plans to be more inclusive. The practical, teacher-friendly strategies and techniques included here are proven effective with ELLs, and many are also effective with all students. The book provides context-specific strategies for the full range of the secondary sciences curriculum, including physical science, life science, earth and space science, science as inquiry, and history and nature of science and more. A fully annotated list of web and print resources completes the book, making this a one volume reference to help science teachers meet the challenges of including all learners in effective instruction. Special features: practical examples of science exercises make applying theory to practice simple when teaching science to ELLs an overview of the National Science Education Standards offers useful guidelines for effective instructional and assessment practices for ELLs in secondary grades graphs, tables, and illustrations provide additional access points to the text in clear, meaningful ways.

CLIMATE CHANGE

EVIDENCE AND CAUSES

National Academies Press Climate Change: Evidence and Causes is a jointly produced publication of The US National Academy of Sciences and The Royal Society. Written by a UK-US team of leading climate scientists and reviewed by climate scientists and others, the publication is intended as a brief, readable reference document for decision makers, policy makers, educators, and other individuals seeking authoritative information on the some of the questions that continue to be asked. Climate Change makes clear what is well-established and where understanding is still developing. It echoes and builds upon the long history of climate-related work from both national academies, as well as on the newest climate-change assessment from the United Nations' Intergovernmental Panel on Climate Change. It touches on current areas of active debate and ongoing research, such as the link between ocean heat content and the rate of warming.

GREENHOUSE WARMING AND NUCLEAR HAZARDS

A SERIES OF ESSAYS AND RESEARCH PAPERS

World Scientific This book is a rebuttal of the common belief that grave environmental consequences are associated with the issues of global warming and nuclear hazards. Firstly, it is argued that after 25 years of research no-one has actually found evidence for greenhouse warming. Instead, the heat has caused the evaporation of ocean water to increase cloud coverage, reflecting more sunlight away, cooling down the earth and nullifying the effects of greenhouse warming. The author describes this revolution in climatology through new scientific discoveries that solve the longstanding mystery of the ice ages and explain the enigma of the missing greenhouse heat. The solution of the ice age problem is a far most important scientific accomplishment. In the second part of the book, the author argues that the effects of low-level radiation can be beneficial rather than damaging. Evidence is presented proving that low-level radiation in the US from both natural sources and human activities such as nuclear bombs tests actually reduces death rates from cancer and other diseases and increases longevity. In the Indian State of Kerala life span has been shown to increase 10.5 years due to the natural radiation from thorium mines. The book proposes that primitive life forms must have developed immune systems to counter the harmful effects of natural radioactivity and that low-level radiation from nuclear waste may one day be transformed from trash to treasure. Nature has always been kind to humans. But our self-aggrandizing species has mistaken blessings for disasters and spoiled the otherwise splendid 20th century. Contents:Greenhouse Warming and Nuclear Hazards:Three Smoking Guns Prove the Falsity of Greenhouse WarmingNuclear Waste Disposal, from Trash to TreasureCancer Death Rates of 50 States of US Related to Natural and Nuclear-Bomb-Test-Induced Low Level RadiationGreenhouse Warming:Latent Heat of Melting and Its Importance for Glaciation CyclesOrigin of Ice Ages: Initial Condition Forcing and DynamicsUnraveling a Century's Mystery of the Ice AgesThe Fourth Phase of Water and the Theories of Greenhouse Effects and Ice Age Glacial CyclesResearch Papers on Nuclear Hazards:The Ultimate Direct Measurement of Low Level Radiation EffectsLong Life Expectancy as the Beneficial Effect of Low RadiationLow Level Radiation Extends Life Span by Cutting Death Rates of Disease Including Heart Disease, Cancer, Stroke, etc.Reexamining Nuclear Energy Safety Readership: Undergraduates and general public. Keywords:Greenhouse Effect;Global Warming;Environment;Energy Nuclear;Cancer;Ageing;Ice Age;Climate;Thermodynamics

GLOBAL WARMING

IMPACTS AND FUTURE PERSPECTIVE

BoD - Books on Demand Global Warming has become perhaps the most complicated issue being faced by world leaders. Thus, it requires field of attention for many modern societies, power and energy engineers, academicians, researchers and stakeholders. The so-called consensus in the past century anthropogenically induced Global Warming, has recently been disputed by rising number of climate change panelists. Whatever the uncertainties of climate models are, mankind has to strive towards reduction in the amount of greenhouse gases emitted into the atmosphere in order to preserve natural resources and living organisms by introducing new advances on alternative fuels and other related technologies. This book presents the state-of-the-science fundamentals on the origin of Global Warming and other related technologies that can be implemented to reduce human impact as well as to present novel policies that world leader should adopt. In this book, chapters received from various authors are placed in three sub- sections in a sequential and easy manner so as to strive an appropriate balance between breadth and depth of coverage of various topics.

CLIMATE SYSTEMS

INTERACTIVE FORCES OF GLOBAL WARMING

Infobase Publishing Focuses on the scientific framework of Earth's climate system, including the greenhouse effect and global warming.

A PHRASEBOOK FOR SPIRITUAL EMERGENCIES: ESSAYS

Lulu.com When is the last time a phrase went through your head for the umpteenth time before you caught it by the tail? The phrases that go through our minds drive our lives. These phrases come in moods just like the weather, and often it doesn't occur to us that we make this weather and can change it. There seems to be a consensus that we need to change our consciousness, make a quantum leap, and get ready for the shift. Many people have already stocked up on duct tape and started meditating; there is no shortage of books telling us what to do. Until now however there was no book that gave an actual demonstration of self-help phrases that can be used in a spiritual emergency. Please enjoy this collection of personal essays---"Alice's new work is terrific. She brings gravity and personality to every page, and remains one of the slickest wits out there. The work is concentrated and forceful -- she's on a roll." -Jonathan Lethem.

INTERNATIONAL ADVANCES IN WRITING RESEARCH

CULTURES, PLACES, MEASURES

Parlor Press LLC The authors report research that considers writing in all levels of schooling, in science, in the public sphere, and in the workplace, as well as the relationship among these various places of writing. The authors also consider the cultures of writing—among them national cultures, gender cultures, schooling cultures, scientific cultures, and cultures of the workplace.

COMPACT FIRST FOR SCHOOLS STUDENT'S BOOK WITHOUT ANSWERS WITH CD-ROM

Cambridge University Press A focused, 50-60 hour course for the revised Cambridge English: First (FCE) for Schools exam from 2015. Compact First for Schools Student's Book features eight topic-based units to maximise the exam performance of school-age learners. Units are organised by exam paper with pages on Reading and Use of English, Writing, Listening and Speaking. A Grammar reference covers key areas in the syllabus, and unit-based wordlists include target vocabulary with definitions. There is also a revision section and two full practice tests are available online for teachers to access. The CD-ROM provides interactive grammar, vocabulary and exam skills tasks including listening. Audio recordings for the Student's Book listening exercises are available separately on a Class Audio CD.

COMPACT FIRST FOR SCHOOLS STUDENT'S BOOK WITH ANSWERS WITH CD-ROM

Cambridge University Press "The course is designed to maximise the performance of school-age learners. It features eight units covering the core topics, vocabulary, grammar and skills needed for all four exam papers for the revised Cambridge English: First (FCE) for Schools exam from 2015. Two teen-inspired topics in each unit ensure the entire exam syllabus is covered, and can also act as a basis for CLIL-based extension activities and projects. Grammar sections and a Grammar Reference help students build up the accurate language structure necessary for the Use of English parts of the new Reading and Use of English paper, while B2-level vocabulary is targeted, drawing on insights from English Profile, and brought together in a Wordlist based on key vocabulary from the units. 'Exam tips', and grammar and vocabulary exercises teach students to avoid common mistakes identified in Cambridge's unique collection of real exam papers, the Cambridge Learner Corpus."--Publisher description.

COMPOSING A CIVIC LIFE

A RHETORIC AND READINGS FOR INQUIRY AND ACTION

Longman Publishing Group Promoting the examined life as an ideal that brings inquiry and action together, this text addresses the critical thinking, reading, and writing skills. It promotes active citizenship by encouraging students to write as a means of inquiry and civic participation. It shows students how to work toward negotiation and positive social action.

THE WESTERN IDEOLOGY AND OTHER ESSAYS

Policy Press The Western Ideology brings together for the first time Andrew Gamble's writings on political ideas and ideologies, which illustrate the main themes of his writing in intellectual history and the history of ideas, including economic liberalism and neoliberalism, and critiques from both social democratic and conservative perspectives.

ESSAYS FOR THE PRESIDENCY

Foreign Affairs Foreign Affairs has long been the place for aspiring presidents and their advisers to present their foreign policy visions, and so with the 2016 campaign well under way, we decided to provide some context for it by pulling together nearly a century's worth of campaign-related articles from our archives. In this collection, you'll find everybody, from all the major candidates in 2008—including Barack Obama, Hillary Clinton, John McCain, Mitt Romney, and Mike Huckabee—to crucial historical figures such as Colonel House, Franklin Roosevelt, John F. Kennedy, Richard Nixon, and many more. It's a great volume to keep close at hand as you watch the election unfold—even as you keep an eye on the magazine and ForeignAffairs.com for essays by current candidates, along with continuous coverage of U.S. foreign policy and the world at large.

WENDELL BERRY: ESSAYS 1993-2017 (LOA #317)

Library of America The second volume of the Library of America's definitive two-volume selection of the nonfiction writings of our greatest living advocate for sustainable culture. Writing with elegance and clarity, Wendell Berry is a compassionate and compelling voice for our time of political and cultural distrust and division, whether expounding the joys and wisdom of nonindustrial agriculture, relishing the pleasure of eating food produced locally by people you know, or giving voice to a righteous contempt for hollow innovation. He is our most important writer on the cultural crisis posed by industrialization and mass consumerism, and the vital role of rural, sustainable farming in preserving the planet as well as our national character. Now, in celebration of Berry's extraordinary six-decade-long career, Library of America presents a two-volume selection of his nonfiction writings prepared in close consultation with the author. In this second volume, forty-four essays from ten works turn to issues of political and social debate--big government, science and religion, and the meaning of citizenship following the tragedy of 9/11. Also included is his Jefferson Lecture to the National Endowment for the Humanities, "It All Turns on Affection" (2012). Berry's essays remain timely, even urgent today, and will resonate with anyone interested in our relationship to the natural world and especially with a younger, politically engaged generation invested in the future welfare of the planet. INCLUDES: Life is a Miracle AND SELECTIONS FROM Sex, Economy, Freedom & Community Another Turn of the Crank Citizenship Papers The Way of Ignorance What Matters? Imagination in Place It All Turns on Affection Our Only World The Art of Loading Brush LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. The Library of America series includes more than 300 volumes to date, authoritative editions that average 1,000 pages in length, feature cloth covers, sewn bindings, and ribbon markers, and are printed on premium acid-free paper that will last for centuries.

#31DAYS: A COLLECTION OF HORROR ESSAYS, VOL. 1

Robert J Gannon Imagine immersing yourself in a world of unimaginable horrors for a month. Now imagine doing it every year for 16 years. Horror critic Robert J Gannon does it every year. The #31Days challenge is to watch and review a different horror property--film, TV series, book, game, play, etc.--every day for the month of October. In this newly revised and expanded collection of essays, Robert J Gannon celebrates the horror genre with a focus on film and television. #31Days features 65 essays and reviews covering everything from Don Coscarelli's "Phantasm" series to the anthology horror show "Masters of Horror." This non-fiction collection follows the spirit of Sketching Details, Robert's long-running entertainment media criticism website. Horror deserves the same level of respect and analysis as any other genre. Robert J Gannon has built a career out of analyzing and sharing a passion for genre fiction--horror, sci-fi, and fantasy--and he's ready to show the world in his debut non-fiction collection.

THE MATURE STUDENT'S HANDBOOK

Bloomsbury Publishing A practical guide allowing mature students to build on their strengths and overcome challenges. Includes worked examples, exercises and space for recording strategies and successes. Covers areas such as lectures, seminars, reading and note-taking, presentations, writing, exams, time management, finance and careers.

GLOBAL PHILOSOPHY

WHAT PHILOSOPHY OUGHT TO BE

Andrews UK Limited This book is about education, learning, rational inquiry, philosophy, science studies, problem solving, academic inquiry, global problems, wisdom and, above all, the urgent need for an academic revolution. Despite this range and diversity of topics, there is a common underlying theme. Education ought to be devoted, much more than it is, to the exploration real-life, open problems; it ought not to be restricted to learning up solutions to already solved problems - especially if nothing is said about the problems that provoked the solutions in the first place. A central task of philosophy ought to be to keep alive awareness of our unsolved fundamental problems - especially our most fundamental problem of all, encompassing all others: How can our human world - and the world of sentient life more generally - imbued with the experiential, consciousness, free will, meaning and value, exist and best flourish embedded as it is in the physical universe? This is both our fundamental intellectual problem and our fundamental problem of living. The essays in this volume seek to provoke a concerted effort to transform our institutions of learning so that they become rationally and effectively devoted to helping us learn how to create a wiser world. Our most serious problems of living are so grim, so imbued with suffering, wasted lives and unnecessary death, that the idea of approaching them in a playful spirit seems sacrilegious. We need to keep alive tackling of intellectual problems so that playful capacities can be exercised - if for no other reason (and other reasons there are, of course, aplenty). There are two really worthy impulses behind all rational inquiry: delight and compassion.

STEPS TO ACADEMIC WRITING

Cambridge University Press Textbooks for foreign speakers.

MY VIEWS AND IDEAS IN FORM OF BRIEF ESSAYS

Blue Rose Publishers This book covers topics that we observe and experience in our day-to-day life. It includes a wide array of topics ranging from the mystery of happiness to outer space exploration. So enjoy this journey and shape your own opinions on a variety of subjects.

TEACHING TO CHANGE THE WORLD

McGraw-Hill Humanities, Social Sciences & World Languages This is a highly current and engaging, multicultural, introduction to education and teaching -- both its challenges and its joys. Jeannie Oakes is a leading education researcher and director of the UCLA teacher education program. Martin Lipton is an education writer and consultant and has taught in public schools for 31 years. Together, they bring an excellent blend of theory and applications to the text. This ground-breaking text responds to the current national crisis in teaching and teacher education, considers the values and politics that pervade education, and asks critical questions about how conventional thinking and practice came to be and who benefits from them. The text takes the position that a hopeful, democratic future depends on whether all students learn, and pays particular attention to inequalities associated with race, social class, language, gender, and other social categories and looks for alternatives to the inequalities. The text provides a solid research base and practical treatment of essential topics that locates these topics within cognitive, sociocultural, and constructivist perspectives on learning, and within democratic values. The text infuses issues of diversity throughout its discussion of traditional elements of schools and teaching -- learning, curriculum, instruction, etc. It presents educational foundations and history as alive and active in today's schools, and treats them as useful concepts for students to use as they think about and respond to more transitory, current "headline" issues, such as charter schools, vouchers, standards, and bilingual education. Central to the book is the belief that schools can and must be places of extraordinary educational quality and institutions for social justice. The authors explore the tensions between the democratic aims of schools and competition for always-scarce high quality opportunities. Throughout the chapters are boxed personal observations of a diverse group of first-year teachers who voice their analyses and personal anecdotes about their own struggles to transform theory into practice. "Digging Deeper" sections that end each chapter feature scholars who are working on issues raised in the chapter. An innovative Instructor's Manual provides ways to teach the course consistent with cognitive and sociocultural learning theory, culturally diverse pedagogy, and authentic assessment.

ENCYCLOPEDIA OF BUSINESS ETHICS AND SOCIETY

SAGE The five volumes of this ultimate resource recognize the inherent unity between business ethics and business and society, that stems from their shared primary concern with value in commerce. This Encyclopedia spans the relationships among business, ethics, and society by including more than 800 entries that feature broad coverage of corporate social responsibility, the obligation of companies to various stakeholder groups, the contribution of business to society and culture, and the relationship between organizations and the quality of the environment.

ESSAYS OF A PENITENTIARY PHILOSOPHER

iUniverse If you want to know why our nation's leaders have failed to solve America's crime problem, these essays expose a number of areas where either not enough thought is being given, or the thinking is just wrong. While crime dominates America's media and political scene, there is very little intelligent insight on the topic coming from those who would know most about it, criminals. These essays change that. The essays begin by addressing crime as part of a larger social fabric that cannot be fixed by the simple passing of a few more laws. After focusing on the big picture, the essays become more specific, examining different ways to make a more efficient and effective legal system. In part two, these essays expand to address a number of other social issues like the war in Iraq, labor issues, health care and the environment. The reader is forced to continuously re-examine their beliefs. Torsrud strips down problems to their core, creating arguments that are insightful, hard to challenge, and at times even humorous.

REVISE CITIZENSHIP STUDIES FOR OCR

Heinemann A perfect match to the OCR Citizenship Studies short course. Students will get targeted and focused preparation for their exams to help them get the grades they want. Accessible content broken down into small chunks makes revision easier and more manageable. Checklists at the end of each chapter highlight areas that need more revision, as well as helping students plan their work. Packed with practice exam questions and sample answers with examiners' feedback, so students know exactly what the examiners are looking for. Written by experienced authors, so students get the best preparation available.

ADMIRABLE IELTS WRITING TASK 2

250+ SOLVED ESSAYS FROM LATEST IELTS EXAMS

Rana Books India If your Writing Skills in an IELTS prevent you from getting the desired score, this is the book that helps you write impressively. This is the only book which contains the 'Essay Checklist' and 'Latest Topics' in the world for self- or classroom study. ISBN: 978-81-953234-6-3

ARCHITECTURE BEYOND ANTHROPOCENE

ESSAYS ON REFLECTIVE RESISTANCES

BoD - Books on Demand Essays on Architecture in the Anthropocene. 44 young architects in the making share their reflections and possible/impossible stances facing architecture in the Anthropocene. Every text here has a core of doubt. Doubt that opens up to some insight or towards a focus, an interest, an outlet. Every text has an unusual stillness brought forth through reflection. Reason and feeling are balancing on a tightrope. In the suspense, I imagine humour will enter. It is always best above the abyss.

THINKING AHEAD - ESSAYS ON BIG DATA, DIGITAL REVOLUTION, AND PARTICIPATORY MARKET SOCIETY

Springer The rapidly progressing digital revolution is now touching the foundations of the governance of societal structures. Humans are on the verge of evolving from consumers to prosumers, and old, entrenched theories - in particular sociological and economic ones - are falling prey to these rapid developments. The original assumptions on which they are based are being questioned. Each year we produce as much data as in the entire human history - can we possibly create a global crystal ball to predict our future and to optimally govern our world? Do we need wide-scale surveillance to understand and manage the increasingly complex systems we are constructing, or would bottom-up approaches such as self-regulating systems be a better solution to creating a more innovative, more successful, more resilient, and ultimately happier society? Working at the interface of complexity theory, quantitative sociology and Big Data-driven risk and knowledge management, the author advocates the establishment of new participatory systems in our digital society to enhance coordination, reduce conflict and, above all, reduce the "tragedies of the commons," resulting from the methods now used in political, economic and management decision-making. The author Physicist Dirk Helbing is Professor of Computational Social Science at the Department of Humanities, Social and Political Sciences and an affiliate of the Computer Science Department at ETH Zurich, as well as co-founder of ETH's Risk Center. He is internationally known for the scientific coordination of the FuturICT Initiative which focuses on using smart data to understand techno-socio-economic systems. "Prof. Helbing has produced an insightful and important set of essays on the ways in which big data and complexity science are changing our understanding of ourselves and our society, and potentially allowing us to manage our societies much better than we are currently able to do. Of special note are the essays that touch on the promises of big data along with the dangers...this is material that we should all become familiar with!" Alex Pentland, MIT, author of Social Physics: How Good Ideas Spread - The Lessons From a New Science "Dirk Helbing has established his reputation as one of the leading scientific thinkers on the dramatic impacts of the digital revolution on our society and economy. Thinking Ahead is a most stimulating and provocative set of essays which deserves a wide audience." Paul Ormerod, economist, and author of Butterfly Economics and Why Most Things Fail. "It is becoming increasingly clear that many of our institutions and social structures are in a bad way and urgently need fixing. Financial crises, international conflicts, civil wars and terrorism, inaction on climate change, problems of poverty, widening economic inequality, health epidemics, pollution and threats to digital privacy and identity are just some of the major challenges that we confront in the twenty-first century. These issues demand new and bold thinking, and that is what Dirk Helbing offers in this collection of essays. If even a fraction of these ideas pay off, the consequences for global governance could be significant. So this is a must-read book for anyone concerned about the future." Philip Ball, science writer and author of Critical Mass "This collection of papers, brought together by Dirk Helbing, is both timely and topical. It raises concerns about Big Data, which are truly frightening and disconcerting, that we do need to be aware of; while at the same time offering some hope that the technology, which has created the previously unthought-of dangers to our privacy, safety and democracy can be the means to address these dangers by enabling social, economic and political participation and coordination, not possible in the past. It makes for compelling reading and I hope for timely action."Eve Mitleton-Kelly, LSE, author of Corporate Governance and Complexity Theory and editor of Co-evolution of Intelligent Socio-technical Systems

SCHOOL ESSAYS & LETTERS

BPI Publishing School Essays and Letters consists of a variety of essays, letters, emails and paragraphs. The topics and subjects covered are wide-ranging and meant for children who wish to indulge in writing creatively. The book introduces students to email writing which is one of the important ways of communication in this age. The use of simple language makes it easier for children to grasp the ideas. The book is a handy reference for those who are beginning to learn to write creatively.

SCIENCE, TECHNOLOGY, IMPERIALISM, AND WAR

Pearson Education India The Volume Science, Technology, Imperialism And War Interlinks The Concerned Themes To Present A Coherent Analysis Of The Development Of Related Ideas And Institutions In The Subcontinent. The Chapters On Science, Therefore, Look At The Cognitive And Socio-Historical Aspects Of Science, Relating The Same With The Establishment And Spread Of Imperialism In India; With Its Application To Develop Technologies; And With The Use Of Such Technologies To Fund The Major Preoccupation Of

Imperialism - War. Likewise, The Section On Technology Leads The Reader To A Search For Its Very Probable Links With Imperialism And War. The Section On Imperialism Offers Four Themes In The Edited Volume: The First One Deals With Its Theories; The Second With Its Link With Colonialism; And The Third And The Fourth Follow Its Manifestation In The Russian And British Adventures-Chiefly In Central Asia And India. The Dependence Of Imperialism On War Looms Large. War, The Concluding Theme Of This Exercise, Is The Saturation Point Of Himan Efforts To Subjugate And Dominate Others. The Scholars Writing In This Section Critically Survey The Various Kinds Of War-Conventional, Limited And Nuclear-And A Detailed And Insightful Analysis Of The Cold War By The Editor Completes The Picture. This Volume Will Prove Invaluable To Scholars And Students Of South Asian Studies, History, Political Science And International Relations, And Defence Studies Alike.

CARBON CAPTURE AND STORAGE (CCS). IS CSS THE GAME CHANGING ENERGY TECHNOLOGY OF THE EARLY 21ST CENTURY?

GRIN Verlag Essay from the year 2012 in the subject Politics - International Politics - Environmental Policy, grade: Merit, School of Oriental and African Studies, University of London (CISD - Centre for International Studies and Diplomacy), course: Global Energy and Climate Policy, language: English, abstract: CCS is a highly praised technology that allegedly allows humankind to go on living life the way they have always done and continue their business as usual. But is it that what we need? CCS might help overcome the short-term problems of society but never can it be a solution for all CO2 related questions. It is a dead end street. Earth as only a certain capacity of letting CO2 sink in through sequestration, i.e. absorption through afforestation, peat production, wetland restoration, ocean related absorption or a change in agricultural methods. Apart from that, then, there is CCS. Unfortunately, CCS is not on scale yet and it implies huge capital costs for installation at a time when no one knows yet whether or not it is a viable option at all. Additionally, the emission of greenhouse gases includes not only the emission of CO2 but also a range of harmful short-term pollutants (e.g. sulphates, methane) that cannot be captured by CCS methods but that still have a massive influence on our climate. What is needed is a consequent and fundamental change of behaviour and not a change of technology that allows us to go on as before. As recent history shows, the implementation of taxes or restrictive regulations or the implementation of ETS have not had a major effect on the behaviour of countries. The money invested in research for CCS is better invested in finding alternatives, in funding the implementation of an integrated grid, to start with in Europe and then gradually expanding it, with the further development of techniques to possibly even span oceans and connect the American or African continent to the European grid to guarantee energy security through renewable energy resources, which are already in the phase of development where they can be produced at scale and are competitive with the implementation of conventional energy sources.

GREENHOUSE WARMING AND NUCLEAR HAZARDS

A SERIES OF ESSAYS AND RESEARCH PAPERS

World Scientific Publishing Company Incorporated Introduction : Greenhouse warming and nuclear hazards. Three smoking guns prove the falsity of greenhouse warming. Nuclear waste disposal, from trash to treasure. Cancer death rates of 50 states of U.S. related to natural and nuclear-bomb-test-induced low level radiation -- pt. I. Greenhouse warming. An essay on the controversy of greenhouse warming. Related research papers on the origin of ice ages. Latent heat of melting and its importance of glaciation cycles. Origin of ice ages : Initial condition forcing and dynamics. Unraveling a century's mystery of the ice ages. The fourth phase of water and the theories of greenhouse effects and ice age glacial cycles -- pt. II. Research papers on nuclear hazards. The ultimate direct measurement of low level radiation effects. Long life expectancy as the beneficial effect of low radiation. Low level radiation extends life span by cutting death rates of disease including heart disease, cancer, stroke, etc. Reexamining nuclear energy safety

TOEFL IBT WRITING STRUCTURE, ANALYZE AND ACADEMIC ESSAYS COLLECTION

Steven Michael BIG DISCOUNT - ONLY for this WEEKEND!!!!!!!!!!!!!!!!!!!!!!!!!!!!!! On this e-book you will find some guidance on how you should write an essay. There are then model answers on the following pages for different types of essay and different questions, with some brief guidance on each. Agree / disagree Discuss two opinions Advantages & disadvantages Causes (reasons) & solutions Causes (reasons) & effects Problems & solutions Compare & contrast Not every essay will fit one of these patterns, but many do. You may get some of these tasks mixed up. For example, you could be asked to give your opinion on an issue, and then discuss the advantages or disadvantages of it. The golden rule is to ALWAYS read the question very carefully to see exactly what you are being asked to do. View this lesson for more practice on analysing essay questions. An essay is structured like any other essay; you just need to make it shorter. There are three key elements: Introduction Body Paragraphs Conclusion We will look at each of these in turn, using the essay question above as an example. This ebook goes through each part of a high scoring answer and explains exactly how to write it. - See sample high scoring answers written by Examiner - Discover the elements that have the biggest impact on your score and what to do about them - Learn what high scoring writing answers look like so you can model them and do the same - Get lots of sample questions to practice

LOSING EARTH

THE DECADE WE COULD HAVE STOPPED CLIMATE CHANGE

Pan Macmillan 'Nathaniel Rich's account starts in Washington in the 1990s and tells the story of how climate change could have been stopped back then, if only the powerful had acted. But they didn't want to.' - Observer By 1979, we knew all that we know now about the science of climate change - what was happening, why it was happening, and how to stop it. Over the next ten years, we had the very real opportunity to stop it. Obviously, we failed. Nathaniel Rich tells the essential story of why and how, thanks to the actions of politicians and businessmen, that failure came about. It is crucial to an understanding of where we are today. 'The excellent and appalling Losing Earth by Nathaniel Rich describes how close we came in the 70s to dealing with the causes of global warming and how US big business and Reaganite politicians in the 80s ensured it didn't happen. Read it.' - John Simpson 'An eloquent science history, and an urgent eleventh-hour call to save what can be saved.' - Nature 'To change the future, we must first understand our past, and Losing Earth is a crucial part of that when it comes to the environmental battles we're facing.' - Stylist
