The Naked Farmer [Macmillan Publishers Aus.](#) Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Modifying the Aerodynamics of Your Road Car [Veloce Publishing Ltd](#) This unique handbook assumes no starting knowledge of vehicle aerodynamics. It begins with simple ideas and finishes with sophisticated and effective aerodynamic modifications that work. Three major chapters cover on-road testing techniques that give you all the information you need to decide what modifications you should make - and, after you've made them, how well they work. Low-cost techniques allow you to visualise the patterns of airflow over your car so that you can actually see the problem areas that need improvement. Uniquely, you're also shown how to measure aerodynamic pressures, so you can determine which body surfaces are creating lift, drag and downforce. Want to work out where a wing should be placed? On-road testing to find that out is covered as well. The book also shows you how to measure downforce to see if that wing is actually working! If you wish to reduce drag, more than ten different areas are covered. Reducing frontal area, lowering cooling system drag, optimising vehicle ride height and rake, reducing the strength of the wake, achieving clean airflow separation and optimising wheel designs - they're all covered using the latest research findings. And if you're a performance driver, there's a major chapter devoted to reducing lift and improving stability. This chapter includes the design and development of undertrays and diffusers, wings and spoilers. The example car developed measurable downforce when fitted with an undertray and rear diffuser, something that transformed its on-road handling. The author has been writing about the aerodynamics of road cars for more than 25 years. He is also an experienced and proficient car modifier who has performed numerous aerodynamic modifications and upgrades to his own cars. The book's technical consultant, RH Barnard, is an acknowledged world leading automotive aerodynamicist. If you want a practical, hands-on guide that demystifies and explains car aerodynamics, and shows you how to make effective aerodynamic modifications to your car, this book is for you. Tasmanian Government Gazette Jōyō kan-ei jukugo jiten [Kodansha Amer Incorporated](#) Wild Lands [Random House Australia](#) From bestselling author Nicole Alexander comes an epic novel of bravery, loyalty and impossible love that takes the reader on a spellbinding journey from the streets of early Sydney to the heart of Australia's wild, untamed lands. New South Wales, 1837, and settlers in search of fertile country are venturing far outside the colony. Literally cutting a swathe through the bush with their bare hands, they lay claim to territory beyond government jurisdiction - and the reach of the law. As she accepts a position on one such farm, seventeen-year-old Kate Carter is unaware she is entering a land of outlaws, adventurers and murderous natives. Because the first people of this new world will no longer accept the white man's advance, and retaliatory attacks on both sides have made it a frontier on the brink of war. Into Kate's path comes Bronzewing, a young white man schooled by a settler family yet raised within an Aboriginal tribe. Caught between two worlds, Bronzewing strives to protect his adopted people and their vanishing civilisation. But as he and Kate will discover, 'beyond the outer limits' is a beautiful yet terrifying place, where it's impossible to know who is friend and who is enemy . . . 'Alexander writers [with] a deep love of the land' The Courier-Mail Enginology When Water Lost Her Way Lost in her ever-changing forms, 'Water' questions who she is after an encounter with a creature in an underground cave. Water seeks all parts of her cycle for answers, which makes her feel overwhelmed and confused. However, an 'old tree' helps her to understand her place in the world and her many interconnections with all living and non-living things. From the unique perspective of Water, the story explores the water cycle drawing out the many interconnections Water has with all living and non-living things.
